Condensed Notes to Unaudited Consolidated Financial Statements

(1) General Information

Washington Trust Bancorp, Inc. (the “Bancorp”) is a publicly-owned registered bank holding company and financial holding company. The Bancorp owns all of the outstanding common stock of The Washington Trust Company, of Westerly (the “Bank”), a Rhode Island chartered commercial bank founded in 1800. Through its subsidiaries, the Bancorp offers a complete product line of financial services including commercial, residential and consumer lending, retail and commercial deposit products, and wealth management services through its offices in Rhode Island, eastern Massachusetts and Connecticut.

The consolidated financial statements include the accounts of the Bancorp and its subsidiaries (collectively, the “Corporation” or “Washington Trust”). All significant intercompany transactions have been eliminated. Certain previously reported amounts have been reclassified to conform to current year’s presentation.

The accounting and reporting policies of the Corporation conform to accounting principles generally accepted in the United States of America (“GAAP”) and to general practices of the banking industry. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ from those estimates.

The unaudited consolidated financial statements of the Corporation presented herein have been prepared pursuant to the rules of the Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q and do not include all of the information and note disclosures required by GAAP. In the opinion of management, all adjustments (consisting of normal recurring adjustments) and disclosures considered necessary for the fair presentation of the accompanying consolidated financial statements have been included. Interim results are not necessarily reflective of the results of the entire year. The accompanying unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

(2) Recently Issued Accounting Pronouncements

Revenue from Contracts with Customers - Topic 606

Accounting Standards Update No. 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”), was issued in May 2014 and provides a revenue recognition framework for any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of non-financial assets unless those contracts are within the scope of other accounting standards. ASU 2014-09 is effective for annual periods beginning after December 15, 2016, including interim periods within that reporting period with early adoption not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. In August 2015, Accounting Standards Update No. 2015-14, “Deferral of the Effective Date” (“ASU 2015-14”) was issued and delayed the effective date of ASU 2014-09 to annual and interim periods in fiscal years beginning after December 15, 2017. In 2016, Accounting Standards Update No. 2016-08, “Principal versus Agent Considerations” (“ASU 2016-08”), Accounting Standards Update No. 2016-10, “Identifying Performance Obligations and Licensing” (“ASU 2016-10”) and Accounting Standards Update No. 2016-12, “Narrow-Scope Improvements and Practical Expedients” (“ASU 2016-12”) were issued. These ASUs do not change the core principle for revenue recognition in Topic 606; instead, the amendments provide more detailed guidance in a few areas and additional implementation guidance and examples, which are expected to reduce the degree of judgment necessary to comply with Topic 606. The effective date and transition requirements for ASU 2016-08, ASU 2016-10 and ASU 2016-12 are the same as those provided by ASU 2015-14. The Corporation is currently evaluating the impact that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Corporation has not yet selected a transition method nor has it determined the effect of ASU 2014-09

on its ongoing financial reporting.

Business Combinations - Topic 805

Accounting Standards Update No. 2015-16, “Simplifying the Accounting for Measurement-Period Adjustments (“ASU 2015-16”), was issued in September 2015 and eliminates the requirement for an acquirer to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. ASU 2015-16 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016. The adoption of ASU 2015-16 is not expected to have a material impact on the Corporation’s consolidated financial statements.

Financial Instruments - Topic 825

Accounting Standards Update No. 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities” (“ASU 2016-01”), was issued in January 2016 and provides revised guidance related to the accounting for and reporting of financial instruments. Some of the main provisions include: requiring most equity securities to be reported at fair value with unrealized

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

gains and losses reported in the income statement; requiring separate presentation of financial assets and liabilities by measurement category and form (i.e. securities or loans); clarifying that entities must assess valuation allowances on a deferred tax asset related to available for sale debt securities in combination with their other deferred tax assets; and eliminating the requirement to disclose the method and significant assumptions used to estimate fair value for financial instruments measured at amortized cost on the balance sheet. ASU 2016-01 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. The Corporation has not yet determined the effect of ASU 2016-01 on its ongoing financial reporting.

Leases - Topic 842

Accounting Standards Update No. 2016-02, “Leases” (“ASU 2016-02”), was issued in February 2016 and provides revised guidance related to the accounting and reporting of leases. ASU 2016-02 requires lessees to recognize most leases on the balance sheet. The recognition, measurement and presentation of expenses and cash flows arising from a lease by a lessee will depend on its classification as a finance or operating lease. ASU 2016-02 requires a modified retrospective transition, with a number of practical expedients that entities may elect to apply. ASU 2016-02 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018. Early adoption is permitted. The Corporation has not yet determined the effect of ASU 2016-02 on its ongoing financial reporting.

Stock Compensation - Topic 718

Accounting Standards Update No. 2016-09, “Improvements to Employee Share-Based Payment Accounting” (“ASU 2016-09”), was issued in March 2016. ASU 2016-09 includes multiple provisions intended to simplify several aspects of the accounting for share-based payment transactions, including income tax consequences and the classification of certain tax-related transactions on the statement of cash flows. ASU 2016-09 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016. Early adoption is permitted in any interim or annual period. Amendments should be applied using the appropriate transition method as detailed by the provisions of ASU 2016-09. The Corporation has not yet determined the effect of ASU 2016-09 on its ongoing financial reporting.

Derivatives and Hedging - Topic 815

Accounting Standards Update No. 2016-05, “Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships” (“ASU 2016-05”), was issued in March 2016. ASU 2016-05 clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require de-designation of that hedging relationship provided that all other hedge accounting criteria continue to be met. ASU 2016-05 allows for either a prospective approach or modified retrospective approach for adoption. ASU 2016-05 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016. Early adoption is permitted. ASU 2016-05 is not expected to have a material impact on the Corporation’s financial reporting.

Accounting Standards Update No. 2016-06, “Contingent Put and Call Options in Debt Instruments” (“ASU 2016-06”), was issued in March 2016. ASU 2016-06 clarifies the requirements for assessing whether contingent call or put options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts by providing a four-step decision sequence to assess whether the economic characteristics of the embedded call and put options are clearly and closely related to the economic characteristics of their debt hosts. ASU 2016-06 allows for a modified retrospective approach for adoption. ASU 2016-06 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016. Early adoption is permitted. ASU 2016-06 is not expected to have a material impact on the Corporation’s financial reporting.

Credit Losses - Topic 326

Accounting Standards Update No. 2016-13, "Financial Instruments - Credit Losses" ("ASU 2016-13"), was issued in June 2016. ASU 2016-13 requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts and requires enhanced disclosures related to the significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. In addition, ASU 2016-13 amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. ASU 2016-13 provides for a modified retrospective transition, resulting in a cumulative-effect adjustment to equity as of the beginning of the period in which the guidance is effective, except for debt securities for which an other-than-temporary impairment has previously been recognized. For these debt securities, a prospective transition approach will be adopted in order to maintain the same amortized cost prior to and subsequent to the effective date of ASU 2016-13. This ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2019. Early adoption is permitted, for annual periods and interim periods within those annual

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

periods, beginning after December 15, 2018. The Corporation has not yet determined the effect of ASU 2016-13 on its ongoing financial reporting.

(3) Cash and Due from Banks

The Bank maintains certain average reserve balances to meet the requirements of the Board of Governors of the Federal Reserve System (“FRB”). Some or all of these reserve requirements may be satisfied with vault cash. Reserve balances amounted to \$10.7 million at June 30, 2016 and \$10.5 million at December 31, 2015 and were included in cash and due from banks in the Consolidated Balance Sheets.

As of June 30, 2016 and December 31, 2015, cash and due from banks included interest-bearing deposits in other banks of \$74.4 million and \$48.2 million, respectively.

(4) Securities

The following tables present the amortized cost, gross unrealized holding gains, gross unrealized holding losses and fair value of securities by major security type and class of security:

(Dollars in thousands)

June 30, 2016	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities Available for Sale:				
Obligations of U.S. government-sponsored enterprises	\$72,653	\$170	\$—	\$72,823
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	267,025	9,268	(29)	276,264
Obligations of states and political subdivisions	25,844	313	—	26,157
Individual name issuer trust preferred debt securities	29,833	—	(5,339)	24,494
Corporate bonds	1,961	50	—	2,011
Total securities available for sale	\$397,316	\$9,801	(\$5,368)	\$401,749
Held to Maturity:				
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	\$17,917	\$678	\$—	\$18,595
Total securities held to maturity	\$17,917	\$678	\$—	\$18,595
Total securities	\$415,233	\$10,479	(\$5,368)	\$420,344

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

(Dollars in thousands)

December 31, 2015	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities Available for Sale:				
Obligations of U.S. government-sponsored enterprises	\$77,330	\$73	(\$388)	\$77,015
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	228,908	6,398	(450)	234,856
Obligations of states and political subdivisions	35,353	727	—	36,080
Individual name issuer trust preferred debt securities	29,815	—	(4,677)	25,138
Corporate bonds	1,970	5	(20)	1,955
Total securities available for sale	\$373,376	\$7,203	(\$5,535)	\$375,044
Held to Maturity:				
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	\$20,023	\$493	\$—	\$20,516
Total securities held to maturity	\$20,023	\$493	\$—	\$20,516
Total securities	\$393,399	\$7,696	(\$5,535)	\$395,560

At June 30, 2016 and December 31, 2015, securities available for sale and held to maturity with a fair value of \$354.6 million and \$346.1 million, respectively, were pledged as collateral for Federal Home Loan Bank of Boston (“FHLBB”) borrowings, potential borrowings with the FRB, certain public deposits and for other purposes. See Note 7 for additional disclosure on FHLBB borrowings.

The schedule of maturities of debt securities available for sale and held to maturity is presented below. Mortgage-backed securities are included based on weighted average maturities, adjusted for anticipated prepayments. All other debt securities are included based on contractual maturities. Actual maturities may differ from amounts presented because certain issuers have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Available for Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
June 30, 2016				
Due in one year or less	\$64,530	\$66,714	\$5,100	\$5,293
Due after one year to five years	149,238	153,975	9,696	10,063
Due after five years to ten years	131,935	134,032	2,774	2,879
Due after ten years	51,613	47,028	347	360
Total securities	\$397,316	\$401,749	\$17,917	\$18,595

Included in the above table are debt securities with an amortized cost balance of \$127.3 million and a fair value of \$122.4 million at June 30, 2016 that are callable at the discretion of the issuers. Final maturities of the callable securities range from 8 months to 21 years, with call features ranging from 1 month to 5 years.

Other-Than-Temporary Impairment Assessment

Washington Trust assesses whether the decline in fair value of investment securities is other-than-temporary on a regular basis. Unrealized losses on debt securities may occur from current market conditions, increases in interest rates since the time of purchase, a structural change in an investment, volatility of earnings of a specific issuer, or deterioration in credit quality of the issuer. Management evaluates impairments in value both qualitatively and quantitatively to assess whether they are other-than-temporary.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following tables summarize temporarily impaired securities, segregated by length of time the securities have been in a continuous unrealized loss position:

(Dollars in thousands)	Less than 12 Months			12 Months or Longer			Total		
	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses
June 30, 2016									
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	1	9,583	(29)	—	—	—	1	9,583	(29)
Individual name issuer trust preferred debt securities	—	—	—	10	24,494	(5,339)	10	24,494	(5,339)
Total temporarily impaired securities	1	\$9,583	(\$29)	10	\$24,494	(\$5,339)	11	\$34,077	(\$5,368)

(Dollars in thousands)	Less than 12 Months			12 Months or Longer			Total		
	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses
December 31, 2015									
Obligations of U.S. government-sponsored enterprises	4	\$34,767	(\$388)	—	\$—	\$—	4	\$34,767	(\$388)
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	9	61,764	(450)	—	—	—	9	61,764	(450)
Individual name issuer trust preferred debt securities	—	—	—	10	25,138	(4,677)	10	25,138	(4,677)
Corporate bonds	3	1,235	(20)	—	—	—	3	1,235	(20)
Total temporarily impaired securities	16	\$97,766	(\$858)	10	\$25,138	(\$4,677)	26	\$122,904	(\$5,535)

Further deterioration in credit quality of the underlying issuers of the securities, further deterioration in the condition of the financial services industry, a continuation or worsening of the current economic environment, or additional declines in real estate values, among other things, may further affect the fair value of these securities and increase the potential that certain unrealized losses be designated as other-than-temporary in future periods, and the Corporation may incur write-downs.

Unrealized losses on temporarily impaired securities as of June 30, 2016 were concentrated in variable rate trust preferred debt securities.

Trust Preferred Debt Securities of Individual Name Issuers

Included in debt securities in an unrealized loss position at June 30, 2016 were 10 trust preferred security holdings issued by 7 individual companies in the banking sector. Management believes the unrealized loss position in these holdings was attributable to the general widening of spreads for this category of debt securities issued by financial services companies since the time these securities were purchased. Based on the information available through the filing date of this report, all individual name issuer trust preferred debt securities held in our portfolio continue to accrue and make payments as expected with no payment deferrals or defaults on the part of the issuers. As of June 30, 2016, individual name issuer trust preferred debt securities with an amortized cost of \$10.9 million and unrealized losses of \$2.1 million were rated below investment grade by Standard & Poors, Inc. (“S&P”). Management reviewed the collectibility of these securities taking into consideration such factors as the financial condition of the issuers, reported regulatory capital ratios of the issuers, credit ratings, including ratings in effect as of the reporting period date

as well as credit rating changes between the reporting period date and the filing date of this report, and other information. We noted no additional downgrades to below investment grade between June 30, 2016 and the filing date of this report. Based on these analyses, management concluded that it expects to recover the entire amortized cost basis of these securities. Furthermore, Washington Trust does not intend to sell these securities and it is not more-likely-than-not that Washington Trust will be required to sell these securities before recovery of their cost basis, which may be maturity. Therefore, management does not consider these investments to be other-than-temporarily impaired at June 30, 2016.

(5) Loans

The following is a summary of loans:

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	%	Amount	%
Commercial:				
Mortgages (1)	\$1,074,747	35 %	\$931,953	31 %
Construction & development (2)	81,812	3	122,297	4
Commercial & industrial (3)	575,661	18	600,297	20
Total commercial	1,732,220	56	1,654,547	55
Residential real estate:				
Mortgages	978,399	32	984,437	33
Homeowner construction	26,637	1	29,118	1
Total residential real estate	1,005,036	33	1,013,555	34
Consumer:				
Home equity lines	260,541	8	255,565	8
Home equity loans	39,572	1	46,649	2
Other (4)	43,515	2	42,811	1
Total consumer	343,628	11	345,025	11
Total loans (5)	\$3,080,884	100 %	\$3,013,127	100 %

(1) Loans primarily secured by income producing property.

(2) Loans for construction of commercial properties, loans to developers for construction of residential properties and loans for land development.

(3) Loans to businesses and individuals, a substantial portion of which are fully or partially collateralized by real estate.

(4) Loans to individuals secured by general aviation aircraft and other personal installment loans.

Includes net unamortized loan origination costs of \$2.6 million at both June 30, 2016 and December 31, 2015 and (5) net unamortized premiums on purchased loans of \$171 thousand and \$84 thousand, respectively, at June 30, 2016 and December 31, 2015.

At June 30, 2016 and December 31, 2015, there were \$1.5 billion and \$1.3 billion, respectively, of loans pledged as collateral to the FHLBB under a blanket pledge agreement and to the FRB for the discount window. See Note 7 for additional disclosure regarding borrowings.

Nonaccrual Loans

Loans, with the exception of certain well-secured loans that are in the process of collection, are placed on nonaccrual status and interest recognition is suspended when such loans are 90 days or more overdue with respect to principal and/or interest, or sooner if considered appropriate by management. Well-secured loans are permitted to remain on accrual status provided that full collection of principal and interest is assured and the loan is in the process of collection. Loans are also placed on nonaccrual status when, in the opinion of management, full collection of principal and interest is doubtful. Interest previously accrued but not collected on such loans is reversed against current period income. Subsequent interest payments received on nonaccrual loans are applied to the outstanding principal balance of the loan or recognized as interest income depending on management's assessment of the ultimate collectability of the loan. Loans are removed from nonaccrual status when they have been current as to principal and interest for approximately 6 months, the borrower has demonstrated an ability to comply with repayment terms, and when, in management's opinion, the loans are considered to be fully collectible.

