Form 10-Q
August 07, 2008

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2008

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: **0-13611**

SPARTAN MOTORS, INC.

(Exact Name of Registrant as Specified in Its Charter)

Michigan
(State or Other Jurisdiction of
Incorporation or Organization)

38-2078923
(I.R.S. Employer
Identification No.)

1000 Reynolds Road
Charlotte, Michigan
(Address of Principal Executive Offices)

48813
(Zip Code)

Registrant's Telephone Number, Including Area Code: **(517) 543-6400**

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

FORWARD-LOOKING STATEMENTS

This Form 10-Q contains statements that are not historical facts. These statements are called "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements involve important known and unknown risks, uncertainties and other factors and can be identified by phrases using "estimate," "anticipate," "believe," "project," "expect," "intend," "predict," "potential," "future," "may," "should" and similar expressions or words. Our future results, performance or achievements may differ materially from the results, performance or achievements discussed in the forward-looking statements. There are numerous factors that could cause actual results to differ materially from the results discussed in forward-looking statements, including, among others:

Changes in existing products liability, tort or warranty laws or the introduction of new laws, regulations or policies that could affect our business practices. These laws, regulations or policies could impact our industry as a whole, or could impact only those portions in which we are currently active, for example, laws regulating the design or manufacture of emergency vehicles or regulations issued by the National Fire Protection Association; in either case, our profitability could be adversely impacted due to an industry-wide market decline or due to our inability to compete with other companies that are unaffected by these laws, regulations or policies.

Changes in environmental regulations. These regulations could have a negative impact on our earnings; for example, laws mandating improved emissions standards could increase our research and development costs, increase the cost of components and lead to the temporary unavailability of engines.

Rapidly rising material and component costs and the Company's ability to mitigate such cost increases based upon our supply contracts or to recover such cost increases with increases in selling prices of its products. Such increases in costs could have an adverse impact on our earnings.

Changes in relationships with major customers. An adverse change in our relationship with major customers would have a negative impact on our earnings and financial position.

Economic, legal and other factors could impact our customers' ability to pay accounts receivable balances due from them. In the ordinary course of business, customers are granted terms related to the sale of goods and services delivered to them. These terms typically include a period of time between when the goods and services are tendered for delivery to the customer and when the customer needs to pay for these goods and services. The amounts due under these payment terms are listed as accounts receivable on our balance sheet. Prior to collection of these accounts receivable, our customers could encounter drops in sales, large legal settlements, or other factors which could impact their ability to continue as a going concern and which could affect the collectability of these amounts. Writing off uncollectible accounts receivable could have a material adverse effect on our earnings and cash flow as the Company has major customers with material accounts receivable balances at any given time.

Changes in economic conditions, including changes in interest rates, financial market performance and our industry. These types of changes can impact the economy in general, resulting in a downward trend that impacts not only our business, but all companies with which we compete; or, the changes can impact only those parts of the economy upon which we rely in a unique fashion, including, by way of example:

Credit availability can impact our direct customers' and our direct customers' dealer network's ability to finance their operations, including inventory levels of our product. In addition, the condition of the housing market can cause liquidity issues for motorhome retail customers.

Factors that impact our attempts to expand internationally, such as the introduction of trade barriers in the United States or abroad.

Increasing oil prices and the availability of oil may have an adverse impact on the RV market.

Armed conflicts and other military actions. The considerable political and economic uncertainties resulting from these events could adversely affect our order intake and sales.

Our sales of specialty chassis for military vehicles depend on U.S. government contracts awarded to our customers. Multi-year U.S. government contracts generally are not fully funded at inception and are subject to termination. Currently, we derive a large portion of our revenue from the sale of specialty chassis for military vehicles. Our customers for these specialty chassis have prime contracts with military agencies of the U.S. government. There are unique risks associated with U.S. government contracts, and by extension, subcontracts. Changes in the congressional appropriations process, program funding levels, and unforeseen world events can interrupt, delay, or terminate the funding for any program or contract. Other risks particular to government contracts and subcontracts include:

U.S. government contracts generally permit the government to terminate a contract, in whole or in part, for convenience. If a contract is terminated the government will pay the prime and subcontractors for work performed and related termination costs.

