**Filed Pursuant to Rule 424(b)(2)**

**Registration Statement No. 333-211718**

Pricing Supplement dated July 24, 2018 to the

Product Prospectus Supplement MLN-ES-ETF-1 dated July 8, 2016 and

Prospectus Dated June 30, 2016

The  
Toronto-Dominion  
Bank

\$1,047,000

Autocallable  
Contingent Interest  
Barrier Notes  
Linked to the Least  
Performing among  
the American  
depository receipts  
of British  
American Tobacco  
p.l.c., the Common  
Stock of Altria  
Group, Inc., and  
the Common Stock  
of Philip Morris  
International Inc.  
Due January 27,  
2023

The Toronto-Dominion Bank ("TD" or "we") has offered the Autocallable Contingent Interest Barrier Notes (the "Notes") linked to the least performing among the American depository receipts ("ADRs") of British American Tobacco p.l.c., the common stock of Altria Group, Inc., and the common stock of Philip Morris International Inc. (each, a "Reference Asset" and together, the "Reference Assets").

The Notes will pay a Contingent Interest Payment on a Contingent Interest Payment Date (including the Maturity Date) at a per annum rate of 13.30% (the "Contingent Interest Rate") only if, on the related Contingent Interest Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Contingent Interest Barrier Value, which is equal to 75.00% of its Initial Value. The Notes will be automatically called if, on any Call

Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value. If the Notes are automatically called, on the first following Contingent Interest Payment Date (the “Call Payment Date”), we will pay a cash payment per Note equal to the Principal Amount, plus any Contingent Interest Payment otherwise due. No further amounts will be owed under the Notes. If the Notes are not automatically called, the amount we pay at maturity, in addition to any Contingent Payment otherwise due, if anything, will depend on the Closing Value of each Reference Asset on its Final Valuation Date (each, its “Final Value”) relative to its Barrier Value, which is equal to 60.00% of its Initial Value, calculated as follows:

- If the Final Value of each Reference Asset is greater than or equal to its Barrier Value:  

the Principal Amount of \$1,000
- If the Final Value of any Reference Asset is less than its Barrier Value:

the sum of (1) \$1,000 plus (2) the product of (i) \$1,000 times (ii) the Least Performing Percentage Change *In this scenario, investors will suffer a loss on their initial investment that is proportionate to the Reference Asset with the lowest percentage change from its Initial Value to its Final Value (the “Least Performing Reference Asset”) over the term of the Notes. Specifically, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount. Any payments on the Notes are subject to our credit risk.*

**The Notes do not guarantee the payment of any Contingent Interest Payments or the return of the Principal Amount. Investors are exposed to the market risk of each Reference Asset on each Contingent Interest Observation Date (including the Final Valuation Date) and any decline in the value of one Reference Asset will not be offset or mitigated by a lesser decline or potential increase in the value of any other Reference Asset. If the Final Value of any Reference Asset is less than its Barrier Value, investors may lose up to their entire investment in the Notes.**

The Notes are unsecured and are not savings accounts or insured deposits of a bank. The Notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States. The Notes will not be listed or displayed on any securities exchange or electronic communications network.

**The Notes have complex features and investing in the Notes involves a number of risks. See “Additional Risk Factors” beginning on page P-7 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement MLN-ES-ETF-1 dated July 8, 2016 (the “product prospectus supplement”) and “Risk Factors” on page 1 of the prospectus dated June 30, 2016 (the “prospectus”).**

**Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these Notes or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

We will deliver the Notes in book-entry only form through the facilities of The Depository Trust Company on July 27, 2018 against payment in immediately available funds.

The estimated value of your Notes at the time the terms of your Notes were set on the Pricing Date is \$893.80 per Note, as discussed further under “Additional Risk Factors — Estimated Value” beginning on page P-9 and “Additional Information Regarding the Estimated Value of the Notes” on page P-27 of this pricing supplement. The estimated value is less than the public offering price of the Notes.

Public Offering Price <sup>1</sup>	Underwriting Discount <sup>2</sup>	Proceeds to TD
Per Note \$1,000.00	\$45.00	\$955.00

Edgar Filing: TORONTO DOMINION BANK - Form 424B2

Total    \$1,047,000.00            \$47,115.00            \$999,885.00

The public offering price, underwriting discount and proceeds to TD listed above relate to the Notes we issue initially. We may decide to sell additional Notes after the date of this pricing supplement, at public offering prices and with underwriting discounts and proceeds to TD that differ from the amounts set forth above. The return (whether positive or negative) on your investment in the Notes will depend in part on the public offering price you pay for such Notes.

---

<sup>1</sup> Certain dealers who purchase the Notes for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The public offering price for investors purchasing the Notes in these accounts may be as low as \$970.00 (97.00%) per \$1,000.00 Principal Amount of the Notes.

<sup>2</sup> TD Securities (USA) LLC (“TDS”) will receive a commission of \$45.00 (4.50%) per \$1,000.00 principal amount of the Notes and may use all or a portion of that commission to allow selling concessions to other dealers in connection with the distribution of the Notes, or has offered the Notes directly to investors. TDS may resell the Notes to other securities dealers at the Principal Amount less a concession not in excess of \$45.00 per Note. The other dealers may forgo, in their sole discretion, some or all of their selling concessions. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Notes, and TD will pay TDS a fee in connection with its role in the offer and sale of the Notes. See “Supplemental Plan of Distribution (Conflicts of Interest)” on page P-26 of this pricing supplement.