- 13-

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following is a summary of nonaccrual loans, segregated by class of loans:

(Dollars in thousands)	Jun 30, 2016	Dec 31, 2015
Commercial:		
Mortgages	\$4,054	\$5,711
Construction & development	—	—
Commercial & industrial	1,204	3,018
Residential real estate:		
Mortgages	10,409	10,666
Homeowner construction	—	—
Consumer:		
Home equity lines	315	528
Home equity loans	1,152	1,124
Other	114	—
Total nonaccrual loans	\$17,248	\$21,047
Accruing loans 90 days or more past due	\$—	\$—

As of June 30, 2016 and December 31, 2015, loans secured by one- to four-family residential property amounting to \$5.3 million and \$2.6 million, respectively, were in process of foreclosure.

Nonaccrual loans of \$4.0 million and \$7.4 million, respectively, were current as to the payment of principal and interest at June 30, 2016 and December 31, 2015. There were no significant commitments to lend additional funds to borrowers whose loans were on nonaccrual status at June 30, 2016.

Past Due Loans

Past due status is based on the contractual payment terms of the loan. The following tables present an age analysis of past due loans, segregated by class of loans:

(Dollars in thousands)	Days Past Due			Total Past Due	Current	Total Loans
	30-59	60-89	Over 90			
June 30, 2016						
Commercial:

Total loans	\$5,137	\$3,836	\$8,586	\$17,559	\$2,995,568	\$3,013,127

Included in past due loans as of June 30, 2016 and December 31, 2015, were nonaccrual loans of \$13.2 million and \$13.6 million, respectively. All loans 90 days or more past due at June 30, 2016 and December 31, 2015 were classified as nonaccrual.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

Impaired Loans

Impaired loans are loans for which it is probable that the Corporation will not be able to collect all amounts due according to the contractual terms of the loan agreements and loans restructured in a troubled debt restructuring.

The following is a summary of impaired loans:

(Dollars in thousands)	Recorded Investment (1)		Unpaid Principal		Related Allowance	
	Jun 30, 2016	Dec 31, 2015	Jun 30, 2016	Dec 31, 2015	Jun 30, 2016	Dec 31, 2015
No Related Allowance Recorded:						
Commercial:						
Mortgages	\$—	\$4,292	\$—	\$5,101	\$—	\$—
Construction & development	—	—	—	—	—	—
Commercial & industrial	1,524	1,849	1,640	1,869	—	—
Residential real estate:						
Mortgages	12,243	8,441	12,337	8,826	—	—
Homeowner construction	—	—	—	—	—	—
Consumer:						
Home equity lines	305	6	305	64	—	—
Home equity loans	794	530	800	539	—	—
Other	110	—	110	—	—	—
Subtotal	14,976	15,118	15,192	16,399	—	—
With Related Allowance Recorded:						
Commercial:						
Mortgages	\$13,505	\$10,873	\$14,325	\$10,855	\$714	\$1,633

Homeowner construction	—	—	—	—	—	—
Consumer:						
Home equity lines	10	522	10	522	—	2
Home equity loans	440	679	453	783	46	21
Other	35	145	34	144	5	—
Subtotal	16,581	17,138	17,527	17,493	1,011	2,583
Total impaired loans	\$31,557	\$32,256	\$32,719	\$33,892	\$1,011	\$2,583
Total:						
Commercial	\$15,513	\$19,038	\$16,499	\$20,073	\$737	\$2,404
Residential real estate	14,350	11,336	14,508	11,767	223	156
Consumer	1,694	1,882	1,712	2,052	51	23
Total impaired loans	\$31,557	\$32,256	\$32,719	\$33,892	\$1,011	\$2,583

The recorded investment in impaired loans consists of unpaid principal balance, net of charge-offs, interest payments received applied to principal and unamortized deferred loan origination fees and costs. For impaired (1) accruing loans (troubled debt restructurings for which management has concluded that the collectibility of the loan is not in doubt), the recorded investment also includes accrued interest.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following tables present the average recorded investment balance of impaired loans and interest income recognized on impaired loans segregated by loan class. Prior to the third quarter of 2015, the Corporation had defined impaired loans to include nonaccrual commercial loans, troubled debt restructured loans and certain other loans that were individually evaluated for impairment. In the third quarter of 2015, the Corporation redefined impaired loans to include nonaccrual loans and troubled debt restructured loans. The redefinition of impaired loans resulted in well-secured nonaccrual residential real estate mortgage loans and consumer loans being classified as impaired loans in the third quarter of 2015. See further discussion on the redefinition of impaired loans in Washington Trust's Form 10-K for the fiscal year ended December 31, 2015.

Troubled Debt Restructurings

Loans are considered restructured in a troubled debt restructuring when the Corporation has granted concessions to a borrower due to the borrower's financial condition that it otherwise would not have considered. These concessions may include modifications of the terms of the debt such as deferral of payments, extension of maturity, reduction of principal balance, reduction of the stated interest rate other than normal market rate adjustments, or a combination of these concessions. Debt may be bifurcated with separate terms for each tranche of the restructured debt. Restructuring a loan in lieu of aggressively enforcing the collection of the loan may benefit the Corporation by increasing the ultimate probability of collection.

- 17-

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

Restructured loans are classified as accruing or non-accruing based on management's assessment of the collectibility of the loan. Loans which are already on nonaccrual status at the time of the restructuring generally remain on nonaccrual status for approximately 6 months before management considers such loans for return to accruing status. Accruing restructured loans are placed into nonaccrual status if and when the borrower fails to comply with the restructured terms and management deems it unlikely that the borrower will return to a status of compliance in the near term.

Troubled debt restructurings are reported as such for at least one year from the date of the restructuring. In years after the restructuring, troubled debt restructured loans are removed from this classification if the restructuring did not involve a below-market rate concession and the loan is not deemed to be impaired based on the terms specified in the restructuring agreement.

Troubled debt restructurings are classified as impaired loans. The Corporation identifies loss allocations for impaired loans on an individual loan basis. The recorded investment in troubled debt restructurings was \$20.1 million and \$18.5 million, respectively, at June 30, 2016 and December 31, 2015. These amounts included insignificant balances of accrued interest. The allowance for loan losses included specific reserves for these troubled debt restructurings of \$848 thousand and \$1.8 million, respectively, at June 30, 2016 and December 31, 2015. As of June 30, 2016, there were no significant commitments to lend additional funds to borrowers whose loans had been restructured.

The following tables present loans modified as a troubled debt restructuring:

(Dollars in thousands)	# of Loans		Outstanding Recorded Investment (1)			
			Pre-Modification		Post-Modifications	
Three months ended June 30,	2016	2015	2016	2015	2016	2015

Maturity / amortization concession	133	70	133	163
Interest only payments	3,550	—	3,550	—
Total	\$3,683	\$354	\$3,683	\$782

In the three and six months ended June 30, 2016 and 2015, there were an insignificant amount of loans modified in a troubled debt restructuring within the previous 12 months for which there were payment defaults.

Credit Quality Indicators

Commercial

The Corporation utilizes an internal rating system to assign a risk to each of its commercial loans. Loans are rated on a scale of 1 to 10. This scale can be assigned to three broad categories including “pass” for ratings 1 through 6, “special mention” for 7-rated loans, and “classified” for loans rated 8, 9 or 10. The loan rating system takes into consideration parameters including the borrower’s financial condition, the borrower’s performance with respect to loan terms, the adequacy of collateral, the adequacy of guarantees and other credit quality characteristics. The weighted average risk

rating of the Corporation's commercial loan portfolio was 4.69 at June 30, 2016 and 4.68 at December 31, 2015. For non-impaired loans, the Corporation takes the risk rating into consideration along with other credit attributes in the establishment of an appropriate allowance for loan losses. See Note 6 for additional information.

A description of the commercial loan categories are as follows:

Pass - Loans with acceptable credit quality, defined as ranging from superior or very strong to a status of lesser stature. Superior or very strong credit quality is characterized by a high degree of cash collateralization or strong balance sheet liquidity. Lesser

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

stature loans have an acceptable level of credit quality but exhibit some weakness in various credit metrics such as collateral adequacy, cash flow, secondary sources of repayment, or performance inconsistency or may be in an industry or of a loan type known to have a higher degree of risk.

Special Mention - Loans with potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the Bank's position as creditor at some future date. Special Mention assets are not adversely classified and do not expose the Bank to sufficient risk to warrant adverse classification. Examples of these conditions include but are not limited to outdated or poor quality financial data, strains on liquidity and leverage, losses or negative trends in operating results, marginal cash flow, weaknesses in occupancy rates or trends in the case of commercial real estate and frequent delinquencies.

Classified - Loans identified as "substandard", "doubtful" or "loss" based on criteria consistent with guidelines provided by banking regulators. A "substandard" loan has defined weaknesses which make payment default or principal exposure likely, but not yet certain. Such loans are apt to be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. The loans are closely watched and are either already on nonaccrual status or may be placed on nonaccrual status when management determines there is uncertainty of collectibility. A "doubtful" loan is placed on non-accrual status and has a high probability of loss, but the extent of the loss is difficult to quantify due to dependency upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. A loan in the "loss" category is considered generally uncollectible or the timing or amount of payments cannot be determined. "Loss" is not intended to imply that the loan has no recovery value but rather it is not practical or desirable to continue to carry the asset.

The Corporation's procedures call for loan ratings and classifications to be revised whenever information becomes available that indicates a change is warranted. The criticized loan portfolio, which consists of commercial loans that are risk rated special mention or worse, are reviewed by management on a quarterly basis, focusing on the current status and strategies to improve the credit. An annual loan review program is conducted by a third party to provide an independent evaluation of the creditworthiness of the commercial loan portfolio, the quality of the underwriting and credit risk management practices and the appropriateness of the risk rating classifications. This review is supplemented with selected targeted internal reviews of the commercial loan portfolio.

The following table presents the commercial loan portfolio, segregated by category of credit quality indicator:

(Dollars in thousands)	Pass		Special Mention		Classified	
	Jun 30,	Dec 31,	Jun 30,	Dec 31,	Jun 30,	Dec 31,
	2016	2015	2016	2015	2016	2015
Commercial:						
Mortgages	\$1,061,090	\$914,774	\$1,106	\$3,035	\$12,551	\$14,144
Construction & development	81,812	122,297	—	—	—	—
Commercial & industrial	550,465	577,036	15,863	12,012	9,333	11,249
Total commercial loans	\$1,693,367	\$1,614,107	\$16,969	\$15,047	\$21,884	\$25,393

Residential and Consumer

The residential and consumer portfolios are monitored on an ongoing basis by the Corporation using delinquency information and loan type as credit quality indicators. These credit quality indicators are assessed on an aggregate basis in these relatively homogeneous portfolios. For non-impaired loans, the Corporation assigns loss allocation factors to each respective loan type. See Note 6 for additional information.

Various other techniques are utilized to monitor indicators of credit deterioration in the portfolios of residential real estate mortgages and home equity lines and loans. Among these techniques is the periodic tracking of loans with an updated FICO score and an estimated loan to value (“LTV”) ratio. LTV ratio is determined via statistical modeling analyses. The indicated LTV levels are estimated based on such factors as the location, the original LTV ratio, and the date of origination of the loan and do not reflect actual appraisal amounts. The results of these analyses and other loan review procedures are taken into consideration in the determination of loss allocation factors for residential mortgage and home equity consumer credits. See Note 6 for additional information.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following table presents the residential and consumer loan portfolios, segregated by category of credit quality indicator:

(Dollars in thousands)	Current and Under 90 Days Past Due		Over 90 Days Past Due	
	Jun 30, 2016	Dec 31, 2015	Jun 30, Dec 31, 2016 2015

Other	43,405	42,811	110	—
Total consumer loans	\$343,184	\$344,285	\$444	\$740

(6) Allowance for Loan Losses

The allowance for loan losses is management's best estimate of inherent risk of loss in the loan portfolio as of the balance sheet date. The Corporation uses a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology includes: (1) the identification of loss allocations for individual loans deemed to be impaired and (2) the application of loss allocation factors for non-impaired loans based on historical loss experience and estimated loss emergence period, with adjustments for various exposures that management believes are not adequately represented by historical loss experience.

Prior to December 31, 2015, an unallocated allowance was maintained for measurement imprecision associated with impaired and nonaccrual loans. As a result of further enhancement and refinement of the allowance methodology to provide a more precise quantification of probable losses in the loan portfolio, management concluded that the potential risks anticipated by the unallocated allowance have been incorporated into the allocated component of the methodology, eliminating the need for the unallocated allowance in the fourth quarter of 2015.

(7) Borrowings

Federal Home Loan Bank Advances

Advances payable to the FHLBB amounted to \$640.0 million and \$379.0 million, respectively, at June 30, 2016 and December 31, 2015.

The following table presents maturities and weighted average interest rates on FHLBB advances outstanding as of June 30, 2016:

(Dollars in thousands)	Total Outstanding	Weighted Average Rate	
July 1, 2016 to December 31, 2016	\$377,330	0.71	%
2017	27,575	2.24	
2018	53,134	1.45	
2019	33,258	2.84	
2020	32,733	2.36	
2021 and thereafter	115,980	3.30	
Balance at June 30, 2016	\$640,010	1.50	%

As of June 30, 2016 and December 31, 2015, the Bank had access to a \$40.0 million unused line of credit with the FHLBB and also had remaining available borrowing capacity of \$523.3 million and \$644.8 million, respectively. The Bank pledges certain qualified investment securities and loans as collateral to the FHLBB.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

(9) Derivative Financial Instruments

The Corporation's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Corporation's known or expected cash receipts and its known or expected cash payments principally to manage the Corporation's interest rate risk. Additionally, the Corporation enters into interest rate derivatives to accommodate the business requirements of its customers. All derivatives are recognized as either assets or liabilities on the balance sheet and are measured at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and resulting designation.

Interest Rate Risk Management Agreements

Interest rate swaps and caps are used from time to time as part of the Corporation's interest rate risk management strategy. Interest rate swaps are agreements in which the Corporation and another party agree to exchange interest payments (e.g., fixed-rate for variable-rate payments) computed on a notional principal amount. Interest rate caps represent options purchased by the Corporation to manage the interest rate paid throughout the term of the option contract. The credit risk associated with these transactions is the risk of default by the counterparty. To minimize this risk, the Corporation enters into interest rate agreements only with highly rated counterparties that management believes to be creditworthy. The notional amounts of these agreements do not represent amounts exchanged by the parties and, thus, are not a measure of the potential loss exposure.

Cash Flow Hedging Instruments

As of June 30, 2016 and December 31, 2015, the Bancorp had two interest rate caps with a notional amount of \$22.7 million that were designated as cash flow hedges to hedge the interest rate risk associated with our variable rate junior subordinated debentures. In the fourth quarter of 2015, the Corporation entered into the interest rate cap contracts and paid a premium totaling \$257 thousand to obtain the right to receive the difference between 3-month LIBOR and a 4.5% strike for both of the interest rate caps. The caps mature in 2020. Prior to December 31, 2015, the Bancorp had two interest rate swap contracts designated as cash flow hedges to hedge the interest rate risk associated with the junior subordinated debentures noted above. During 2015, both interest rate swaps contracts matured. The effective portion of the changes in fair value of derivatives designated as cash flow hedges is recorded in other comprehensive income and subsequently reclassified to earnings when gains or losses are realized. The ineffective portion of changes in fair value of the derivatives is recognized directly in earnings as interest expense.

Loan Related Derivative Contracts

Interest Rate Swap Contracts with Customers

The Corporation has entered into interest rate swap contracts to help commercial loan borrowers manage their interest rate risk. The interest rate swap contracts with commercial loan borrowers allow them to convert floating-rate loan payments to fixed-rate loan payments. When we enter into an interest rate swap contract with a commercial loan borrower, we simultaneously enter into a "mirror" swap contract with a third party. The third party exchanges the client's fixed-rate loan payments for floating-rate loan payments. We retain the risk that is associated with the potential failure of counterparties and the risk inherent in originating loans. As of June 30, 2016 and December 31, 2015, Washington Trust had interest rate swap contracts with commercial loan borrowers with notional amounts of \$414.4 million and \$302.1 million, respectively, and equal amounts of "mirror" swap contracts with third-party financial institutions. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

Risk Participation Agreements

The Corporation has entered into risk participation agreements with other banks participating in commercial loan arrangements. Participating banks guarantee the performance on borrower-related interest rate swap contracts. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

Under a risk participation-out agreement, a derivative asset, the Corporation participates out a portion of the credit risk associated with the interest rate swap position executed with the commercial borrower, for a fee paid to the participating bank. Under a risk participation-in agreement, a derivative liability, the Corporation assumes, or participates in, a portion of the credit risk associated with the interest rate swap position with the commercial borrower, for a fee received from the other bank.