The government may also terminate a contract for default in the event of a breach by the contractor. If a contract is terminated for default, the government in most cases pays for only the work it has accepted. The loss of anticipated funding or the termination of multiple or large programs could have an adverse effect on our future sales and earnings.

In general, future sales under multiyear contracts are conditioned on the continuing availability of congressional appropriations. Congress typically appropriates funds on a fiscal-year basis, even though contract performance may extend over many years. Changes in appropriations in subsequent years may impact the funding available for these programs. Delays or changes in funding can impact the timing of available funds or lead to changes in program content.

Contracts and subcontracts for U.S. government programs are subject to various procurement laws and regulations. The government may suspend us from receiving new contracts pending resolution of alleged violations of these laws or regulations.

U.S. defense spending has historically been cyclical. Rising budget deficits, increased military expenditures, and increasing costs for domestic programs could ultimately impact government spending on military vehicles. Changes in military strategies, tactics, and conditions on the ground in Iraq and Afghanistan may lead to the reduction, delay, or termination of the vehicle programs that we support. Reductions in our existing vehicle programs, unless offset by other programs and opportunities, could adversely affect our ability to sustain and grow our future sales and earnings.

Changes to the U.S. Department of Defense's Mine Resistant Ambush Protected ("MRAP") vehicle program may have an adverse effect on our earnings. Since 2005, the Company has derived significant revenue from the sale of specialty chassis for use in the U.S. Department of Defense's MRAP vehicle program. This program began in response to the need for better armored vehicles to protect U.S. soldiers from improvised explosive devices. The Department of Defense, through the various branches of the U.S. military, is expected to complete currently planned purchases of MRAP vehicles by 2009. There is no guarantee that the U.S. government will continue the MRAP program, or that a successor program, if any, would present opportunities for the Company. Whether we receive future orders for military vehicle chassis will depend upon the military's need and funding for vehicles and whether we are successful in submitting competitive bids for our chassis to prime contractors. The Company intends to pursue other opportunities pertaining to military vehicles. These opportunities could include sales of specialty chassis to the U.S. Department of Defense or other foreign militaries. The Company also intends to pursue opportunities related to service, parts and accessories for existing and future vehicles. There can be no assurance that earnings from these opportunities will be realized.

Factors that we have discussed in previous public reports and other documents filed with the Securities and Exchange Commission.

This list provides examples of factors that could affect the results described by forward-looking statements contained in this Report. However, this list is not intended to be exhaustive; many other factors, including the risk factors disclosed in Item 1A "Risk Factors" of this Quarterly Report on Form 10-Q and of the Company's Annual Report on Form 10-K for the year ended December 31, 2007, could impact our business and it is impossible to predict with any accuracy which factors could adversely affect the Company. Although we believe that the forward-looking statements contained in this Report are reasonable, we cannot provide you with any guarantee that the anticipated results will be achieved. All forward-looking statements in this Report are expressly qualified in their entirety by the cautionary statements contained in this section and you are cautioned not to place undue reliance on the forward-looking statements contained in this Report. In addition to the risks listed above, other risks may arise in the future, and we disclaim any obligation to update information contained in any forward-looking statement.

SPARTAN MOTORS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - GENERAL AND SUMMARY OF ACCOUNTING POLICIES

For a description of key accounting policies followed refer to the notes to the Spartan Motors, Inc. (the "Company") consolidated financial statements for the year ended December 31, 2007, included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 14, 2008. There have been no changes in such accounting policies.

The accompanying unaudited interim condensed consolidated financial statements reflect all normal and recurring adjustments that are necessary for the fair presentation of the Company's financial position as of June 30, 2008, the results of operations for the three- and six-month periods ended June 30, 2008 and 2007 and the cash flows for the six-month period ended June 30, 2008.

The results of operations for the three- and six-month periods ended June 30, 2008 are not necessarily indicative of the results to be expected for the full year.