TD SECURITIES (USA) LLC P-1

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

**Issuer:** TD  
**Issue:** Senior Debt Securities  
**Type of Note:** Autocallable Contingent Interest Barrier Notes  
**Term:** Approximately 4.5 years, subject to an automatic call  
**Reference Assets:** The American depository receipts of British American Tobacco p.l.c. (Bloomberg ticker: BTI, “BTI”), the common stock of Altria Group, Inc. (Bloomberg ticker: MO, “MO”) and the common stock Philip Morris International Inc. (Bloomberg ticker: PM, “PM”)

**CUSIP / ISIN:** 89114QPN2 / US89114QPN24  
**Agent:** TDS  
**Currency:** U.S. Dollars  
**Minimum Investment:** \$1,000 and minimum denominations of \$1,000 in excess thereof  
**Principal Amount:** \$1,000 per Note  
**Pricing Date:** July 24, 2018  
**Issue Date:** July 27, 2018, which is three Business Days following the Pricing Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), trades in the secondary market generally are required to settle in two Business Days (“T+2”), unless the parties to a trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes in the secondary market on any date prior to two Business Days before delivery of the Notes will be required, by virtue of the fact that each Note initially will settle in three Business Days (“T+3”), to specify alternative settlement arrangements to prevent a failed settlement of the secondary market trade.

**Final Valuation Date:** The final Contingent Interest Observation Date, as described below under “Contingent Interest Observation Dates” and as described under “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement.

**Maturity Date:** January 27, 2023, subject to postponement as described below under “Contingent Interest Observation Dates” and as described under “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement or, if such day is not a Business Day, the next following Business Day.

**Call Feature:** If the Closing Value of each Reference Asset on any Call Observation Date is greater than or equal to its Call Threshold Value, we will automatically call the Notes and, on the related Call Payment Date, will pay you a cash payment equal to the Principal Amount, plus any Contingent Interest Payment otherwise due. No further amounts will be owed to you under the Notes.

TD SECURITIES (USA) LLC P-2

With respect to BTI, \$51.92 (100.00% of its initial value).

**Call  
Threshold  
Value:**

With respect to MO, \$57.99 (100.00% of its initial value).

With respect to PM, \$83.56 (100.00% of its initial value).

Each Call Threshold Value is subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.

**Call  
Observation  
Dates:**

Quarterly, on the 24<sup>th</sup> calendar day of each January, April, July and October, commencing on July 24, 2019 and ending on October 24, 2022, or, if such day is not a Trading Day, the next following Trading Day. If a Market Disruption Event occurs or is continuing with respect to a Reference Asset on any Call Observation Date, the Call Observation Date for the affected Reference Asset will be postponed until the next Trading Day on which no Market Disruption Event occurs or is continuing for that Reference Asset. In no event, however, will any Call Observation Date for any Reference Asset be postponed by more than ten Trading Days. If the determination of the Closing Value of a Reference Asset for any Call Observation Date is postponed to the last possible day, but a Market Disruption Event occurs or is continuing on that day, that day will nevertheless be the date on which the Closing Value of such Reference Asset will be determined. In such an event, the Calculation Agent will estimate the Closing Value that would have prevailed in the absence of the Market Disruption Event. For the avoidance of doubt, if on any Call Observation Date, no Market Disruption Event is occurring with respect to a particular Reference Asset, the Call Observation Date for such Reference Asset will be made on the originally scheduled Observation Date irrespective of the occurrence of a Market Disruption event with respect to another Reference Asset.

**Call Payment  
Date:**

If the Notes are subject to an automatic call, the Call Payment Date will be the Contingent Interest Payment Date immediately following the relevant Call Observation Date, subject to postponement as described above under “Call Observation Dates” if the related Call Observation Date is postponed or, if such day is not a Business Day, the next following Business Day.

If the Closing Value of each Reference Asset is greater than or equal to its Contingent Interest Barrier Value on any Contingent Interest Observation Date, a Contingent Interest Payment will be paid to you on the corresponding Contingent Interest Payment Date, in an amount equal to:

Principal Amount x Contingent Interest Rate x 1/4

**Contingent  
Interest  
Payment:**

If the Closing Value of any Reference Asset is less than its Contingent Interest Barrier Value on any Contingent Interest Observation Date, you will receive no Contingent Interest Payment on the corresponding Contingent Interest Payment Date.

**Contingent Interest Payments on the Notes are not guaranteed. You will not receive a Contingent Interest Payment on a Contingent Interest Payment Date if the Closing Value of any Reference Asset on the related Contingent Interest Observation Date is less than its Contingent Interest Barrier Value.**

**Contingent  
Interest Rate:**

13.30% per annum.

**Contingent  
Interest  
Barrier  
Value:**

With respect to BTI, \$38.94 (75.00% of its initial value).

With respect to MO, \$43.49 (75.00% of its initial value).

With respect to PM, \$62.67 (75.00% of its initial value).

Each Contingent Interest Barrier Value is subject to adjustment as described under “General Terms of the Notes— Anti-Dilution Adjustments” in the product prospectus supplement.

TD SECURITIES (USA) LLC P-3

Contingent Interest Observation Dates: Quarterly, on the 24<sup>th</sup> calendar day of each January, April, July and October, commencing on October 24, 2018 and ending on January 24, 2023 (the “Final Valuation Date”), or, if such day is not a Trading Day, the next following Trading Day. If a Market Disruption Event occurs or is continuing with respect to a Reference Asset on any Contingent Interest Observation Date for any Reference Asset, the Contingent Interest Observation Date for the affected Reference Asset will be postponed until the next Trading Day on which no Market Disruption Event occurs or is continuing for that Reference Asset. In no event, however, will any Contingent Interest Observation Date for any Reference Asset be postponed by more than ten Trading Days. If the determination of the Closing Value of a Reference Asset for any Contingent Interest Observation Date is postponed to the last possible day, but a Market Disruption Event occurs or is continuing on that day, that day will nevertheless be the date on which the Closing Value of such Reference Asset will be determined. In such an event, the Calculation Agent will estimate the Closing Value that would have prevailed in the absence of the Market Disruption Event. For the avoidance of doubt, if on any Contingent Interest Observation Date, no Market Disruption Event is occurring with respect to a particular Reference Asset, the Contingent Interest Observation Date for such Reference Asset will be made on the originally scheduled Observation Date irrespective of the occurrence of a Market Disruption event with respect to another Reference Asset.