At June 30, 2016 and December 31, 2015, the notional amounts of risk participation-out agreements were \$38.6 million and \$25.3 million, respectively. The notional amounts of risk participation-in agreements at both June 30, 2016 and December 31, 2015 were \$21.5 million.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

Loan Commitments

Interest rate lock commitments are extended to borrowers and relate to the origination of residential real estate mortgage loans held for sale. To mitigate the interest rate risk inherent in these rate locks, as well as closed residential real estate mortgage loans held for sale, forward commitments are established to sell individual residential real estate mortgage loans. Both interest rate lock commitments and commitments to sell residential real estate mortgage loans are derivative financial instruments, but do not meet criteria for hedge accounting and, as such are treated as derivatives not designated as hedging instruments. The changes in fair value of these commitments are reflected in earnings in the period of change. The Corporation has elected to carry certain closed residential real estate mortgage loans held for sale at fair value, as changes in fair value in these loans held for sale generally offset changes in interest rate lock and forward sale commitments.

The following table presents the fair values of derivative instruments in the Corporation's Consolidated Balance Sheets:

(Dollars in thousands)	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value Jun 30, 2016	Dec 31, 2015	Balance Sheet Location	Fair Value Jun 30, 2016	Dec 31, 2015

(10) Fair Value Measurements

The Corporation uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. As of June 30, 2016 and December 31, 2015, securities available for sale, certain residential real estate mortgage loans held for sale, derivatives and the contingent consideration liability are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets on a nonrecurring basis, such as collateral dependent impaired loans, property acquired through foreclosure or repossession, certain residential real estate mortgage loans held for sale and mortgage servicing rights. These nonrecurring fair value adjustments typically involve the application of lower of cost or market accounting or write-downs of individual assets.

Fair value is a market-based measurement, not an entity-specific measurement. Fair value measurements are determined based on the assumptions the market participants would use in pricing the asset or liability. In addition, GAAP specifies a hierarchy of valuation techniques based on whether the types of valuation information (“inputs”) are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Corporation’s market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1 – Quoted prices for identical assets or liabilities in active markets.

Level 2 – Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable in the markets and which reflect the Corporation’s market assumptions.

Fair Value Option Election

GAAP allows for the irrevocable option to elect fair value accounting for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. The Corporation has elected the fair value option for certain residential real estate mortgage loans held for sale to better match changes in fair value of the loans with changes in the fair value of the derivative loan sale contracts used to economically hedge them.

The aggregate principal amount of the residential real estate mortgage loans held for sale recorded at fair value was \$37.3 million and \$33.2 million, respectively, at June 30, 2016 and December 31, 2015. The aggregate fair value of these loans as of the same dates was \$38.6 million and \$34.0 million, respectively. As of June 30, 2016 and December 31, 2015, the aggregate fair value of residential real estate mortgage loans held for sale exceeded the aggregate principal amount by \$1.2 million and \$731 thousand, respectively.

There were no residential real estate mortgage loans held for sale 90 days or more past due as of June 30, 2016 and December 31, 2015.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following table presents the changes in fair value related to mortgage loans held for sale, interest rate lock commitments and commitments to sell residential real estate mortgage loans, for which the fair value option was elected. Changes in fair values are reported as a component of mortgage banking revenues in the Consolidated Statements of Income.

Valuation Techniques

Securities

Securities available for sale are recorded at fair value on a recurring basis. When available, the Corporation uses quoted market prices to determine the fair value of securities; such items are classified as Level 1. There were no Level 1 securities held at June 30, 2016 and December 31, 2015.

Level 2 securities include debt securities with quoted prices, which are traded less frequently than exchange-traded instruments, whose value is determined using matrix pricing with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category includes obligations of U.S. government-sponsored enterprises, mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises, obligations of states and political subdivisions, individual name issuer trust preferred debt securities and corporate bonds.

Securities not actively traded whose fair value is determined through the use of cash flows utilizing inputs that are unobservable are classified as Level 3. There were no Level 3 securities held at June 30, 2016 and December 31, 2015.

Mortgage Loans Held for Sale

The fair value of mortgage loans held for sale is estimated based on current market prices for similar loans in the secondary market and therefore are classified as Level 2 assets.

Collateral Dependent Impaired Loans

Collateral dependent loans that are deemed to be impaired are valued based upon the fair value of the underlying collateral. Such collateral primarily consists of real estate and, to a lesser extent, other business assets. For collateral dependent loans for which repayment is dependent on the sale of the collateral, management adjusts the fair value for estimated costs to sell. For collateral dependent loans for which repayment is dependent on the operation of the collateral, such as accruing troubled debt restructured loans, estimated costs to sell are not incorporated into the measurement. Management may also adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values resulting from its knowledge of the property. Internal valuations are utilized to determine the fair value of other business assets. Collateral dependent impaired loans are categorized as Level 3.

Loan Servicing Rights

Loans sold with the retention of servicing result in the recognition of loan servicing rights. Loan servicing rights are included in other assets in the Consolidated Balance Sheets and are amortized as an offset to mortgage banking revenues over the estimated period of servicing. Loan servicing rights are evaluated quarterly for impairment based on

their fair value. Impairment exists if the carrying value exceeds the estimated fair value. Impairment is measured on an aggregated basis by stratifying the loan servicing rights based on homogeneous characteristics such as note rate and loan type. The fair value is estimated using an independent valuation model that estimates the present value of expected cash flows, incorporating assumptions for discount rates and prepayment rates. Any impairment is recognized through a valuation allowance and as a reduction to mortgage banking revenues. Loan servicing rights are categorized as Level 3.

Property Acquired Through Foreclosure or Repossession

Property acquired through foreclosure or repossession included in other assets in the Consolidated Balance Sheets is adjusted to fair value less costs to sell upon transfer out of loans through a charge to allowance for loan losses. Subsequently, it is carried

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

at the lower of carrying value or fair value less costs to sell. Such subsequent valuation charges are charged through earnings. Fair value is generally based upon appraised values of the collateral. Management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of the property, and such property is categorized as Level 3.

Derivatives

Interest rate swap and cap contracts are traded in over-the-counter markets where quoted market prices are not readily available. Fair value measurements are determined using independent pricing models that utilize primarily market observable inputs, such as swap rates of different maturities and LIBOR rates. The Corporation also evaluates the credit risk of its counterparties as well as that of the Corporation. Accordingly, Washington Trust considers factors such as the likelihood of default by the Corporation and its counterparties, its net exposures and remaining contractual life, among other factors, in determining if any fair value adjustments related to credit risk are required. Counterparty exposure is evaluated by netting positions that are subject to master netting agreements, as well as considering the amount of collateral securing the position. Although the Corporation has determined that the majority of the inputs used to value its interest rate swap and cap contracts fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with interest rate contracts and risk participation agreements utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Corporation and its counterparties. However, as of June 30, 2016 and December 31, 2015, the Corporation has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Corporation has classified its derivative valuations in their entirety as Level 2.

Fair value measurements of forward loan commitments (interest rate lock commitments and commitments to sell residential real estate mortgages) are estimated based on current market prices for similar assets in the secondary market and therefore are classified as Level 2 assets.

Contingent Consideration Liability

A contingent consideration liability was recognized upon the completion of the Halsey Associates, Inc. (“Halsey”) acquisition on August 1, 2015 and represents the estimated present value of future earn-outs to be paid based on the future revenue growth of the acquired business during the 5-year period following the acquisition.

The liability's valuation is based upon unobservable inputs, therefore, the contingent liability is classified within Level 3 of the fair value hierarchy. The unobservable inputs include probability estimates regarding the likelihood of achieving revenue growth targets and the discount rates utilized the discounted cash flow calculations applied to the estimates earn-outs to be paid. The discount rates used ranged from 3% to 4%.

The fair value of the contingency represents the estimated price to transfer the liability between market participants at the measurement date under current market conditions.

(2) Derivative liabilities include mirror swaps with counterparties, risk participation-in agreements and forward loan commitments and are included in other liabilities in the Consolidated Balance Sheets.

(3) The contingent consideration liability is included in other liabilities in the Consolidated Balance Sheets.

It is the Corporation's policy to review and reflect transfers between Levels as of the financial statement reporting date. During the six months ended June 30, 2016 and 2015, there were no transfers in and/or out of Level 1, 2 or 3.

Items Recorded at Fair Value on a Nonrecurring Basis

The following table presents the carrying value of assets held at June 30, 2016, which were written down to fair value during the six months ended June 30, 2016:

(Dollars in thousands)	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

Collateral dependent impaired loans	\$12,996	\$—	\$—	\$12,996
Loan servicing rights	3,286	—	—	3,286
Property acquired through foreclosure or repossession	1,045	—	—	1,045
Total assets at fair value on a nonrecurring basis	\$17,327	\$—	\$—	\$17,327

The allowance for loan losses on collateral dependent impaired loans amounted to \$857 thousand at June 30, 2016.

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

The following table presents the carrying value of assets held at December 31, 2015, which were written down to fair value during the year ended December 31, 2015:

(Dollars in thousands)	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Collateral dependent impaired loans	\$10,545	\$—	\$—	\$10,545
Property acquired through foreclosure or repossession	270	—	—	270
Total assets at fair value on a nonrecurring basis	\$10,815	\$—	\$—	\$10,815

The allowance for loan losses on collateral dependent impaired loans amounted to \$2.4 million at December 31, 2015.

The following tables present valuation techniques and unobservable inputs for assets measured at fair value on a nonrecurring basis for which the Corporation has utilized Level 3 inputs to determine fair value:

(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
June 30, 2016				
Collateral dependent impaired loans	\$12,996	Appraisals of collateral	Discount for costs to sell	0% - 20% (6%)
Loan servicing rights	\$3,286	Discounted Cash Flow	Discount rates Prepayment rates	10% - 14% (11%) 12% - 22% (16%)
Property acquired through foreclosure or repossession	\$1,045	Appraisals of collateral	Discount for costs to sell Appraisal adjustments (1)	10% - 12% (11%) 6% - 32% (20%)

(1) Management may adjust appraisal values to reflect market value declines or other discounts resulting from its knowledge of the property.

(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
December 31, 2015				
Collateral dependent impaired loans	\$10,545	Appraisals of collateral	Discount for costs to sell	0% - 20% (2%)
Property acquired through foreclosure or repossession	\$270	Appraisals of collateral	Discount for costs to sell Appraisal adjustments (1)	12% 32%

(1)

Management may adjust appraisal values to reflect market value declines or other discounts resulting from its knowledge of the property.

Valuation of Other Financial Instruments

The methodologies for estimating the fair value of financial instruments that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial instruments are discussed below.

Loans

Fair values are estimated for categories of loans with similar financial characteristics. Loans are segregated by type and are then further segmented into fixed-rate and adjustable-rate interest terms to determine their fair value. The fair value of fixed-rate commercial and consumer loans is calculated by discounting scheduled cash flows through the estimated maturity of the loan using interest rates offered at the measurement date that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Corporation's historical repayment experience. For residential mortgages, fair value is estimated by using market prices for sales of similar loans on the secondary market. The fair value of floating rate commercial and consumer loans approximates carrying value. Fair value for impaired loans is estimated using a discounted cash flow method

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

based upon the loan's contractual effective interest rate, or at the loan's observable market price, or if the loan is collateral dependent, at the fair value of the collateral. Loans are classified within Level 3 of the fair value hierarchy.

Time Deposits

The discounted values of cash flows using the rates currently offered for deposits of similar remaining maturities were used to estimate the fair value of time deposits. Time deposits are classified within Level 2 of the fair value hierarchy.

Federal Home Loan Bank Advances

Rates currently available to the Corporation for advances with similar terms and remaining maturities are used to estimate fair value of existing advances. FHLBB advances are categorized as Level 2.

Junior Subordinated Debentures

The fair value of the junior subordinated debentures is estimated using rates currently available to the Corporation for debentures with similar terms and maturities. Junior subordinated debentures are categorized as Level 2.

The following tables present the carrying amount, estimated fair value and placement in the fair value hierarchy of the Corporation's financial instruments. The tables exclude financial instruments for which the carrying value approximates fair value. Financial assets for which the fair value approximates carrying value include cash and cash equivalents, FHLBB stock, accrued interest receivable and bank-owned life insurance. Financial liabilities for which the fair value approximates carrying value include non-maturity deposits and accrued interest payable.

(11) Defined Benefit Pension Plans

The Corporation maintains a tax-qualified defined benefit pension plan for the benefit of certain eligible employees who were hired prior to October 1, 2007. The Corporation also has non-qualified retirement plans to provide supplemental retirement benefits to certain employees, as defined in the plans. The defined benefit pension plans were previously amended to freeze benefit accruals after a 10-year transition period ending in December 2023.

The defined benefit pension plan is funded on a current basis, in compliance with the requirements of ERISA.

Pension benefit costs and benefit obligations incorporate various actuarial and other assumptions, including discount rates, mortality, rates of return on plan assets and compensation increases. Washington Trust evaluates these assumptions annually. Prior to 2016, a single weighted-average discount rate was used to calculate interest and service cost components of net periodic benefit cost. For 2016, Washington Trust utilizes a "spot rate approach" in the calculation of interest and service cost. The spot rate approach applies separate discount rates for each projected benefit payment in the calculation of interest and service cost. This approach provides a more precise measurement of interest and service cost by improving the correlation between projected benefit cash flows and their corresponding spot rates. This change was made in conjunction with the annual evaluation of assumptions and did not affect the measurement of the Corporation's defined benefit obligations at December 31, 2015. It is considered a change in accounting estimate and, accordingly, was accounted for prospectively starting in 2016.

The composition of net periodic benefit cost was as follows:

(Dollars in thousands)	Qualified Pension Plan				Non-Qualified Retirement Plans			
	Three months		Six months		Three months		Six months	
Periods ended June 30,	2016	2015	2016	2015	2016	2015	2016	2015
Net Periodic Benefit Cost:								
Service cost	\$537	\$614	\$1,074	\$1,229	\$31	\$19	\$61	\$39
Interest cost	644	732	1,288	1,464	108	123	216	245
Expected return on plan assets	(1,159)	(1,128)	(2,317)	(2,257)	—	—	—	—
Amortization of prior service (credit) cost	(5)	(5)	(11)	(11)	—	—	—	—
Recognized net actuarial loss	207	312	414	624	61	61	123	122
Net periodic benefit cost	\$224	\$525	\$448	\$1,049	\$200	\$203	\$400	\$406

The following table presents the measurement date and weighted-average assumptions used to determine net periodic benefit cost:

Periods ended June 30,	Qualified Pension Plan		Non-Qualified Retirement Plans	
	2016	2015	2016	2015
Measurement date	Dec 31, 2015	Dec 31, 2014	Dec 31, 2015	Dec 31, 2014
Discount rate	N/A	4.125%	N/A	3.90%
Equivalent single discount rate for benefit obligations	4.48%	N/A	4.19%	N/A
Equivalent single discount rate for service cost	4.63	N/A	4.59	N/A
Equivalent single discount rate for interest cost	3.88	N/A	3.44	N/A
Expected long-term return on plan assets	6.75	7.25	N/A	N/A
Rate of compensation increase	3.75	3.75	3.75	3.75

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

(12) Share-Based Compensation Arrangements

During the six months ended June 30, 2016, the Corporation granted equity awards, which included performance share awards and nonvested share units.

The performance share awards were granted to certain executive officers providing the opportunity to earn shares of common stock of the Corporation. The performance share awards were valued at fair market value as of January 20, 2016 (the award date), or \$36.11, and will be earned over a 3-year performance period. The number of shares earned will range from zero to 200% of the target number of shares dependent upon the Corporation's core return on equity and core earnings per share growth ranking compared to an industry peer group. The current assumption based on the most recent peer group information available results in shares earned at 142% of the target, or 51,618 shares.

The Corporation granted 8,400 nonvested share units to non-employee directors with 3-year cliff vesting. The nonvested share units were valued at fair market value as of May 10, 2016 (the award date), or \$36.10.