Note 2 - INVENTORIES

Inventories are summarized as follows:

	June 30, 2008		December 31, 2007
Finished goods	\$ 12,059,786		\$ 18,346,128
Work in process	25,663,721		21,426,663
Raw materials and purchased components	77,749,974		65,459,415
Obsolescence reserve	(2,366,591)		(2,156,417)
	\$ 113,106,890		\$ 103,075,789

Note 3 - WARRANTIES

The Company's products generally carry limited warranties based on terms that are generally accepted in the marketplace. Some components included in the Company's end products (such as engines, transmissions, tires, etc.) may include manufacturers' warranties. These manufacturers' warranties are generally passed onto the end customer of the Company's products.

The Company's policy is to record a provision for the estimated cost of warranty-related claims at the time of the sale and periodically adjust the provision to reflect actual experience. The amount of warranty liability accrued reflects management's best estimate of the expected future cost of honoring the Company's obligations under the warranty agreements. Historically, the cost of fulfilling the Company's warranty obligations has principally involved replacement parts and labor for field retrofit campaigns. The Company's estimates are based on historical experience, the number of units involved and the extent of features and components included in product models. The estimates for military vehicles are based upon experience with commercial vehicles.

Certain warranty and other related claims involve matters of dispute that ultimately are resolved by negotiation, arbitration or litigation. Infrequently, a material warranty issue can arise which is beyond the scope of the Company's historical experience. The Company provides for any such warranty issues as they become known and are estimable. It is reasonably possible that additional warranty and other related claims could arise from disputes or other matters beyond the scope of the Company's historical experience.

Changes in the Company's warranty liability were as follows for the six months ended June 30:

	2008	2007
	<u> </u>	<u> </u>
Balance of accrued warranty at January 1	\$ 10,823,532	\$ 6,380,740
Warranties accrued during the period	2,969,886	3,167,518
Cash settlements made during the period	(2,808,681)	(3,735,771)
Changes in liability for pre-existing warranties during the period, including expirations	354,514	2,309,484
	<u> </u>	<u> </u>
Balance of accrued warranty at June 30	<u>\$ 11,339,251</u>	<u>\$ 8,121,971</u>

Note 4 - COMMITMENTS AND CONTINGENT LIABILITIES

At June 30, 2008, the Company and its subsidiaries were parties, both as plaintiff and defendant, to a number of lawsuits and claims arising out of the normal course of their businesses. In the opinion of management, the financial position, future operating results or cash flows of the Company will not be materially affected by the final outcome of these legal proceedings.

Note 5 - BUSINESS SEGMENTS

Note 6 - NEW AND PENDING ACCOUNTING STANDARDS

In May 2008, the FASB issued SFAS No. 162, "The Hierarchy of Generally Accepted Accounting Principles." SFAS No. 162 is intended to improve financial reporting by identifying a consistent framework, or hierarchy, for selecting accounting principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with U.S. generally accepted accounting principles (GAAP). SFAS No. 162 directs the GAAP hierarchy to the entity, not the independent auditors, as the entity is responsible for selecting accounting principles for financial statements that are presented in conformity with GAAP. SFAS No. 162 is effective 60 days following the Securities and Exchange Commission's approval of the Public Company Accounting Oversight Board amendments to remove the GAAP hierarchy from the auditing standards. The Company does not expect SFAS No. 162 to have a material impact on its future consolidated results of operations or its financial position.

