The main trends observed in the 2002 fiscal year indicators are:

LIQUIDITY INDICES

There is a reduction in the liquidity index in relation to 2001 because of the transfer to short-term of the long-term syndicated loan installments, the increase in reserves, and the effect on bank loans in dollars of the rise in the price of the dollar, which rose by 10.2% compared to March 2001.

DEBT INDICES

The debt and short and long-term debt distribution ratios show variations, which may be explained by the above reasons.

The coverage index of financial expenses fell with respect to December of the previous year because of lower profits. Whereas, this index rose compared to that of March 2001 because of lower financial expenses in the first quarter of 2002.

PROFITABILITY INDICES

These indices fell because of the reduction in profits during the first quarter of the year.

On the other hand, although dividends distributed between April 2000 and March 2001 rose by 8.1% compared to the January/December 2001 period, the rate of return of dividends dropped because of the increase in the price of stocks in the stock exchange, which rose from \$3,512 per share as of March 31, 2001, to \$4,300 per share as of December 31, 2001.

2. DIFFERENCE BETWEEN BOOK VALUE AND MARKET VALUE OF MAIN ASSETS.

The financial statements as of March 31, 2002 have been prepared according to generally accepted accounting principles and general and specific norms of the Securities and Insurance Commission, which is the agency that regulates the Company. The valuation of the assets includes adjustment for currency

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

devaluation, provisions, and technical revaluations. We believe the foregoing is a reasonable way to value the company's permanent investments.

As of March 31, 2002 there were financial investments in stocks recorded in the accounting according to their purchase price at Ch\$ 3,264 million whose market value on the same date was Ch\$ 5,199 million.

3. RESULTS FOR THE 2001 PERIOD

3a. Consolidated Result

Cristalerias de Chile S.A. consolidates its results with Vina Santa Rita, CIECSA, Cristalchile Comunicaciones S.A., Cristalchile Inversiones S.A. and Apoger. Since the second quarter of 2001, the company does not consolidate its results with Envases CMF S.A. (formerly Crowpla-Reicolite S.A.). On June 29, 2001, Cristalerias de Chile S.A. ("Cristalerias") and Embotelladora Andina S.A. ("Andina") entered into a series of contracts in order to establish an association or joint venture in the PET plastic packaging businesses, which were developed previously through their subsidiaries Crowpla-Reicolite S.A. and Envases Multipack S.A. ("Multipack"), respectively. This association was done through the incorporation of Andina Inversiones Societarias S.A., as Crowpla-Reicolite's shareholder, with a 50% stake in that company. The remaining 50% was maintained by Cristalerias. Likewise, Crowpla-Reicolite S.A. acquired from Multipack the necessary assets for the development of the joint venture. On the other hand, on September 27, 2001, stocks of Ediciones Chiloe and Ediciones Financieras were sold to Recoletos Chile Ltda. (Financial Times), CIECSA keeping a 50% stake in Ediciones Chiloe. As of that date CIECSA stopped consolidating its financial statements with Ediciones Financieras S.A. ("El Diario").

As of March 2002, the net profit of the Company was Ch\$ 176 million compared with \$1,738 million in 2001. This is due to a greater non-operating loss of \$4,891 million, compared with a loss of \$4,013 million in 2001, chiefly due to a greater net loss of the subsidiaries, including the effect of the devaluation in Argentina on our investment in Rayen Cura when applying a rate of exchange of 2.9 Argentine pesos per dollar, which generates a loss of \$1,477 million; the non-realization of an extraordinary income of \$976 million corresponding to the reversion of the reserve for the repair Furnace C of Cristalerias, which was included in "Extraordinary Items" in 2001. This was partly offset by the operating result that improved compared with 2001, totaling \$6,465 million, due mainly to better operating results in the glass business and CIECSA.

As of March 2002 consolidated sales of Cristalerias totalled Ch\$30,088 million, increasing by 3.5% compared to sales in the previous period, adjusted for the non-consolidation of Crowpla-Reicolite and Ediciones Financieras during the period.¹ The increase in the sales of Cristalerias in the consolidated statements results from greater sales in the glass business (5.6%) and CIECSA (26,9%). The consolidated operating result totaled Ch\$6,465 million, which represents a 8.6% increase, adjusting the operating profit of 2001 by Ch\$155 million, corresponding to the profit generated by Crowpla-Reicolite and Ediciones Financiera during the period. The glass business accounted for Ch\$4,956 million, Santa Rita Ch\$1,492 million, CIECSA Ch\$14 million of the operating results.