(13) Business Segments

Washington Trust segregates financial information in assessing its results among its Commercial Banking and Wealth Management Services operating segments. The amounts in the Corporate unit include activity not related to the segments.

Management uses certain methodologies to allocate income and expenses to the business lines. A funds transfer pricing methodology is used to assign interest income and interest expense to each interest-earning asset and interest-bearing liability on a matched maturity funding basis. Certain indirect expenses are allocated to segments. These include support unit expenses such as technology, operations and other support functions.

Commercial Banking

The Commercial Banking segment includes commercial, residential and consumer lending activities; equity in losses of unconsolidated investments in real estate limited partnerships; mortgage banking activities; deposit generation; cash management activities; and direct banking activities, which include the operation of ATMs, telephone and Internet banking services and customer support and sales.

Wealth Management Services

Wealth Management Services includes investment management; financial planning; personal trust and estate services, including services as trustee, personal representative, custodian and guardian; and settlement of decedents' estates. Institutional trust services are also provided, including fiduciary services.

Corporate

Corporate includes the Treasury Unit, which is responsible for managing the wholesale investment portfolio and wholesale funding needs. It also includes income from bank-owned life insurance, as well as administrative and executive expenses not allocated to the operating segments and the residual impact of methodology allocations such as funds transfer pricing offsets.

(15) Earnings Per Common Share

The following table presents the calculation of earnings per common share:

(Dollars and shares in thousands, except per share amounts)

Periods ended June 30,	Three Months		Six months	
	2016	2015	2016	2015
Earnings per common share - basic:				
Net income	\$11,057	\$11,503	\$21,992	\$22,513
Less dividends and undistributed earnings allocated to participating securities	(22)	(34)	(47)	(73)
Net income applicable to common shareholders	\$11,035	\$11,469	\$21,945	\$22,440
Weighted average common shares	17,067	16,811	17,045	16,785
Earnings per common share - basic	\$0.65	\$0.68	\$1.29	\$1.34
Earnings per common share - diluted:				
Net income	\$11,057	\$11,503	\$21,992	\$22,513
Less dividends and undistributed earnings allocated to participating securities	(22)	(33)	(47)	(72)
Net income applicable to common shareholders	\$11,035	\$11,470	\$21,945	\$22,441
Weighted average common shares	17,067	16,811	17,045	16,785
Dilutive effect of common stock equivalents	127	178	140	192
Weighted average diluted common shares	17,194	16,989	17,185	16,977
Earnings per common share - diluted	\$0.64	\$0.68	\$1.28	\$1.32

Weighted average common stock equivalents, not included in common stock equivalents above because they were anti-dilutive, totaled 69,025 and 27,169, respectively, for the three months ended June 30, 2016 and 2015. These amounts were 70,132 and 75,913, respectively for the six months ended June 30, 2016 and 2015.

(16) Commitments and Contingencies

Financial Instruments with Off-Balance Sheet Risk

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers and to manage the Corporation's exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit, standby letters of credit, interest rate swap agreements and interest rate lock commitments and commitments to sell residential real estate mortgage loans. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the Corporation's Consolidated Balance Sheets. The contract or notional amounts of these instruments reflect the extent of involvement the Corporation has in particular classes of financial instruments. The Corporation's credit policies with respect to interest rate swap agreements with commercial borrowers, commitments to extend credit and financial guarantees are similar to those used for loans. The interest rate swaps with other counterparties are generally subject to bilateral collateralization terms.

The following table presents the contractual and notional amounts of financial instruments with off-balance sheet risk:

(Dollars in thousands)	Jun 30, 2016	Dec 31, 2015
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit:		
Commercial loans	\$358,423	\$360,795
Home equity lines	221,235	219,427
Other loans	48,530	44,164
Standby letters of credit	5,706	5,629
Financial instruments whose notional amounts exceed the amount of credit risk:		
Forward loan commitments:		
Interest rate lock commitments	92,574	49,712
Commitments to sell mortgage loans	129,901	87,498
Loan related derivative contracts:		
Interest rate swaps with customers	414,368	302,142
Mirror swaps with counterparties	414,368	302,142
Risk participation-in agreements	21,474	21,474

See Note 9 for additional disclosure pertaining to derivative financial instruments.

Commitments to Extend Credit

Commitments to extend credit are agreements to lend to a customer as long as there are no violations of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, total commitment amounts do not necessarily represent future cash requirements. Each borrower's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation of the borrower.

Standby Letters of Credit

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These standby letters of credit are primarily issued to support the financing needs of the Bank's commercial customers. The credit risk involved in issuing standby letters of credit is essentially the same as that involved in extending loan facilities to customers. The collateral supporting those commitments is essentially the same as for other commitments. Most standby letters of credit extend for 1 year. As of June 30, 2016 and December 31, 2015, the

maximum potential amount of undiscounted future payments, not reduced by amounts that may be recovered, totaled \$5.7 million and \$5.6 million, respectively. At June 30, 2016 and December 31, 2015, there were no liabilities to beneficiaries resulting from standby letters of credit. Fee income on standby letters of credit was insignificant for the three and six months ended June 30, 2016 and 2015.

Forward Loan Commitments

Interest rate lock commitments are extended to borrowers and relate to the origination of residential real estate mortgage loans held for sale. To mitigate the interest rate risk inherent in these rate locks, as well as closed residential real estate mortgage

Condensed Notes to Unaudited Consolidated Financial Statements – (continued)

loans held for sale, forward commitments are established to sell individual residential real estate mortgage loans. Both interest rate lock commitments and commitments to sell residential real estate mortgage loans are derivative financial instruments.

Leases

At June 30, 2016, the Corporation was committed to rent premises used in banking operations under non-cancellable operating leases. Rental expense under the operating leases amounted to \$1.0 million and \$2.0 million for the three and six months ended June 30, 2016, compared to \$744 thousand and \$1.5 million for the same periods in 2015. The following table presents the minimum annual lease payments under the terms of these leases, exclusive of renewal provisions:

(Dollars in thousands)

July 1, 2016 to December 31, 2016	\$1,739
2017	3,345
2018	3,023
2019	2,751
2020	2,138
2021 and thereafter	27,274
Total minimum lease payments	\$40,270

Lease expiration dates range from 3 months to 25 years, with renewal options on certain leases of 6 months to 25 years.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Corporation's consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the year ended December 31, 2015, and in conjunction with the condensed unaudited consolidated financial statements and notes thereto included in Item 1 of this report. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results for the full-year ended December 31, 2016 or any future period.

Forward-Looking Statements

This report contains statements that are "forward-looking statements." We may also make forward-looking statements in other documents we file with the SEC, in our annual reports to shareholders, in press releases and other written materials, and in oral statements made by our officers, directors or employees. You can identify forward-looking statements by the use of the words "believe," "expect," "anticipate," "intend," "estimate," "assume," "outlook," "will," "should" and other expressions that predict or indicate future events and trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond our control. These risks, uncertainties and other factors may cause our actual results, performance or achievements to be materially different than the anticipated future results, performance or achievements expressed or implied by the forward-looking statements.

Some of the factors that might cause these differences include the following: weakness in national, regional or international economic conditions or conditions affecting the banking or financial services industries or financial capital markets; volatility in national and international financial markets; additional government intervention in the U.S. financial system; reductions in net interest income resulting from interest rate volatility as well as changes in the balance and mix of loans and deposits; reductions in the market value of wealth management assets under administration; changes in the value of securities and other assets; reductions in loan demand; changes in loan collectibility, default and charge-off rates; changes in the size and nature of our competition; changes in legislation or regulation and accounting principles, policies and guidelines; and changes in the assumptions used in making such forward-looking statements. In addition, the factors described under "Risk Factors" in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as updated by our Quarterly Reports on Form 10-Q and other filings submitted to the SEC, may result in these differences. You should carefully review all of these factors and you should be aware that there may be other factors that could cause these differences. These forward-looking statements were based on information, plans and estimates at the date of this report, and we assume no obligation to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

Critical Accounting Policies and Estimates

Accounting policies involving significant judgments, estimates and assumptions by management, which have, or could have, a material impact on the Corporation's consolidated financial statements are considered critical accounting policies. Management considers the following to be its critical accounting policies: the determination of allowance for loan losses, the valuation of goodwill and identifiable intangible assets, the assessment of investment securities for other-than-temporary impairment and accounting for defined benefit pension plans. There have been no significant changes in the Corporation's critical accounting policies and estimates from those disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Recently Issued Accounting Pronouncements

See Note 2 to the Unaudited Consolidated Financial Statements for details of recently issued accounting pronouncements and their expected impact on the Corporation's financial statements.

Overview

Washington Trust offers a comprehensive product line of banking and financial services to individuals and businesses, including commercial, residential and consumer lending, retail and commercial deposit products, and wealth

management services through its offices in Rhode Island, eastern Massachusetts and Connecticut; its ATM networks; and its Internet website at www.washtrust.com.

Our largest source of operating income is net interest income, the difference between interest earned on loans and securities and interest paid on deposits and borrowings. In addition, we generate noninterest income from a number of sources, including wealth management services, mortgage banking activities and deposit services. Our principal noninterest expenses include salaries and employee benefits, occupancy and facility-related costs, technology and other administrative expenses.

Our financial results are affected by interest rate fluctuations, changes in economic and market conditions, competitive conditions within our market area and changes in legislation, regulation and/or accounting principles.

We continued to leverage our strong, statewide brand to build market share in Rhode Island and bring select business lines to new markets with high-growth potential while remaining steadfast in our commitment to provide superior service. We opened a new full-service branch in Providence, Rhode Island, in January 2016 and expect to open another full-service branch in Coventry, Rhode Island, in 2017. In July 2016, we also opened a new residential mortgage lending office in Wellesley, Massachusetts.

Composition of Earnings

Net income for the second quarter of 2016 amounted to \$11.1 million, or \$0.64 per diluted share, compared to \$11.5 million, or \$0.68 per diluted share, reported for the second quarter of 2015. The returns on average equity and average assets for the second quarter of 2016 were 11.50% and 1.14%, respectively, compared to 12.88% and 1.27%, respectively, for the same quarter in 2015.

For the six months ended June 30, 2016, net income totaled \$22.0 million, or \$1.28 per diluted share, compared to \$22.5 million, or \$1.32 per diluted share, reported for the second quarter of 2015. The returns on average equity and average assets for the six months ended June 30, 2016, were 11.50% and 1.15%, respectively, compared to 12.71% and 1.25%, respectively for the same period in 2015.

Results for the six months ended 2016 included the following transactions, which decreased diluted earnings per share by \$0.01:

In June 2016, the Corporation received life insurance proceeds, resulting in a non-taxable gain of \$589 thousand, or \$0.03 per diluted share, which is included in income from bank-owned life insurance (“BOLI”).

In the second quarter of 2016, the Corporation incurred \$425 thousand, after-tax \$268 thousand, or \$0.02 per diluted share, of severance costs, which are classified in salaries and employee benefits expense.

In March 2016, the Corporation incurred debt prepayment penalty expense of \$431 thousand, after tax \$272 thousand, or \$0.02 per diluted share. See additional discussion regarding debt prepayment penalty expense in the “Borrowings” section under the caption “Sources of Funds and Other Liabilities.”

Results for the six months ended 2015 included the following transactions, which decreased diluted earnings per share by \$0.01:

In the second quarter of 2015, the Corporation received a settlement payment for a trust preferred debt security previously held by Washington Trust, totaling \$255 thousand, after-tax \$161 thousand, or \$0.01 per diluted share.

The Corporation incurred acquisition related expenses totaling \$433 thousand, after-tax \$403 thousand, or \$0.02 per diluted share in the second quarter of 2015.

Net interest income for the three and six months ended June 30, 2016 amounted to \$26.8 million and \$54.5 million, respectively, up by 3% and 5%, respectively, from the comparable period in 2015. The net interest margin (fully taxable equivalent net interest income as a percentage of average interest-earnings assets) for the three and six months ended June 30, 2016 was 3.05% and 3.15%, respectively, compared to 3.15% and 3.16%, respectively, for the comparable 2015 periods. Loan prepayment fees and certain other fees that are included in net interest income amounted to \$115 thousand and \$1.2 million, respectively, for the three and six months ended June 30, 2016, compared to \$572 thousand and \$913 thousand, respectively, for the same periods in 2015. Excluding these fees from each period, the net interest margin was 3.04% and 3.08%, respectively, for the three and six months ended June 30, 2016, compared to 3.08% and 3.11%, respectively, for the same periods in 2015.

The loan loss provision charged to earnings for the three and six months ended June 30, 2016 amounted to \$450 thousand and \$950 thousand, respectively, compared to a loan loss provision of \$100 thousand recognized for both the three and six months ended June 30, 2015. The level of provision reflects management’s assessment of loss exposure, as well as loss allocations commensurate with growth in loan portfolio balances.

Wealth management revenues for the three and six months ended June 30, 2016 totaled \$9.5 million and \$18.7 million, respectively, up by 6% and 8%, respectively, from the same periods in 2015, reflecting an increase in asset-based revenues due to the acquisition of Halsey on August 1, 2015.

Mortgage banking revenues, which includes gains and commissions on loan sales and mortgage servicing fee income, amounted to \$2.7 million and \$4.9 million, respectively, for the three and six months ended June 30, 2016, down by 1% and 8%, respectively, from the same periods in 2015, due to lower levels of residential mortgage loan sales.

Salaries and employee benefit costs, the largest component of noninterest expense, totaled \$17.4 million and \$33.8 million, respectively, for the three and six months ended June 30, 2016, up by 12% and 9%, respectively, from the same periods in 2015. A portion of these increases were attributable to the acquisition of Halsey and employee severance costs.

Results of Operations

Segment Reporting

Washington Trust manages its operations through two business segments, Commercial Banking and Wealth Management Services. Activity not related to the segments, including activity related to the investment securities portfolio, wholesale funding matters and administrative units are considered Corporate. The Corporate unit also includes income from BOLI and the residual impact of methodology allocations such as funds transfer pricing offsets. Methodologies used to allocate income and expenses to business lines are periodically reviewed and revised. See Note 13 to the Unaudited Consolidated Financial Statements for additional disclosure related to business segments.

The Commercial Banking segment reported net income of \$7.3 million and \$15.4 million, respectively, for the three and six months ended June 30, 2016, compared to \$8.2 million and \$15.9 million, respectively, for the same periods in 2015. Net interest income for this operating segment for the three and six months ended June 30, 2016, increased by \$735 thousand and \$2.7 million, respectively, from the same periods in 2015, primarily due to a favorable shift in the mix of deposits to lower cost categories and wider spreads in the funds transfer pricing allocation with the Corporate unit. The loan loss provision charged to earnings amounted to \$450 thousand and \$950 thousand, respectively, for the three and six months ended June 30, 2016, compared to \$100 thousand for both the three and six months ended June 30, 2015. Noninterest income derived from the Commercial Banking segment totaled \$5.3 million and \$10.2 million, respectively, for the three and six months ended June 30, 2016, down by \$298 thousand and \$436 thousand, respectively, from the comparable periods in 2015, reflecting lower mortgage banking revenues and loan related derivative income. Commercial Banking noninterest expenses for the three and six months ended June 30, 2016 were up by \$1.2 million and \$1.6 million, respectively, from the same periods in 2015, largely due to increases in salaries and benefit costs.

The Wealth Management Services segment reported net income of \$1.4 million and \$2.6 million, respectively, for the three and six months ended June 30, 2016, compared to \$1.3 million and \$2.7 million, respectively, for the same periods in 2015. Noninterest income derived from the Wealth Management Services segment was \$9.5 million and \$18.7 million, respectively, for the three and six months ended June 30, 2016, up by \$569 thousand and \$1.3 million compared to the same periods in 2015. These increases were largely due to the acquisition of Halsey on August 1, 2015. Noninterest expenses for the Wealth Management Services segment totaled \$7.2 million and \$14.4 million, respectively, for the three and six months ended June 30, 2016, up by \$407 thousand and \$1.5 million, respectively, from the same periods in 2015. These increases were largely due to the acquisition of Halsey.