Contingent Interest Payment Dates: With respect to each Contingent Interest Observation Date, the second Business Day following the relevant Contingent Interest Observation Date, with the exception of the final Contingent Interest Payment Date, which will be the Maturity Date, subject to postponement as described above under “— Contingent Interest Observation Dates” if the related Contingent Interest Observation Date is postponed or, if such day is not a Business Day, the next following Business Day.

If the Notes are not automatically called, on the Maturity Date, in addition to any Contingent Interest Payment otherwise due, we will pay a cash payment, if anything, per Note equal to:

Payment at Maturity: If the Final Value of each Reference Asset is greater than or equal to its Barrier Value:  
Principal Amount of \$1,000.

Percentage Change: If the Final Value of any Reference Asset is less than its Barrier Value:  
\$1,000 + \$1,000 x Least Performing Percentage Change.  
For each Reference Asset, the Percentage Change is the quotient, expressed as a percentage, of the following formula:  
$$\frac{\text{Final Value} - \text{Initial Value}}{\text{Initial Value}}$$
  
With respect to BTI, \$51.92.  
With respect to MO, \$57.99.

**Initial Value:** With respect to PM, \$83.56.

**Closing Value:** In each case equal to its Closing Value on the Pricing Date, as determined by the Calculation Agent and subject to adjustment, as described under “General Terms of the Notes— Anti-Dilution Adjustments” in the product prospectus supplement.  
For each Reference Asset, the Closing Value will be the closing sale price or last reported sale price (or, in the case of NASDAQ, the official closing price) for that Reference Asset on a per-share or other unit

basis, on any Trading Day for that Reference Asset or, if such Reference Asset is not quoted on any national securities exchange on that day, on any other market system or quotation system that is the primary market for the trading of such Reference Asset.

**Final Value:** For each Reference Asset, the Closing Value of such Reference Asset on its Final Valuation Date.

TD SECURITIES (USA) LLC P-4

With respect to BTI, \$31.15 (60.00% of its initial value).

With respect to MO, \$34.79 (60.00% of its initial value).

**Barrier**

**Value:**

With respect to PM, \$50.14 (60.00% of its initial value).

Each Barrier Value is subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.

**Least**

**Performing**

**Reference**

**Asset:**

The Reference Asset with the lowest Percentage Change as compared to the Percentage Change of any other Reference Asset.

**Least**

**Performing**

**Percentage**

**Change:**

The Percentage Change of the Least Performing Reference Asset.

**Monitoring**

**Period:**

Final Valuation Date Monitoring

**Business Day:** a day on which banking institutions are authorized or required by law to close in New York City or Toronto.

By purchasing the Notes, you agree, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to treat the Notes, for U.S. federal income tax purposes, as pre-paid derivative contracts with respect to the Reference Assets. Pursuant to this approach, it is likely that any Contingent Interest Payment that you receive should be included in ordinary income at the time you receive the payment or when it accrues, depending on your regular method of accounting for U.S. federal income tax purposes. Based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, it is reasonable to treat the Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Notes could differ materially and adversely from the treatment described above, as described further herein under “Supplemental Discussion of U.S. Federal Income Tax Consequences” beginning on page P-24 and in the product prospectus supplement under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.

**U.S. Tax Treatment:**

**Canadian Tax Treatment:**

Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Notes.

**Record Date:**

The Business Day preceding the relevant Contingent Interest Payment Date, provided that if you sell the Notes in the secondary market on a Contingent Interest Observation Date, assuming standard T+2 settlement, the purchaser of the Notes shall be deemed to be the record holder as of the applicable record date and, therefore, you will not be entitled to any payment attributable to that date.

**Calculation Agent:**

TD

**Listing:**

The Notes will not be listed or displayed on any securities exchange or electronic communications network.

Clearance and DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg as Settlement: described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus).

TD SECURITIES (USA) LLC P-5

Additional Terms of Your Notes

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement MLN-ES-ETF-1 (the “product prospectus supplement”), relating to our Senior Debt Securities, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Notes vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” beginning on page P-7 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement and “Risk Factors” on page 1 of the prospectus, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. You may access these documents on the SEC website at [www.sec.gov](http://www.sec.gov) as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

§ Prospectus dated June 30, 2016:

<https://www.sec.gov/Archives/edgar/data/947263/000119312516638441/d162493d424b3.htm>

§ Product Prospectus Supplement MLN-ES-ETF-1 dated July 8, 2016:

[https://www.sec.gov/Archives/edgar/data/947263/000089109216016045/e70441\\_424b2.htm](https://www.sec.gov/Archives/edgar/data/947263/000089109216016045/e70441_424b2.htm)

Our Central Index Key, or CIK, on the SEC website is 0000947263. Alternatively, The Toronto-Dominion Bank, any Agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries.

We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes, in which case we may reject your offer to purchase.

TD SECURITIES (USA) LLC P-6

## Additional Risk Factors

The Notes involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Notes. For additional information as to these and other risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and the prospectus.

You should carefully consider whether the Notes are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Notes and the suitability of the Notes in light of their particular circumstances.