The individual result of Cristalerias de Chile S.A. and its main subsidiaries is analyzed in greater detail below.

3b. Individual Result

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

As of March 2002, the Company had unconsolidated sales of Ch\$15,090 million, which is a 5.6% increase compared to the 2001 fiscal year. Volumes sold increased by 5.3%, reaching

1 As of September 2000 (?? no se ve la fecha) the sales of Crowpla-Reicolite and Ediciones Financieras totaled Ch\$3,604 million and Ch\$497 million respectively.

53.922 tons. This sales volume is mainly due to greater sales of bottles for beer non-returnable and wine markets.

Operating profit rose 12.6% totalling Ch\$4,956 million. For comparison purposes the operating margin recorded an increase which is due to greater sales of imported products with a lower margin compared to the first quarter of 2001.

The Company's net profit was Ch\$176 million in 2002 to Ch\$1,738 million in 2001. The result can be explained partly by decline in the non-operating results, which passed from a loss of \$2,989 million in 2001 to a loss of \$3,961 million in 2002. This greater loss is due to the effect of the devaluation of the Argentine peso (from \$1.7 to \$2.9 Argentine pesos per dollar) on the accounting of the financial statements of Rayen Cura, which generate a quarterly loss of \$1,477 million. This was offset in part by better results in Vina Santa Rita and CIECSA. In addition, it is worth noting that the company had an extraordinary income of Ch\$976 million in 2001 corresponding to the reversion of the reserve for repairing Furnace C, included in the "extraordinary items" account.

3c. Result in Subsidiaries

As of March 2002 Santa Rita's profit totaled Ch\$1,016 million, which represents a 5.4% increase over the same period in 2001. In the local market, the Company reached volumes that were 17.0% higher than in 2001. The prices in this market fell 20.4% in real terms, as a result of increased competition and lower costs of musts, which led to sales valued in the local market showing a reduction of 6.9%. Sales in the export market decreased by 7.1% in terms of volume because of lower sales to the European and Latin American markets. During the period, exports represented 52% of the total income amounting to US\$9.9 million. The operating result fell by 30.4%, totaling Ch\$1,492 million, mainly as a result of the drop in prices in the local market and a reduction in volumes in the export market. The average price in dollars per case for the export market was US\$ 29.6, whereas the average for the industry was US\$22.05 per case. As of March 2002, Santa Rita registered a non-operating loss of Ch\$261 million, compared with a loss of Ch\$817 million in 2001. This improvement can be mainly explained by lower financial costs.

Megavision, CIECSA's principal subsidiary showed operating earnings of Ch\$41 million, compared to a loss of Ch\$591 million in 2001. Megavision achieved an 22.4% share of the audience during the period. Net sales increased by 26.2%, reaching Ch\$13,626 million, due to an increase in real time productions. As of March 2002, the Company showed a net loss of Ch\$187 million compared with a loss of Ch\$791 million during the same period in 2001. CIECSA improved its non-operating results passing from a loss of Ch\$543 million in 2001 to a loss of Ch\$361 million in 2002 mainly due to smaller losses in subsidiaries. CIECSA's final result was a loss of Ch\$252 million compared with a loss of Ch\$875 million in 2001.

Envases CMF S.A. recorded net profits of Ch\$278 million in 2002 compared with

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

a profit of Ch\$146 million in 2001 (the latter only considers the result of Crowpla-Reicolite before associating with Multipack). The company increased sales by 131% during the period, totaling Ch\$8,341 million. It is worth noting that this significant increase in sales is due mainly to the company's association with Multipack at the end of June 2001. Sales volumes increased by

109%, totaling 5,950 tons. Operating profit was Ch\$805 million, which is 126% higher than the profit obtained the previous year.

In the area of cable TV, Cristalchile Comunicaciones S.A. (99.99% subsidiary of Cristalerias), is the owner of 50% of Cordillera Comunicaciones Ltda., in turn the owner of 99% of Metropolis-Intercom S.A.

Metropolis-Intercom S.A. registered sales of Ch\$11,372 million during 2002 compared with Ch\$10,681 million during the same period the previous year. As of March 2002, Metropolis-Intercom had a net loss of Ch\$3,777 million compared with a loss of Ch\$3,959 million in 2001. This result includes a depreciation charge of Ch\$2,683 million (Ch\$2,863 million in 2001) corresponding to the HFC network acquired in July 2000. The company ended the period with 247,000 subscribers, 10.5% down compared to the same date in 2001, due to a greater number of discontinued subscriptions because of the deteriorated domestic economic situation.

As a result of the foregoing and the amortization of the lower value of investments through Cordillera Comunicaciones from \$1,003 million in the quarter (\$944 million in 2001), Cristalchile Comunicaciones recorded a net loss of \$2,391 million (loss of \$2,417 in the first quarter of 2001).

4. CASH FLOW STATEMENT

During the first quarter of 2002 a total net positive flow of Ch\$8,997 million was generated, which is explained by a positive flow generated by operating activities of Ch\$11,159 million and a positive financing flow of Ch\$444 million, which were partially offset by a negative flow of investment activities of Ch\$2,606 million.

The operating flow corresponds basically to the collection of sales and financial interests and other income received that were reduced in part by payment to suppliers, taxes and interests.

The negative financing flow can be explained mainly by a net increase in loans from related companies of \$347 offset by a reduction in loans of \$1,090 million, and dividends paid of \$1,880 million.

The investment flow is mainly explained by the incorporation of fixed assets of Ch\$4,464 million, which are financed with the redemption of Term Deposits at over 90 days for \$4,757 million.

The foregoing results in an increase in the final balance of cash and cash equivalent, which passed from Ch\$37,649 million as of December 31, 2001 to \$46,837 million as of March 31, 2002.

According to the current regulations of the SVS and the Association of Accountants of Chile, term deposits and agreements with due date less than 90 days have been considered cash and cash equivalent.

5. INTEREST RATES AND EXCHANGE RATE RISK ANALYSIS

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

a. Interest rates

Cristaleras and its Subsidiaries are exposed to the risk of fluctuations in interest rates on its short-term and long-term debts. As of March 31, 2002 Short-Term and Long-Term bank liabilities and obligations with the public totaled Ch\$101,217 million, which represents 25.7% of the Company's consolidated assets.

On the other hand, bank credits total Ch\$80,812 million, Ch\$72,887 million of which correspond to credits in foreign currency agreed at variable rates related to the six-month Libor, Ch\$6,916 million correspond to credits in pesos adjustable in unidades de fomento (indexed currency units) that are exposed to changes in the six-month TAB rate, and Ch\$1,009 million correspond to credits in pesos at an annual rate of 6.96%.

Obligations with the public of Ch\$20,405 million correspond to coupon Bonds issued by the subsidiary Vina Santa Rita at a fixed interest rate.

Also, as of March 31, 2002, the Company had funds available of Ch\$59,204 million invested in instruments at different time periods like term deposits, bonds, fixed-rate mutual funds and resale agreements.

The company and its subsidiaries do not use secondary financial instruments at the present time to reduce risk in the event of fluctuations in interest rates. That policy will be studied permanently to evaluate the alternatives offered by the market.

b) Exchange risk.

The Company and its Subsidiaries maintain liabilities in dollars of US\$130.4 million, which represent 21.8% of its consolidated assets, and include a long-term syndicated loan of US\$100 million in the parent company and Long-Term bank credits in Vina Santa Rita of US\$12.2 million. As of March 31 the Company and its Subsidiaries has investments in dollars of US\$53.1 million in time deposits, bonds and fixed rate mutual funds. It also has dollar purchase contracts of US\$142.8 million, and a contract that provides coverage for EURO/Dollar fluctuations for 3.5 million Euros, all of which provides a reasonable coverage for exchange rate variations risk.

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

The main trends observed in the 2002 fiscal year indicators are:

LIQUIDITY INDICES

There is a reduction in the liquidity index in relation to March 2001 despite a significant reduction in notes payable, because of the transfer to the short term of long-term syndicated loan installment, the increase in reserves, and the effect on bank loans in dollars of the rise in the price of the dollar, which rose by 10.2% between April 2001 and March 2002.

DEBT INDICES

Although the debt index has had a slight increase because of the rise in the rate of exchange, this financial index remained steady during the periods studied because of the increase in equity resulting from the increase in profits.

On the other hand, the distribution of the short-term and long-term debt shows variations due to the expiry of installments payable in less than one year of Long Term Liabilities that have been transferred to Short Term.

The coverage index of financial expenses fell with respect to the previous year because of lower profits.

ACTIVITY INDICES

The indices of inventory turnover and permanence improved because of the stocks bought by management to reduce product stock inventories.

PROFITABILITY INDICES

Profitability indices fell during the fiscal year because of a reduction in profits.

On the other hand, although dividends distributed between April 2000 and March 2001 rose by 8.1% compared to the January/December 2001 period, the rate of return of dividends dropped because of the increase in the price of stocks in the stock exchange, which rose from \$3,512 per share as of March 31, 2001, to \$4,300 per share as of December 31, 2001.

2. DIFFERENCE BETWEEN BOOK VALUE AND MARKET VALUE OF MAIN ASSETS

The financial statements of the company have been prepared according to generally accepted accounting principles and general and specific norms of the Securities and Insurance Commission, which is the agency that regulates the Company. The valuation of the assets includes adjustment for currency devaluation, reserves, and technical revaluations. We believe the foregoing is a reasonable way to value the company's permanent investments.

As of March 31, 2002, there were financial investments in stocks recorded in the accounting according to their purchase price of Th Ch\$ 3,264 million whose market value on the same date was Th Ch\$ 5,761 million.

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

3. RESULTS OF THE FIRST QUARTER OF 2002

3a. Individual Result

The Company had non-consolidated sales of Ch\$ 15,090 million as of March 2002, which is a 5.6% increase compared to the previous fiscal year. Volumes sold increased by 5.3%, reaching 53,922 tons. This volume level is mainly due to higher sales of bottles for the non-returnable beer and wine markets.

Operating profit rose by 12.6%, totaling Ch\$4,956 million. For comparison purposes the operating margin increased due the lower sale of lower-margin imported products compared to the first quarter of 2001.

The Company's net profit amounted to \$176 million compared to \$1,738 million the previous year. This result can be explained in part by the reduction in the non-operating result, which passed from a loss of \$2,989 million in 2001 to a loss of \$3,961 million in 2002. This greater loss results from the effect of the devaluation of the Argentine peso (from \$1.7 to \$2.9 Argentine pesos per dollar) in the accounting of the financial statements of Rayen Cura, which generated a loss of \$1,477 million for the quarter. This was compensated in part in Vina Santa Rita and CIECSA. In addition, in the year 2001 the company had an extraordinary income of Ch\$976 million corresponding to the reversion of the reserve for the repair of Furnace C, included in the account "Extraordinary Items".

Finally, the company reflects a special contribution of Ch\$ 1,785 million for the reverse of the reserve for repair of Furnace C, which is included in the "Special items" account.

3b. Result in Subsidiaries

As of March 31, 2002, Santa Rita's profit was Ch\$1,016 million, which was a 5.4% increase over the same period in 2001. In the local market, the volumes of the Company were 17% higher than in 2001. The prices in this market dropped 20.4% in real terms, as a result of increased competition and lower cost of musts, which led to valued sales in the local market dropping 6.9%. Sales in the export market decreased 7.1% in volume due to lower sales to the European and Latin American markets. During the period, exports represented 52% of total income with US\$ 9.9 million. The operating result fell 30.4%, reaching Ch\$1,492 million, mainly as a result of the fall in prices in the local market and the reduction in volumes in the export market. The average price in dollars per case for the export market was US\$ 29.6, whereas the average price for the industry was US\$22.05 per case. As of March 2002, Santa Rita showed a non-operating loss of Ch\$261 million, compared to a loss of Ch\$817 million in 2001, which can be mainly explained by lower financial costs.