Net income attributed to the Corporate unit amounted to \$2.4 million and \$4.0 million, respectively, for the three and six months ended June 30, 2016, compared to \$2.0 million and \$3.9 million, respectively, for the same periods in 2015. Net interest income for the Corporate unit for the three and six months ended June 30, 2016 was up modestly compared to the same periods in 2015. Noninterest income for the Corporate unit for the three and six months ended June 30, 2016, was \$1.1 million and \$1.7 million, respectively, up by \$382 thousand and \$395 thousand, respectively, from the comparable 2015 periods. Included in the 2015 periods was a \$255 thousand settlement received for a trust preferred debt security previously held by Washington Trust, which was recognized in other income. The 2016 periods included nontaxable income of \$589 thousand associated with the receipt of BOLI proceeds in the second

quarter of 2016. Noninterest expenses for the Corporate unit for the three and six months ended June 30, 2016 were up by \$95 thousand and \$547 thousand, respectively, from the same periods in 2015. The year-to-date increase was largely due to debt prepayment penalty expense incurred in the first quarter of 2016. See additional discussion regarding debt prepayment penalty expense in the “Borrowings” section under the caption “Sources of Funds and Other Liabilities.”

Net Interest Income

Net interest income continues to be the primary source of our operating income. Net interest income is affected by the level of interest rates, changes in interest rates and changes in the amount and composition of interest-earning assets and interest-bearing liabilities. Included in interest income are loan prepayment fees and certain other fees, such as late charges. The following

discussion presents net interest income on a fully taxable equivalent (“FTE”) basis by adjusting income and yields on tax-exempt loans and securities to be comparable to taxable loans and securities. For more information, see the section entitled “Average Balances / Net Interest Margin - Fully Taxable Equivalent (FTE) Basis” below.

FTE net interest income for the three and six months ended June 30, 2016 amounted to \$27.5 million and \$56.0 million, respectively, up from \$26.7 million and \$53.1 million, respectively, for the same periods in 2015. The net interest margin was 3.05% and 3.15%, respectively, for the three and six months ended June 30, 2016, compared to 3.15% and 3.16%, respectively, for the same periods a year ago. Loan prepayment fees and certain other fees of \$115 thousand and \$1.2 million, respectively, were recognized in the three and six months ended June 30, 2016, compared to \$572 thousand and \$913 thousand, respectively, for the same periods in 2015. Excluding these amounts from each period, net interest income for the three and six months ended June 30, 2016 increased by \$1.2 million and \$2.5 million, respectively, and net interest margin declined by 4 basis points and 3 basis points, respectively.

Average interest-earning assets for three and six months ended June 30, 2016 were up by 7% and 6%, respectively, from the average balances for the same periods in 2015, largely due to loan growth. The yield on average interest-earning assets for the three and six months ended June 30, 2016 was 3.65% and 3.75%, respectively, compared to 3.80% and 3.82%, respectively for the same periods in 2015. Excluding the impact of loan prepayment fee income and certain other fees in both periods, the yield on average interest-earning assets was 3.64% and 3.68%, respectively, for the three and six months ended June 30, 2016, compared to 3.73% and 3.77%, respectively, for the same periods in 2015. While yields on prime-based and short-term LIBOR-based loans benefited from the increase in the short-term borrowing rate announced by the Federal Reserve in December 2015, the impact of a sustained low interest rate environment has generally resulted in lower asset yields.

Total average loans for the three and six months ended June 30, 2016 increased by \$157.9 million and \$144.6 million, respectively, from the average balances for the comparable 2015 periods, primarily due to growth in average commercial real estate loan balances. The yield on total loans for the three and six months ended June 30, 2016 was 3.86% and 3.95%, respectively, down by 13 basis points and 5 basis points, respectively, from the same periods in 2015. Excluding the impact of loan prepayment fee income and certain other fees, the yield on total loans for the three and six months ended June 30, 2016 was 3.84% and 3.87%, down by 7 basis points from the three and six months ended June 30, 2015. Due to the combined effect of new loan growth and the runoff of higher yielding loan balances, yields on total loans may continue to decline.

Total average securities for the three and six months ended June 30, 2016 increased by \$63.4 million and \$44.3 million, respectively, from the average balances for the same periods a year earlier. The FTE rate of return on securities for the three and six months ended June 30, 2016 decreased by 35 basis points and 32 basis points, respectively, from the comparable periods in 2015, due to runoff of higher yielding securities combined with purchases of lower yielding securities.

Average interest-bearing liabilities for the three and six months ended June 30, 2016 increased by \$174.8 million and \$143.3 million, respectively, from the average balances for the same periods in 2015, largely reflecting increases in average FHLBB advances and decreases in average money market account balances. The cost of funds for the three and six months ended June 30, 2016 declined by 5 basis points and 6 basis points, respectively, from the comparable 2015 periods, largely due to a decline in the rate paid on money market accounts and FHLBB advances. See additional discussion under the caption “Sources of Funds and Other Liabilities.”

The average balance of FHLBB advances for the three and six months ended June 30, 2016 increased by \$196.2 million and \$122.3 million, respectively, compared to the average balances for the same periods in 2015. The average rate paid on such advances for the three and six months ended June 30, 2016 was 1.58% and 1.73%, compared to 1.94% and 1.92%, respectively, for the same periods in 2015.

Total average interest-bearing deposits for the three months ended June 30, 2016 decreased by \$21.4 million from the average balance for the same period in 2015, while on a year-to-date basis, average interest-bearing deposits increased by \$21.0 million from the average balance for the six months ended June 30, 2015. Included in total average interest-bearing deposits for the three and six months ended June 30, 2016 were \$302.7 million and \$299.8 million, respectively, of out-of-market wholesale brokered time certificates of deposit, compared to \$285.8 million and \$290.2 million, respectively, for the same periods in 2015. The average rate paid on wholesale brokered time deposits for the three and six months ended June 30, 2016 increased by 14 basis points and 12 basis points, respectively, compared to the same periods in 2015.

Excluding wholesale brokered time deposits, average in-market interest-bearing deposits for the three months ended June 30, 2016 decreased by \$38.3 million from the average balance for the same period in 2015, largely due to decreases in average money market account balances. On a year-to-date basis, average in-market interest-bearing deposits increased by \$11.5 million from the average balance for the six months ended June 30, 2015. The average rate paid on in-market interest-bearing deposits for the three and six months ended June 30, 2016 decreased by 3 basis points and 5 basis points, respectively, compared to the same periods in 2015, largely due to lower rates on money market accounts.

The average balance of noninterest-bearing demand deposits for the three and six months ended June 30, 2016 increased by \$32.4 million and \$32.6 million, respectively, from the average balances for the same periods in 2015.

Average Balances / Net Interest Margin - Fully Taxable Equivalent (FTE) Basis

The following tables present average balance and interest rate information. Tax-exempt income is converted to a fully taxable equivalent basis using the statutory federal income tax rate adjusted for applicable state income taxes net of the related federal tax benefit. Unrealized gains (losses) on available for sale securities and fair value adjustments on mortgage loans held for sale are excluded from the average balance and yield calculations. Nonaccrual and renegotiated loans, as well as interest recognized on these loans are included in amounts presented for loans.

Three months ended June 30,	2016			2015

Provision and Allowance for Loan Losses

The provision for loan losses is based on management's periodic assessment of the adequacy of the allowance for loan losses which, in turn, is based on such interrelated factors as the composition of the loan portfolio and its inherent risk characteristics; the level of nonperforming loans and net charge-offs, both current and historic; local economic and credit conditions; the direction of real estate values; and regulatory guidelines. The provision for loan losses is charged against earnings in order to maintain an allowance for loan losses that reflects management's best estimate of probable losses inherent in the loan portfolio at the balance sheet date.

The provision for loan losses charged to earnings amounted to \$450 thousand and \$950 thousand, respectively, for the three and six months ended June 30, 2016, compared to a loan loss provision of \$100 thousand recognized for both the three and six months ended June 30, 2015. The loan loss provision was based on management's assessment of loss exposure, as well as loan loss allocations commensurate with growth in the loan portfolio.

For the three and six months ended June 30, 2016, net charge-offs totaled \$761 thousand and \$2.2 million, respectively. These amounts included a \$737 thousand charge-off recognized in the second quarter of 2016 on one commercial and industrial loan and a \$1.2 million charge-off recognized on one commercial mortgage relationship recognized in the first quarter of 2016. Net-charge offs for the same periods in 2015 were \$323 thousand and \$536 thousand, respectively.

The allowance for loan losses was \$25.8 million, or 0.84% of total loans, at June 30, 2016, compared to \$27.1 million, or 0.90% of total loans, at December 31, 2015. The ratio of allowance for loan losses to total loans includes the impact of loan charge-offs for which loss exposure had been allocated prior to 2016. See additional discussion under the caption "Asset Quality" below for further information on the Allowance for Loan Losses.

Noninterest Income

Noninterest income is an important source of revenue for Washington Trust. The principal categories of noninterest income are shown in the following table:

(Dollars in thousands)	Three months				Six months			
	2016	2015	Change		2016	2015	Change	
Periods ended June 30,			\$	%			\$	%
Noninterest income:								
Wealth management revenues	\$9,481	\$8,912	\$569	6 %	\$18,655	\$17,347	\$1,308	8 %
Mortgage banking revenues	2,710	2,741	(31)	(1)	4,908	5,329	(421)	(8)
Service charges on deposit accounts	935	973	(38)	(4)	1,842	1,908	(66)	(3)
Card interchange fees	860	826	34	4	1,657	1,540	117	8
Income from bank-owned life insurance	1,090	492	598	122	1,589	982	607	62
Loan related derivative income	508	717	(209)	(29)	1,153	1,362	(209)	(15)
Equity in earnings (losses) of unconsolidated subsidiaries	(89)	(69)	(20)	(29)	(177)	(155)	(22)	(14)
Other income	419	669	(250)	(37)	921	968	(47)	(5)
Total noninterest income	\$15,914	\$15,261	\$653	4 %	\$30,548	\$29,281	\$1,267	4 %

Noninterest Income Analysis

Revenue from wealth management services is our largest source of noninterest income. A substantial portion of wealth management revenues is largely dependent on the value of wealth management assets under administration and is closely tied to the performance of the financial markets. This portion of wealth management revenues is referred to as "asset-based" and includes trust and investment management fees and mutual fund fees. Wealth management revenues also include "transaction based" revenues, such as financial planning, commissions and other service fees that are not primarily derived from the value of assets.

The categories of wealth management revenues are shown in the following table:

(Dollars in thousands)	Three months				Six months			
			Change				Change	
Periods ended June 30,	2016	2015	\$	%	2016	2015	\$	%
Wealth management revenues:								
Trust and investment management fees	\$8,195	\$7,238	\$957	13 %	\$16,260	\$14,380	\$1,880	13 %
Mutual fund fees	812	1,032	(220)	(21)	1,655	2,068	(413)	(20)
Asset-based revenues	9,007	8,270	737	9	17,915	16,448	1,467	9
Transaction-based revenues	474	642	(168)	(26)	740	899	(159)	(18)
Total wealth management revenues	\$9,481	\$8,912	\$569	6 %	\$18,655	\$17,347	\$1,308	8 %

The following table presents the changes in wealth management assets under administration:

(Dollars in thousands)	Three months		Six months	
	2016	2015	2016	2015
Periods ended June 30,				
Wealth management assets under administration:				
Balance at the beginning of period	\$5,878,967	\$5,159,663	\$5,844,636	\$5,069,966
Net investment appreciation & income	71,447	(13,932)	93,835	66,940
Net client asset flows	(45,395)	65,817	(33,452)	74,642
Balance at the end of period	\$5,905,019	\$5,211,548	\$5,905,019	\$5,211,548

Wealth management revenues for the three and six months ended June 30, 2016 were \$9.5 million and \$18.7 million, respectively, up by 6% and 8%, respectively, from the same periods in 2015, due to increases in asset-based revenues. Included in the three and six months ended June 30, 2016 were asset-based revenues of \$978 thousand and \$1.9 million, respectively, generated by Halsey, which was acquired on August 1, 2015. Asset-based revenues for the three and six months ended June 30, 2016, excluding those generated by Halsey, declined by \$241 thousand and \$471 thousand, respectively, from the same periods in 2015. Assets under administration amounted to \$5.9 billion at June 30, 2016, up by \$693.5 million, or 13%, from a year ago. Excluding Halsey's assets under management, total wealth management assets under administration declined by 3% in the last twelve months reflecting declines in the financial markets and client asset outflows.

Mortgage banking revenues are dependent on mortgage origination volume and are sensitive to interest rates and the condition of housing markets. Mortgage banking revenues totaled \$2.7 million and \$4.9 million, respectively, for the three and six months ended June 30, 2016, down by \$31 thousand and \$421 thousand, respectively, compared to the same periods in 2015. For the three and six months ended June 30, 2016, residential mortgages sold to the secondary market, including brokered loans, totaled \$139.0 million and \$245.0 million, respectively, compared to \$143.2 million and \$271.1 million, respectively, for the same periods in 2015.

Income from BOLI for the three and six months ended June 30, 2016 totaled \$1.1 million and \$1.6 million, respectively, up by \$598 thousand and \$607 thousand, respectively, compared to the same periods in 2015. The increase was due to a \$589 thousand gain that was recognized in the second quarter of 2016 resulting from the receipt of tax-exempt life insurance proceeds.

Loan related derivative income for the three and six months ended June 30, 2016 totaled \$508 thousand and \$1.2 million, respectively, compared to \$717 thousand and \$1.4 million, respectively, for the same periods in 2015. The decrease reflected negative market value adjustments on loan related derivatives, primarily caused by a reduction in longer-term interest rates since the end of 2015. The negative market value adjustments were partially offset by increased transactional volume of loan related interest rate swaps.

Other income amounted to \$419 thousand and \$921 thousand, respectively, for the three and six months ended June 30, 2016, down by \$250 thousand and \$47 thousand, respectively, compared to the same periods in 2015. Included in other income in 2016 was a net gain of \$135 thousand recognized in the first quarter on the sale of a nonaccrual residential mortgage. Other income in 2015 included a settlement payment of \$255 thousand received in the second quarter for a trust preferred debt security

- 51-

previously held by Washington Trust. Excluding these amounts in both periods, other income for the three and six months ended June 30, 2016 was up by \$5 thousand and \$73 thousand, respectively, compared to the same periods in 2015.

Noninterest Expense

The following table presents noninterest expense comparisons:

(Dollars in thousands)	Three months				Six months			
			Change				Change	
Periods ended June 30,	2016	2015	\$	%	2016	2015	\$	%

Other	2,130	2,258	(128)	(6)	4,388	4,251	137	3
Total noninterest expense	\$26,030	\$24,299	\$1,731	7 %	\$51,480	\$47,830	\$3,650	8 %

Noninterest Expense Analysis

For the three and six months ended June 30, 2016, salaries and employee benefit costs totaled \$17.4 million and \$33.8 million, respectively, up by \$1.9 million, or 12%, and \$2.8 million, or 9%, respectively, compared to the same periods in 2015. Excluding costs attributable to Halsey, which was acquired on August 1, 2015, and severance costs of \$425 thousand incurred in the second quarter of 2016, total salaries and employee benefit costs were up by \$1.1 million, or 7%, and \$1.7 million, or 5%, respectively. These increases were concentrated in our wealth management division and mortgage banking business line.

Amortization of intangibles amounted to \$322 thousand and \$645 thousand, respectively, for three and six months ended June 30, 2016, up by \$166 thousand and \$334 thousand, respectively, from the same periods in 2015, due to the amortization of intangible assets associated with the acquisition of Halsey in August 2015.

Prepayment of FHLBB advances in March 2016 resulted in the recognition of \$431 thousand of debt prepayment penalty expense in the first quarter of 2016. There was no such expense in the second quarter of 2016 and in 2015. See additional discussion under the caption “Sources of Funds and Other Liabilities.”

Acquisition related expenses for both the three and six months ended June 30, 2015 amounted to \$433 thousand associated with the acquisition of Halsey in August 2015. There were no such expenses for the three and six months ended June 30, 2016.

Income Taxes

Income tax expense amounted to \$5.2 million and \$10.6 million, respectively, for the three and six months ended June 30, 2016, compared to \$5.4 million and \$10.6 million, respectively, for the same periods in 2015. The Corporation’s effective tax rate was 31.8% and 32.6%, respectively, for the three and six months ended June 30, 2016, compared to 31.9% for both the three and six months ended June 30, 2015. The effective tax rate for the three months ended June 30, 2016 includes the impact of the non-taxable gain related to the receipt of BOLI proceeds. The overall increase in the effective tax rate for the six months ended June 30, 2016 as compared to the same period in 2015

reflects a higher proportion of taxable income to pre-tax book income.

