PARK NATIONAL CORPORATION
NOTES TO UNAUDITED CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation

The accompanying unaudited consolidated condensed financial statements included in this report have been prepared for Park National Corporation (sometimes also referred to as the “Registrant”) and its subsidiaries. Unless the context otherwise requires, references to “Park”, the “Corporation” or the “Company” and similar terms mean Park National Corporation and its subsidiaries. In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of the results of operations for the interim periods included herein have been made. The results of operations for the three-month period ended March 31, 2014 are not necessarily indicative of the operating results to be anticipated for the fiscal year ending December 31, 2014.

The accompanying unaudited consolidated condensed financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and footnotes necessary for a fair presentation of the condensed balance sheets, condensed statements of income, condensed statements of comprehensive income, condensed statements of changes in shareholders’ equity and condensed statements of cash flows in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”). These financial statements should be read in conjunction with the consolidated financial statements incorporated by reference in the Annual Report on Form 10-K of Park for the fiscal year ended December 31, 2013 from Park’s 2013 Annual Report to Shareholders (“2013 Annual Report”).

Park’s significant accounting policies are described in Note 1 of the Notes to Consolidated Financial Statements included in Park’s 2013 Annual Report. For interim reporting purposes, Park follows the same basic accounting policies, as updated by the information contained in this report, and considers each interim period an integral part of an annual period. Management has evaluated events occurring subsequent to the balance sheet date, determining no events required additional disclosure in these consolidated condensed financial statements.

Note 2 – Recent Accounting Pronouncements

ASU 2013-11- Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists: The ASU requires that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, if a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption of this guidance did not have an impact on Park's consolidated statements.

ASU 2014-01- Investments—Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects (a consensus of the FASB Emerging Issues Task Force): In January 2014, FASB issued Accounting Standards Update 2014-01, Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects (a consensus of the FASB Emerging Issues Task Force). The ASU permits reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional

amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense. Additionally, a reporting entity should disclose information that enables users of its financial statement to understand the nature of its investments in qualified affordable housing projects, and the effect of the measurement of its investments in qualified affordable housing projects and the related tax credits on its financial position and results of operations. The new guidance is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2014. The adoption of this guidance will not have a material impact on Park's consolidated financial statements, but may impact the presentation of Park's investments in qualified affordable housing projects. Additionally, the adoption of this guidance will require additional disclosures.

Table of Contents

ASU 2014-04 - Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force): In January 2014, FASB issued Accounting Standards Update 2014-04, Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force). The ASU clarifies when an insubstance repossession or foreclosure occurs and a creditor is considered to have received physical possession of real estate property collateralizing a consumer mortgage loan. Specifically, the new ASU requires a creditor to reclassify a collateralized consumer mortgage loan to real estate property upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. Additional disclosures are required detailing the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgages collateralized by real estate property that are in the process of foreclosure. The new guidance is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2014. The adoption of this guidance will not have a material impact on Park's consolidated financial statements, but will result in additional disclosures.

Management's general practice is to proactively charge down loans individually evaluated for impairment to the fair value of the underlying collateral. At March 31, 2014 and December 31, 2013, there were \$49.2 million and \$58.1 million, respectively, of partial charge-offs on loans individually evaluated for impairment with no related allowance recorded and \$5.1 million and \$5.2 million, respectively, of partial charge-offs on loans individually evaluated for impairment that also had a specific reserve allocated.

The allowance for loan losses included specific reserves related to loans individually evaluated for impairment at March 31, 2014 and December 31, 2013 of \$11.3 million and \$10.5 million, respectively. These loans with specific reserves had a recorded investment of \$24.1 million and \$21.4 million as of March 31, 2014 and December 31, 2013, respectively.

Interest income on loans individually evaluated for impairment is recognized on a cash basis. The following table presents the average recorded investment and interest income recognized on loans individually evaluated for impairment as of and for the three months ended March 31, 2014 and March 31, 2013:

Credit Quality Indicators

Management utilizes past due information as a credit quality indicator across the loan portfolio. Past due information as of March 31, 2014 and December 31, 2013 is included in the tables above. The past due information is the primary credit quality indicator within the following classes of loans: (1) mortgage loans and installment loans in the construction real estate segment; (2) mortgage loans, HELOC and installment loans in the residential real estate segment; and (3) consumer loans. The primary credit indicator for commercial loans is based on an internal grading system that grades all commercial loans from 1 to 8. Credit grades are continuously monitored by the respective loan officer and adjustments are made when appropriate. A grade of 1 indicates little or no credit risk and a grade of 8 is considered a loss. Commercial loans with grades of 1 to 4.5 (pass-rated) are considered to be of acceptable credit risk. Commercial loans graded a 5 (special mention) are considered to be watch list credits and a higher loan loss reserve percentage is allocated to these loans. Loans classified as special mention have potential weaknesses that require management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date. Commercial loans graded 6 (substandard), also considered watch list credits, are considered to represent higher credit risk and, as a result, a higher loan loss reserve percentage is allocated to these loans. Loans classified as substandard are inadequately protected by the current sound worth and paying capacity of the obligor or the value of the collateral pledged, if any. Loans so classified have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that Park will sustain some loss if the deficiencies are not corrected. Commercial loans that are graded a 7 (doubtful) are shown as nonaccrual and Park charges these loans down to their fair value by taking a partial charge-off or recording a specific reserve. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and

improbable. Certain 6-rated loans and all 7-rated loans are included within the impaired category. A loan is deemed impaired when management determines the borrower's ability to perform in accordance with the contractual loan agreement is in doubt. Any commercial loan graded an 8 (loss) is completely charged off.

Troubled Debt Restructurings (TDRs)

Management classifies loans as TDRs when a borrower is experiencing financial difficulties and Park has granted a concession to the borrower as part of a modification or in the loan renewal process. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of the borrower's debt in the foreseeable future without the modification. This evaluation is performed in accordance with the Company's internal underwriting policy. Management's policy is to modify loans by extending the term or by granting a temporary or permanent contractual interest rate below the market rate, not by forgiving debt. Certain loans which were modified during the periods ended March 31, 2014 and March 31, 2013 did not meet the definition of a TDR as the modification was a delay in a payment that was considered to be insignificant. Management considers a forbearance period of up to three months or a delay in payment of up to 30 days to be insignificant. TDRs may be classified as accruing if the borrower has been current for a period of at least six months with respect to loan payments and management expects that the borrower will be able to continue to make payments in accordance with the terms of the restructured note. Management reviews all accruing TDRs quarterly to ensure payments continue to be made in accordance with the modified terms.

Table of Contents

Management reviews renewals/modifications of loans previously identified as TDRs to consider if it is appropriate to remove the TDR classification. If the borrower is no longer experiencing financial difficulty and the renewal/modification does not contain a concessionary interest rate or other concessionary terms, management considers the potential removal of the TDR classification. If deemed appropriate, the TDR classification is removed as the borrower has complied with the terms of the loan at the date of the renewal/modification and there was a reasonable expectation that the borrower would continue to comply with the terms of the loan subsequent to the date of the renewal/modification. The majority of these TDRs were originally considered restructurings in a prior year as a result of a renewal/modification with an interest rate that was not commensurate with the risk of the underlying loan at the time of the renewal/modification. During the three months ended March 31, 2014, Park removed the TDR classification on \$966,000 of loans that met the requirements discussed above. The TDR classification was not removed on any loans during the three months ended March 31, 2013.

At March 31, 2014 and December 31, 2013, there were \$70.7 million and \$76.3 million, respectively, of TDRs included in nonaccrual loan totals. At March 31, 2014 and December 31, 2013, \$27.6 million and \$50.6 million of these nonaccrual TDRs were performing in accordance with the terms of the restructured note. As of March 31, 2014 and December 31, 2013, there were \$18.0 million and \$18.8 million, respectively, of TDRs included in accruing loan totals. Management will continue to review the restructured loans and may determine it appropriate to move certain of the loans back to accrual status in the future.

At March 31, 2014 and December 31, 2013, Park had commitments to lend \$2.7 million and \$4.0 million, respectively, of additional funds to borrowers whose outstanding loan terms had been modified in a TDR.

The specific reserve related to TDRs at March 31, 2014 and December 31, 2013 was \$8.2 million and \$7.5 million, respectively. Modifications made in 2013 and 2014 were largely the result of renewals, extending the maturity date of the loan, at terms consistent with the original note. These modifications were deemed to be TDRs primarily due to Park's conclusion that the borrower would likely not have qualified for similar terms through another lender. Many of the modifications deemed to be TDRs were previously identified as impaired loans, and thus were also previously evaluated for impairment under ASC 310. Additional specific reserves of \$18,000 and \$238,000 were recorded during the three-month periods ended March 31, 2014 and March 31, 2013, respectively, as a result of TDRs identified in the respective year.

The terms of certain other loans were modified/renewed during the three-month periods ended March 31, 2014 and March 31, 2013 that did not meet the definition of a TDR. Modified substandard commercial loans which did not meet the definition of a TDR had a total recorded investment as of March 31, 2014 and March 31, 2013 of \$392,000 and \$800,000, respectively. The renewal/modification of these loans: (1) involved a renewal/modification of the terms of a loan to a borrower who was not experiencing financial difficulties, (2) resulted in a delay in a payment that was considered to be insignificant, or (3) resulted in Park obtaining additional collateral or guarantees that improved the likelihood of the ultimate collection of the loan such that the modification was deemed to be at market terms. Modified consumer loans which did not meet the definition of a TDR had a total recorded investment as of March 31, 2014 and March 31, 2013 of \$5.7 million and \$6.6 million, respectively. Many of these loans were to borrowers who were not experiencing financial difficulties but who were looking to reduce their cost of funds.

Table of Contents

The following tables detail the number of contracts modified as TDRs during the three-month periods ended March 31, 2014 and March 31, 2013, as well as the recorded investment of these contracts at March 31, 2014 and March 31, 2013. The recorded investment pre- and post-modification is generally the same due to the fact that Park does not typically provide for forgiveness of principal.

Of those loans which were modified and determined to be a TDR during the three-month period ended March 31, 2014, \$900,000 were on nonaccrual status as of December 31, 2013. Of those loans which were modified and determined to be a TDR during the three-month period ended March 31, 2013, \$300,000 were on nonaccrual status as of December 31, 2012.

Table of Contents

The following table presents the recorded investment in financing receivables which were modified as TDRs within the previous 12 months and for which there was a payment default during the three-month periods ended March 31, 2014 and March 31, 2013, respectively. For this table, a loan is considered to be in default when it becomes 30 days contractually past due under the modified terms. The additional allowance for loan loss resulting from the defaults on TDR loans was immaterial.

Of the \$7.1 million in modified TDRs which defaulted during the three months ended March 31, 2013, \$768,000 were accruing loans and \$6.3 million were nonaccrual loans.

Note 5 – Allowance for Loan Losses

The allowance for loan losses is that amount management believes is adequate to absorb probable incurred credit losses in the loan portfolio based on management's evaluation of various factors including overall growth in the loan portfolio, an analysis of individual loans, prior and current loss experience, and current economic conditions. A provision for loan losses is charged to operations based on management's periodic evaluation of these and other pertinent factors as discussed within Note 1 of the Notes to Consolidated Financial Statements included in Park's 2013 Annual Report.

With the inclusion of 2013 net charge-off information, management concluded that it was no longer appropriate to calculate the historical average with an even allocation across the five-year period. Rather than apply a 20% allocation to each year in the calculation of the historical annualized loss factor, management determined that it was appropriate to more heavily weight those years with higher losses in the historical loss calculation, given the continued uncertainty in the current economic environment. Specifically, rather than applying equal percentages to each year in the historical loss calculation, management applied more weight to the 2009-2011 periods compared to the 2012 and 2013 periods. Management will update the historical loss factors annually in the fourth quarter, or more frequently as deemed appropriate.

Loans collectively evaluated for impairment in the following tables include all performing loans at March 31, 2014 and December 31, 2013, as well as nonperforming loans internally classified as consumer loans. Nonperforming consumer loans are not typically individually evaluated for impairment, but receive a portion of the statistical allocation of the allowance for loan losses. Loans individually evaluated for impairment include all impaired loans internally classified as commercial loans at March 31, 2014 and December 31, 2013, which are evaluated for impairment in accordance with U.S. GAAP (see Note 1 of the Notes to Consolidated Financial Statements included in Park's 2013 Annual Report).

| Effect of dilutive stock awards (weighted average outstanding) | 13,792 | — |
| Denominator for diluted earnings per share (weighted average common shares outstanding adjusted for the effect of dilutive stock awards) | 15,414,897 | 15,411,990 |
| Earnings per common share: | | |
| Basic earnings per common share | \$1.27 | \$1.34 |
| Diluted earnings per common share | \$1.27 | \$1.34 |

For the three months ended March 31, 2014, Park awarded 21,975 performance - based restricted stock units (PBRUSU's) to employees. The PBRUSU's vest based on service and performance conditions. The dilutive effect of the PBRUSU's was the addition of 13,792 common shares for the three months ended March 31, 2014.

Table of Contents

There were no dilutive shares included in the calculation of diluted earnings per share for the three months ended March 31, 2013.

Note 7 – Segment Information

The Corporation is a financial holding company headquartered in Newark, Ohio. The operating segments for the Corporation are its chartered national bank subsidiary, The Park National Bank (headquartered in Newark, Ohio) (“PNB”), SE Property Holdings, LLC (“SEPH”), and Guardian Financial Services Company (“GFSC”).

Management is required to disclose information about the different types of business activities in which a company engages and also information on the different economic environments in which a company operates, so that the users of the financial statements can better understand the company’s performance, better understand the potential for future cash flows, and make more informed judgments about the company as a whole. Park has three operating segments, as: (i) discrete financial information is available for each operating segment and (ii) the segments are aligned with internal reporting to Park’s Chief Executive Officer and President, who is the chief operating decision maker.

Note 8 – Mortgage Loans Held For Sale

Mortgage loans held for sale are carried at their fair value. At March 31, 2014 and December 31, 2013, respectively, Park had approximately \$3.5 million and \$1.7 million in mortgage loans held for sale. These amounts are included in loans on the consolidated condensed balance sheets and in the residential real estate loan classes in Notes 4 and 5. The contractual balance was \$3.4 million and \$1.6 million at March 31, 2014 and December 31, 2013, respectively. The gain expected upon sale was \$62,000 and \$28,000 at March 31, 2014 and December 31, 2013, respectively. None of these loans were 90 days or more past due or on nonaccrual status as of March 31, 2014 or December 31, 2013.

Note 9 – Investment Securities

The amortized cost and fair values of investment securities are shown in the following table. Management performs a quarterly evaluation of investment securities for any other-than-temporary impairment. For the three months ended March 31, 2014 and 2013, there were no investment securities deemed to be other-than-temporarily impaired.

Investment securities at March 31, 2014, were as follows:

| U.S. Government sponsored entities' asset-backed securities | \$ 5,781 | \$ 42 | \$ — | \$ — | \$ 5,781 | \$ 42 |

Management does not believe any of the unrealized losses at March 31, 2014 or December 31, 2013 represented other-than-temporary impairment. Should the impairment of any of these securities become other-than-temporary, the cost basis of the investment will be reduced and the resulting loss recognized within net income in the period the other-than-temporary impairment is identified.

Park's U.S. Government sponsored entities' asset-backed securities consist primarily of 15-year residential mortgage-backed securities and collateralized mortgage obligations.

Table of Contents

The amortized cost and estimated fair value of investments in debt securities at March 31, 2014, are shown in the following table by contractual maturity or the expected call date, except for asset-backed securities, which are shown as a single total, due to the unpredictability of the timing of principal repayments.

The \$539.0 million of Park's securities shown at fair value in the above table as U.S. Treasury and sponsored entities' obligations are callable notes. These callable securities have final maturities of 8 to 13 years. Of the \$539.0 million reported at March 31, 2014, \$47.9 million were expected to be called and are shown in the table at their expected call date.

There were no sales of investment securities during the three month periods ended March 31, 2014 or 2013.

Note 10 – Other Investment Securities

Other investment securities consist of stock investments in the Federal Home Loan Bank and the Federal Reserve Bank. These restricted stock investments are carried at their redemption value.

Note 11 - Share-Based Compensation

The Park National Corporation 2013 Long-Term Incentive Plan (the "2013 Incentive Plan") was adopted by the Board of Directors of Park on January 28, 2013 and was approved by Park's shareholders at the Annual Meeting of Shareholders on April 22, 2013. The 2013 Incentive Plan replaces Park's 2005 Incentive Stock Option Plan (the "2005 Plan") and Park's Stock Plan for Non-Employee Directors of Park National Corporation and Subsidiaries (the "Directors' Stock Plan") which were terminated immediately following the approval of the 2013 Incentive Plan. The 2013 Incentive Plan makes equity-based awards and cash-based awards available for grant to participants in the form of incentive stock options, nonqualified stock options, stock appreciations rights, restricted common shares, restricted stock awards that may be settled in common shares, cash or a combination of the two, unrestricted common shares and

cash-based awards. Under the 2013 Incentive Plan, 600,000 common shares are authorized to be granted. The common shares to be issued and delivered under the 2013 Incentive Plan may consist of either common shares currently held or common shares subsequently acquired by Park as treasury shares, including common shares purchased in the open market or in private transactions. No awards may be made under the 2013

Table of Contents

Incentive Plan after April 22, 2023. At March 31, 2014, 567,475 common shares were available for future grants under the 2013 Incentive Plan.

On January 24, 2014, the Compensation Committee of the Board of Directors of Park granted awards of 21,975 performance-based restricted stock units (“PBRsUs”) to employees of Park, which grants were effective on January 24, 2014. The number of PBRsUs earned or settled will depend on certain performance conditions and are also subject to service-based vesting.

Share-based compensation expense of \$103,000 was recognized for the three-month period ended March 31, 2014. No share-based compensation expense was recognized in 2013 related to awards to employees.

Note 12 – Pension Plan

Park has a noncontributory defined benefit pension plan covering substantially all of its employees. The plan provides benefits based on an employee’s years of service and compensation.

Park’s funding policy is to contribute annually an amount that can be deducted for federal income tax purposes using a different actuarial cost method and different assumptions from those used for financial reporting purposes. There were no pension plan contributions for the three-month period ended March 31, 2014 and \$12.6 million of contributions for the three-month period ended March 31, 2013.

The following table shows the components of net periodic benefit (income) expense:

| (In thousands) | Three Months Ended | |
|------------------------------------|--------------------|----------------|
| | March 31, 2014 | March 31, 2013 |
| Service cost | \$1,083 | \$1,204 |
| Interest cost | 1,144 | 1,056 |
| Expected return on plan assets | (2,717) | (2,384) |
| Amortization of prior service cost | 5 | 5 |
| Recognized net actuarial loss | — | 676 |
| Benefit (income) expense | \$(485) | \$557 |

Note 13 – Loan Servicing

Park serviced sold mortgage loans of \$1.30 billion at March 31, 2014, compared to \$1.33 billion at December 31, 2013 and \$1.40 billion at March 31, 2013. At March 31, 2014, \$9.3 million of the sold mortgage loans were sold with recourse compared \$10.7 million at December 31, 2013 and \$14.6 million at March 31, 2013. Management closely monitors the delinquency rates on the mortgage loans sold with recourse. At March 31, 2014 and December 31, 2013, management had established reserves of \$813,000 and \$1.0 million, respectively, to account for future loan repurchases.

When Park sells mortgage loans with servicing rights retained, servicing rights are initially recorded at fair value. Park selected the “amortization method” as permissible within U.S. GAAP, whereby the servicing rights capitalized are amortized in proportion to and over the period of estimated future servicing income of the underlying loan. At the end of each reporting period, the carrying value of mortgage servicing rights (“MSRs”) is assessed for impairment with a comparison to fair value. MSRs are carried at the lower of their amortized cost or fair value.

| End of period | \$1,031 | \$2,262 |

Servicing fees included in other service income were \$0.9 million for both the three months ended March 31, 2014 and 2013, respectively.

Note 14 – Fair Value

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that Park uses to measure fair value are as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that Park has the ability to access as of the measurement date.

Level 2: Level 1 inputs for assets or liabilities that are not actively traded. Also consists of an observable market price for a similar asset or liability. This includes the use of “matrix pricing” to value debt securities absent the exclusive use of quoted prices.

Level 3: Consists of unobservable inputs that are used to measure fair value when observable market inputs are not available. This could include the use of internally developed models, financial forecasting and similar inputs.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability between market participants at the balance sheet date. When possible, the Company looks to active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, the Company looks to observable market data for similar assets and liabilities. However, certain assets and liabilities are not traded in observable markets and Park must use other valuation methods to develop a fair value. The fair value of impaired loans is typically based on the fair value of the underlying collateral, which is estimated through third-party appraisals or internal estimates of collateral values in accordance with Park's valuation requirements per its commercial and real estate loan policies.

There were no transfers between Level 1 and Level 2 during 2014 or 2013. Management's policy is to transfer assets or liabilities from one level to another when the methodology to obtain the fair value changes such that there are more or fewer unobservable inputs as of the end of the reporting period.

The following methods and assumptions were used by the Company in determining fair value of the financial assets and liabilities discussed above:

Investment securities: Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. The Fair Value Measurements tables exclude Park's Federal Home Loan Bank stock and Federal Reserve Bank stock. These assets are carried at their respective redemption values, as it is not practicable to calculate their fair values. For securities where quoted prices or market prices of similar securities are not available, which include municipal

securities, fair values are calculated using discounted cash flows.

Fair value swap: The fair value of the swap agreement entered into with the purchaser of the Visa Class B shares represents an internally developed estimate of the exposure based upon probability-weighted potential Visa litigation losses.

Mortgage Interest Rate Lock Commitments (IRLCs): IRLCs are based on current secondary market pricing and are classified as Level 2.

Mortgage loans held for sale: Mortgage loans held for sale are carried at their fair value. Mortgage loans held for sale are estimated using security prices for similar product types and, therefore, are classified in Level 2.

The table below is a reconciliation of the beginning and ending balances of the Level 3 inputs for the three months ended March 31, 2014 and 2013, for financial instruments measured on a recurring basis and classified as Level 3:

Assets and liabilities measured at fair value on a nonrecurring basis:

The following methods and assumptions were used by the Company in determining the fair value of assets and liabilities measured at fair value on a nonrecurring basis described below:

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value have been partially charged-off or receive specific allocations of the allowance for loan losses. For collateral dependent loans, fair value is generally based on real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments result in a Level 3 classification of the inputs for determining fair value. Collateral is then adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly. Additionally, updated valuations are obtained annually for all impaired loans in accordance with Company policy.

Other Real Estate Owned (OREO): Assets acquired through or in lieu of loan foreclosure are initially recorded at fair value less costs to sell when acquired. The carrying value of OREO is not re-measured to fair value on a recurring basis, but is subject to fair value adjustments when the carrying value exceeds the fair value, less estimated selling costs. Fair value is based on recent real estate appraisals and is updated at least annually. These appraisals may utilize a single valuation approach or a combination of approaches including the comparable sales approach and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments result in a Level 3 classification of the inputs for determining fair value.

Table of Contents

Appraisals for both collateral dependent impaired loans and OREO are performed by licensed appraisers. Appraisals are generally obtained to support the fair value of collateral. In general, there are two types of appraisals, real estate appraisals and lot development loan appraisals, received by the Company. These are discussed below:

Real estate appraisals typically incorporate measures such as recent sales prices for comparable properties. Appraisers may make adjustments to the sales prices of the comparable properties as deemed appropriate based on the age, condition or general characteristics of the subject property. Management generally applies a 15% discount to real estate appraised values which management expects will cover all disposition costs (including selling costs). This 15% discount is based on historical discounts to appraised values on sold OREO properties.

Lot development loan appraisals are typically performed using a discounted cash flow analysis. Appraisers determine an anticipated absorption period and a discount rate that takes into account an investor's required rate of return based on recent comparable sales. Management generally applies a 6% discount to lot development appraised values, which is an additional discount above the net present value calculation included in the appraisal, to account for selling costs.

MSRs: MSRs are carried at the lower of cost or fair value. MSRs do not trade in active, open markets with readily observable prices. For example, sales of MSRs do occur, but precise terms and conditions typically are not readily available. As such, management, with the assistance of a third-party specialist, determines fair value based on the discounted value of the future cash flows estimated to be received. Significant inputs include the discount rate and assumed prepayment speeds utilized. The calculated fair value is then compared to market values where possible to ascertain the reasonableness of the valuation in relation to current market expectations for similar products. Accordingly, MSRs are classified as Level 2.

The following tables present assets and liabilities measured at fair value on a nonrecurring basis. Collateral dependent impaired loans are carried at fair value if they have been charged down to fair value or if a specific valuation allowance has been established. A new cost basis is established at the time a property is initially recorded in OREO. OREO properties are carried at fair value if a devaluation has been taken to the property's value subsequent to the initial measurement.

Impaired loans had a recorded investment of \$105.9 million at March 31, 2014, after partial charge-offs of \$54.4 million. Additionally, these impaired loans had a specific valuation allowance of \$11.3 million. Of the \$105.9 million impaired loan portfolio at March 31, 2014, loans with a recorded investment of \$40.9 million were carried at their fair value of \$32.7 million, as a result of charge-offs of \$40.1 million and a specific valuation allowance of \$8.3 million. An additional specific valuation allowance of \$3.0 million at March 31, 2014 was related to loans which were not collateral dependent and were thus not included in the fair value table above. The remaining \$65.0 million of impaired loans were carried at cost, as the fair value of the underlying collateral or present value of expected future cash flows on each of these loans exceeded the recorded investment for each individual credit. At December 31, 2013, impaired loans had a recorded investment of \$112.3 million, after partial charge-offs of \$63.3 million. Additionally, these impaired loans had a specific valuation allowance of \$10.5 million. Of the \$112.3 million impaired loan portfolio at December 31, 2013, loans with a recorded investment of \$41.0 million were carried at their fair value of \$33.8 million as a result of partial charge-offs of \$49.0 million and a specific valuation allowance for those loans carried at fair value of \$7.2 million. An additional specific valuation allowance of \$3.3 million at December 31, 2013 related to loans which were not collateral dependent and were thus not included in the fair value table above. The remaining \$71.3 million of impaired loans at December 31, 2013 were carried at cost. The financial impact of credit adjustments related to impaired loans carried at fair value during the three months ended March 31, 2014 and 2013 was \$2.2 million and \$2.3 million, respectively.

MSRs, which are carried at the lower of cost or fair value, were recorded at \$8.8 million at March 31, 2014. Of the \$8.8 million MSR carrying balance at March 31, 2014, \$2.1 million was recorded at fair value and included a valuation allowance of \$1.0 million. The remaining \$6.7 million was recorded at cost, as the fair value exceeded cost at March 31, 2014. At December 31, 2013, MSRs were recorded at \$9.0 million. Of the \$9.0 million MSR carrying balance at December 31, 2013, \$2.3 million was recorded at fair value and included a valuation allowance of \$1.0 million. The remaining \$6.7 million was recorded at cost, as the fair value exceeded cost at December 31, 2013. There was no income or expense related to MSRs carried at fair value during the three-month period ended March 31, 2014. Income related to MSRs carried at fair value during the three-month period ended March 31, 2013 was \$62,000.

Total OREO held by Park at March 31, 2014 and December 31, 2013 was \$35.1 million and \$34.6 million, respectively. Approximately 50% of OREO held by Park at March 31, 2014 and 53% at December 31, 2013 was

carried at fair value due to fair value adjustments made subsequent to the initial OREO measurement. At March 31, 2014 and December 31, 2013, the estimated fair value of OREO, less estimated selling costs, amounted to \$17.7 million and \$18.5 million, respectively. The net income/(expense) related to OREO fair value adjustments was \$(0.4) million and \$0.4 million for the three-month periods ended March 31, 2014 and 2013, respectively.

The following methods and assumptions were used by the Corporation in estimating its fair value disclosures for assets and liabilities not discussed above:

Cash and cash equivalents: The carrying amounts reported in the consolidated condensed balance sheets for cash and short-term instruments approximate those assets' fair values.

Loans receivable: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values for certain mortgage loans (e.g., one-to-four family residential)

are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. The fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality.

Off-balance sheet instruments: Fair values for the Corporation's loan commitments and standby letters of credit are based on the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The carrying amount and fair value are not material.

Table of Contents

Deposit liabilities: The fair values disclosed for demand deposits (e.g., interest and non-interest checking, savings, and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts for variable-rate, fixed-term certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities of time deposits.

Short-term borrowings: The carrying amounts of federal funds purchased, borrowings under repurchase agreements and other short-term borrowings approximate their fair values.

Long-term debt: Fair values for long-term debt are estimated using a discounted cash flow calculation that applies interest rates currently being offered on long-term debt with a schedule of monthly maturities.

Subordinated debentures and notes: Fair values for subordinated debentures and notes are estimated using a discounted cash flow calculation that applies interest rate spreads currently being offered on similar debt structures with a schedule of monthly maturities.

The fair value of financial instruments at March 31, 2014 and December 31, 2013, was as follows:

ITEM 2 – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Management’s discussion and analysis (“MD&A”) contains forward-looking statements that are provided to assist in the understanding of anticipated future financial performance. Forward-looking statements provide current expectations or forecasts of future events and are not guarantees of future performance. The forward-looking statements are based on management’s expectations and are subject to a number of risks and uncertainties. Although management believes that the expectations reflected in such forward-looking statements are reasonable, actual results may differ materially from those expressed or implied in such statements. Risks and uncertainties that could cause actual results to differ materially include, without limitation: Park's ability to execute its business plan successfully and within the expected timeframe; general economic and financial market conditions, and the uneven spread of positive impacts of the recovery on the economy, specifically in the real estate markets and the credit markets, either nationally or in the states in which Park and its subsidiaries do business, may be worse or slower than expected which could adversely impact the demand for loan, deposit and other financial services as well as loan delinquencies and defaults; changes in interest rates and prices may adversely impact the value of securities, loans, deposits and other financial instruments and the interest rate sensitivity of our consolidated balance sheet; changes in consumer spending, borrowing and saving habits; changes in unemployment; asset/liability repricing risks and liquidity risks; our liquidity requirements could be adversely affected by changes to regulations governing bank capital and liquidity standards as well as by changes in our assets and liabilities; competitive factors among financial services organizations could increase significantly, including product and pricing pressures and our ability to attract, develop and retain qualified bank professionals; the nature, timing and effect of changes in banking regulations or other regulatory or legislative requirements affecting the respective businesses of Park and its subsidiaries, including changes in laws and regulations concerning taxes, accounting, banking, securities and other aspects of the financial services industry, specifically the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”), as well as future regulations which will be adopted by the relevant regulatory agencies, including the Consumer Financial Protection Bureau, to implement the Dodd-Frank Act's provisions, the Budget Control Act of 2011, the American Taxpayer Relief Act of 2012 and the Basel III regulatory capital reforms; the effect of changes in accounting policies and practices, as may be adopted by the Financial Accounting Standards Board, the SEC, the Public Company Accounting Oversight Board and other regulatory agencies, and the accuracy of our assumptions and estimates used to prepare our financial statements; the effect of fiscal and governmental policies of the United States federal government; the adequacy of our risk management program; a failure in or breach of our operational or security systems or infrastructure, or those of our third-party vendors and other service providers, including as a result of cyber attacks; demand for loans in the respective market areas served by Park and its subsidiaries; and other risk factors relating to the banking industry as detailed from time to time in Park's reports filed with the Securities and Exchange Commission including those described in "Item 1A. Risk Factors" of Part I of Park's Annual Report on Form 10-K for the fiscal year ended December 31, 2013. Park does not undertake, and specifically disclaims any obligation, to publicly release the results of any revisions that may be made to update any forward-looking statement to reflect the events or circumstances after the date on which the forward-looking statement was made, or reflect the occurrence of unanticipated events, except to the extent required by law.

Critical Accounting Policies

Note 1 of the Notes to Consolidated Financial Statements included in Park’s 2013 Annual Report to Shareholders the (“2013 Annual Report”) lists significant accounting policies used in the development and presentation of Park’s consolidated financial statements. The accounting and reporting policies of Park conform with U.S. generally accepted accounting principles (U.S. GAAP) and general practices within the financial services industry. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that

affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

Park believes the determination of the allowance for loan losses involves a higher degree of judgment and complexity than its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining a reserve level believed by management to be sufficient to absorb probable incurred credit losses in the loan portfolio. Management's determination of the adequacy of the allowance for loan losses is based on periodic evaluations of the loan portfolio and of current economic conditions. However, this evaluation has subjective components requiring material estimates, including expected default probabilities, the expected loss given default, the amounts and timing of expected future cash flows on impaired loans, and estimated losses on consumer loans and residential mortgage loans based on historical loss experience and current economic conditions. All of these factors may be susceptible to significant change. To the extent that actual results differ from management estimates, additional loan loss provisions may be required that would adversely impact earnings in future periods. (Refer to the "Credit Metrics and Provision for (Recovery of) Loan Losses" section within this MD&A for additional discussion.)

Table of Contents

Other real estate owned (“OREO”), property acquired through foreclosure, is recorded at estimated fair value less anticipated selling costs (net realizable value). If the net realizable value is below the carrying value of the loan on the date of transfer, the difference is charged to the allowance for loan losses. Subsequent declines in value, OREO devaluations, are reported as adjustments to the carrying amount of OREO and are expensed within other income. Gains or losses not previously recognized, resulting from the sale of OREO, are recognized in other income on the date of sale.

U.S. GAAP requires management to establish a fair value hierarchy, which has the objective of maximizing the use of observable market inputs. U.S. GAAP also requires enhanced disclosures regarding the inputs used to calculate fair value. These are classified as Level 1, 2, and 3. Level 3 inputs are those with significant unobservable inputs that reflect a company’s own assumptions about the market for a particular instrument. Some of these inputs could be based on internal models and cash flow analyses. The large majority of Park’s assets whose fair value is determined using Level 2 inputs consists of available-for-sale (“AFS”) securities. The fair value of these AFS securities is obtained largely through the use of matrix pricing, which is a mathematical technique widely used in the financial services industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities’ relationship to other benchmark quoted securities. Please see Note 14 - Fair Value of the Notes to Unaudited Consolidated Condensed Financial Statements in this Quarterly Report on Form 10-Q for additional information on fair value.

Management believes that the accounting for goodwill and other intangible assets also involves a higher degree of judgment than most other significant accounting policies. U.S. GAAP establishes standards for the amortization of acquired intangible assets and the impairment assessment of goodwill. Goodwill arising from business combinations represents the value attributable to unidentifiable intangible assets in the business acquired. Park’s goodwill relates to the value inherent in the banking industry and that value is dependent upon the ability of Park’s Ohio-based banking subsidiary, The Park National Bank (“PNB”) to provide quality, cost-effective banking services in a competitive marketplace. The goodwill value is supported by revenue that is in part driven by the volume of business transacted. A decrease in earnings resulting from a decline in the customer base, the inability to deliver cost-effective services over sustained periods or significant credit problems can lead to impairment of goodwill that could adversely impact earnings in future periods. U.S. GAAP requires an annual evaluation of goodwill for impairment, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Park’s most recent evaluation was completed during the second quarter of 2013 and resulted in no impairment of goodwill. The fair value of the goodwill, which resides on the books of PNB, is estimated by reviewing the past and projected operating results for PNB, deposit and loan totals for PNB and banking industry comparable information. Please see Note 3 – Goodwill of the Notes to Unaudited Consolidated Condensed Financial Statements in this Quarterly Report on Form 10-Q for additional information on goodwill.

The determination of pension plan obligations and related expenses requires the use of assumptions to estimate the amount of benefits that employees earn while working, as well as the present value of those benefits. Annual pension expense is principally based on four components: (1) the value of benefits earned by employees for working during the year (service cost), (2) the increase in the liability due to the passage of time (interest cost), and (3) other gains and losses, reduced by (4) the expected return on plan assets for our pension plan.

Significant assumptions used to measure our annual pension expense include:

- the interest rate used to determine the present value of liabilities (discount rate);
- certain employee-related factors, such as turnover, retirement age and mortality;
- the expected return on assets in our funded plans; and
- for pension expense, the rate of salary increases for plans where benefits are based on earnings

Our assumptions reflect our historical experience and management's best judgment regarding future expectations. Due to the significant management judgment involved, our assumptions could have a material impact on the measurement of our pension plan expense and obligation.

Comparison of Results of Operations

For the Three Months Ended March 31, 2014 and 2013

Summary Discussion of Results

Net income for the three months ended March 31, 2014 was \$19.6 million, compared to \$20.7 million for the first quarter of 2013. Diluted earnings per common share were \$1.27 for the first quarter of 2014, compared to \$1.34 for the first quarter of 2013. Weighted average diluted common shares outstanding were 15,414,897 for the three months ended March 31, 2014, compared to 15,411,990 diluted common shares for the first quarter of 2013.

Financial Results by Segment

The table below reflects the net income (loss) by segment for the first quarter of 2014 and 2013 and for the fiscal years ended December 31, 2013 and December 31, 2012. Park's segments include PNB, Guardian Financial Services Company ("GFSC"), SE Property Holdings, LLC ("SEPH") and "All Other" which primarily consists of Park as the "Parent Company."

Net income (loss) by segment

| (In thousands) | Q1 2014 | Q1 2013 | 2013 | 2012 |
|---|----------|----------|----------|-----------|
| PNB | \$19,607 | \$19,940 | \$75,594 | \$87,106 |
| GFSC | 604 | 740 | 2,888 | 3,550 |
| Park Parent Company | (904) | 132 | (1,397) | 195 |
| Ongoing operations | \$19,307 | \$20,812 | \$77,085 | \$90,851 |
| SEPH | 312 | (102) | 142 | (12,221) |
| Total Park | \$19,619 | \$20,710 | \$77,227 | \$78,630 |
| Preferred dividends and accretion | \$— | \$— | \$— | \$3,425 |
| Net income available to common shareholders | \$19,619 | \$20,710 | \$77,227 | \$75,205 |

The "Park Parent Company" above excludes the results for SEPH, an entity which is winding down commensurate with the disposition of its problem assets. Management considers the "Ongoing operations" results to be reflective of the business of Park and its subsidiaries on a going forward basis. The discussion below provides some additional information regarding the segments that make up the "Ongoing operations", followed by additional information on SEPH.

Vision Bank ("Vision") merged with and into SEPH, a non-bank subsidiary of Park, following the sale of the Vision business to Centennial Bank ("Centennial") on February 16, 2012. The results of Vision through February 16, 2012 are included in the SEPH results presented in the table above. The sale of the Vision business in the first quarter of 2012 resulted in a pre-tax gain of \$22.2 million (\$14.4 million after-tax), which is included in the fiscal year ended December 31, 2012 SEPH results presented in the table above. SEPH holds the remaining assets and liabilities retained by Vision subsequent to the sale. SEPH assets consist primarily of performing and nonperforming loans and other real estate owned ("OREO"). This segment represents a run-off portfolio of the legacy Vision assets.

(2) Annualized for the three months ended March 31, 2014 and 2013.

Loans outstanding at March 31, 2014 of \$4.57 billion represented an increase of \$7.9 million, or 0.17% (0.70% annualized), compared to the loans outstanding of \$4.56 billion at December 31, 2013. The \$8 million increase in loans experienced at PNB in the first quarter of 2014 was related to growth in PNB's retained mortgage loan portfolio of approximately \$7 million and in the consumer loan portfolio of approximately \$27 million, offset by a decline in the commercial loan portfolio of approximately \$26 million.

The \$4.57 billion of loans at March 31, 2014 represented an increase of \$199 million, or 4.55%, compared to the loans outstanding of \$4.37 billion at March 31, 2013. The \$199 million increase in loans experienced at PNB over the last twelve months was related to growth in PNB's retained mortgage loan portfolio of approximately \$91 million, in the consumer loan portfolio of approximately \$97 million and in the commercial loan portfolio of approximately \$11 million.

PNB's allowance for loan losses increased by \$907,000, or 1.59%, to \$57.8 million at March 31, 2014, compared to \$56.9 million at December 31, 2013. PNB credit metrics in the first quarter of 2014 continued to trend in a positive direction. Net recoveries were \$1.0 million, or annualized recoveries of 0.09%, for the three months ended March 31, 2014. Included in the recoveries in the first quarter of 2014 was a \$1.8 million recovery on a loan relationship that PNB had participated in from Vision Bank. Absent this recovery, PNB had net charge-offs of \$780,000, or annualized charge-offs of 0.07%.

The net interest income for Park's parent company includes interest income on loans to SEPH and on subordinated debt investments in PNB through September 30, 2013, which were eliminated in the consolidated Park National Corporation totals. Additionally, net interest income includes interest expense related to the \$35.25 million and \$30.00 million of subordinated notes issued by Park to accredited investors in December 2009 and April 2012, respectively.

SEPH

The table below reflects the results for SEPH for the first quarter of 2014 and 2013 and for the fiscal years ended December 31, 2013 and December 31, 2012. SEPH was formed in March 2011. Prior to holding the remaining Vision assets, SEPH held OREO assets that were transferred from Vision to SEPH.

SEPH financial results for the first quarter of 2014 included net recoveries of \$2.4 million. The net recoveries during the first quarter of 2014 consisted of charge-offs of \$0.5 million, offset by recoveries of \$2.9 million. Other income for the quarter ended March 31, 2014 at SEPH of \$837,000 was primarily related to net gains on the sale of OREO of \$576,000.

On February 16, 2012, when Vision merged with and into SEPH, the loans then held by Vision were transferred to SEPH by operation of law at their fair market value and no allowance for loan loss is carried at SEPH. The loans included in both the performing and nonperforming portfolios have been charged down to their fair value. The table below provides additional information for SEPH regarding charge-offs as a percentage of unpaid principal balance, as of March 31, 2014:

SEPH - Retained Vision Loan Portfolio

| (In thousands) | Unpaid Principal Balance | Aggregate Charge-Offs | Net Book Balance | Charge-off Percentage | |

Net Interest Income Comparison for the First Quarter of 2014 and 2013

Park's principal source of earnings is net interest income, the difference between total interest income and total interest expense. Net interest income results from average balances outstanding for interest earning assets and interest bearing liabilities in conjunction with the average rates earned and paid on them. Net interest income decreased by \$1.0 million, or 1.8%, to \$54.5 million for the first quarter of 2014, compared to \$55.5 million for the first quarter of 2013. The \$1.0 million decrease was primarily due to the continued low interest rate environment. See the discussion under the table below.

Average interest earning assets for the first quarter of 2014 increased by \$112.9 million or 1.8% to \$6,238 million, compared to \$6,125 million for the first quarter of 2013. The average yield on interest earning assets decreased by 21 basis points to 4.20% for the first quarter of 2014, compared to 4.41% for the first quarter of 2013.

Average interest bearing liabilities for the first quarter of 2014 increased by \$10.8 million or 0.2% to \$4,867 million, compared to \$4,856 million for the first quarter of 2013. The average cost of interest bearing liabilities decreased by 8 basis points to 0.82% for the first quarter of 2014, compared to 0.90% for the first quarter of 2013.

The following table displays for the past five quarters the average balance of interest earning assets, net interest income and the tax equivalent net interest margin.

| Quarter ended (In thousands) | Average balance of interest earning assets | Net interest income | Tax equivalent net interest margin | |
|------------------------------|--|------------------------|--|---|
| March 31, 2013 | \$6,125,403 | \$55,453 | 3.70 | % |

Loans, Investments, Deposits and Borrowings

Average loan balances increased by \$169 million, or 3.8%, to \$4,607 million for the three months ended March 31, 2014, compared to \$4,438 million for the first quarter of 2013. Period end loan balances as of March 31, 2014 and 2013 were \$4,624 million and \$4,444 million, respectively. The average yield on the loan portfolio decreased by 29 basis points to 4.84% for the first quarter of 2014, compared to 5.13% for the first quarter of 2013. The decrease in the average yield on the loan portfolio over the twelve-month period was primarily due to interest rate changes associated with the variable rate portion of the loan portfolio and management's decision to continue to retain 15-year, fixed-rate mortgage loans on the balance sheet.

Table of Contents

The following table displays the average balance of the loan portfolio, the interest income earned on the loan portfolio and the tax equivalent yield on the loan portfolio for the past five quarters.

| Quarter ended (In thousands) | Average balance of loan portfolio | Interest Income | Tax equivalent yield | |
|------------------------------|-----------------------------------|-----------------|----------------------|---|
| March 31, 2013 | \$4,438,308 | \$55,775 | 5.13 | % |
| June 30, 2013 | \$4,484,161 | \$56,388 | 5.08 | % |

| March 31, 2014 | \$4,607,198 | \$54,753 | 4.84 | % |

Park's total loans outstanding at March 31, 2014 were \$4,624 million, compared to \$4,621 million at December 31, 2013, an increase of \$3 million, or an annualized 0.3%. Loan balances at Park's Ohio-based bank subsidiary, PNB, increased by \$8 million, or an annualized 0.7%, to \$4,567 million at March 31, 2014, compared to \$4,559 million at December 31, 2013.

The average balance of taxable investment securities increased by \$24 million, or 1.7%, to \$1,450 million for the first quarter of 2014, compared to \$1,426 million for the first quarter of 2013. The average yield on taxable investment securities declined by 26 basis points to 2.65% for the first quarter of 2014, compared to 2.91% for the first quarter of 2013. See the table in the section captioned "Mix of Average Interest Earning Assets and Yield on Average Interest Earning Assets" for additional information on the changes in the mix over the past 3.25 years.

The average balance of money market instruments decreased by \$78.7 million to \$181.0 million for the first quarter of 2014, compared to \$259.7 million for the first quarter of 2013. The average yield on money market instruments was 0.25% for the first quarter of each of 2014 and 2013.

The amortized cost of total investment securities was \$1,446 million at March 31, 2014, compared to \$1,470 million at December 31, 2013. At March 31, 2014, the tax equivalent yield on Park's investment portfolio was 2.52% and the remaining average life was estimated to be 6.4 years.

Average interest bearing deposit accounts increased by \$1 million, or 0.03%, to \$3,749 million for the first quarter of 2014, compared to \$3,748 million for the first quarter of 2013. The average interest rate paid on interest bearing deposits decreased by 10 basis points to 0.29% for the first quarter of 2014, compared to 0.39% for the first quarter last year.

Average total borrowings were \$1,118 million for the three months ended March 31, 2014, compared to \$1,108 million for the first quarter of 2013, an increase of \$10 million, or 0.9%. The average interest rate paid on total borrowings was 2.61% for the first quarter of 2014, compared to 2.62% for the first quarter of 2013.

Net interest spread (the difference between the tax equivalent yield on interest earning assets and the cost of interest bearing liabilities) decreased by 13 basis points to 3.38% for the first quarter of 2014, compared to 3.51% for the first quarter last year. Net interest margin (the annualized tax equivalent net interest income divided by average interest earning assets) declined by 14 basis points to 3.56% for the first quarter of 2014, compared to 3.70% for the first quarter of 2013.