Megavision, the main subsidiary of CIECSA, showed an operating profit of Ch\$41 million, compared with an operating loss of Ch\$591 million in the previous year. Megavision had a

22.4% share of the audience during the period.1 Net sales increased by 26.2% totaling Ch\$3,626 million because of the live programs. As of March 2002, Megavision had a net loss of Ch\$187 million, compared to a loss of Ch\$791 million in 2001. CIECSA improved its non-operating results passing from a loss of Ch\$543 million in 2001 to loss of Ch\$361 in 2002, due mainly to lower losses in its subsidiaries. CIECSA's final result was a loss of Ch\$252 million compared to a loss of Ch\$875 million the year before.

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

Envases CMF S.A. showed a net profit of Ch\$278 million in 2002 compared with a profit of Ch\$146 million in 2001 (this last figure considers only the result of Crowpla-Reicolite before its association to Multipack). The company increased its sales 131%, reaching Ch\$8,341 million during the year. This significant increase in sales is largely attributable to the partnership entered into with Multipack at the end of June 2001. Sales volume increased 109%, reaching 5,950 tons. Operating profit was Ch\$805 million, which is 126% higher than the profit obtained during 2001.

In the area of cable TV, Cristalchile Comunicaciones S.A. (99.99% subsidiary of Cristalerias), is the owner of 50% of Cordillera Comunicaciones Ltda., which in turn is the owner of 99% of Metropolis-Intercom S.A.

Metropolis-Intercom S.A. registered sales of Ch\$11,372 million during 2002 compared with Ch\$10,681 million during the same period the previous year. As of March 2002, Metropolis-Intercom had a net loss of Ch\$3,777 million compared with a loss of Ch\$3,959 million in 2001. This result includes a depreciation charge of Ch\$2,683 million (Ch\$2,863 million in 2001) corresponding to the HFC network acquired in July 2000. The company ended the period with 247,000 subscribers, 10.5% down compared to the same date in 2001, due to a greater number of discontinued subscriptions because of the deteriorated domestic economic situation.

As a result of the foregoing and the amortization of the lower value of investments through Cordillera Comunicaciones from \$1,003 million in the quarter (\$944 million in 2001), Cristalchile Comunicaciones recorded a net loss of \$2,391 million (loss of \$2,417 in the first quarter of 2001).

4. CASH FLOW STATEMENT

During the first quarter of 2002 a total net positive flow of Ch\$6,624 million was generated, which is explained by a positive flow generated by operating activities of Ch\$7,075 million, which was reduced by a negative financing flow of Ch\$1,907 million and a positive flow of investment activities of Ch\$1,456 million.

The operating flow corresponds basically to the collection of sales and financial interests that were reduced by payment to suppliers, interests and income tax.

1 Measured between 9:00 A.M. and 1:00 A.M. (in other words 16 hours a day) from Monday to Sunday.

The financing flow can be explained mainly by payment of dividends for Ch\$1,880 million in January 2002.

The investment flow is mainly explained by the redemption of Term Deposits at over 90 days and the expiry of future contracts. This flow was used in part in the incorporation of fixed assets and in the investment of financial instruments.

The foregoing results in an increase in the final balance of cash and cash equivalent, which passed from Ch\$18,440 million as of March 31, 2001 to \$25,139 million as of March 31, 2002.

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

According to the current regulations of the SVS and the Association of Accountants of Chile, term deposits and agreements with due date less than 90 days have been considered cash and cash equivalent.

5. INTEREST RATES AND EXCHANGE RATE RISK ANALYSIS

a. Interest rates

The Company is exposed to the risk of fluctuations in interest rates on its long-term debt, corresponding to a credit of US\$100 million, which was agreed at a variable rate Libo plus 1.125 percentage points on average. On the other hand, as of March 31, 2002 the Company had available funds of \$38,100 million invested at different terms in instruments like term deposits, bonds, fixed rate and repurchase agreement mutual funds.

The company does not use secondary financial instruments at the present time to reduce risk in the event of fluctuations in interest rates. That policy will be studied permanently to evaluate the alternatives offered by the market.

The Company maintains liabilities in dollars of US\$111.9 million, which represent 24.2% of its assets, and include a long-term syndicated loan of US\$100 million. As of March 31 the Company has investments in dollars of US\$50.4 million in term deposits, bonds and fixed rate mutual funds. It also has dollar purchase contracts of US\$119.6 million, and a contract that provides coverage for Euro/Dollar fluctuations for 3.5 million Euros, all of which provides a reasonable coverage for exchange rate variations risk.