Financial Condition

Summary

Total assets amounted to \$3.9 billion at June 30, 2016, up by \$145.5 million, or 4%, from the end of 2015, largely reflecting growth in the commercial real estate portfolio and additions to the investment securities portfolio.

- 52-

Nonperforming assets as a percentage of total assets amounted to 0.48% and 0.58%, respectively, at June 30, 2016 and December 31, 2015. Past due loans as a percentage of total loans amounted to 0.56% and 0.58%, respectively, at June 30, 2016 and December 31, 2015.

In 2016, total deposits decreased by \$144.9 million, or 5%, reflecting money market account and demand deposit outflows. FHLBB advances amounted to \$640.0 million, up by \$261.0 million, or 69%, from December 31, 2015.

Shareholders' equity totaled \$388.3 million at June 30, 2016, up by \$12.9 million from the balance at the end of 2015. Capital levels continue to exceed the regulatory minimum levels to be considered well-capitalized, with a total risk-based capital ratio of 12.43% at June 30, 2016, compared to 12.58% at December 31, 2015. See Note 8 to the Unaudited Consolidated Financial Statements for additional discussion on regulatory capital requirements.

Securities

Washington Trust's securities portfolio is managed to generate interest income, to implement interest rate risk management strategies, and to provide a readily available source of liquidity for balance sheet management. Securities are designated as either available for sale, held to maturity or trading at the time of purchase. The Corporation does not currently maintain a portfolio of trading securities. Securities available for sale may be sold in response to changes in market conditions, prepayment risk, rate fluctuations, liquidity, or capital requirements. Securities available for sale are reported at fair value, with any unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of tax, until realized. Securities held to maturity are reported at amortized cost.

Determination of Fair Value

The Corporation uses an independent pricing service to obtain quoted prices. The prices provided by the independent pricing service are generally based on observable market data in active markets. The determination of whether markets are active or inactive is based upon the level of trading activity for a particular security class. The Corporation reviews the independent pricing service's documentation to gain an understanding of the appropriateness of the pricing methodologies. The Corporation also reviews the prices provided by the independent pricing service for reasonableness based upon current trading levels for similar securities. If the prices appear unusual, they are re-examined and the value is either confirmed or revised. In addition, the Corporation periodically performs independent price tests of securities to ensure proper valuation and to verify our understanding of how securities are priced. As of June 30, 2016 and December 31, 2015, the Corporation did not make any adjustments to the prices provided by the pricing service.

Our fair value measurements generally utilize Level 2 inputs, representing quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, and model-derived valuations in which all significant input assumptions are observable in active markets.

See Notes 4 and 10 to the Unaudited Consolidated Financial Statements for additional information regarding the determination of fair value of investment securities.

Securities Portfolio

The carrying amounts of securities held are as follows:

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	%	Amount	%
Securities Available for Sale:				
Obligations of U.S. government-sponsored enterprises	\$72,823	18 %	\$77,015	21 %
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	276,264	68	234,856	61

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

Obligations of states and political subdivisions	26,157	7	36,080	10
Individual name issuer trust preferred debt securities	24,494	6	25,138	7
Corporate bonds	2,011	1	1,955	1
Total securities available for sale	\$401,749	100 %	\$375,044	100 %

- 53-

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	%	Amount	%
Securities Held to Maturity:				
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	\$17,917	100%	\$20,023	100%
Total securities held to maturity	\$17,917	100%	\$20,023	100%

As of June 30, 2016, the securities portfolio totaled \$419.7 million, or 11% of total assets, compared to \$395.1 million, or 10% of total assets, as of December 31, 2015. The largest component of the securities portfolio is mortgage-backed securities, all of which are issued by U.S. government agencies or U.S. government-sponsored enterprises. The securities portfolio increased by \$24.6 million, or 6%, in 2016. See additional disclosure regarding investment activities in the Corporation's Consolidated Statements of Cash Flows.

At June 30, 2016 and December 31, 2015, the net unrealized gain position on securities available for sale and held to maturity amounted to \$5.1 million and \$2.2 million, respectively, and included gross unrealized losses of \$5.4 million and \$5.5 million, respectively. These gross unrealized losses were temporary in nature and concentrated in variable rate trust preferred securities issued by financial services companies.

Obligations of States and Political Subdivisions

The carrying amount of obligations of states and political subdivisions included in our securities portfolio at June 30, 2016 totaled \$26.2 million. The following table presents obligations of states and political subdivisions by geographic location:

(Dollars in thousands)	Amortized	Unrealized	Unrealized	Fair
June 30, 2016	Cost	Gains	Losses	Value
New Jersey	\$16,600	\$216	\$—	\$16,816
New York	3,281	44	—	3,325
Pennsylvania	1,963	14	—	1,977
Arizona	1,290	—	—	1,290
Other	2,710	39	—	2,749
Total	\$25,844	\$313	\$—	\$26,157

The following table presents obligations of states and political subdivisions by category:

(Dollars in thousands)	Amortized	Unrealized	Unrealized	Fair
June 30, 2016	Cost	Gains	Losses	Value
General obligations	\$23,531	\$285	\$—	\$23,816
Revenue obligations (1)	2,313	28	—	2,341
Total	\$25,844	\$313	\$—	\$26,157

(1) Includes water and sewer districts, tax revenue obligations and other.

Washington Trust owns trust preferred security holdings of 7 individual name issuers in the financial services industry. The following table presents information concerning these holdings, including credit ratings. The Corporation's Investment Policy contains rating standards that specifically reference ratings issued by Moody's and S&P.

Individual Name Issuer Trust Preferred Debt Securities

(Dollars in thousands)		June 30, 2016			Credit Ratings		June 30, 2016		Form 10-Q Filing Date

Totals	10	\$29,833	\$24,494	(\$5,339)					

(i) Number of separate issuances, including issuances of acquired institutions.

(ii) Rating is below investment grade.

The Corporation's evaluation of the impairment status of individual name trust preferred securities includes various considerations in addition to the degree of impairment and the duration of impairment. We review the reported regulatory capital ratios of the issuer and, in all cases, the regulatory capital ratios were deemed to be in excess of the regulatory minimums. Credit ratings were also taken into consideration, including ratings in effect as of the reporting period date as well as credit rating changes between the reporting period date and the filing date of this report. We noted no additional downgrades to below investment grade between June 30, 2016 and the filing date of this report. Where available, credit ratings from multiple rating agencies are obtained and rating downgrades are specifically analyzed. Our review process for these credit-sensitive holdings also includes a periodic review of relevant financial information for each issuer, such as quarterly financial reports, press releases and analyst reports. This information is used to evaluate the current and prospective financial condition of the issuer in order to assess the issuer's ability to meet its debt obligations. Through the filing date of this report, each of the individual name issuer securities was current with respect to interest payments. Based on our evaluation of the facts and circumstances relating to each issuer, management concluded that all principal and interest payments for these individual name issuer trust preferred debt securities would be collected according to their contractual terms and it expects to recover the entire amortized cost basis of these securities. Furthermore, Washington Trust does not intend to sell these securities and it is not more-likely-than-not that Washington Trust will be required to sell these securities before recovery of their cost basis, which may be at maturity. Therefore, management does not consider these investments to be other-than-temporarily impaired at June 30, 2016.

Further deterioration in credit quality of the underlying issuers of the securities, further deterioration in the condition of the financial services industry, a continuation or worsening of the current economic environment, or additional declines in real estate values, amount other things, may further affect the fair value of these securities and increase the potential that certain unrealized losses may be designated as other-than-temporary in future periods, and the Corporation may incur write-downs.

Loans

Total loans amounted to \$3.1 billion at June 30, 2016, up by \$67.8 million, or 2%, from the end of 2015, reflecting growth in the commercial real estate loan portfolio.

Commercial Loans

The commercial loan portfolio represented 56% of total loans at June 30, 2016. In making commercial loans, we may occasionally solicit the participation of other banks. Washington Trust also participates in commercial loans originated by other banks. In such cases, these loans are individually underwritten by us using standards similar to those

employed for our self-originated loans. Our participation in commercial loans originated by other banks also includes shared national credits, which are participations in loans or loan commitments of at least \$20.0 million that are shared by three or more banks. Commercial loans fall into two major categories, commercial real estate and commercial and industrial loans. Commercial real estate loans consist of commercial mortgages secured by real property where the primary source of repayment is derived from rental income associated with the property or the proceeds of the sale, refinancing or permanent financing of the property. Commercial real estate loans also include construction loans made to businesses for land development or the on-site construction of industrial, commercial,

or residential buildings. Commercial and industrial loans primarily provide working capital, equipment financing and financing for other business-related purposes. Commercial and industrial loans are frequently collateralized by equipment, inventory, accounts receivable, and/or general business assets. A significant portion of the Bank's commercial and industrial loans is also collateralized by real estate. Commercial and industrial loans also include tax exempt loans made to states and political subdivisions, as well as industrial development or revenue bonds issued through quasi-public corporations for the benefit of a private or non-profit entity where that entity rather than the governmental entity is obligated to pay the debt service.

Commercial Real Estate Loans

Commercial real estate loans amounted to \$1.2 billion at June 30, 2016, up by \$102.3 million, or 10%, from the balance at December 31, 2015. The growth in commercial real estate loans was in large part due to business cultivation efforts with new and existing borrowers, with an emphasis on larger loan balances to borrowers or groups of related borrowers. Included in the end of period commercial real estate amounts were construction and development loans of \$81.8 million and \$122.3 million, respectively, at June 30, 2016 and December 31, 2015.

At June 30, 2016, shared national credit balances outstanding included in the commercial real estate loan portfolio totaled \$20.9 million. All of these loans were included in the pass-rated category of commercial loan credit quality, all payments were current and the loans were performing in accordance with their contractual terms.

Commercial real estate loans are secured by a variety of property types, with approximately 90% of the total at June 30, 2016 composed of office buildings, retail facilities, multi-family dwellings, commercial mixed use, lodging, healthcare facilities and industrial and warehouse properties. The average loan balance outstanding in the portfolio was \$2.2 million and the largest individual commercial real estate loan outstanding was \$27.1 million as of June 30, 2016.

The following table presents a geographic summary of commercial real estate loans, including commercial construction, by property location:

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	% of Total	Amount	% of Total
Rhode Island, Connecticut, Massachusetts	\$1,073,506	93 %	\$959,883	91 %
New York, New Jersey, Pennsylvania	69,872	6	80,989	8
New Hampshire	13,181	1	13,377	1
Total	\$1,156,559	100 %	\$1,054,249	100 %

Commercial and Industrial Loans

Commercial and industrial loans amounted to \$575.7 million at June 30, 2016, down by \$24.6 million from the balance at December 31, 2015.

At June 30, 2016, shared national credit balances outstanding included in the commercial and industrial loan portfolio totaled \$67.1 million. All of these loans were included in the pass-rated category of commercial loan credit quality, all payments were current and the loans were performing in accordance with their contractual terms.

The commercial and industrial loan portfolio includes loans to a variety of business types. Approximately 95% of the total is composed of health care/social assistance, owner occupied and other real estate, manufacturing, retail trade, professional, scientific and technical, transportation and warehousing, entertainment and recreation, finance and insurance, public administration, educational and other services, wholesale trade, accommodation and food services and construction businesses. The average loan balance outstanding in the portfolio was \$450 thousand and the largest individual commercial and industrial loan outstanding was \$21.3 million as of June 30, 2016.

Residential Real Estate Loans

Washington Trust originates residential real estate mortgages within our general market area of Southern New England. Through our residential mortgage lending offices in eastern Massachusetts and Connecticut, our mortgage origination business reaches beyond our bank branch network, which is primarily located in Rhode Island.

- 56-

Residential real estate loans are originated both for sale to the secondary market as well as for retention in the Bank's loan portfolio. We also originate residential real estate loans for various investors in a broker capacity, including conventional mortgages and reverse mortgages.

The table below presents residential real estate loan origination activity:

(Dollars in thousands)

Periods ended June 30,	Three Months		Six Months	
	2016	2015	2016	2015
Originations for retention in portfolio	\$54,080	\$65,134	\$101,626	\$119,809
Originations for sale to the secondary market (1)	154,043	134,360	244,501	263,356
Total	\$208,123	\$199,494	\$346,127	\$383,165

(1) Also includes loans originated in a broker capacity.

Loans are sold with servicing retained or released. The table below presents residential real estate loan sales activity:

(Dollars in thousands)

Periods ended June 30,	Three Months		Six Months	
	2016	2015	2016	2015
Loans sold with servicing rights retained	\$45,804	\$32,693	\$72,258	\$79,949
Loans sold with servicing rights released (1)	93,239	110,484	172,746	191,125
Total	\$139,043	\$143,177	\$245,004	\$271,074

(1) Also includes loans originated in a broker capacity.

Loans sold with the retention of servicing result in the capitalization of servicing rights. Loan servicing rights are included in other assets and are subsequently amortized as an offset to mortgage banking revenues over the estimated period of servicing. The net balance of capitalized servicing rights amounted to \$3.3 million at both June 30, 2016 and December 31, 2015. The balance of residential mortgage loans serviced for others, which are not included in the Consolidated Balance Sheets, amounted to \$488.6 million and \$458.6 million, respectively, as of June 30, 2016 and December 31, 2015.

Residential real estate loans held in portfolio amounted to \$1.0 billion at June 30, 2016, down by \$8.5 million, or 1%, from the balance at December 31, 2015. Included in the residential real estate loan portfolio were purchased residential mortgage balances totaling \$41.5 million and \$27.5 million, respectively, as of June 30, 2016 and December 31, 2015. In the second quarter of 2016, the Corporation purchased \$16.1 million of residential mortgages. These loans were individually evaluated to Washington Trust's underwriting standards and are predominantly secured by properties located in Massachusetts.

The following is a geographic summary of residential real estate mortgages by property location:

(Dollars in thousands)

	June 30, 2016		December 31, 2015	
	Amount	% of Total	Amount	% of Total
Rhode Island, Connecticut, Massachusetts	\$989,085	98.5 %	\$995,743	98.2 %
New Hampshire, Vermont	9,500	0.9	10,186	1.0
New York, Virginia, New Jersey, Maryland, Pennsylvania	3,434	0.3	4,163	0.4
Ohio	1,132	0.1	1,557	0.2
Other	1,885	0.2	1,906	0.2
Total	\$1,005,036	100.0 %	\$1,013,555	100.0 %

Consumer Loans

Consumer loans include home equity loans and lines of credit and personal installment loans. Washington Trust also purchases loans to individuals secured by general aviation aircraft.

The consumer loan portfolio totaled \$343.6 million at June 30, 2016, down by \$1.4 million from December 31, 2015. Home equity lines and home equity loans represented 87% of the total consumer portfolio at June 30, 2016. The Bank estimates that approximately 65% of the combined home equity line and home equity loan balances are first lien positions or subordinate to other Washington Trust mortgages. Purchased consumer loans amounted to \$30.5 million and \$34.5 million, respectively, at June 30, 2016 and December 31, 2015.

Asset Quality

Nonperforming Assets

Nonperforming assets include nonaccrual loans and property acquired through foreclosure or repossession.

The following table presents nonperforming assets and additional asset quality data:

(Dollars in thousands)	Jun 30, 2016	Dec 31, 2015		
Nonaccrual loans:				
Commercial mortgages	\$4,054	\$5,711		
Commercial construction & development	—	—		
Commercial & industrial	1,204	3,018		
Residential real estate mortgages	10,409	10,666		
Consumer	1,581	1,652		
Total nonaccrual loans	17,248	21,047		
Property acquired through foreclosure or repossession, net	1,515	716		
Total nonperforming assets	\$18,763	\$21,763		
Nonperforming assets to total assets	0.48	% 0.58	%	
Nonperforming loans to total loans	0.56	% 0.70	%	
Total past due loans to total loans	0.56	% 0.58	%	
Accruing loans 90 days or more past due	\$—	\$—		

Nonperforming assets totaled \$18.8 million, or 0.48% of total assets, at June 30, 2016, down from \$21.8 million, or 0.58% of total assets, at December 31, 2015.

Property acquired through foreclosure or repossession amounted to \$1.5 million at June 30, 2016 and consisted of 2 residential properties and 2 commercial properties.

Nonaccrual Loans

During the six months ended June 30, 2016, the Corporation made no changes in its practices or policies concerning the placement of loans into nonaccrual status. There were no significant commitments to lend additional funds to borrowers whose loans were on nonaccrual status at June 30, 2016.

