NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share data)

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“GAAP”) and with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements of Sonic Corp. (the “Company”). In the opinion of management, these financial statements reflect all adjustments of a normal recurring nature, including recurring accruals, necessary for the fair presentation of the Company’s financial position, results of operations and cash flows for the interim periods presented in conformity with GAAP. In certain situations, recurring accruals, including franchise royalties, are based on more limited information at interim reporting dates than at the Company’s fiscal year end due to the abbreviated reporting period. Actual results may differ from these estimates. These unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the fiscal year ended August 31, 2013, included in the Company’s Annual Report on Form 10-K. Interim results are not necessarily indicative of the results that may be expected for a full year or any other interim period. The second fiscal quarter is typically the most volatile for the Company due to seasonality and weather.

Principles of Consolidation

The accompanying financial statements include the accounts of the Company, its wholly owned subsidiaries and a number of Company Drive-Ins in which a subsidiary has a controlling ownership interest. All intercompany accounts and transactions have been eliminated.

Reclassifications

Certain amounts reported in previous years, which are not material, have been combined and reclassified to conform to the current-year presentation.

## 2.Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

	Three months ended February 28,		Six months ended February 28,	
	2014	2013	2014	2013
Numerator:				
Net income	\$ 4,107	\$ 3,577	\$ 12,315	\$ 9,710
Denominator:				
Weighted average common shares outstanding– basic	55,958	55,798	56,125	56,735
Effect of dilutive employee stock options and unvested restricted stock units	1,450	625	1,528	519
Weighted average common shares – diluted	57,408	56,423	57,653	57,254
Net income per common share – basic	\$ 0.07	\$ 0.06	\$ 0.22	\$ 0.17
Net income per common share – diluted	\$ 0.07	\$ 0.06	\$ 0.21	\$ 0.17
Anti-dilutive securities excluded(1)	1,117	3,735	1,042	4,151

(1) Anti-dilutive securities consist of stock options and unvested restricted stock units that were not included in the computation of diluted earnings per share because either the exercise price of the options was greater than the average market price of the common stock or the total assumed proceeds under the treasury stock method resulted in negative incremental shares and thus the inclusion would have been anti-dilutive.

## 3.Share Repurchase Program

In August 2013, the Company's Board of Directors extended the share repurchase program authorizing the Company to purchase up to \$40 million of its outstanding shares of common stock and, in January 2014, the Company's Board of Directors approved an incremental \$40 million authorization that allows for up to \$80 million of common stock to be repurchased through August 31, 2014. Share repurchases may be made from time to time in the open market or otherwise, including through an accelerated share repurchase program, under terms of a Rule 10b5-1 plan, in privately negotiated transactions or in round lot or block transactions. The share repurchase program may be extended, modified, suspended or discontinued at any time.

In February 2014, the Company entered into an accelerated share repurchase ("ASR") agreement with a financial institution to purchase \$40 million of the Company's common stock. In exchange for a \$40 million up-front payment, the financial institution delivered approximately 2.1 million shares. Subsequent to the end of the second quarter, the ASR purchase period concluded with no additional shares delivered, resulting in an average price per share of \$19.13.

The Company reflected the ASR transaction as a repurchase of common stock for purposes of calculating earnings per share and as a forward contract indexed to its own common stock. The forward contract met all of the applicable criteria for equity classification.

Including repurchases under the ASR transaction described above, during the first six months of fiscal year 2014, approximately 3.1 million shares were repurchased for a total cost of \$58.4 million, resulting in an average price per share of \$19.06.

The total remaining amount authorized under the share repurchase program, as of February 28, 2014, was \$21.6 million.

## 4. Income Taxes

The following table presents the Company's provision for income taxes and effective income tax rate for the periods below:

	Three months ended February 28,		Six months ended February 28,	
	2014	2013	2014	2013
Provision for income taxes	\$ 2,002	\$ 669	\$ 5,887	\$ 4,205
Effective income tax rate	32.8 %	15.8 %	32.3 %	30.2 %

The lower effective income tax rate during the second quarter and first six months of fiscal year 2013 was primarily attributable to the expiration of a state statute of limitations related to an uncertain tax position and legislation that was passed to reinstate and extend the Work Opportunity Tax Credit ("WOTC").