RELEVANT EVENTS

In a letter dated April 17, 2002, the SVS was notified that in the Meeting of the Board of Directors held on April 16, 2002, it was agreed to start a bond issue process to fully or partially substitute short and medium term liabilities and finance future investments.

Non-secured sight bonds non-convertible into shares for an amount of UF 4,100,000 (four million one hundred UF) shall be issued. The bonds will be placed in the capital market, under the terms and conditions, and timing to be defined.

The Board of Directors authorized the Chairman, Vice-chairman, Mr. Jaime Claro Valdes and the company's General Manger, so that acting jointly any two of them, they may establish the terms, conditions and timing of the issue, and so they may enter into contracts and carry out any acts necessary for the issue and sale of the bonds.

The main trends observed in the 2002 fiscal year indicators are:

LIQUIDITY INDICES

There is a reduction in the liquidity index in relation to March 2001 despite

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

a significant reduction in notes payable, because of the transfer to the short term of long-term syndicated loan installment, the increase in reserves, and the effect on bank loans in dollars of the rise in the price of the dollar, which rose by 10.2% between April 2001 and March 2002.

DEBT INDICES

Although the debt index has had a slight increase because of the rise in the rate of exchange, this financial index remained steady during the periods studied because of the increase in equity resulting from the increase in profits.

On the other hand, the distribution of the short-term and long-term debt shows variations due to the expiry of installments payable in less than one year of Long Term Liabilities that have been transferred to Short Term.

The coverage index of financial expenses fell with respect to the previous year because of lower profits.

ACTIVITY INDICES

The indices of inventory turnover and permanence improved because of the stocks bought by management to reduce product stock inventories.

PROFITABILITY INDICES

Profitability indices fell during the fiscal year because of a reduction in profits.

On the other hand, although dividends distributed between April 2000 and March 2001 rose by 8.1% compared to the January/December 2001 period, the rate of return of dividends dropped because of the increase in the price of stocks in the stock exchange, which rose from \$3,512 per share as of March 31, 2001, to \$4,300 per share as of December 31, 2001.

2. DIFFERENCE BETWEEN BOOK VALUE AND MARKET VALUE OF MAIN ASSETS

The financial statements of the company have been prepared according to generally accepted accounting principles and general and specific norms of the Securities and Insurance Commission, which is the agency that regulates the Company. The valuation of the assets includes adjustment for currency devaluation, reserves, and technical revaluations. We believe the foregoing is a reasonable way to value the company's permanent investments.

As of March 31, 2002, there were financial investments in stocks recorded in the accounting according to their purchase price of Th Ch\$ 3,264 million whose market value on the same date was Th Ch\$ 5,761 million.

3. RESULTS OF THE FIRST QUARTER OF 2002

3a. Individual Result

The Company had non-consolidated sales of Ch\$ 15,090 million as of March 2002, which is a 5.6% increase compared to the previous fiscal year. Volumes sold increased by 5.3%, reaching 53,922 tons. This volume level is mainly due to higher sales of bottles for the non-returnable beer and wine markets.

Edgar Filing: GLASSWORKS OF CHILE - Form 6-K

Operating profit rose by 12.6%, totaling Ch\$4,956 million. For comparison purposes the operating margin increased due the lower sale of lower-margin imported products compared to the first quarter of 2001.

The Company's net profit amounted to \$176 million compared to \$1,738 million the previous year. This result can be explained in part by the reduction in the non-operating result, which passed from a loss of \$2,989 million in 2001 to a loss of \$3,961 million in 2002. This greater loss results from the effect of the devaluation of the Argentine peso (from \$1.7 to \$2.9 Argentine pesos per dollar) in the accounting of the financial statements of Rayen Cura, which generated a loss of \$1,477 million for the quarter. This was compensated in part in Vina Santa Rita and CIECSA. In addition, in the year 2001 the company had an extraordinary income of Ch\$976 million corresponding to the reversion of the reserve for the repair of Furnace C, included in the account "Extraordinary Items".

Finally, the company reflects a special contribution of Ch\$ 1,785 million for the reverse of the reserve for repair of Furnace C, which is included in the "Special items" account.