In June 2007, the Financial Accounting Standards Board (FASB) ratified the consensus reached by the Emerging Issues Task Force (EITF) on EITF issue 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards." EITF 06-11 requires companies to recognize the income tax benefit realized from dividends or dividend equivalents that are charged to retained earnings and paid to employees for non-vested equity-classified employee share-based payment awards as an increase in additional paid-in capital. The EITF should be applied prospectively to the income tax benefits of dividends on equity-classified employee share-based payment awards that are declared in fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. For the second quarter of 2008, EITF 06-11 did not have a material effect on the Company's consolidated results of operations or its financial position. The Company does not expect this EITF to have a material impact on its future consolidated results of operation or its financial position.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities," which permits entities to choose to measure eligible financial instruments at fair value. The objective of this statement is to provide entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS No. 159 was effective for the Company beginning January 1, 2008. The Company does not expect the adoption of this statement to have a material impact on its consolidated results of operations or its financial position. Through June 30, 2008, the Company had not elected the fair value option for any of its financial assets or liabilities.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements." This statement clarifies the definition of fair value, establishes a framework for measuring fair value and expands the disclosures on fair value measurements. SFAS No. 157 was initially effective for the Company beginning January 1, 2008. In February 2008, the FASB approved the issuance of FASB Staff Position (FSP) FAS 157-2. FSP FAS 157-2 allows entities to electively defer the effective date of SFAS No. 157 until January 1, 2009 for nonfinancial assets and nonfinancial liabilities except those items recognized or disclosed at fair value on an annual or more frequently recurring basis. Through June 30, 2008, SFAS No. 157 had no effect on the Company's consolidated results of operations or financial position with respect to its financial assets and liabilities. Effective January 1, 2009, the Company will apply the fair value measurement and disclosure provisions of SFAS No. 157 to its nonfinancial assets and liabilities

measured on a nonrecurring basis. Such is not expected to have a material impact on the Company's consolidated results of operations or financial position. The Company measures the fair value of the following on a nonrecurring basis: (1) long-lived assets and (2) the reporting unit under step one of the Company's goodwill impairment test.

In December 2007, the FASB issued SFAS No. 141(R), "Business Combinations," to further enhance the accounting and financial reporting related to business combinations. SFAS No. 141(R) establishes principles and requirements for how the acquirer in a business combination (1) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree, (2) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase, and (3) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Therefore, the effects of the Company's adoption of SFAS No. 141(R) will depend upon the extent and magnitude of acquisitions after December 31, 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

The Company was organized as a Michigan corporation on September 18, 1975, and is headquartered in Charlotte, Michigan. The Company began development of its first product that same year and shipped its first fire truck chassis in October 1975.

The Company is known as a leading, niche market engineer and manufacturer in the heavy-duty, custom vehicles marketplace. The Company has four wholly owned subsidiaries: Spartan Motors Chassis, Inc., located at the corporate headquarters in Charlotte, Michigan ("Spartan Chassis"); Crimson Fire, Inc., headquartered in Brandon, South Dakota ("Crimson"); Crimson Fire Aerials, Inc., located in Lancaster, Pennsylvania ("Crimson Aerials"); and Road Rescue, Inc., located in Marion, South Carolina ("Road Rescue").

Spartan Chassis is a leading designer, engineer and manufacturer of custom heavy-duty chassis. The chassis consist of a frame assembly, engine, transmission, electrical system, running gear (wheels, tires, axles, suspension and brakes) and, for fire trucks and some specialty chassis applications, a cab. Spartan Chassis customers are original equipment manufacturers ("OEMs") who complete their heavy-duty vehicle product by either mounting the body or apparatus on the Company's chassis or integrating the drive train with the armored body. Crimson and Road Rescue engineer and manufacture emergency vehicles built on chassis platforms purchased from either Spartan Chassis or outside sources. Crimson Aerials engineers and manufactures aerial ladder and waterway components for fire trucks.

The Company's business strategy is to further diversify product lines and develop innovative design, engineering and manufacturing expertise in order to be the best value producer of custom vehicle products. Spartan Chassis sells its custom chassis to three principal markets: fire truck,

motorhome and specialty vehicles. Spartan Chassis focuses on certain custom niches within its three principal markets and believes that opportunities for growth remains for custom-built chassis and vehicles in each market.

The Company is an innovative team focused on building lasting relationships with its customers. This is accomplished by striving to deliver premium custom vehicles and services. The Company believes that it can best carry out its long-term business plan and obtain optimal financial flexibility by using a combination of borrowings under the Company's credit facilities, as well as internally or externally generated equity capital, as sources of expansion capital.