### **Your Investment in the Notes May Result in a Loss.**

The Notes do not guarantee the return of the Principal Amount and investors may lose up to their entire investment in the Notes. Specifically, if the Notes are not automatically called and the Final Value of any Reference Asset is less than its Barrier Value, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount.

### **You Will Not Receive Any Contingent Interest Payment for Any Contingent Interest Payment Date If the Closing Value of Any Reference Asset on the Corresponding Contingent Interest Observation Date Is Less Than its Contingent Interest Barrier Value.**

You will not receive a Contingent Interest Payment on a Contingent Interest Payment Date if the Closing Value of any Reference Asset on the related Contingent Interest Observation Date is less than its Contingent Interest Barrier Value. If the Closing Value of any Reference Asset is less than its Contingent Interest Barrier Value on each Contingent Interest Observation Date over the term of the Notes, you will not receive any Contingent Interest Payments, and you will not receive a positive return on your Notes. Generally, this non-payment of any Contingent Interest Payment will coincide with a greater risk of principal loss on your Notes. Accordingly, if we do not pay the Contingent Interest Payment on the Maturity Date, you will incur a loss of principal because the Final Price of the Least Performing Reference Asset will be less than the Barrier Price, and you may lose your entire Principal Amount.

### **The Potential Positive Return on the Notes Is Limited to the Contingent Interest Payments Paid on the Notes, If Any, Regardless of Any Appreciation in the Price of Any Reference Asset.**

The potential positive return on the Notes is limited to any Contingent Interest Payments paid, meaning any positive return on the Notes will be composed solely by the sum of any Contingent Interest Payments paid over the term of the Notes. Therefore, if the appreciation of any Reference Asset exceeds the sum of any Contingent Interest Payments actually paid on the Notes, the return on the Notes will be less than the return would be if you made a direct investment in such Reference Asset or a security directly linked to the positive performance of such Reference Asset.

### **Your Return May Be Lower than the Return on a Conventional Debt Security of Comparable Maturity.**

The return that you will receive on your Notes, which could be negative, may be less than the return you could earn on other investments. The Notes do not provide for fixed interest payments and you may not receive any Contingent Interest Payments over the term of the Notes. Even if you do receive one or more Contingent Interest Payments and your return on the Notes is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD with the same maturity date or if you invested directly in any of the Reference Assets. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

**The Notes May Be Automatically Called Prior to the Maturity Date And Are Subject to Reinvestment Risk.**

If your Notes are automatically called, no further payments will be owed to you under the Notes after the applicable Call Payment Date. Therefore, because the Notes could be called as early as the first potential Call Payment Date, the holding period could be limited. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Notes at a comparable return for a similar level of risk in the event the Notes are automatically called prior to the Maturity Date. Furthermore, to the extent you are able to reinvest such proceeds in an investment with a comparable return for a similar level of risk, you may incur transaction costs such as dealer discounts and hedging costs built into the price of the new notes.

**Investors Are Exposed to the Market Risk of Each Reference Asset on Each Contingent Interest Observation Date (Including the Final Valuation Date).**

Your return on the Notes is not linked to a basket consisting of the Reference Assets. Rather, it will be contingent upon the performance of each Reference Asset. Unlike an instrument with a return linked to a basket of indices, common stocks or other underlying securities, in which risk is mitigated and diversified among all of the components of the basket, you will be exposed equally to the risks related to each Reference Asset on each Contingent Interest Observation Date (including the Final Valuation Date). Poor performance by any Reference Asset over the term of the Notes will negatively affect your return and will not be offset or mitigated by a positive performance by any other Reference Asset. For instance, you will receive a negative return equal to the Least Performing Percentage Change if the Final Value of any Reference Asset is less than its Barrier Value on its Final Valuation Date, even if the Percentage Change of another Reference Asset is positive or has not declined as much. Accordingly, your investment is subject to the market risk of each Reference Asset.

TD SECURITIES (USA) LLC P-7

**Because the Notes are Linked to the Least Performing Reference Asset, You Are Exposed to a Greater Risk of no Contingent Interest Payments and Losing a Significant Portion or All of Your Initial Investment at Maturity than if the Notes Were Linked to a Single Reference Asset.**

The risk that you will not receive any Contingent Interest Payments and lose a significant portion or all of your initial investment in the Notes is greater if you invest in the Notes than the risk of investing in substantially similar securities that are linked to the performance of only one Reference Asset. With more Reference Assets, it is more likely that the Closing Value or Final Value of any Reference Asset will be less than its Contingent Interest Barrier Value on any Contingent Interest Observation Date (including the Final Valuation Date) than if the Notes were linked to a single Reference Asset.

In addition, the lower the correlation is between the performance of a pair of Reference Assets, the more likely it is that one of the Reference Assets will decline in value to a Closing Value or Final Value, as applicable, that is less than its Contingent Interest Barrier Value or Barrier Value on any Call Observation Date or Contingent Interest Observation Date. Although the correlation of the Reference Assets' performance may change over the term of the Notes, the economic terms of the Notes, including the Contingent Interest Rate, Contingent Interest Barrier Value and Barrier Value are determined, in part, based on the correlation of the Reference Assets' performance calculated using our internal models at the time when the terms of the Notes are finalized. All things being equal, a higher Contingent Interest Rate and lower Contingent Interest Barrier Values and Barrier Values are generally associated with lower correlation of the Reference Assets. Therefore, if the performance of a pair of Reference Assets is not correlated to each other or is negatively correlated, the risk that you will not receive any Contingent Interest Payments or that the Final Value of any Reference Asset is less than its Barrier Value will occur is even greater despite a lower Barrier Value and Contingent Interest Barrier Value. Therefore, it is more likely that you will not receive any Contingent Interest Payments and that you will lose a significant portion or all of your initial investment at maturity.

**Investors Are Subject to TD's Credit Risk, and TD's Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Notes.**

Although the return on the Notes will be based on the performance of the Least Performing Reference Asset, the payment of any amount due on the Notes is subject to TD's credit risk. The Notes are TD's senior unsecured debt obligations. Investors are dependent on TD's ability to pay all amounts due on the Notes and, therefore, investors are subject to the credit risk of TD and to changes in the market's view of TD's creditworthiness. Any decrease in TD's credit ratings or increase in the credit spreads charged by the market for taking TD's credit risk is likely to adversely affect the market value of the Notes. If TD becomes unable to meet its financial obligations as they become due, investors may not receive any amounts due under the terms of the Notes.

**The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.**

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Notes will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, any underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Notes. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction.

**There May Not Be an Active Trading Market for the Notes — Sales in the Secondary Market May Result in Significant Losses.**

There may be little or no secondary market for the Notes. The Notes will not be listed or displayed on any securities exchange or electronic communications network. The Agent may make a market for the Notes; however, it is not required to do so and may stop any market-making activities at any time. Even if a secondary market for the Notes develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Notes in any secondary market could be substantial.

If you sell your Notes before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the value of the then-current least performing Reference Asset, and as a result, you may suffer substantial losses.

**The Amounts Payable on the Notes Are Not Linked to the Value of the Least Performing Reference Asset at Any Time Other Than on the Contingent Interest Observation Dates (Including the Final Valuation Date) and Call Observation Dates.**

Any payments on the Notes will be based on the Closing Value of the Least Performing Reference Asset only on the Contingent Interest Observation Dates (Including the Final Valuation Date) and Call Observation Dates. Even if the market value of the Least Performing Reference Asset appreciates prior to the relevant Contingent Interest Observation Date but then drops on that day to a Closing Value that is less than its Contingent Interest Barrier Value, you will not receive any Contingent Interest Payment on the corresponding Contingent Interest Payment Date. Similarly, the Payment at Maturity may be significantly less than it would have been had the Notes been linked to the Closing Value of the Least Performing Reference Asset on a date other than the Final Valuation Date, and may be zero. Although the actual values of the Reference Assets at other times during the term of the Notes may be higher than the values on one or more Contingent Interest Observation Dates (including the Final Valuation Date) or Call Observation Dates, any Contingent Interest Payments on the Notes and the Payment at Maturity will be based solely on the Closing Value of the Least Performing Reference Asset on the applicable Contingent Interest Observation Date (including the Final Valuation Date) and Call Observation Dates.

**The Contingent Interest Rate Will Reflect In Part the Volatility of each Reference Asset and May Not Be Sufficient to Compensate You for the Risk of Loss at Maturity.**

Generally, the higher the Reference Assets' volatility, the more likely it is that the Closing Value of each Reference Asset could be less than its Initial Value or its Contingent Interest Barrier Value on a Contingent Interest Observation Date or its Barrier Value on its Final Valuation Date. Volatility means the magnitude and frequency of changes in the values of the Reference Assets. This greater risk will generally be reflected in a higher Contingent Interest Rate for the Notes than the interest rate payable on our conventional debt securities with a comparable term. However, while the Contingent Interest Rate is set on the Pricing Date, the Reference Assets' volatility can change significantly over the term of the Notes, and may increase. The value of any Reference Asset could fall sharply on the Contingent Interest Observation Dates, resulting in few or no Contingent Interest Payments or on the Final Valuation Date, resulting in a significant or entire loss of principal.

**There Are Single Stock Risks Associated with each Reference Asset.**

The value of each Reference Asset can rise or fall sharply due to factors specific to such Reference Asset and their issuers (the "Reference Asset Issuer", and together, the "Reference Asset Issuers"), such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock and commodity market volatility and levels, interest rates and economic and political conditions. You, as an investor in the Notes, should make your own investigation into the Reference Assets and Reference Asset Issuers for your Notes. For additional information, see "Information Regarding the Reference Assets" in this pricing supplement and the each Reference Asset Issuer's SEC filings. **We urge you to review financial and other information filed periodically by the Reference Asset Issuers with the SEC.**

**Trading and Business Activities by TD or its Affiliates May Adversely Affect the Market Value of the Notes.**

We, the Agent and our affiliates may hedge our obligations under the Notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the price of a Reference Asset, and we may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Notes declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in a Reference Asset.

These trading activities may present a conflict between the holders' interest in the Notes and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers' accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Notes.

We, the Agent and our affiliates may, at present or in the future, engage in business with one or more Reference Asset Issuers, including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between our, the Agent's and our affiliates' obligations, and your interests as a holder of the Notes. Moreover, we, the Agent or our affiliates may have published, and in the future expect to publish, research reports with respect to a Reference Asset. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities by us or one or

more of our affiliates or the Agents or their affiliates may affect the value of a Reference Asset and, therefore, the market value of the Notes, whether the Contingent Interest Payment is payable on any Contingent Interest Payment Date and the Payment at Maturity, if any.

### **Estimated Value**

#### **The Estimated Value of Your Notes Is Lower Than the Public Offering Price of Your Notes.**

The estimated value of your Notes is lower than the public offering price of your Notes. The difference between the public offering price of your Notes and the estimated value of the Notes reflects costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

#### **The Estimated Value of Your Notes Is Based on Our Internal Funding Rate.**

The estimated value of your Notes is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Notes generally represents a discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would pay for its conventional fixed-rate debt securities. This discount is based on, among other things, our view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for our conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional fixed-rate debt securities, or the borrowing rate we would pay for our conventional fixed-rate debt securities were to be used, we would expect the economic terms of the Notes to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Notes is expected to increase the estimated value of the Notes at any time.

TD SECURITIES (USA) LLC P-9

**The Estimated Value of the Notes Is Based on Our Internal Pricing Models, Which May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.**

The estimated value of your Notes is based on our internal pricing models when the terms of the Notes are set, which take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Notes may not be consistent with those of other financial institutions that may be purchasers or sellers of Notes in the secondary market. As a result, the secondary market price of your Notes may be materially lower than the estimated value of the Notes determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

**The Estimated Value of Your Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely be Lower Than the Public Offering Price of Your Notes and May Be Lower Than the Estimated Value of Your Notes.**

The estimated value of the Notes is not a prediction of the prices at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time, if any, will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than the estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes, secondary market prices of your Notes will likely be lower than the public offering price of your Notes. As a result, the price at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be lower than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

**The Temporary Price at Which the Agent May Initially Buy the Notes in the Secondary Market May Not Be Indicative of Future Prices of Your Notes.**

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agent may initially buy or sell the Notes in the secondary market (if the Agent makes a market in the Notes, which it is not obligated to do) may exceed the estimated value of the Notes on the Pricing Date, as well as the secondary market value of the Notes, for a temporary period after the Issue Date of the Notes, as discussed further under "Additional Information Regarding the Estimated Value of the Notes." The price at which the Agent may initially buy or sell the Notes in the secondary market may not be indicative of future prices of your Notes.

**The Notes are Subject to Industry Concentration Risk**

The Notes are subject to industry concentration risk because, as described below under "Information Regarding the Reference Assets", the Reference Asset Issuers operate in a single sector. The performance of these companies is subject to a number of complex and unpredictable factors such as government regulation, supply and demand for the products and services produced or offered by such companies and industry competition. Any developments may have a negative effect on the Reference Asset Issuers and, in turn, may materially and adversely effect the value of, and the

amounts payable on, the Notes. By investing in the Notes, you will not benefit from the diversification which could result from an investment linked to companies that operate in multiple sectors.

**The Notes are Subject to Exchange Rate Risk**

The Notes are subject to exchange rate risk because they are linked, in part, to the ADRs of BTI that are denominated in U.S. dollars but represent non-U.S. equity securities that are denominated in a non-U.S. currency. Accordingly, changes in currency exchange rates may negatively impact the value of the ADRs. The value of the non-U.S. currency may be subject to a high degree of fluctuation due to changes in interest rates, the effects of monetary policies issued by the U.S., non-U.S. governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. Therefore, adverse changes in exchange rates may result in reduced returns for the Notes.

**The Notes are Subject to Risks Associated with Non-U.S. Markets**

The Notes are subject to risks associated with non-U.S. markets because they are linked, in part, to the ADRs of BTI. An investment in securities linked directly or indirectly to the value of non-U.S. equity securities involves particular risks. For example, the non-U.S. markets may be more volatile than the U.S. securities markets, and market developments may affect these markets differently from the U.S. or other securities markets. Direct or indirect government intervention to stabilize the securities markets outside the U.S., as well as cross-shareholdings in certain companies, may affect trading prices and trading volumes in those markets. Also, the public availability of information concerning the non-U.S. issuers may vary depending on their home jurisdiction and the reporting requirements imposed by their respective regulators. Securities prices generally are subject to political, economic, financial and social factors that apply to the markets in which they trade and, to a lesser extent, non-U.S. markets. Securities prices outside the U.S. are subject to political, economic, financial and social factors that apply in non-U.S. countries. These factors, which could negatively affect non-U.S. markets, include the possibility of changes in a non-U.S. government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to non-U.S. companies or investments in non-U.S. equity securities and the possibility of fluctuations in the rate of exchange between currencies. The United Kingdom has voted to leave

TD SECURITIES (USA) LLC P-10

the European Union (popularly known as “Brexit”). The effect of Brexit is uncertain, and Brexit has and may continue to contribute to volatility in the prices of securities of companies located in Europe and currency exchange rates, including the valuation of the euro and British pound in particular. Moreover, non-U.S. economies may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

**There Are Important Differences Between the Rights of Holders of ADRs and the Rights of Holders of the Non-U.S. Stock**

There are important differences between the rights of holders of ADRs and the non-U.S. stock represented by such ADRs. Each ADR is a security evidenced by an American depositary receipt that represents a specified number of shares of the non-U.S. stock. Generally, an ADR is issued under a deposit agreement, which sets forth the rights and responsibilities of the depositary, the non-U.S. stock issuer and holders of the ADRs, which may be different from the rights of holders of the non-U.S. stock. For example, the non-U.S. stock issuer may make distributions in respect of the non-U.S. stock that are not passed on to the holders of its ADRs. Any such differences between the rights of holders of the ADRs and holders of the non-U.S. stock may be significant and may materially and adversely affect the value of the ADRs and, as a result, the value of your Notes and any payment of any contingent coupons or at maturity.

**If the Values of any Reference Asset Changes, the Market Value of Your Notes May Not Change in the Same Manner.**

Your Notes may trade quite differently from the performance of any of the Reference Assets. Changes in the value of any Reference Asset may not result in a comparable change in the market value of your Notes. Even if the value of each Reference Asset increases above its Initial Value during the life of the Notes, the market value of your Notes may not increase by the same amount and could decline.