3b. Result in Subsidiaries

As of March 31, 2002, Santa Rita's profit was Ch\$1,016 million, which was a 5.4% increase over the same period in 2001. In the local market, the volumes of the Company were 17% higher than in 2001. The prices in this market dropped 20.4% in real terms, as a result of increased competition and lower cost of musts, which led to valued sales in the local market dropping 6.9%. Sales in the export market decreased 7.1% in volume due to lower sales to the European and Latin American markets. During the period, exports represented 52% of total income with US\$ 9.9 million. The operating result fell 30.4%, reaching Ch\$1,492 million, mainly as a result of the fall in prices in the local market and the reduction in volumes in the export market. The average price in dollars per case for the export market was US\$ 29.6, whereas the average price for the industry was US\$22.05 per case. As of March 2002, Santa Rita showed a non-operating loss of Ch\$261 million, compared to a loss of Ch\$817 million in 2001, which can be mainly explained by lower financial costs.

Megavision, the main subsidiary of CIECSA, showed an operating profit of Ch\$41 million, compared with an operating loss of Ch\$591 million in the previous year. Megavision had a

22.4% share of the audience during the period.1 Net sales increased by 26.2% totaling Ch\$3,626 million because of the live programs. As of March 2002, Megavision had a net loss of Ch\$187 million, compared to a loss of Ch\$791 million in 2001. CIECSA improved its non-operating results passing from a loss of Ch\$543 million in 2001 to loss of Ch\$361 in 2002, due mainly to lower losses in its subsidiaries. CIECSA's final result was a loss of Ch\$252 million compared to a loss of Ch\$875 million the year before.

Envases CMF S.A. showed a net profit of Ch\$278 million in 2002 compared with a profit of Ch\$146 million in 2001 (this last figure considers only the result of Crowpla-Reicolite before its association to Multipack). The company increased its sales 131%, reaching Ch\$8,341 million during the year. This significant increase in sales is largely attributable to the partnership entered into with Multipack at the end of June 2001. Sales volume increased 109%, reaching 5,950 tons. Operating profit was Ch\$805 million, which is 126% higher than the profit obtained during 2001.

Metropolis-Intercom S.A. registered sales of Ch\$11,372 million during 2002 compared with Ch\$10,681 million during the same period the previous year. As of March 2002, Metropolis-Intercom had a net loss of Ch\$3,777 million compared with a loss of Ch\$3,959 million in 2001. This result includes a depreciation charge of Ch\$2,683 million (Ch\$2,863 million in 2001) corresponding to the HFC network acquired in July 2000. The company ended the period with 247,000 subscribers, 10.5% down compared to the same date in 2001, due to a greater number of discontinued subscriptions because of the deteriorated domestic economic situation.

As a result of the foregoing and the amortization of the lower value of investments through Cordillera Comunicaciones from \$1,003 million in the quarter (\$944 million in 2001), Cristalchile Comunicaciones recorded a net loss of \$2,391 million (loss of \$2,417 in the first quarter of 2001).

4. CASH FLOW STATEMENT

During the first quarter of 2002 a total net positive flow of Ch\$6,624 million was generated, which is explained by a positive flow generated by operating activities of Ch\$7,075 million, which was reduced by a negative financing flow of Ch\$1,907 million and a positive flow of investment activities of Ch\$1,456 million.

The operating flow corresponds basically to the collection of sales and financial interests that were reduced by payment to suppliers, interests and income tax.

1 Measured between 9:00 A.M. and 1:00 A.M. (in other words 16 hours a day) from Monday to Sunday.

The financing flow can be explained mainly by payment of dividends for Ch\$1,880 million in January 2002.

The investment flow is mainly explained by the redemption of Term Deposits at over 90 days and the expiry of future contracts. This flow was used in part in the incorporation of fixed assets and in the investment of financial instruments.

The foregoing results in an increase in the final balance of cash and cash equivalent, which passed from Ch\$18,440 million as of March 31, 2001 to \$25,139 million as of March 31, 2002.

According to the current regulations of the SVS and the Association of Accountants of Chile, term deposits and agreements with due date less than 90 days have been considered cash and cash equivalent.

The Company is exposed to the risk of fluctuations in interest rates on its long-term debt, corresponding to a credit of US\$100 million, which was agreed at a variable rate Libo plus 1.125 percentage points on average.