The Company recognizes that motorhome chassis sales are more sensitive to economic swings than that of the Company's other two principal chassis markets. Thus, in the past few years, management has placed special emphasis on further market penetration in the fire truck market and continued diversification into the specialty chassis market.

The Company expects future growth and earnings to come from:

The growing strength of the Spartan brands, including Spartan Chassis, Crimson Fire and Road Rescue.

EVTeam operational improvements as processes are reengineered to lower costs by eliminating non-value added activities

Further market share gain in the Class A motorhome market as the Company's chassis continue to lead the way in design features such as stability, ride, durability and dependability.

Recent additions to manufacturing capacity for fire truck chassis cabs, specialty vehicles, and motorhome chassis, expanded our capability to fulfill current and future market needs.

In 2007, the Company unveiled the Furion which is the entry-level fire truck cab and chassis in the Spartan Chassis product line. The Furion is designed to bridge the market between custom and commercial vehicles.

Opportunities in the areas of specialty vehicles and micro-niche markets. The Company has received subcontract orders under the Mine Resistant Ambush Protected (MRAP) program, the Iraqi Light Armored Vehicle (ILAV) program, the Joint IED-Defeat Organization (JIEDDO) program, the Yemen Light Armored Vehicle (YLAV) program and the Special Operations Command (SOCOM) program. The Company's current backlog for these specialty vehicles will support production through most of 2008. The Company believes it is well positioned to seek additional military business, but this business is subject to unique risks and uncertainties identified in the "Forward Looking Statements" section of this Form 10-Q and disclosed in Item 1A "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

There is an opportunity for increased service, parts and accessory sales as the number of military vehicles containing the Company's components in the field grows.

Potential for increased sales from our EVTeam due to the introduction of new technology such as the "Boomer", an innovative, low cost product that will provide an aerial waterway for fire departments looking for a cost effective solution.

The Company believes the major strength of its business model is market diversity and customization, with a growing foundation in emergency rescue. The emergency rescue market is relatively less affected by geo-political events compared to the recreational vehicle market.

The following is a discussion of the major elements impacting the Company's financial and operating results for the three- and six-month periods ended June 30, 2008 compared to the three- and six-month periods ended June 30, 2007. The comments that follow should be read in conjunction with the Company's condensed consolidated financial statements and related notes contained in this Form 10-Q and in conjunction with the Company's annual report on Form 10-K filed with the Securities and exchange Commission on March 14, 2008.

RESULTS OF OPERATIONS

The following tables set forth, for the periods indicated, the components of the Company's business segment statements of operations, on an actual basis, as a percentage of sales:

Three months ended:

Quarter Ended June 30, 2008, Compared to the Quarter Ended June 30, 2007

For the three months ended June 30, 2008, consolidated sales increased \$43.9 million (28.8%) to \$196.5 million, from \$152.6 million in the second quarter of 2007. The increase was primarily due to the \$43.4 million (31.6%) increase in Spartan Chassis sales. Other sales at Spartan Chassis drove the majority of this increase, with a \$76.8 million (159.5%) increase over the prior year's quarter. The increase in other sales was partially offset by the decline in motorhome chassis sales of \$30.2 million (50.0%) and the decline in fire truck chassis sales of \$3.2 million (11.2%).

The increase in other sales at Spartan Chassis was primarily due to an increase of military chassis of \$59.3 million (146.1%) coupled with an increase in service parts sales of \$17.6 million (250.2%). The increase in military chassis sales was due to an increase in volume, mainly as a result of orders received under the Mine Resistant Ambush Protected (MRAP) program. See Item 1A "Risk Factors" relating to governmental contracts and the information regarding the MRAP program below for more details. The increase in service parts sales was due to an increase in volume of sales and corresponds to increased military vehicles in the field, principally as a result of the MRAP program mentioned above. The decrease in motorhome chassis sales was due to lower order volume, as a result of weakened economic conditions impacting the motorhome market as a whole.

The EVTeam also contributed to the overall sales increase. Compared to the same period in 2007, sales increased \$1.2 million (6.0%). This increase was primarily due to an increase in sales of ambulances of \$2.3 million (59.2%) offset by lower fire truck sales of \$1.5 million (-9.9%). These fluctuations were due to changes in sales volumes due to timing of deliveries.