As of February 28, 2014, the Company had \$2.1 million of unrecognized tax benefits, including \$0.3 million of interest and penalties. During the first six months of fiscal year 2014, the liability for unrecognized tax benefits decreased \$0.5 million. The decrease was primarily related to the IRS' acceptance of a federal tax method change that impacted the Company's tax rate. The Company recognizes estimated interest and penalties as a component of its income tax expense, net of federal benefit. If recognized, the entire amount of unrecognized tax benefits would favorably impact the effective tax rate.

The Company or one of its subsidiaries is subject to U.S. federal income tax and income tax in multiple U.S. state jurisdictions. The Company is currently undergoing examinations or appeals by various state and federal authorities. The Company anticipates that the finalization of these examinations or appeals, combined with the expiration of applicable statutes of limitations and the additional accrual of interest related to unrecognized benefits on various return positions taken in years still open for examination, could result in a change to the liability for unrecognized tax

benefits during the next 12 months ranging from a decrease of \$1.5 million to an increase of \$1.3 million depending on the timing and terms of the examination resolutions.

## 5. Contingencies

The Company is involved in various legal proceedings and has certain unresolved claims pending. Based on the information currently available, management believes that all claims currently pending are either covered by insurance or would not have a material adverse effect on the Company's business, operating results or financial condition.

On December 20, 2013, the Company extended a note purchase agreement to a bank that serves to guarantee the repayment of a franchisee loan, with a term through 2018, and also benefits the franchisee with a lower financing rate. In the event of default by the franchisee, the Company would purchase the franchisee loan from the bank, thereby becoming the note holder and providing an avenue of recourse with the franchisee. The Company recorded a liability for this guarantee which was based on the Company's estimate of fair value. As of February 28, 2014, the balance of the franchisee's loan was \$6.3 million.

The Company has obligations under various operating lease agreements with third-party lessors related to the real estate for certain Company Drive-In operations that were sold to franchisees. Under these agreements, which expire through 2029, the Company remains secondarily liable for the lease payments for which it was responsible as the original lessee. As of February 28, 2014, the amount remaining under these guaranteed lease obligations totaled \$10.0 million. At this time, the Company does not anticipate any material defaults under the foregoing leases; therefore, no liability has been provided.

6. Fair Value of Financial Instruments

The fair value of financial instruments is the amount at which the instrument could be exchanged in a current transaction between willing parties. The Company has no financial liabilities that are required to be measured at fair value on a recurring basis.

The Company categorizes its assets and liabilities recorded at fair value based upon the following fair value hierarchy established by the Financial Accounting Standards Board:

- Level 1 valuations use quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 valuations use inputs other than actively quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: (a) quoted prices for similar assets or liabilities in active markets, (b) quoted prices for identical or similar assets or liabilities in markets that are not active, (c) inputs other than quoted prices that are observable for the asset or liability such as interest rates and yield curves observable at commonly quoted intervals and (d) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 valuations use unobservable inputs for the asset or liability. Unobservable inputs are used to the extent observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

The Company's cash equivalents are carried at cost which approximates fair value and totaled \$31.8 million at February 28, 2014 and \$39.1 million at August 31, 2013. This fair value is estimated using Level 1 inputs.

At February 28, 2014, the fair value of the Company's Series 2011-1 Senior Secured Fixed Rate Notes, Class A-2 (the "2011 Fixed Rate Notes") and Series 2013-1 Senior Secured Fixed Rate Notes, Class A-2 (the "2013 Fixed Rate Notes") approximated the carrying value of \$442.7 million, including accrued interest. At August 31, 2013, the fair value of the 2011 Fixed Rate Notes and 2013 Fixed Rate Notes approximated the carrying value of \$447.6 million, including accrued interest. The fair value of the 2011 Fixed Rate Notes and the 2013 Fixed Rate Notes is estimated using Level 2 inputs from market information available for public debt transactions for companies with ratings that are similar to the Company's ratings and from information gathered from brokers who trade in the Company's notes.

## 7. Segment Information

Operating segments are generally defined as components of an enterprise for which separate discrete financial information is available as the basis for management to allocate resources and assess performance.

Based on internal reporting and management structure, the Company has two reportable segments: Company Drive-Ins and Franchise Operations. The Company Drive-Ins segment consists of the drive-in operations in which the Company owns a controlling ownership interest and derives its revenues from operating drive-in restaurants. The Franchise Operations segment consists of franchising activities and derives its revenues from royalties, franchise fees and lease revenues received from franchisees. The accounting policies of the segments are the same as those described in the Summary of Significant Accounting Policies in the Company's most recent Annual Report on Form 10-K. Segment information for total assets and capital expenditures is not presented as such information is not used in measuring segment performance or allocating resources between segments.