The following table presents additional detail on nonaccrual loans:

(Dollars in thousands)	June 30, 2016				December 31, 2015			
	Days Past Due				Days Past Due			
	Over 90	Under 90	Total	% (1)	Over 90	Under 90	Total	% (1)
Commercial mortgages	\$4,054	\$—	\$4,054	0.38 %	\$4,504	\$1,207	\$5,711	0.61 %
Commercial construction & development	—	—	—	—	—	—	—	—
Commercial & industrial	1,197	7	1,204	0.21	48	2,970	3,018	0.50
Residential real estate mortgages	3,927	6,482	10,409	1.04	3,294	7,372	10,666	1.05
Consumer	444	1,137	1,581	0.46	740	912	1,652	0.48
Total nonaccrual loans	\$9,622	\$7,626	\$17,248	0.56 %	\$8,586	\$12,461	\$21,047	0.70 %

(1) Percentage of nonaccrual loans to the total loans outstanding within the respective category.

As of June 30, 2016, the composition of nonaccrual loans was 30% commercial and 70% residential and consumer, compared to 41% and 59%, respectively, at December 31, 2015.

Nonaccrual commercial mortgage loans amounted to \$4.1 million at June 30, 2016, down by \$1.7 million from the balance at the end of 2015. This decline was largely due to the recognition of a \$1.2 million charge-off in the first quarter of 2016 on one commercial loan. See additional disclosure about this loan below under the caption “Troubled Debt Restructurings.” As of June 30, 2016, the balance of nonaccrual commercial mortgages was comprised of one troubled debt restructured loan, which was classified into nonaccrual status in the third quarter of 2014 because the borrower failed to perform in accordance with the terms of the restructuring. This loan is secured by commercial mixed use property in Connecticut and is collateral dependent. Based on the estimated fair value of the underlying collateral, a \$119 thousand loss allocation was deemed necessary at June 30, 2016.

Nonaccrual commercial and industrial loans amounted to \$1.2 million at June 30, 2016, down by \$1.8 million from the balance at the end of 2015. This decline included the recognition of a \$737 thousand charge-off in the second quarter of 2016 on one commercial and industrial loan. A substantial portion of the loss exposure associated with this charge-off was recognized prior to 2016.

Nonaccrual residential real estate mortgage loans totaled \$10.4 million at June 30, 2016, down by \$257 thousand from the balance at the end of 2015. As of June 30, 2016, the balance of nonaccrual residential mortgage loans was predominately secured by properties in Rhode Island, Connecticut and Massachusetts. Included in total nonaccrual residential mortgages at June 30, 2016 were 8 loans purchased for portfolio and serviced by others amounting to \$2.1 million. Management monitors the collection efforts of its third party servicers as part of its assessment of the collectibility of nonperforming loans.

Past Due Loans

The following table presents past due loans by category:

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	% (1)	Amount	% (1)
Commercial mortgages	\$4,062	0.38 %	\$4,555	0.49 %
Commercial construction & development	—	—	—	—
Commercial & industrial	1,978	0.34	462	0.08
Residential real estate mortgages	8,893	0.88	9,286	0.92
Consumer loans	2,201	0.64	3,256	0.94
Total past due loans	\$17,134	0.56 %	\$17,559	0.58 %

(1) Percentage of past due loans to the total loans outstanding within the respective category.

As of June 30, 2016, total past due loans amounted to \$17.1 million, or 0.56% of total loans, compared to \$17.6 million, or 0.58%, at December 31, 2015. Included in past due loans as of June 30, 2016 and December 31, 2015 were nonaccrual loans of \$13.2 million and \$13.6 million, respectively. All loans 90 days or more past due at June 30, 2016 and December 31, 2015 were classified as nonaccrual.

As of June 30, 2016, the composition of past due loans was 35% commercial and 65% residential and consumer, compared to 29% and 71%, respectively at December 31, 2015. The increase in commercial past due loans included a commercial and industrial loan relationship consisting of 3 loans with a total carrying value of \$590 thousand that became past due in the second quarter of 2016.

Troubled Debt Restructurings

Loans are considered restructured in a troubled debt restructuring when the Corporation has granted concessions to a borrower due to the borrower's financial condition that it otherwise would not have considered. These concessions include modifications of the terms of the debt such as reduction of the stated interest rate other than normal market rate adjustments, extension of maturity dates, or reduction of principal balance or accrued interest. The decision to restructure a loan, versus aggressively enforcing the collection of the loan, may benefit the Corporation by increasing the ultimate probability of collection.

Restructured loans are classified as accruing or non-accruing based on management's assessment of the collectability of the loan. Loans which are already on nonaccrual status at the time of the restructuring generally remain on nonaccrual status for approximately six months before management considers such loans for return to accruing status. Accruing restructured loans are placed into nonaccrual status if and when the borrower fails to comply with the restructured terms and management deems it unlikely that the borrower will return to a status of compliance in the near term.

Troubled debt restructurings are reported as such for at least one year from the date of the restructuring. In years after the restructuring, troubled debt restructured loans are removed from this classification if the restructuring did not involve a below-market rate concession and the loan is not deemed to be impaired based on the terms specified in the restructuring agreement. As of June 30, 2016, there were no significant commitments to lend additional funds to borrowers whose loans had been restructured.

The following table sets forth information on troubled debt restructured loans as of the dates indicated. The amounts below consist of unpaid principal balance, net of charge-offs and unamortized deferred loan origination fees and costs. Accrued interest is not included in the carrying amounts set forth below. See Note 5 to the Unaudited Consolidated Financial Statements for additional information.

(Dollars in thousands)	Jun 30, 2016	Dec 31, 2015
Accruing troubled debt restructured loans:		
Commercial mortgages	\$9,427	\$9,430
Commercial & industrial	802	853
Residential real estate mortgages	3,928	669
Consumer	111	228
Accruing troubled debt restructured loans	14,268	11,180
Nonaccrual troubled debt restructured loans:		
Commercial mortgages	4,054	5,296
Commercial & industrial	1,010	1,371
Residential real estate mortgages	575	596
Consumer	110	—
Nonaccrual troubled debt restructured loans	5,749	7,263
Total troubled debt restructured loans	\$20,017	\$18,443

Loans classified as troubled debt restructurings amounted to \$20.0 million and \$18.4 million, respectively, at June 30, 2016 and December 31, 2015. The allowance for loans losses included specific reserves for troubled debt restructurings of \$848 thousand and \$1.8 million, respectively, at June 30, 2016 and December 31, 2015.

- 60-

As of June 30, 2016, 85% of troubled debt restructured loans consisted of 4 relationships. The largest troubled debt restructured relationship at June 30, 2016 consisted of 2 commercial mortgage loans with a carrying value of \$8.2 million, secured by mixed use properties. The restructuring took place in 2013 and included a modification of certain payment terms and a below-market rate concession for a temporary period. A third loan in this relationship was on nonaccrual status at December 31, 2015 with a carrying value at that time of \$1.2 million. A loss allocation for the full amount of this loan was provided for in the allowance for loan losses as of December 31, 2015. During the first quarter of 2016, this loan was fully charged-off. The second largest troubled debt restructured relationship consisted of a nonaccrual commercial mortgage with a carrying value of \$4.1 million at June 30, 2016, secured by commercial property. The restructuring took place in 2013 and included a modification of certain payment terms and a below-market rate concession for a temporary period. See additional disclosure about this relationship above under the caption "Nonaccrual Loans." The third largest troubled debt restructured relationship consisted of an accruing residential real estate mortgage with a carrying value of \$3.5 million at June 30, 2016. The restructuring took place in the second quarter of 2016 and included interest only payments for a temporary period of time. The fourth largest troubled debt restructured relationship consisted of an accruing commercial mortgage with a carrying value of \$1.2 million at June 30, 2016, secured by a commercial office property. The restructuring took place in the third quarter of 2015 and included a modification of certain payment terms.

Potential Problem Loans

The Corporation classifies certain loans as "substandard," "doubtful," or "loss" based on criteria consistent with guidelines provided by banking regulators. Potential problem loans consist of classified accruing commercial loans that were less than 90 days past due at June 30, 2016 and other loans for which known information about possible credit problems of the related borrowers causes management to have doubts as to the ability of such borrowers to comply with the present loan repayment terms and which may result in disclosure of such loans as nonperforming at some time in the future. These loans are not included in the amounts of nonaccrual or restructured loans presented above. Management cannot predict the extent to which economic conditions or other factors may impact borrowers and the potential problem loans. Accordingly, there can be no assurance that other loans will not become 90 days or more past due, be placed on nonaccrual, become restructured, or require increased allowance coverage and provision for loan losses. The Corporation has identified approximately \$7.9 million in potential problem loans at June 30, 2016, primarily comprised of one commercial and industrial relationship with a carrying value of \$6.5 million. Management considers this relationship to be well-secured and it was current with respect to payment terms at June 30, 2016. Potential problem loans are assessed for loss exposure using the methods described in Note 5 to the Unaudited Consolidated Financial Statements under the caption "Credit Quality Indicators."

Allowance for Loan Losses

Establishing an appropriate level of allowance for loan losses necessarily involves a high degree of judgment. The Corporation uses a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio for purposes of establishing a sufficient allowance for loan losses. See additional discussion regarding the allowance for loan losses, in Item 7 under the caption "Critical Accounting Policies and Estimates" of Washington Trust's Annual Report on Form 10-K for the fiscal year ended December 31, 2015 and in Note 6 to the Unaudited Consolidated Financial Statements.

The allowance for loan losses is management's best estimate of probable loan losses inherent in the loan portfolio as of the balance sheet date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged off, and is reduced by charge-offs on loans. The status of nonaccrual loans, delinquent loans and performing loans were all taken into consideration in the assessment of the adequacy of the allowance for loans losses. In addition, the balance and trends of credit quality indicators, including the commercial loan categories of Pass, Special Mention and Classified, are integrated into the process used to determine the allocation of loss exposure. See Note 5 to the Unaudited Consolidated Financial Statements under the caption "Credit Quality Indicators" for additional information. Management believes that the level of allowance for loan losses at June 30, 2016 is adequate and

consistent with asset quality and delinquency indicators. Management will continue to assess the adequacy of the allowance for loan losses in accordance with its established policies.

The Bank's general practice is to identify problem credits early and recognize full or partial charge-offs as promptly as practicable when it is determined that the collection of loan principal is unlikely. The Bank recognizes full or partial charge-offs on collateral dependent impaired loans when the collateral is deemed to be insufficient to support the carrying value of the loan. The Bank does not recognize a recovery when an updated appraisal indicates a subsequent increase in value.

Appraisals are generally obtained with values determined on an "as is" basis from independent appraisal firms for real estate collateral dependent commercial loans in the process of collection or when warranted by other deterioration in the borrower's

credit status. Updates to appraisals are generally obtained for troubled or nonaccrual loans or when management believes it is warranted. The Corporation has continued to maintain appropriate professional standards regarding the professional qualifications of appraisers and has an internal review process to monitor the quality of appraisals.

For residential mortgages and real estate collateral dependent consumer loans that are in the process of collection, valuations are obtained from independent appraisal firms with values determined on an “as is” basis.

The estimation of loan loss exposure inherent in the loan portfolio includes, among other procedures, the identification of loss allocations for individual loans deemed to be impaired; and the application of loss allocation factors for non-impaired loans based on historical loss experience and estimated loss emergence period, with adjustments for various exposures that management believes are not adequately represented by historical loss experience.

The following is a summary of impaired loans by measurement type:

(Dollars in thousands)	Jun 30, Dec 31,	
	2016	2015
Collateral dependent impaired loans (1)	\$28,210	\$26,998
Impaired loans measured on discounted cash flow method (2)	3,306	5,228
Total impaired loans	\$31,516	\$32,226

(1) Net of partial charge-offs of \$1.1 million and \$1.4 million, respectively, at June 30, 2016 and December 31, 2015.

(2) Net of partial charge-offs of \$20 thousand and \$114 thousand, respectively, at June 30, 2016 and December 31, 2015.

Various loan loss allowance coverage ratios are affected by the timing and extent of charge-offs, particularly with respect to impaired collateral dependent loans. For such loans, the Bank generally recognizes a partial charge-off equal to the identified loss exposure; therefore, the remaining allocation of loss is minimal.

The following table presents additional detail on the Corporation’s loan portfolio and associated allowance for loan losses:

(Dollars in thousands)	June 30, 2016				December 31, 2015			
	Loans	Related Allowance	Allowance / Loans		Loans	Related Allowance	Allowance / Loans	
Impaired loans individually evaluated for impairment	\$31,516	\$1,011	3.21	%	\$32,226	\$2,583	8.02	%
Loans collectively evaluated for impairment	3,049,368	24,815	0.81		2,980,901	24,486	0.82	
Total	\$3,080,884	\$25,826	0.84	%	\$3,013,127	\$27,069	0.90	%

Based on management’s assessment of loss exposure, as well as loan loss allocations commensurate with growth in the loan portfolio, a loan loss provision totaling \$450 thousand and \$950 thousand, respectively, was charged to earnings for the three and six months ended June 30, 2016, compared to \$100 thousand for both the three and six months ended June 30, 2015. Net charge-offs were \$761 thousand and \$2.2 million, respectively, for the three and six months ended June 30, 2016. These amounts included a \$737 thousand charge-off recognized in the second quarter of 2016 on one commercial and industrial loan and a \$1.2 million charge-off recognized on one commercial mortgage relationship that was recognized in the first quarter of 2016. Net-charge offs for the same periods in 2015 were \$323 thousand and \$536 thousand, respectively.

As of June 30, 2016, the allowance for loan losses was \$25.8 million, or 0.84% of total loans, compared to \$27.1 million, or 0.90% of total loans, at December 31, 2015. The ratio of allowance for loan losses to total loans includes the impact of loan charge-offs for which loss exposure had been allocated prior to 2016.

The following table presents the allocation of the allowance for loan losses. The allocation below is neither indicative of the specific amounts or the loan categories in which future charge-offs may occur, nor is it an indicator of any future loss trends.

(Dollars in thousands)	June 30, 2016		December 31, 2015	
	Amount	% (1)	Amount	% (1)
Commercial:				
Mortgages	\$10,413	35 %	\$9,140	31 %
Construction & development	904	3	1,758	4
Commercial & industrial	6,520	18	8,202	20
Residential real estate:				
Mortgage	5,292	32	5,265	33
Homeowner construction	177	1	195	1
Consumer	2,520	11	2,509	11
Balance at end of period	\$25,826	100%	\$27,069	100%

(1) Percentage of loans within the respective category to total loans outstanding.

Sources of Funds and Other Liabilities

Our sources of funds include deposits, brokered time certificates of deposit, FHLBB borrowings, other borrowings and proceeds from the sales, maturities and payments of loans and investment securities. Washington Trust uses funds to originate and purchase loans, purchase investment securities, conduct operations, expand the branch network and pay dividends to shareholders.

Management's preferred strategy for funding asset growth is to grow low-cost deposits, including demand deposits, NOW and savings accounts. Asset growth in excess of low-cost deposits is typically funded through higher-cost deposits (including certificates of deposit and money market accounts), brokered time certificates of deposit, FHLBB borrowings and securities portfolio cash flow.

Deposits

Washington Trust offers a wide variety of deposit products to consumer and business customers. Deposits provide an important source of funding for the Bank as well as an ongoing stream of fee revenue.

Washington Trust is a participant in the Insured Cash Sweep ("ICS") program, Demand Deposit Marketplace ("DDM") program, and the Certificate of Deposit Account Registry Service ("CDARS") program. Washington Trust uses these deposit sweep services to place customer funds into interest-bearing demand accounts, money market accounts, and/or time certificates of deposit issued by other participating banks. Customer funds are placed at one or more participating banks to ensure that each deposit customer is eligible for the full amount of FDIC insurance. As a program participant, we receive reciprocal amounts of deposits from other participating banks. ICS, DDM and CDARS deposits are considered to be brokered deposits for bank regulatory purposes. We consider these reciprocal deposit balances to be in-market deposits as distinguished from traditional out-of-market brokered deposits.