Gross margin as a percent of sales increased to 17.2% from 15.7% for June 30, 2008 and 2007, respectively. The increase is due primarily to a change in the product sales mix, higher absorption of overhead and more favorable warranty and rework costs. The product mix shifted toward higher margin fire truck chassis and other product sales which include specialty chassis and service parts.

Operating expenses as a percentage of sales increased slightly from 8.7% in the second quarter of 2007 to 9.0% in the second quarter of 2008. This increase was driven primarily by higher bonus compensation accruals due to higher profitability.

Interest expense remained flat at \$0.4 million for the three-months ended June 30, 2008 and 2007.

The effective income tax rate was 34.4% in the second quarter of 2008 and 37.4% for the same quarter of 2007. The Company's effective tax rate fluctuates based upon the states where sales occur and with the level of export sales. In addition, the Company experienced lower state taxes during the second quarter of 2008 as a result of tax credits received in connection with plant expansion and job creation in the state of Michigan. The effective tax rates for 2008 and 2007 are consistent with the applicable federal and state statutory tax rates.

Net earnings increased \$3.9 million (\$0.12 per diluted share) from \$6.5 million (\$0.20 per diluted share) in 2007 to \$10.4 million (\$0.32 per diluted share) in 2008 as a result of the factors discussed above.

Total chassis unit orders received during the second quarter of 2008 decreased slightly by 2.4% compared to the same period in 2007. This is the net result of increases from fire truck and military chassis offset by a decrease in motorhome chassis for reasons noted above.

The U.S. Department of Defense launched the MRAP program in response to the need to protect U.S. troops in Iraq from roadside bombs and other improvised explosive devices. By mid-2007, the Department of Defense considered the MRAP program its highest priority, and the program received significant appropriations. As the Department of Defense completes its planned purchases, MRAP purchases will decline significantly, and the Company expects that chassis sales attributable to the MRAP program will experience a corresponding decline. The Company's largest customer during 2007, a producer of blast-protected vehicles, has publicly disclosed that it has no MRAP orders currently in place for 2009, and the Company's third largest customer of 2007 has publicly stated that it expects its MRAP sales to end by 2009.

While the expected ramping down of the MRAP program will likely affect our revenue and earnings, the Company believes that revenue opportunities exist in parts, refurbishment and replacement of MRAP vehicle chassis, and in the sale of specialty chassis for military use in non-U.S. military forces and chassis for future armored vehicle programs.

At June 30, 2008, the Company had \$320.2 million in backlog, compared with a backlog of \$290.4 million at June 30, 2007. This reflects an increase in Spartan Chassis backlog of \$49.4 million, partially offset by a decrease in EVTeam backlog of \$19.6 million. The Company anticipates filling its current backlog orders by May 2009.

While orders in the backlog are subject to modification, cancellation or rescheduling by customers, this has not been a major factor in the past. Although the backlog of unfilled orders is one of many indicators of market demand, several factors, such as changes in production rates, available capacity, new product introductions and competitive pricing actions, may affect actual sales. Accordingly, a comparison of backlog from period to period is not necessarily indicative of eventual actual shipments.

Six Months Ended June 30, 2008, Compared to the Six Months Ended June 30, 2007

For the six months ended June 30, 2008, consolidated sales increased \$165.1 million (55.9%) to \$460.6 million, from \$295.5 million in the first six months of 2007. This increase in sales is mainly due to an increase in sales of \$160.7 million (60.5%) at Spartan Chassis. A large decline in motorhome chassis sales of \$48.2 million (-41.4%) and a slight decrease in fire truck chassis sales of \$4.1 million (-6.9%) were more than offset by higher sales of other product of \$213.0 million (238.3%).