A primary financial goal for Park is to increase the amount of quality loans on its balance sheet. Management emphasizes the importance of growing quality loans on an ongoing basis to its retail and commercial lenders. The average balance of loans for the first three months of 2014 was \$4,607 million, compared to \$4,515 million for all of 2013.

Management actively manages the investment portfolio. The average balance of investment securities may increase as a result of attractive investment opportunities. Likewise, the average balance of investment securities may decrease if management sells investment securities or chooses not to reinvest the cash flow from maturities or investment repayments.

The following table shows the yield on average interest earning assets for the three months ended March 31, 2014 and for the fiscal years ended December 31, 2013, 2012 and 2011.

| (Dollars in thousands) | Loans | Investments | Money Market Instruments | Total | |

Credit Metrics and Provision for (Recovery of) Loan Losses

The provision for (recovery of) loan losses for Park was \$(2.2) million for the three months ended March 31, 2014, compared to \$329,000 for the same period in 2013. Net loan charge-offs (recoveries) for Park were \$(3.0) million for the first quarter of 2014, compared to \$551,000 for the first quarter of 2013. Park's annualized ratio of net loan charge-offs (recoveries) to average loans was (0.27)% for the three months ended March 31, 2014, compared to 0.05% for the same period in 2013.

The provision for loan losses for PNB and Guardian, Park's two Ohio-based subsidiaries, was an aggregate of \$134,000 for the three months ended March 31, 2014 and \$3.3 million for the same period in 2013. Net loan charge-offs (recoveries) for PNB and Guardian totaled \$(654,000) for the first three months of 2014, compared to \$3.6 million for the same period in 2013. The annualized ratio of net loan charge-offs (recoveries) to average loans for

PNB and Guardian was (0.06)% for the three months ended March 31, 2014, compared to 0.33% for the same period in 2013.

The provision for (recovery of) loan losses for SEPH was \$(2.4) million for the three months ended March 31, 2014, compared to \$(3.0) million for the same period in 2013.

Table of Contents

On February 16, 2012, when Vision merged with and into SEPH, the loans then held by Vision were transferred to SEPH by operation of law at their fair value and no allowance for loan loss is carried at SEPH. The table below provides additional information regarding cumulative charge-offs as a percentage of unpaid principal balance, as of March 31, 2014.

SEPH - Retained Vision Loan Portfolio

| (In thousands) | Unpaid Principal Balance | Aggregate Charge-Offs | Net Book Balance | Charge-off Percentage | |
|--|--------------------------------|--------------------------|---------------------|--------------------------|---|
| Nonperforming loans - retained by SEPH | \$62,484 | \$31,033 | \$31,451 | 49.67 | % |
| Performing loans - retained by SEPH | 1,845 | 157 | 1,688 | 8.51 | % |
| Total SEPH loan exposure | \$64,329 | \$31,190 | \$33,139 | 48.49 | % |

Generally, management obtains updated valuations for all nonperforming loans, including those held at SEPH, annually. As new valuation information is received, management performs an evaluation and applies a discount for anticipated disposition costs to determine the net realizable value of the collateral, which is compared against the outstanding principal balance to determine if additional write-downs are necessary.

The following table provides additional information related to Park's allowance for loan losses, including information related to specific reserves and general reserves, at March 31, 2014, December 31, 2013 and March 31, 2013.

Park National Corporation - Allowance for Loan Losses

| (In thousands) | March 31, 2014 | December 31, 2013 | March 31, 2013 | | |
|---|----------------|----------------------|----------------|--|---|
| Total allowance for loan losses | \$60,257 | \$59,468 | \$55,315 | | |
| Specific reserves | 11,322 | 10,451 | 8,260 | | |
| General reserves | \$48,935 | \$49,017 | \$47,055 | | |
| Total loans | \$4,623,926 | \$4,620,505 | \$4,443,523 | | |
| Impaired commercial loans | 105,833 | 112,304 | 130,270 | | |
| Non-impaired loans | \$4,518,093 | \$4,508,201 | \$4,313,253 | | |
| Total allowance for loan losses to total loan ratio | 1.30 | % 1.29 | % 1.24 | | % |
| General reserves as a % of non-impaired loans | 1.08 | % 1.09 | % 1.09 | | % |

The decline in general reserves as a percentage of non-impaired loans from 1.09% at December 31, 2013 to 1.08% at March 31, 2014 is primarily due to improving credit trends in the commercial loan portfolio for Park's Ohio operations (PNB and GFSC). The following table shows the trends in Park's Ohio-based operations commercial loan portfolio.

| Commercial loans * (In thousands) | March 31, 2014 | December 31, 2013 | March 31, 2013 |
|-----------------------------------|----------------|----------------------|----------------|
| Pass rated | \$2,293,211 | \$2,311,914 | \$2,232,747 |
| Special mention | 22,445 | 26,361 | 47,298 |
| Substandard | 1,036 | 2,687 | 14,127 |
| Impaired | 75,196 | 77,038 | 86,411 |
| Total | \$2,391,888 | \$2,418,000 | \$2,380,583 |

* Commercial loans include: (1) Commercial, financial and agricultural loans, (2) Commercial real estate loans, (3) Commercial related loans in the construction real estate portfolio and (4) Commercial related loans in the residential

real estate portfolio.

The commercial loan table above demonstrates the improvement experienced over the past 12 months in the Park Ohio commercial portfolio. Pass rated commercial loans have grown \$60.5 million, or 2.7%, since March 2013. Over this period, special mention loans have declined by \$24.9 million, or 52.5% and substandard loans have declined by \$13.1 million, or 92.7%. These improved credit metrics in the special mention and substandard categories of the commercial loan portfolio have

48

Table of Contents

a significant impact on the general reserves that are established to cover incurred losses on performing commercial loans. As these credit metrics have improved over the past 12 months, general reserves as a percentage of the performing commercial loan portfolio have declined.

Delinquent and accruing loan trends (includes all outstanding loans, consumer and commercial) for Park's Ohio-based operations have also improved over the past 12 months. Delinquent and accruing loans were \$26.9 million or 0.59% of total loans at March 31, 2014, compared to \$32.0 million (0.70% of total loans) at December 31, 2013 and \$28.9 million (0.66% of total loans) at March 31, 2013.

Impaired commercial loans for Park's Ohio-based operations were \$75.2 million as of March 31, 2014, a reduction from the balance of impaired loans of \$77.0 million as of December 31, 2013 and \$86.4 million at March 31, 2013. Impaired commercial loans are individually evaluated for impairment and specific reserves are established to cover any incurred losses for those loans that have not been charged down to the net realizable value of the underlying collateral or to the net present value of expected cash flows.

Nonperforming Assets: Nonperforming loans include: 1) loans whose interest is accounted for on a nonaccrual basis; 2) TDRs on accrual status; 3) loans which are contractually past due 90 days or more as to principal or interest payments but whose interest continues to accrue; and (4) OREO which results from taking possession of property that served as collateral for a defaulted loan.

The following table compares Park's nonperforming assets at March 31, 2014, December 31, 2013 and March 31, 2013.

Park management reviews all TDRs quarterly and may classify a TDR as accruing if the borrower has been current for a period of at least six months with respect to loan payments and management expects that the borrower will be able to continue to make payments in accordance with the terms of the restructured note. At March 31, 2014, management deemed it appropriate to have \$18.0 million of TDRs on accrual status, while the remaining \$70.7 million of TDRs were on nonaccrual status. Management reviews all accruing TDRs quarterly to ensure payments continue to be made in accordance with the modified terms.

Management reviews renewals/modifications of loans previously identified as TDRs to consider if it is appropriate to remove the TDR classification. If the borrower is no longer experiencing financial difficulty and the renewal/modification does not contain a concessionary interest rate or other concessionary terms, management considers the potential removal of the TDR classification. If deemed appropriate, the TDR classification is removed as the borrower has complied with the terms of the loan at the date of the renewal/modification and there was a reasonable expectation that the borrower would continue to comply with the terms of the loan subsequent to the date of the renewal/modification. The majority of these TDRs were originally considered restructurings in a prior year as a result of a modification with an interest rate that was not commensurate with the

risk of the underlying loan. During the three-month period ended March 31, 2014, Park removed the TDR classification on \$966,000 of loans that met the requirements discussed above.

Nonperforming assets for PNB and GFSC and for SEPH as of March 31, 2014, December 31, 2013 and March 31, 2013 were as reported in the following two tables:

When determining the quarterly loan loss provision, Park reviews the grades of commercial loans. These loans are graded from 1 to 8. A grade of 1 indicates little or no credit risk and a grade of 8 is considered a loss. Commercial loans with grades of 1 to 4.5 (pass-rated) are considered to be of acceptable credit risk. Commercial loans graded a 5 (special mention) are considered to be watch list credits and a higher loan loss reserve percentage is allocated to these loans. Commercial loans graded 6 (substandard), also considered watch list credits, represent higher credit risk than those rated special mention and, as a result, a higher loan loss reserve percentage is allocated to these loans. Generally, commercial loans that are graded a 6 are considered for partial charge-off. Commercial loans that are graded a 7 (doubtful) are shown as nonperforming and Park charges these loans down to their fair value by taking a partial charge-off or recording a specific reserve. Any commercial loan graded an 8 (loss) is completely charged-off.

