### METSO TO REBUILD CMPC S BOARD MACHINE IN CHILE

(Helsinki, Finland, June 2, 2004) - Metso Corporation's (NYSE: MX; HEX: MEO) fiber and paper technology business area, Metso Paper, will rebuild Cartulinas CMPC's board machine in its Maule mill in Chile. The rebuilt machine will start in mid 2005. The value of the order is not disclosed.

The board machine BM19 was originally started up in 1998, and it is used to make folding boxboard. The rebuild will improve the end-product quality. At the same time, the new technology will enhance production capacity from about 600 tons/day to 900 tons/day. The speed of the 5-m wide board line will be 650 m/min after the rebuild.

The delivery will include a new headbox, two shoe presses and a metering size press. In addition, Metso Paper will upgrade the machine's drying capacity to correspond to the higher speed, as well as supply a new winder and a shoe nip calander.

Cartulinas CMPC S.A. is an affiliate of Empresas CMPC S.A. It has manufactured and marketed folding boxboard since 1951. Its two mills have an annual production capacity of 220.000 tons. With the investment to Maule mill, CMPC will be able to increase the combined production to over 300.000 tons per year. The increased production will be mainly targeted to North America, Europe and Asia.

*Metso Corporation is a global supplier of process industry machinery and systems, as well as know-how and aftermarket services. The Corporation's core businesses are fiber and paper technology (Metso Paper), rock and mineral processing (Metso Minerals) and automation and control technology (Metso Automation).