Total deposits amounted to \$2.8 billion at June 30, 2016, down by \$144.9 million, or 5%, from December 31, 2015. This included a net decrease of \$8.4 million of out-of-market brokered time certificates of deposit. Excluding out-of-market brokered time certificates of deposit, in-market deposits were down by \$136.5 million, or 5%, from the balance at December 31, 2015. The largest declines were in money market account balances and to a lesser extent in demand deposits.

Demand deposits totaled \$512.3 million at June 30, 2016, down by \$25.0 million, or 5%, from December 31, 2015. Money market accounts totaled \$675.9 million at June 30, 2016, down by \$147.6 million, or 18%, from December 31, 2015. These declines are largely due to outflows associated with the periodic business cycles of various educational,

governmental and institutional depositors.

NOW account balances totaled \$414.5 million at June 30, 2016, up by \$1.9 million, from December 31, 2015. Savings accounts increased by \$15.6 million, or 5%, from December 31, 2015 and amounted to \$342.6 million at June 30, 2016.

- 63-

Time deposits amounted to \$844.0 million at June 30, 2016, up by \$10.1 million, or 1%, from December 31, 2015. Included in time deposits at June 30, 2016 were out-of-market wholesale brokered time certificates of deposit of \$294.1 million, which were down by \$8.4 million from the balance at December 31, 2015. Excluding out-of-market brokered certificates of deposit, in-market time deposits totaled \$549.9 million at June 30, 2016, up by \$18.5 million, or 3%, from December 31, 2015.

Borrowings

The Corporation utilizes advances from the FHLBB as well as other borrowings as part of its overall funding strategy. FHLBB advances are used to meet short-term liquidity needs and also to fund additions to the securities portfolio and loan growth. FHLBB advances amounted to \$640.0 million at June 30, 2016, up by \$261.0 million from the balance at the end of 2015.

In February 2016, FHLBB advances totaling \$59.4 million with original maturity dates ranging from 2017 to 2019 were modified to 2020 to 2023. The original weighted average interest rate was 3.48% and was revised to 3.01%.

In March 2016, FHLBB advances totaling \$10.0 million were prepaid, resulting in debt prepayment penalty expense of \$431 thousand. The weighted average rate of these advances was 2.72% with a weighted average remaining term of 32 months. These were replaced with \$10.0 million of brokered time certificates of deposits with an 18-month maturity and a fixed interest rate of 0.95%. Net interest savings of \$132 thousand for the remainder of 2016 are expected as a result of the extinguishment of the FHLBB advances.

Defined Benefit Pension Plan Obligations

The Corporation maintains a tax-qualified defined benefit pension plan and non-qualified retirement plans, as more fully described in Note 11 to the Unaudited Consolidated Financial Statements.

As of June 30, 2016, the funded status of the qualified defined benefit pension plan amounted to \$6.6 million and was included in other assets in the Consolidated Balance Sheet. As of December 31, 2015, the unfunded status of this qualified plan amounted to \$1.8 million and was included in other liabilities. The change in funded status of the qualified plan was due to a plan contribution made in the first quarter of 2016.

Non-qualified defined benefit retirement plan obligations were \$12.9 million and \$13.0 million, respectively, at June 30, 2016 and December 31, 2015 and were included in other liabilities. In accordance with the terms of these non-qualified plans, securities available for sale and other short-term investments with a carrying value of \$12.2 million and \$12.3 million, respectively, at June 30, 2016 and December 31, 2015 have been designated in rabbi trusts to be used for future benefit payments associated with these plans.

Pension benefit costs and benefit obligations incorporate various actuarial and other assumptions, including discount rates, mortality, rates of return on plan assets and compensation increases. Washington Trust evaluates these assumptions annually.

Prior to 2016, a single weighted-average discount rate was used to calculate interest and service cost components of net periodic benefit cost. For 2016, Washington Trust utilizes a "spot rate approach" in the calculation of interest and service cost. See additional disclosure regarding this change in accounting estimate in Note 11 to the Unaudited Consolidated Financial Statements.

The Corporation expects full-year 2016 defined benefit plan costs to decrease by \$1.2 million, compared to full-year 2015. This decrease primarily reflects an increase in the discount rate, a higher level of plan assets and a change to the "spot rate approach." Approximately \$515 thousand of the expected decrease in full-year 2016 defined benefit plan costs is attributable to the implementation of the "spot rate approach." Pension plan expense for the three and six months ended June 30, 2016 decreased by \$301 thousand and \$601 thousand, respectively, compared to the same periods in

2015.

Liquidity and Capital Resources

Liquidity Management

Liquidity is the ability of a financial institution to meet maturing liability obligations and customer loan demand. Washington Trust's primary source of liquidity is deposits, which funded approximately 66% of total average assets in the six months ended June 30, 2016. While the generally preferred funding strategy is to attract and retain low cost deposits, the ability to do so is affected by competitive interest rates and terms in the marketplace. Other sources of funding include discretionary use of purchased liabilities (e.g., FHLBB term advances and brokered time certificates of deposit), cash flows from the Corporation's securities portfolios and loan repayments. Securities designated as available for sale may also be sold in response to short-term or long-term liquidity needs although management has no intention to do so at this time. For a more detailed discussion on

- 64-

Washington Trust's detailed liquidity funding policy and contingency funding plan, see additional information in Item 7 under the caption "Liquidity and Capital Resources" of Washington Trust's Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

The Asset/Liability Committee ("ALCO") establishes and monitors internal liquidity measures to manage liquidity exposure. Liquidity remained well within target ranges established by the ALCO during the six months ended June 30, 2016. Based on its assessment of the liquidity considerations described above, management believes the Corporation's sources of funding meets anticipated funding needs.

For the six months ended June 30, 2016, net cash provided by financing activities amounted to \$104.3 million, as net cash inflows provided by FHLBB advances were offset, in part, by deposit outflows and cash dividends paid. Net cash used in investing activities totaled \$102.6 million for the six months ended June 30, 2016. The most significant elements of cash flow within investing activities were net outflows related to additions to the loan portfolio, as well as purchases of debt securities and FHLBB stock, partially offset by net inflows from maturities, calls and principal repayments of debt securities. Net cash provided by operating activities amounted to \$20.7 million for the six months ended June 30, 2016. Net income totaled \$22.0 million in the first six months of 2016 and the most significant adjustments to reconcile net income to net cash provided by operating activities pertained to mortgage banking activities. See the Corporation's Consolidated Statements of Cash Flows for further information about sources and uses of cash.

Capital Resources

Total shareholders' equity amounted to \$388.3 million at June 30, 2016, up by \$12.9 million from December 31, 2015, including net income of \$22.0 million and a reduction of \$12.4 million for dividend declarations.

On May 10, 2016, the shareholders of the Corporation approved an increase in the number of common stock shares authorized for issuance from 30 million to 60 million shares.

The ratio of total equity to total assets amounted to 9.91% at June 30, 2016 compared to a ratio of 9.95% at December 31, 2015. Book value per share at June 30, 2016 and December 31, 2015 amounted to \$22.73 and \$22.06, respectively.

The Bancorp and the Bank are subject to various regulatory capital requirements. As of June 30, 2016, the Bancorp and the Bank exceeded the regulatory minimum levels to be considered "well-capitalized."

See Note 8 to the Unaudited Consolidated Financial Statements for additional discussion of regulatory capital requirements.

Off-Balance Sheet Arrangements

For additional information on derivative financial instruments and financial instruments with off-balance sheet risk see Notes 9 and 16 to the Unaudited Consolidated Financial Statements.

Asset/Liability Management and Interest Rate Risk

Interest rate risk is the primary market risk category associated with the Corporation's operations. Interest rate risk is the risk of loss to future earnings due to changes in interest rates. The ALCO is responsible for establishing policy guidelines on liquidity and acceptable exposure to interest rate risk. Periodically, the ALCO reports on the status of liquidity and interest rate risk matters to the Bank's Board of Directors. The objective of the ALCO is to manage assets and funding sources to produce results that are consistent with Washington Trust's liquidity, capital adequacy, growth, risk and profitability goals.

The ALCO manages the Corporation's interest rate risk using income simulation to measure interest rate risk inherent in the Corporation's on-balance sheet and off-balance sheet financial instruments at a given point in time by showing the effect of interest rate shifts on net interest income over a 12-month horizon, the 13- to 24-month horizon and a 60-month horizon. The simulations assume that the size and general composition of the Corporation's balance sheet remain static over the simulation horizons, with the exception of certain deposit mix shifts from low-cost core savings to higher-cost time deposits in selected interest rate scenarios. Additionally, the simulations take into account the specific repricing, maturity, call options, and prepayment characteristics of differing financial instruments that may vary under different interest rate scenarios. The characteristics of financial instrument classes are reviewed periodically by the ALCO to ensure their accuracy and consistency.

The ALCO reviews simulation results to determine whether the Corporation's exposure to a decline in net interest income remains within established tolerance levels over the simulation horizons and to develop appropriate strategies to manage this exposure. As

of June 30, 2016 and December 31, 2015, net interest income simulations indicated that exposure to changing interest rates over the simulation horizons remained within tolerance levels established by the Corporation. The Corporation defines maximum unfavorable net interest income exposure to be a change of no more than 5% in net interest income over the first 12 months, no more than 10% over the second 12 months, and no more than 10% over the full 60-month simulation horizon. All changes are measured in comparison to the projected net interest income that would result from an “unchanged” rate scenario where both interest rates and the composition of the Corporation’s balance sheet remain stable for a 60-month period. In addition to measuring the change in net interest income as compared to an unchanged interest rate scenario, the ALCO also measures the trend of both net interest income and net interest margin over a 60-month horizon to ensure the stability and adequacy of this source of earnings in different interest rate scenarios.

The ALCO regularly reviews a wide variety of interest rate shift scenario results to evaluate interest risk exposure, including scenarios showing the effect of steepening or flattening changes in the yield curve of up to 500 basis points as well as parallel changes in interest rates of up to 400 basis points. Because income simulations assume that the Corporation’s balance sheet will remain static over the simulation horizon, the results do not reflect adjustments in strategy that the ALCO could implement in response to rate shifts.

The following table sets forth the estimated change in net interest income from an unchanged interest rate scenario over the periods indicated for parallel changes in market interest rates using the Corporation’s on- and off-balance sheet financial instruments as of June 30, 2016 and December 31, 2015. Interest rates are assumed to shift by a parallel 100, 200 or 300 basis points upward or 100 basis points downward over a 12-month period, except for core savings deposits, which are assumed to shift by lesser amounts due to their relative historical insensitivity to market interest rate movements. Further, deposits are assumed to have certain minimum rate levels below which they will not fall. It should be noted that the rate scenarios shown do not necessarily reflect the ALCO’s view of the “most likely” change in interest rates over the periods indicated.

	June 30, 2016		December 31, 2015	
	Months 1 - 12	Months 13 - 24	Months 1 - 12	Months 13 - 24
100 basis point rate decrease	(2.97)%	(7.28)%	(2.43)%	(7.13)%
100 basis point rate increase	2.75	3.26	1.92	3.02
200 basis point rate increase	6.08	7.13	4.93	8.18
300 basis point rate increase	9.27	10.71	8.00	13.26

The ALCO estimates that the negative exposure of net interest income to falling rates as compared to an unchanged rate scenario results from a more rapid decline in earning asset yields compared to rates paid on deposits. If market interest rates were to fall from their already low levels and remain lower for a sustained period, certain core savings and time deposit rates could decline more slowly and by a lesser amount than other market rates. Asset yields would likely decline more rapidly than deposit costs as current asset holdings mature or reprice, since cash flow from mortgage-related prepayments and redemption of callable securities would increase as market rates fall.

The positive exposure of net interest income to rising rates as compared to an unchanged rate scenario results from a more rapid projected relative rate of increase in asset yields than funding costs over the near term. For simulation purposes, deposit rate changes are anticipated to lag behind other market rates in both timing and magnitude. The ALCO’s estimate of interest rate risk exposure to rising rate environments, including those involving changes to the shape of the yield curve, incorporates certain assumptions regarding the shift in deposit balances from low-cost core savings categories to higher-cost deposit categories, which has characterized a shift in funding mix during the past rising interest rate cycles.

While the ALCO reviews and updates simulation assumptions and also periodically back-tests the simulation results to ensure that the assumptions are reasonable and current, income simulation may not always prove to be an accurate

indicator of interest rate risk or future net interest margin. Over time, the repricing, maturity and prepayment characteristics of financial instruments and the composition of the Corporation's balance sheet may change to a different degree than estimated. Simulation modeling assumes a static balance sheet, with the exception of certain modeled deposit mix shifts from low-cost core savings deposits to higher-cost time deposits in rising rate scenarios as noted above. Due to the current level of low market interest rates, the banking industry has experienced relatively strong growth in low-cost core savings deposits over the past several years. The ALCO recognizes that a portion of these increased levels of low-cost balances could shift into higher yielding alternatives in the future, particularly if interest rates rise and as confidence in financial markets strengthens, and has modeled increased amounts of deposit shifts out of these low-cost categories into higher-cost alternatives in the rising rate simulation scenarios presented above. Deposit

balances may also be subject to possible outflow to non-bank alternatives in a rising rate environment, which may cause interest rate sensitivity to differ from the results as presented. Another significant simulation assumption is the sensitivity of core savings deposits to fluctuations in interest rates. Income simulation results assume that changes in both core savings deposit rates and balances are related to changes in short-term interest rates. The relationship between short-term interest rate changes and core deposit rate and balance changes may differ from the ALCO's estimates used in income simulation. It should also be noted that the static balance sheet assumption does not necessarily reflect the Corporation's expectation for future balance sheet growth, which is a function of the business environment and customer behavior. Lastly, mortgage-backed securities and mortgage loans involve a level of risk that unforeseen changes in prepayment speeds may cause related cash flows to vary significantly in differing rate environments. Such changes could affect the level of reinvestment risk associated with cash flow from these instruments, as well as their market value. Changes in prepayment speeds could also increase or decrease the amortization of premium or accretion of discounts related to such instruments, thereby affecting interest income.

The Corporation also monitors the potential change in market value of its available for sale debt securities in changing interest rate environments. The purpose is to determine market value exposure that may not be captured by income simulation, but which might result in changes to the Corporation's capital position. Results are calculated using industry-standard analytical techniques and securities data.

The following table summarizes the potential change in market value of the Corporation's available for sale debt securities as of June 30, 2016 and December 31, 2015 resulting from immediate parallel rate shifts:
(Dollars in thousands)

Security Type	Down 100 Basis Points	Up 200 Basis Points
U.S. government sponsored enterprise securities (callable)	\$645	(\$6,034)
Obligations of states and political subdivisions	105	(3,828)
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	11,089	(17,757)
Trust preferred debt and other corporate debt securities	(354)	598
Total change in market value as of June 30, 2016	\$11,485	(\$27,021)
Total change in market value as of December 31, 2015	\$6,350	(\$26,362)

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding quantitative and qualitative disclosures about market risk appears under Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the caption "Asset/Liability Management and Interest Rate Risk."

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, as amended (the "Exchange Act"), the Corporation carried out an evaluation under the supervision and with the participation of the Corporation's management, including the Corporation's principal executive officer and principal financial officer, of the Corporation's disclosure controls and procedures as of the period ended June 30, 2016. Based upon that evaluation, the principal executive officer and principal financial officer concluded that the Corporation's disclosure controls and procedures are effective and designed to ensure that information required to be disclosed by the Corporation in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Corporation's management including its Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosures. The Corporation will continue to review and document its disclosure controls and procedures and

consider such changes in future evaluations of the effectiveness of such controls and procedures, as it deems appropriate.

Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during the period ended June 30, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. In the third quarter of 2015, the Corporation completed its acquisition of Halsey Associates, Inc. The documentation, evaluation and testing of Halsey's internal controls over financial reporting was substantially completed by June 30, 2016. As required, management will include Halsey's internal controls over financial reporting in its assessment of the effectiveness of the Corporation's internal control over financial reporting as of September 30, 2016.

PART II. Other Information

Item 1. Legal Proceedings

The Corporation is involved in various claims and legal proceedings arising out of the ordinary course of business. Management is of the opinion, based on its review with counsel of the development of such matters to date, that the ultimate disposition of such matters will not materially affect the consolidated financial position or results of operations of the Corporation.

Item 1A. Risk Factors

There have been no material changes in the risk factors described in Item 1A to Part I of Washington Trust's Annual Report on Form 10-K for the year ended December 31, 2015.

Item 6. Exhibits

(a) Exhibits. The following exhibits are included as part of this Form 10-Q:
