THREE MONTHS ENDED MARCH 31, 2002 AND 2001

(1) MARKETABLE SECURITIES

Upon adoption of FASB No. 115, management has determined that the Company's portfolio is best characterized as "Available-For-Sale". A corresponding increase in shareholders' equity has been effectuated. In accordance with the provisions of FASB No. 115, the adjustment in shareholders' equity to reflect the Company's unrealized gains has been made net of the tax effect had these gains been realized.

The following tables summarize the company's investments as of :

There are no current legal proceedings. The Company is not aware of any pending legal proceedings.

MANAGEMENT'S DISCUSSION AND ANALYSIS RESULTS OF OPERATIONS AND FINANCIAL CONDITION

ITEM 2.

RESULTS OF OPERATIONS

Three months ended March 31, 2002 as compared with three months ended March 31, 2001.

For the three months ended March 31, 2002, total revenues were \$661,838 up from \$647,626 in 2001. Increased kit sales were a factor resulting in increased revenues. There were Capital gains in 2002 of \$803 vs. a loss of (\$8,704) in 2001. Operating revenues were \$193,063 in 2002 up from \$140,077 in 2001. The Company is now focusing on a lease or loaner plan for its Blood Volume Analyzer which results in less immediate income from instrument sales, but greater income from the kits. The Company may elect to directly lease its own equipment. Under such plans, income would be recorded over the term of the lease. If equipment was sold to a leasing company, then it would be recorded as a direct sale. Dividend income in 2002 was \$455,986 with a net interest expense of \$11,572, as compared to dividend income of \$473,919 with a net interest expense of \$34,409 in 2001. In 2002, the Company had a net profit before income taxes of \$48,320 versus \$59,780 in 2001. The Company anticipates that it's sales of instruments and kits will become the major source of income for the Company. The Company is currently initiating distribution networks but no income has yet been received from sales by non-Company personnel.

LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2002 the Company had total assets of \$46,369,961 and total liabilities of \$9,012,742 with shareholders' equity of \$37,357,219. The Company has a net pre-taxed unrealized gain of \$24,010,362 and \$ 15,846,839 of net after tax unrealized capital gains on available-for-sale securities in its portfolio.

Edgar Filing: DAXOR CORP - Form 10-Q

This amount is included in the calculation of Total Shareholders' Equity. The Company's stock portfolio had a market value of \$45,231,112 with short-term loans of \$719,485 with 4,664,909 shares outstanding.

The Company has adequate resources for the current marketing level of its Blood Volume Analyzer as well as capital to sustain its localized semen and blood banking services. The Company is reviewing various options in regard to establishing a nationwide sales force as opposed to utilizing independent local dealer distribution networks. The Company is evaluating the possibility of acquiring additional capital which would enable it to undertake a more rapid marketing program nationally as well as internationally. The Company has an instrument loaner plan which requires use of the Company's reserves. Such plans, however, have the potential for an ultimate higher return for the Company. The Company will arrange some leases through independent leasing companies, to whom it will sell the BVA-100. The Company is evaluating blood volume instrumentation management programs for hospitals. Under such a plan, the Company would provide equipment and personnel on a sub-contract basis. The Company will use its financial reserves primarily for developing and marketing the Blood Volume Analyzer, but will begin to develop blood banking programs in conjunction with hospitals.

The Company did not file any reports on form 8-K during the first three months of 2002.