The following table presents the revenues and income from operations for each reportable segment, along with reconciliation to reported revenue, income from operations and income before income taxes:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In the Quarterly Report on Form 10-Q, unless the context otherwise requires, the terms "Sonic Corp.," "the Company," "we," "us" and "our" refer to Sonic Corp. and its subsidiaries.

Overview

System-wide same-store sales increased 1.4% during the second quarter and increased 1.8% for the first six months of fiscal year 2014 as compared to flat sales and an increase of 1.5%, respectively, for the same periods last year. Same-store sales at Company Drive-Ins increased 1.3% during the second quarter and 1.6% for the first six months of fiscal year 2014 as compared to an increase of 1.9% and 3.1%, respectively, for the same periods last year. Our continued positive same-store sales, in light of adverse weather during the second quarter of fiscal year 2014, are a result of successful implementation of initiatives, including product quality improvements, a greater emphasis on personalized service and a tiered pricing strategy, that have set a solid foundation for growth. We continue to focus on key initiatives such as increased media effectiveness and our innovative product pipeline in supporting our layered day-part promotional strategy to drive same-store sales. To achieve earnings growth, we utilize a multi-layered growth strategy which incorporates same-store sales growth, operating leverage, deployment of cash, an ascending royalty rate and new drive-in development. Positive same-store sales is the most important layer and drives operating leverage and increased operating cash flows.

Revenues decreased to \$109.7 million for the second quarter of fiscal year 2014 from \$111.1 million for the same period last year and decreased to \$236.4 million for the first six months of fiscal year 2014 from \$237.1 million for the same period last year. A decline in Company Drive-In sales was the primary driver of the decrease in revenues for the second quarter and first half of fiscal year 2014 and was mainly attributable to the closure of 12 lower performing Company Drive-Ins on August 31, 2013 and the refranchising of seven Company Drive-Ins during the first quarter of fiscal year 2014. Partially offsetting this decline was an increase in franchising revenues. Restaurant margins at Company Drive-Ins improved 80 basis points during the second quarter and first six months of fiscal year 2014 primarily as a result of leverage from improved same-store sales and the closure of 12 lower performing Company Drive-Ins on August 31, 2013.

Second quarter results for fiscal year 2014 reflected net income of \$4.1 million or \$0.07 per diluted share, as compared to net income of \$3.6 million or \$0.06 per diluted share for the same period last year. Excluding the prior year non-GAAP adjustments further described below, net income and diluted earnings per share for the second quarter of fiscal year 2014 would have increased 35% and 40%, respectively. Net income and diluted earnings per share for the first six months of fiscal year 2014 were \$12.3 million and \$0.21, respectively, as compared to net income of \$9.7 million and \$0.17 per diluted share for the same period last year. Excluding the non-GAAP adjustments further described below, net income and diluted earnings per share for the first half of fiscal year 2014 would have increased

27% and 25%, respectively.

The following non-GAAP adjustments are intended to supplement the presentation of the Company's financial results in accordance with GAAP. We believe the exclusion of these items in evaluating the change in net income and diluted earnings per share for the periods below provides useful information to investors and management regarding the underlying business trends and the performance of our ongoing operations and is helpful for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the financial results for the Company and predicting future performance.

The following table provides information regarding the number of Company Drive-Ins and Franchise Drive-Ins operating as of the end of the periods indicated as well as the system-wide change in sales and average unit volume. System-wide information includes both Company Drive-In and Franchise Drive-In information, which we believe is useful in analyzing the growth of the brand as well as the Company's revenues, since franchisees pay royalties based on a percentage of sales.

Same-store sales for Company Drive-Ins increased 1.3% for the second quarter and 1.6% for the first six months of fiscal year 2014, as compared to an increase of 1.9% and 3.1%, respectively, for the same periods last year. Company Drive-In sales decreased \$1.9 million during the second quarter of fiscal year 2014, as compared to the same period last year, mainly due to a \$2.4 million decrease in sales primarily related to the closure of 12 lower performing drive-ins on August 31, 2013 and a \$1.2 million decrease related to the refranchising of seven drive-ins during the first quarter of fiscal year 2014. These sales declines were partially offset by an increase of \$1.3 million in same-store sales and, to a lesser extent, incremental sales from new drive-in openings. Company Drive-In sales decreased \$1.8 million during the first six months of fiscal year 2014, as compared to the same period last year, mainly due to a

\$4.4 million decrease in sales primarily related to the closure of 12 lower performing drive-ins on August 31, 2013 and a \$1.6 million decrease related to the refranchising of seven drive-ins during the first quarter of fiscal year 2014. These sales declines were partially offset by an increase of \$3.4 million in same-store sales and, to a lesser extent, incremental sales from new drive-in openings.

Table of Contents

The following table reflects the change in franchise sales, the number of Franchise Drive-Ins, average unit volumes and franchising revenues. While we do not record Franchise Drive-In sales as revenues, we believe this information is important in understanding our financial performance since these sales are the basis on which we calculate and record franchise royalties. This information is also indicative of the financial health of our franchisees.

(2) Represents percentage change for drive-ins open for a minimum of 15 months.

(3) Consists of revenues derived from franchising activities, including royalties, franchise fees and lease revenues. See Revenue Recognition Related to Franchise Fees and Royalties in the Critical Accounting Policies and Estimates section of Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended August 31, 2013.

(4) Represents franchise royalties as a percentage of Franchise Drive-In sales.

Same-store sales for Franchise Drive-Ins increased 1.5% for the second quarter and increased 1.8% for the first six months of fiscal year 2014, as compared to a decrease of 0.3% and increase of 1.3%, respectively, for the same periods last year. Franchising revenues increased \$0.4 million, or 1.3%, for the second quarter and increased \$1.1 million, or 1.8%, for the first six months of fiscal year 2014, compared to the same periods last year. The increase in franchise revenues was primarily attributable to an increase in royalties related to the growth of same-store sales and an increase in franchise fees from the growth in Franchise Drive-Ins openings. Partially offsetting these increases was a decline in lease revenue due to a franchisee's purchase during the second quarter of fiscal year 2013 of land and buildings previously leased or subleased from the Company.

Table of Contents

Operating Expenses. The following table presents the overall costs of drive-in operations as a percentage of Company Drive-In sales. Other operating expenses include direct operating costs such as marketing, telephone and utilities, repair and maintenance, rent, property tax and other controllable expenses.

## Company Drive-In Margins

	Three months ended		Percentage Points Increase (Decrease)

Payroll and other employee benefits	36.7	37.6	(0.9)
Other operating expenses	22.5	22.5	-
Cost of Company Drive-In sales	87.4 %	88.2 %	(0.8)

	Six months ended		Percentage Points Decrease
	February 28, 2014	2013	
Costs and expenses:			
Company Drive-Ins:			
Food and packaging	28.1 %	28.3 %	(0.2)
Payroll and other employee benefits	36.1	36.6	(0.5)
Other operating expenses	23.0	23.1	(0.1)
Cost of Company Drive-In sales	87.2 %	88.0 %	(0.8)

Drive-in level margins improved by 80 basis points during the second quarter and the first six months of fiscal year 2014 as a result of leverage from improved same-store sales and the closure of 12 lower performing Company Drive-Ins on August 31, 2013. Food and packaging costs were unfavorable by 10 basis points during the quarter and favorable by 20 basis points during the first half of fiscal year 2014. The favorable impact to food and packaging costs for the first half of fiscal year 2014 resulted from menu price increases that outpaced commodity cost inflation. The unfavorable impact during the quarter reflects increased commodity costs that are expected to pressure food and packaging costs over the remainder of the fiscal year. Payroll and other employee benefits, combined with other operating expenses, improved 90 basis points during the quarter and 60 basis points for the first half of fiscal year 2014 mainly as a result of leveraging improved sales and the closure of lower performing drive-ins discussed above.

Selling, General and Administrative (“SG&A”). SG&A expenses increased \$0.4 million, or 2.7%, to \$15.9 million for the second quarter of fiscal year 2014 and increased \$1.3 million, or 4.1%, for the first six months of fiscal year 2014 as compared to the same periods last year. This increase is primarily related to salary and benefits as a result of additional headcount in support of the company’s technology initiatives partially offset by a decrease in recruiting and relocation expenses.

Depreciation and Amortization. Depreciation and amortization was relatively flat for the second quarter of fiscal year 2014 at \$10.0 million and decreased \$0.6 million, or 2.9%, to \$20.1 million in the first half of fiscal year 2014, as compared to the same periods last year. The year-to-date decline is primarily the result of a franchisee’s purchase during the second quarter of fiscal year 2013 of land and buildings previously leased or subleased from the Company partially offset by depreciation on capital additions.

Net Interest Expense. Excluding the \$0.5 million loss from early extinguishment of debt in the second quarter of fiscal year 2013, net interest expense decreased \$1.0 million, or 14.3%, in the second quarter and decreased \$2.3 million or 15.6% for the first six months of fiscal year 2014, as compared to the same periods last year. This decrease was due to a decline in our weighted-average interest rate attributable to our partial debt

## Table of Contents

refinancing completed in the fourth quarter of fiscal year 2013 and a decline in our long-term debt balance. For additional information on long-term debt see our Annual Report on Form 10-K for the year ended August 31, 2013.

**Income Taxes.** The provision for income taxes reflects an effective tax rate of 32.8% for the second quarter of fiscal 2014 as compared to 15.8% for the same period in 2013. Our effective income tax rate increased to 32.3% for the first half of fiscal year 2014 from 30.2% for the first half of fiscal year 2013. Our effective tax rates for the second quarter and first six months of fiscal year 2013 were lower due to the expiration of a state statute of limitations related to an uncertain tax position and legislation that was passed to reinstate and extend WOTC during the second quarter of fiscal year 2013. Our fiscal year 2014 tax rate may vary depending upon the reinstatement of employment tax credit programs that expired on December 31, 2013, and pending resolution of certain tax matters. Further, our tax rate may continue to vary from quarter to quarter depending on the timing of stock option dispositions by option-holders and as circumstances on other tax matters change.

## Financial Position

Total assets decreased \$42.2 million, or 6.4%, to \$618.6 million during the first six months of fiscal year 2014 from \$660.8 million at the end of fiscal year 2013. The decrease in total assets was largely attributable to a decline in cash and cash equivalents of \$42.8 million, which resulted primarily from the use of \$57.8 million to purchase common stock and \$31.6 million related to our increased investments in property and equipment (largely technology). These uses of cash were partially offset by cash generated from operating activities of \$35.9 million and \$12.3 million in proceeds from stock option exercises.

Total liabilities decreased \$11.0 million, or 1.9%, to \$572.4 million during the first six months of fiscal year 2014 from \$583.3 million at the end of fiscal year 2013. This decrease was primarily attributable to a \$7.9 million decrease in accrued liabilities, which mainly related to the payment of bonuses and other liabilities that were accrued as of August 31, 2013, and \$4.9 million of scheduled debt principal payments during the first six months of fiscal year 2014.

Total stockholders' equity decreased \$31.2 million, or 40.3%, to \$46.3 million during the first six months of fiscal year 2014 from \$77.5 million at the end of fiscal year 2013. This decrease was primarily attributable to \$58.4 million in purchases of common stock during the first six months of the fiscal year partially offset by \$12.3 million from the issuance of stock related to stock option exercises and current-year earnings of \$12.3 million.

## Liquidity and Sources of Capital

Operating Cash Flows. Net cash provided by operating activities increased \$14.0 million to \$35.9 million for the first six months of fiscal year 2014, as compared to \$21.9 million for the same period in fiscal year 2013. This increase primarily resulted from the receipt of a federal income tax refund of \$7.5 million and lower income tax payments for the first six months of fiscal year 2014, as compared to the same period last year, mainly attributable to the timing of estimated payments.

Investing Cash Flows. Cash used in investing activities during the first six months of fiscal year 2014 increased \$47.5 million to \$27.6 million compared to cash provided by investing activities of \$19.9 million for the same period in fiscal year 2013. The table below outlines our use of cash for investments in property and equipment for the first six months of fiscal year 2014 in millions.

Replacement equipment and technology for existing drive-ins	\$ 25.3
Rebuilds, relocations and remodels of existing drive-ins	2.5
Brand technology investments	2.0
Newly constructed drive-ins	1.5
Retrofits, drive-thru additions and LED signs in existing drive-ins	0.3
Total purchases of property and equipment	\$ 31.6

Table of Contents

These purchases increased \$17.7 million compared to the same period last year primarily related to our increased investments in technology. Additionally, proceeds from the sale of assets declined \$30.8 million primarily related to proceeds from a franchisee's purchase, during the second quarter of fiscal year 2013, of land and buildings previously leased or subleased from the Company.