**There Are Potential Conflicts of Interest Between You and the Calculation Agent.**

The Calculation Agent will, among other things, determine whether the Contingent Interest Payment is payable on any Contingent Interest Payment Date and the Payment at Maturity on the Notes. We will serve as the Calculation Agent but may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to unwind any related hedges. Since this discretion by the Calculation Agent may affect payments on the Notes, the Calculation Agent may have a conflict of interest if it needs to make any such decision. For example, the Calculation Agent may have to determine whether a Market Disruption Event affecting a Reference Asset has occurred, and make certain adjustments to the Reference Asset if certain events occur. This determination may, in turn, depend on the Calculation Agent’s judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Notes, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent’s role, see “General Terms of the Notes—Role of Calculation Agent” in the product prospectus supplement.

**You Will Have No Rights to Receive Any Shares of a Reference Asset and You Will Not Be Entitled to Dividends or Other Distributions by a Reference Asset.**

The Notes are our debt securities. They are not equity instruments, shares of stock, or securities of any other issuer. Investing in the Notes will not make you a holder of shares of any Reference Asset. You will not have any voting rights, any rights to receive dividends or other distributions, any rights against any Reference Asset Issuer. As a result, the return on your Notes may not reflect the return you would realize if you actually owned shares of any Reference

Asset and received the dividends paid or other distributions made in connection with them. Your Notes will be paid in cash and you have no right to receive delivery of shares of any Reference Asset.

**Any Contingent Interest Observation Date (including the Final Valuation Date) or Call Observation Date and the Related Payment Dates are Subject to Market Disruption Events and Adjustments.**

Each Contingent Interest Observation Date (including the Final Valuation Date) or Call Observation Date and the related payment dates (including the Maturity Date) are subject to postponement as described in the product prospectus supplement due to the occurrence of one of more market disruption events. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement. A market disruption event for a particular Reference Asset will not constitute a market disruption event for any other Reference Asset.

**We Do Not Control any Reference Asset Issuer and Are Not Responsible for Any of their Disclosures.**

Neither we nor any of our affiliates have the ability to control the actions of any Reference Asset Issuer and have not conducted any independent review or due diligence of any information related to any Reference Asset or Reference Asset Issuer. We are not responsible for any Reference Asset Issuer’s public disclosure of information on itself or the applicable Reference Asset, whether contained in Securities Exchange Commission filings or otherwise. You should make your own investigation into each of the Reference Asset Issuers.

**You Will Have Limited Anti-Dilution Protection.**

The Calculation Agent will adjust the Initial Price and Barrier Price for stock splits, reverse stock splits, stock dividends, extraordinary dividends and other events that affect the Reference Assets, but only in the situations we describe in “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement and “Anti-Dilution Adjustments” herein. The Calculation Agent will not be required to make an adjustment for every event that may affect the Reference Assets. Those events or other actions by any

Reference Asset Issuer or a third party may nevertheless adversely affect the price of a Reference Asset, and adversely affect the value of your Notes.

**Significant Aspects of the Tax Treatment of the Notes Are Uncertain.**

The U.S. tax treatment of the Notes is uncertain. Please read carefully the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” in the product prospectus supplement, and the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” below. You should consult your tax advisor about your tax situation.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Notes, please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences.” If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Notes in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Notes and receiving the payments that might be due under the Notes.

TD SECURITIES (USA) LLC P-12

### Anti-Dilution Adjustments

The section “General Terms of the Notes—Anti-Dilution Adjustments—Transferable Rights and Warrants” in the product prospectus

supplement is replaced in its entirety with the following:

#### **Transferable Rights and Warrants**

If a Reference Asset Issuer issues transferable rights or warrants to all holders of such Reference Asset to subscribe for or purchase such Reference Asset at an exercise price per share that is less than its Closing Value on the Trading Day before the ex-dividend date for such issuance, then the Calculation Agent may adjust the Initial Value and/or Final Value, as applicable, of that Reference Asset, or any other terms of the Notes as the Calculation Agent determines appropriate with reference to any adjustment(s) to options contracts on the affected Reference Asset in respect of such issuance of transferable rights or warrants made by the Options Clearing Corporation, or any other equity derivatives clearing organization or exchange to account for the economic effect of such issuance.

TD SECURITIES (USA) LLC P-13

## Hypothetical Returns

The examples set out below are included for illustration purposes only and are hypothetical examples only; amounts below may have been rounded for ease of analysis. The Closing Values and Percentage Changes of the Reference Assets used to illustrate the calculation of whether a Contingent Interest Payment is payable on a Contingent Interest Payment Date and the Payment at Maturity are not estimates or forecasts of the Initial Value, the Closing Value, the Final Value or the value of any Reference Asset on any trading day prior to the Maturity Date. All examples assume hypothetical Initial Values of \$50.00, \$60.00 and \$80.00, Call Threshold Values of \$50.00, \$60.00 and \$80.00 (each 100.00% of the applicable hypothetical Initial Value), Contingent Interest Barrier Values of \$37.50, \$45.00 and \$60.00 respectively (each 75.00% of the applicable hypothetical Initial Value), Barrier Values of \$30.00, \$36.00 and \$48.00, respectively (each 60.00% of the applicable hypothetical Initial Value), a Contingent Interest Payment of \$33.25 per Note (reflecting the Contingent Interest Rate of 13.30% per annum), that a holder purchased Notes with a Principal Amount of \$1,000 and that no Market Disruption Event occurs on any Call Observation Date or Contingent Interest Observation Date (including the Final Valuation Date). The actual terms of the Notes are indicated on the cover hereof.

**Example 1** **The Closing Value of Each Reference Asset is Greater than or Equal to its Initial Value and Contingent Interest Barrier Value on the First Call Observation Date and The Notes Are Automatically Called.**

	<b>Closing Values</b>	<b>Payment (per Note)</b>
<b>First Contingent Interest Observation Date</b>	Reference Asset A: \$50.00 <b>(greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	\$33.25 (Contingent Interest Payment – Not Callable)
	Reference Asset B: \$62.00 <b>(greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	
	Reference Asset C: \$84.00 <b>(greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	
<b>Second and Third Contingent Interest Observation Date</b>	Reference Asset A: Various (all <b>greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	\$66.50 (Aggregate Contingent Interest Payments – Not Callable)
	Reference Asset B: Various (all <b>greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	
	Reference Asset C: Various (all <b>greater than or equal to</b> its Call Threshold Value and Contingent Interest Barrier Value)	
		\$1,000.00 (Principal Amount)

**Fourth Contingent  
Interest Observation  
Date and First Call  
Observation Date**

Reference Asset A: \$52.00 + \$ 33.25 (Contingent Interest Payment)  
**(greater than or equal to** its Call  
 Threshold Value and Contingent Interest Barrier Value) \$1,033.25 (Total Payment upon Automatic Call)

Reference Asset B: \$65.00  
**(greater than or equal to** its Call  
 Threshold Value and Contingent  
 Interest Barrier Value)

Reference Asset C: \$83.00  
**(greater than or equal to** its Call  
 Threshold Value and Contingent  
 Interest Barrier Value)

If on the first Call Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value (and therefore also greater than the Contingent Interest Barrier Value), then the Notes will be automatically called and, on the Call Payment Date, we will pay you a cash payment equal to \$1,033.25 per Note, reflecting the Principal Amount plus the applicable Contingent Interest Payment. When added to the Contingent Interest Payments of \$99.75 paid in respect of the prior Contingent Interest Payment Dates, TD will have paid you a total of \$1,133.00 per Note, a return of 13.30% per Note. No further amounts will be owed under the Notes.

TD SECURITIES (USA) LLC P-14

**Example 2** The Closing Value of Each Reference Asset is Greater than or Equal to its Contingent Interest Barrier Value on Each of the Contingent Interest Observation Dates, the Notes Are Not Automatically Called on any Call Observation Date and the Final Value of Each Reference Asset is Greater Than its Barrier Value and Contingent Interest Barrier Value.

	<b>Closing Value</b>	<b>Payment (per Note)</b>
<b>First through Third Contingent Interest Observation Date</b>	Reference Asset A: Various (all <b><u>greater than or equal to</u></b> its Contingent Interest Barrier Value; <b><u>less than</u></b> its Call Threshold Value)	
	Reference Asset B: Various (all <b><u>greater than or equal to</u></b> its Contingent Interest Barrier Value; <b><u>less than</u></b> its Call Threshold Value)	\$99.75 (Aggregate Contingent Interest Payments)
	Reference Asset C: Various (all <b><u>greater than or equal to</u></b> its Contingent Interest Barrier Value; <b><u>less than</u></b> its Call Threshold Value)	
<b>Fourth through Seventeenth Contingent Interest Observation Date; First through Fourteenth Call Observation Date</b>	Reference Asset A: Various (all <b><u>greater than</u></b> its Contingent Interest Barrier Value, <b><u>less than</u></b> its Call Threshold Value)	
	Reference Asset B: Various (all <b><u>greater than</u></b> its Contingent Interest Barrier Value, <b><u>less than</u></b> its Call Threshold Value)	\$465.50 (Aggregate Contingent Interest Payments)
	Reference Asset C: Various (all <b><u>greater than</u></b> its Contingent Interest Barrier Value, <b><u>less than</u></b> its Call Threshold Value)	
<b>Final Valuation Date</b>	Reference Asset A: \$40.00 ( <b><u>greater than</u></b> its Barrier Value and Contingent Interest Barrier	\$1,000.00 (Principal Amount) + <u>\$ 33.25</u> (Contingent Interest Payment)

Value) \$1,033.25 (Total Payment on Maturity Date)

Reference Asset B: \$48.00  
(**greater than** its Barrier Value  
and Contingent Interest Barrier  
Value)

Reference Asset C: \$65.00  
(**greater than** its Barrier Value  
and Contingent Interest Barrier  
Value)

If the Closing Value of each Reference Asset on each of the first through seventeenth Contingent Interest Observation Dates is greater than or equal to its Contingent Interest Barrier Value and less than its Call Threshold Value on any Call Observation Date, we will pay the Contingent Interest Payment on the applicable Contingent Interest Payment Date and the Notes will not be subject to an automatic call. If the Final Value of each Reference Asset is greater than or equal to its Barrier Value on the Final Valuation Date and greater than or equal to its Contingent Interest Barrier Value on the Contingent Interest Observation Date, then on the Maturity Date we will pay you a cash payment equal to \$1,033.25 per Note, reflecting the Principal Amount plus the applicable Contingent Interest Payment. When added to the Contingent Interest Payments of \$565.25 paid in respect of the prior Contingent Interest Payment Dates, TD will have paid you a total of \$1,598.50 per Note, a return of 59.85% per Note.

TD SECURITIES (USA) LLC P-15

**Example 3 — The Closing Value of a Reference Asset is Less than its Contingent Interest Barrier Value on each of the Contingent Interest Observation Dates, the Notes Are Not Automatically Called and the Final Value of the Least Performing Reference Asset is Greater Than or Equal to its Barrier Value But Less than its Contingent Interest Barrier Value.**

	<b>Closing Value</b>	<b>Payment (per Note)</b>
<b>First through Third Contingent Interest Observation Date</b>	Reference Asset A: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)	
	Reference Asset B: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)	\$0
	Reference Asset C: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)	
<b>Fourth through Seventeenth Contingent Interest Observation Date; First through Fourteenth Call Observation Date</b>	Reference Asset A: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)	
	Reference Asset B: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)	
	Reference Asset C: Various (all <b><u>less than</u></b> its Contingent Interest Barrier Value)