As of March 31, 2014, Park had taken partial charge-offs of approximately \$54.4 million related to the \$105.8 million of commercial loans considered to be impaired, compared to charge-offs of approximately \$63.3 million related to the \$112.3 million of impaired commercial loans at December 31, 2013. The table below provides additional information related to the Park impaired commercial loans at March 31, 2014, including those impaired commercial loans at PNB and those impaired Vision commercial loans retained at SEPH.

A significant portion of Park's allowance for loan losses is allocated to commercial loans classified as "special mention" or "substandard." "Special mention" loans are loans that have potential weaknesses that may result in loss exposure to Park. "Substandard" loans are those that exhibit a well defined weakness, jeopardizing repayment of the loan, resulting in a higher probability that Park will suffer a loss on the loan unless the weakness is corrected. Park's annualized 60-month loss experience for the period ended December 31, 2013, defined as charge-offs plus changes in specific reserves, within the commercial loan portfolio was 0.66% of the principal balance of these loans. This annualized 60-month loss experience included only the performance of the PNB loan portfolio. The allowance for loan losses related to performing commercial loans was \$31.1 million or 1.34% of the outstanding principal balance of other accruing commercial loans at March 31, 2014.

The overall reserve of 1.34% for other accruing commercial loans breaks down as follows: pass-rated commercial loans are reserved at 1.30%; special mention commercial loans are reserved at 5.46%; and substandard commercial loans are reserved at 10.05%. The reserve levels for pass-rated, special mention and substandard commercial loans in excess of the annualized 60-month loss experience of 0.66% are due to the following factors which management reviews on a quarterly or annual basis:

Loss Emergence Period Factor: Annually during the fourth quarter, management calculates the loss emergence period for each commercial loan segment. This loss emergence period is calculated based upon the average period of time it takes a credit to move from pass-rated to nonaccrual. If the loss emergence period for any commercial loan segment is greater than one year, management applies additional general reserves to all performing loans within that segment of the commercial loan portfolio.

Loss Migration Factor: Park's commercial loans are individually risk graded. If loan downgrades occur, the probability of default increases, and accordingly, management allocates a higher percentage reserve to those accruing commercial loans graded special mention and substandard. Annually, management calculates a loss migration factor for each commercial loan segment for special mention and substandard credits based on a review of losses over the past five-year period, considering how each individual credit was rated at the beginning of the five-year period.

Environmental Loss Factor: Management has identified certain macroeconomic factors that trend in accordance with losses in Park's commercial loan portfolio. These macroeconomic factors are reviewed quarterly and adjustments to the environmental loss factor impacting each segment in the performing commercial loan portfolio correlates to changes in the macroeconomic environment.

Generally, consumer loans are not individually graded. Consumer loans include: (1) mortgage and installment loans included in the construction real estate segment of the loan portfolio; (2) mortgage, home equity lines of credit (HELOC), and installment loans included in the residential real estate segment of the loan portfolio; and (3) all loans included in the consumer segment of the loan portfolio. The amount of loan loss reserve assigned to these loans is based on historical loss experience over the past 60 months, through December 31, 2013. Management generally considers a one-year coverage period (the "Historical Loss Factor") appropriate because the probable loss on any given loan in the consumer loan pool should ordinarily become apparent in that time frame. However, management may incorporate adjustments to the Historical Loss Factor as circumstances warrant additional reserves (e.g., increased loan delinquencies, improving or deteriorating economic conditions, changes in lending management and

underwriting standards, etc.). At March 31, 2014, the coverage period within the consumer portfolio was approximately 1.68 years.

The judgmental increases discussed above incorporate management's evaluation of the impact of environmental qualitative factors which pose additional risks and assignment of a component of the allowance for loan losses in consideration of these factors. Such environmental factors include: national and local economic trends and conditions; experience, ability and depth of lending management and staff; effects of any changes in lending policies and procedures; and levels of, and trends in, consumer bankruptcies, delinquencies, impaired loans and charge-offs and recoveries. The determination of this component of the

Table of Contents

allowance for loan losses requires considerable management judgment. Management continues to work to address weaknesses in those loans that may result in future loss. Actual loss experience may be more or less than the amount allocated.

Total Other Income

Total other income decreased by \$2.2 million to \$16.6 million for the quarter ended March 31, 2014, compared to \$18.8 million for the first quarter of 2013.

The following table is a summary of the changes in the components of total other income:

| (In thousands) | Three months ended March 31, | | |

The following table breaks out the change in total other income for the three months ended March 31, 2014 compared to March 31, 2013 between Park's Ohio-based operations and SEPH/Vision Bank.

Income from fiduciary activities, which represents revenue earned from Park's trust activities, increased by \$465,000, or 11.4%, to \$4.5 million for the three months ended March 31, 2014, compared to \$4.1 million for the same period in 2013. Fiduciary fees are generally charged based on the market value of customer accounts. The average market value for assets under management for the three months ended March 31, 2014 was \$4,114 million, an increase of approximately 10.7% compared to the average for the three months ended March 31, 2013 of \$3,716 million.

Table of Contents

Fee income earned from origination and sale into the secondary market of long-term, fixed-rate mortgage loans is included within other non-yield related fees in the subcategory "Other service income". Other service income decreased by \$2.1 million, or 51.9%, to \$1.9 million for the three months ended March 31, 2014, compared to \$4.0 million for the same period in 2013. The volume of originations of mortgage loans for sale into the secondary market is the primary driver of changes in this fee income category. As long-term interest rates increased in the second half of 2013 and beginning of 2014, the volume of originations (purchases or refinances) of mortgage loans has declined significantly.

For the three months ended March 31, 2014, OREO valuation adjustments were a net expense of \$416,000, compared to a credit of \$401,000 for the same period in 2013. The expense in the first quarter of 2014 compared to 2013 was primarily related to OREO devaluations recognized at PNB.

For the three months ended March 31, 2014, gain on the sale of OREO, net increased by \$482,000 to \$706,000, compared to \$224,000 for the same period in 2013. Through the first three months of 2014, total OREO sales were \$4.7 million, related to properties that had a book value of \$4.0 million. For the first three months of 2013, total OREO sales were \$7.1 million, related to properties that had a book value of \$6.9 million.

Salaries and employee benefits increased by \$427,000, or 1.7%, to \$25.1 million for the three months ended March 31, 2014, compared to \$24.6 million for the same period in 2013. The increase through the first three months of 2014 was largely related to increased medical expense in Park's Ohio-based operations.

Professional fees and services increased by \$419,000, or 7.1%, to \$6.3 million for the three months ended March 31, 2014, compared to \$5.9 million for the same period in 2013. The increase through the first three months of 2014 is primarily related to ongoing legal and professional fees related to legacy Vision Bank credits, specifically those participated at PNB.

OREO expense increased by \$765,000, or 149.4%, to \$1.3 million for the three months ended March 31, 2014, compared to \$512,000 for the same period in 2013. The increase through the first three months of 2014 is primarily related to the payment of real estate taxes related to those OREO properties held by SEPH.

The table below provides information related to total other expense within each of Park's segments, which include PNB, GFSC, Vision, SEPH and "All Other" (which primarily consists of Park as the "Parent Company") for each quarter in 2013 and 2014 to date.

Income Tax

Federal income tax expense was \$6.0 million for the first quarter of 2014, compared to \$7.1 million for the first quarter of 2013. The effective federal income tax rate for the first quarter of 2014 was 23.5%, compared to 25.6% for the same period in 2013. The difference between the statutory federal income tax rate of 35% and Park's effective tax rate is due to the permanent tax differences, primarily consisting of tax-exempt interest income from municipal investments and loans, low income housing tax credits, bank owned life insurance income, and dividends paid on shares held within Park's salary deferral plan. Park expects permanent tax differences for the 2014 year will be approximately \$10 million.

Park and its Ohio-based affiliates do not pay state income taxes to the state of Ohio, but pay a franchise tax based on year end equity. The franchise tax expense is included in "state taxes" as part of other expense on Park's Consolidated Condensed Statements of Income.

Comparison of Financial Condition

At March 31, 2014 and December 31, 2013

Changes in Financial Condition and Liquidity

Total assets increased by \$173 million, or 2.6%, to \$6,811 million at March 31, 2014, compared to \$6,638 million at December 31, 2013.

Total investment securities decreased by \$7 million, or 0.5%, to \$1,417 million at March 31, 2014, compared to \$1,424 million at December 31, 2013. Money market instruments, included in cash and cash equivalents, increased by \$191 million to \$209 million at March 31, 2014, compared to \$18 million at December 31, 2013. Loan balances increased by \$3 million to \$4,624 million at March 31, 2014, compared to \$4,621 million at December 31, 2013.

Total liabilities increased by \$158 million, or 2.6%, during the first three months of 2014 to \$6,145 million at March 31, 2014, from \$5,987 million at December 31, 2013.

Total deposits increased by \$187 million, or 3.9%, to \$4,977 million at March 31, 2014, compared to \$4,790 million at December 31, 2013. The increase in deposits in the first three months of 2014 was largely related to an increase in interest bearing transaction accounts and savings accounts.

Short-term borrowings decreased by \$10 million, or 4.1%, to \$252 million at March 31, 2014, from \$242 million at December 31, 2013. Long-term borrowings, including subordinated debentures and notes, decreased by \$24 million or 2.7% to \$867 million at March 31, 2014, compared to \$891 million at December 31, 2013.