Financing Cash Flows. Net cash used in financing activities declined \$0.9 million to \$51.1 million for the first six months of fiscal year 2014 as compared to \$52.0 million for the same period in fiscal year 2013. This variance in financing cash flows was attributable to a \$22.6 million decline in debt payments as a result of the early repayment of \$20 million of debt in the second quarter of fiscal year 2013 and a \$9.3 million increase in proceeds from stock option exercises partially offset by an increase in treasury stock purchases of \$32.3 million.

In August 2013, our Board of Directors extended the share repurchase program authorizing us to purchase up to \$40 million of our outstanding shares of common stock and, in January 2014, our Board of Directors approved an incremental \$40 million authorization that allows for up to \$80 million of common stock to be repurchased through August 31, 2014. Share repurchases may be made from time to time in the open market or otherwise, including through an accelerated share repurchase program, under terms of a Rule 10b5-1 plan, in privately negotiated transactions or in round lot or block transactions. The share repurchase program may be extended, modified, suspended or discontinued at any time.

In February 2014, we entered into an accelerated share repurchase ("ASR") agreement with a financial institution to purchase \$40 million of the Company's common stock. In exchange for a \$40 million up-front payment, the financial institution delivered approximately 2.1 million shares. Subsequent to the end of the second quarter, the ASR purchase period concluded with no additional shares delivered, resulting in an average price per share of \$19.13.

Including repurchases under the ASR transaction described above, during the first six months of fiscal year 2014, approximately 3.1 million shares were repurchased for a total cost of \$58.4 million, resulting in an average price per share of \$19.06.

The total remaining amount authorized under the share repurchase program, as of February 28, 2014, was \$21.6 million.

As of February 28, 2014, our total cash balance of \$50.4 million (\$35.1 million of unrestricted and \$15.3 million of restricted cash balances) reflected the impact of the cash generated from operating activities, stock option exercise proceeds, cash used for share repurchases, debt payments and capital expenditures mentioned above. We believe that existing cash, funds generated from operations and the \$100 million available under our Series 2011-1 Senior Secured Variable Funding Notes, Class A-1, will meet our needs for the foreseeable future.

Contractual Obligations and Commitments

During the second quarter of fiscal year 2014, we amended one of our purchase obligation contracts to increase our current volume commitment and extend the term of the contract. The amendment will increase our purchase obligation commitment by approximately \$240 million through the life of the contract. For a summary of our commitments to make future payments under contractual obligations, see the Contractual Obligations and Commitments section of Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended August 31, 2013. There have been no other significant changes in our contractual obligations since August 31, 2013.

Table of Contents

Critical Accounting Policies and Estimates

Critical accounting policies are those the Company believes are most important to portraying its financial conditions and results of operations and also require the greatest amount of subjective or complex judgments by management.

Judgments and uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting policies previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended August 31, 2013.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the quantitative and qualitative market risks set forth in Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report on Form 10-K for the year ended August 31, 2013.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-14 under the Securities Exchange Act of 1934). Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective at the reasonable assurance level.

There were no significant changes in the Company's internal control over financial reporting during the quarter ended February 28, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various legal proceedings and has certain unresolved claims pending. Based on the information currently available, management believes that all claims currently pending are either covered by insurance or would not have a material adverse effect on the Company's business, operating results or financial condition.

Item 1A. Risk Factors

There has been no material change in the risk factors set forth in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended August 31, 2013.

Total	2,658	\$ 19.14	2,658	

(1) The total number of shares purchased for the period of February 1, 2014 through February 28, 2014, includes the delivery of approximately 2.1 million shares related to the accelerated share repurchase (“ASR”) agreement.

(2) The average price per share for the period of February 1, 2014 through February 28, 2014 includes the total cost for the ASR transaction with the average share repurchase price of \$19.13. For additional information on this program see Note 3 - Share Repurchase Program.

(3) In August 2013, the Company’s Board of Directors extended the share repurchase program authorizing the Company to purchase up to \$40 million of its outstanding shares of common stock and, in January 2014, the Company’s Board of Directors approved an incremental \$40 million authorization that allows for up to \$80 million of common stock to be repurchased through August 31, 2014. Share repurchases may be made from time to time in the open market or otherwise, including through an accelerated share repurchase program, under terms of a Rule 10b5-1 plan, in privately negotiated transactions or in round lot or block transactions. The share repurchase program may be extended, modified, suspended or discontinued at any time.