Total shareholders' equity increased by \$14.7 million, or 2.3%, to \$666.4 million at March 31, 2014, from \$651.7 million at December 31, 2013. Retained earnings increased by \$5.2 million during the period as a result of net income of \$19.6 million, offset by common share dividends of \$14.4 million. Accumulated other comprehensive loss decreased by \$10.9 million to a loss of \$24.5 million at March 31, 2014, compared to a loss of \$35.4 million at December 31, 2013. This improvement in the accumulated other comprehensive loss was related to a \$10.9 million unrealized net holding gain (net of taxes) in the investment portfolio as a result of the mark-to-market adjustment at March 31, 2014.

Increases or decreases in the investment securities portfolio, short-term borrowings and long-term debt are greatly dependent upon the growth in loans and deposits. The primary objective of management is to grow loan and deposit totals. To the extent that management is unable to grow loan totals at a desired growth rate, additional investment securities may be acquired. Likewise, both short-term borrowings and long-term debt are utilized to fund the growth in earning assets if the growth in deposits and cash flow from operations are not sufficient to do so.

Effective liquidity management ensures that the cash flow requirements of depositors and borrowers, as well as the operating cash needs of the Corporation, are met. Funds are available from a number of sources, including the securities portfolio, the core deposit base, Federal Home Loan Bank borrowings, and the capability to securitize or package loans for sale. The Corporation's loan to asset ratio was 67.89% at March 31, 2014, compared to 69.60% at December 31, 2013 and 65.86% at March 31, 2013. Cash and cash equivalents were \$328.7 million at March 31, 2014, compared to \$147.0 million at December 31, 2013 and \$520.5 million at March 31, 2013. Management believes that the present funding sources provide more than adequate liquidity for the Corporation to meet its cash flow needs.

Capital Resources

Total shareholders' equity and common equity (shareholders' equity excluding any preferred stock) at March 31, 2014 was \$666.4 million, or 9.8% of total assets, compared to \$651.7 million, or 9.8% of total assets, at December 31, 2013 and \$654.2 million, or 9.7% of total assets, at March 31, 2013.

Financial institution regulators have established guidelines for minimum capital ratios for banks, thrifts and bank holding companies. The net unrealized gain or loss on available-for-sale securities is generally not included in computing regulatory capital. The minimum leverage capital ratio (defined as shareholders' equity less intangible assets divided by tangible assets) is 4% and the well capitalized ratio (PNB only) is greater than or equal to 5%. Park's leverage ratio was 9.45% at March 31, 2014 and 9.48% at December 31, 2013. The minimum Tier 1 risk-based capital ratio (defined as leverage capital divided by risk-adjusted assets) is 4% and the well capitalized ratio (PNB only) is greater than or equal to 6%. Park's Tier 1 risk-based capital ratio was 13.42% at March 31, 2014 and 13.27% at December 31, 2013. The minimum total risk-based capital ratio (defined as

Table of Contents

leverage capital plus supplemental capital divided by risk-adjusted assets) is 8% and the well capitalized ratio (PNB only) is greater than or equal to 10%. Park's total risk-based capital ratio was 16.07% at March 31, 2014 and 15.91% at December 31, 2013.

PNB met each of the well capitalized ratio guidelines at March 31, 2014. The following table indicates the capital ratios for PNB and Park at March 31, 2014.

Contractual Obligations and Commitments

In the ordinary course of operations, Park enters into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises. See page 41 of Park's 2013 Annual Report (Table 31) for disclosure concerning contractual obligations and commitments at December 31, 2013. There were no significant changes in contractual obligations and commitments during the first three months of 2014.

Financial Instruments with Off-Balance Sheet Risk

PNB is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include loan commitments and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements.

The exposure to credit loss (for PNB) in the event of nonperformance by the other party to the financial instrument for loan commitments and standby letters of credit is represented by the contractual amount of those instruments. Park and PNB use the same credit policies in making commitments and conditional obligations as they do for on-balance sheet instruments. Since many of the loan commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

The total amounts of off-balance sheet financial instruments with credit risk were as follows:

| (In thousands) | March 31, 2014 | December 31, 2013 |
|---------------------------|-------------------|----------------------|
| Loan commitments | \$842,217 | \$821,795 |
| Standby letters of credit | \$11,282 | \$20,590 |

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Management reviews interest rate sensitivity on a bi-monthly basis by modeling the consolidated financial statements under various interest rate scenarios. The primary reason for these efforts is to guard Park from adverse impacts of unforeseen changes in interest rates. Management continues to believe that further changes in interest rates will have a small impact on net income, consistent with the disclosure on pages 40 and 41 of Park's 2013 Annual Report.

On page 40 (Table 30) of Park's 2013 Annual Report, management reported that Park's twelve-month cumulative rate sensitivity gap was a positive (assets exceeding liabilities) \$367 million or 6.05% of interest earning assets at December 31, 2013. At March 31, 2014, Park's twelve-month cumulative rate sensitivity gap was a positive (assets exceeding liabilities) \$329 million or 5.24% of interest earning assets.

Management supplements the interest rate sensitivity gap analysis with periodic simulations of balance sheet sensitivity under various interest rate and what-if scenarios to better forecast and manage the net interest margin. Management uses a 50 basis point change in market interest rates per quarter for a total of 200 basis points per year in evaluating the impact of changing interest rates on net interest income and net income over a twelve month horizon.

On page 41 of Park's 2013 Annual Report, management reported that at December 31, 2013, the earnings simulation model projected that net income would decrease by 1.4% using a rising interest rate scenario and decrease by 10.3% using a declining interest rate scenario over the next year. At March 31, 2014, the earnings simulation model projected that net income would decrease by 1.97% using a rising interest rate scenario and would decrease by 9.80% in a declining interest rate scenario. The decline in net income in both the increasing and the decreasing interest rate scenarios is due to the balance of loans that are currently indexed to an interest rate "floor". Therefore, in a rising interest rate scenario, a portion of the loan portfolio will not experience an increase in interest income until interest rates on those loans move through the "floor" established in individual loan agreements, while deposit assumptions reflect increasing rates paid on deposits in such a scenario. At March 31, 2014, management continues to believe that gradual changes in interest rates (50 basis points per quarter for a total of 200 basis points per year) will have a small impact on net income.

ITEM 4 – CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

With the participation of the Chief Executive Officer and President (the principal executive officer) and the Chief Financial Officer, Secretary and Treasurer (the principal financial officer) of Park, Park's management has evaluated the effectiveness of Park's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, Park's Chief Executive Officer and President and Park's Chief Financial Officer, Secretary and Treasurer have concluded that:

information required to be disclosed by Park in this Quarterly Report on Form 10-Q and other reports that Park files or submits under the Exchange Act would be accumulated and communicated to Park's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure;

information required to be disclosed by Park in this Quarterly Report on Form 10-Q and the other reports that Park files or submits under the Exchange Act would be recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms; and

Park's disclosure controls and procedures were effective as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q.

Changes in Internal Control Over Financial Reporting

There were no changes in Park's internal control over financial reporting (as defined in Rule 13a – 15(f) under the Exchange Act) that occurred during Park's fiscal quarter ended March 31, 2014, that have materially affected, or are reasonably likely to materially affect, Park's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

There are no pending legal proceedings to which Park or any of its subsidiaries is a party or to which any of their property is subject, except for routine legal proceedings which Park's subsidiary bank, PNB, is a party to incidental to its banking business, as well as routine legal proceedings at SEPH which SEPH (and SEPH as the successor to Vision Bank) is a party to incidental to its business. Park considers none of those proceedings to be material.

Item 1A. Risk Factors

There are certain risks and uncertainties in our business that could cause our actual results to differ materially from those anticipated. In "ITEM 1A. RISK FACTORS" of Part I of Park's Annual Report on Form 10-K for the fiscal year ended December 31, 2013 (the "2013 Form 10-K"), we included a detailed discussion of our risk factors. All of these risk factors should be read carefully in connection with evaluating our business and in connection with the forward-looking statements contained in this Quarterly Report on Form 10-Q. Any of the risks described in the 2013 Form 10-K could materially adversely affect our business, financial condition or future results and the actual outcome of matters as to which forward-looking statements are made. These are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

The following table provides information concerning purchases of Park's common shares made by or on behalf of Park or any "affiliated purchaser" as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended, during the three months ended March 31, 2014, as was as the maximum number of common shares that may be purchased under Park's previously announced stock repurchase authorization to fund the Park National Corporation 2013 Long-Term Incentive Plan ("the 2013 Incentive Plan"):

| Period | Total number of common shares purchased | Average price paid per common share | Total number of common shares purchased as part of publicly announced plans or programs | Maximum number of common shares that may yet be purchased under the plans or programs (1) |
|--------------------------------------|---|-------------------------------------|---|---|
| January 1 through January 31, 2014 | — | — | — | 589,450 |
| February 1 through February 28, 2014 | 19,500 | 76.16 | 19,500 | 569,950 |
| March 1 through March 31, 2014 | — | — | — | 569,950 |
| Total | 19,500 | 76.16 | 19,500 | 569,950 |

The number shown represents, as of the end of each period, the maximum number of common shares that may yet (1) be purchased as part of Park's publicly announced stock repurchase authorization to fund the 2013 Long-Term Incentive Plan which became effective on April 22, 2013.

At the 2013 Annual Meeting of Shareholders held on April 22, 2013, Park's shareholders approved the 2013 Incentive Plan. The aggregate number of common shares with respect to which awards may be granted under the 2013 Incentive Plan will be 600,000. The common shares to be issued and delivered under the 2013 Incentive Plan may consist of either common shares currently held or common shares subsequently acquired by Park as treasury shares. No newly-issued common shares will be delivered under the 2013 Incentive Plan. On April 22, 2013, Park's Board of Directors authorized the purchase, from