The increase in other sales at Spartan Chassis was primarily due to an increase of military chassis of \$183.0 million (239.5%) paired with an increase in service parts sales of \$31.2 million (279.8%). The increase in military chassis sales was due to an increase in volume, mainly as a result of orders received under the MRAP program. See Item 1A "Risk Factors" relating to governmental contracts for more details. The increase in service parts sales was due to an

increase in volume of sales and corresponds to increased military vehicles in the field, principally as a result of the MRAP program mentioned above. The decrease in motorhome chassis sales was due to lower order volume, as a result of weakened economic conditions impacting the motorhome market as a whole.

EVTeam contributed to the sales increase by \$4.1 million (9.7%) to \$46.3 million during the first six months of 2008 compared with the prior year's first six months. The majority of this increase is due to higher ambulance sales, which were up \$3.8 million (41.5%) over the prior year, due to higher sales order levels.

Gross margin as a percent of sales decreased from 16.5% to 16.1% for these same time periods, due primarily to a change in the product sales mix. The decline was expected due to a shift in product mix and margin pressures on military chassis due to increased competition. In the first half of 2007, the military chassis in production at Spartan Chassis were a part of lower volume military programs with higher margins versus the military chassis produced to date in 2008 under the higher volume MRAP program.

Operating expenses decreased as a percentage of sales to 7.5% for the six month period ended June 30, 2008 compared to 9.0% for the same period of 2007. This is a result of increased efficiencies gained from higher sales volumes. Operating expense dollars increased \$8.2 million primarily due to higher compensation accruals for incentive plans reflecting the improved results year to date combined with greater wages and benefits related to higher staffing levels to support the sales increases.

The effective income tax rate was 34.8% in the first six months of 2008 and 36.8% in the same period of 2007. The Company's effective tax rate fluctuates based upon the states where sales occur and with the level of export sales. In addition, the Company experienced lower state taxes during 2008 as a result of tax credits received in connection with plant expansion and job creation in the state of Michigan. The effective tax rates for 2008 and 2007 are consistent with the applicable federal and state statutory tax rates.

Net earnings increased by \$11.5 million (\$0.35 per diluted share) to \$25.2 million (\$0.77 per diluted share) in the first six months of 2008 from \$13.7 million (\$0.42 per diluted share) in the same period of 2007 as a result of the factors discussed above.

Total chassis orders received during the first six months of 2008 increased 16.9% compared to the same period in 2007. This reflects increases in specialty chassis orders (78.1%), due to the MRAP program, and fire truck orders (49.1%), due to an increase in market share by fire truck customers. These were partially offset by a decrease in motorhome chassis orders (-51.7%) which were down due to poor economic conditions.

FINANCIAL CONDITION

Balance Sheet at June 30, 2008 compared to December 31, 2007

Accounts receivable decreased approximately \$30.3 million, or 22.8%, at June 30, 2008 when compared to the balance at December 31, 2007. This decrease is primarily a result of a decrease in sales in the second quarter of 2008 when compared to the fourth quarter of 2007. Sales in the second quarter of 2008 were \$196.5 million versus sales of \$237.6 million in the fourth quarter of 2007.

Accounts payable at June 30, 2008 was \$50.8 million compared to \$90.8 million at December 31, 2007. The decrease of approximately \$40.0 million is a result of a payment timing difference coupled with a shift in the production schedule of a significant customer order under the MRAP program from the second quarter to the third quarter of 2008, due to customer requested engineering changes. The payment timing difference is due to the fact that the Company's offices are closed during the holiday period between Christmas Eve and New Years day. Consequently, there were no check runs during the period and this drove a higher balance at December 31, 2007. The shift in MRAP production schedule moved production out from the second quarter and into the third quarter. The inventory related to these units was on hand in time for the original schedule, resulting in payments being made prior to the inventory being able to be used. As a result, inventory deliveries were slowed in the last month of the quarter ended June 30, 2008, also contributing to the decrease in accounts payable at the end of that period.

LIQUIDITY AND CAPITAL RESOURCES

The Company generated an estimated annualized return on invested capital (ROIC) of 27.7% in the second quarter of 2008, a 23.1% increase compared to the ROIC of 22.5% for the same period in 2007. The Company defines ROIC as operating income, less taxes, on an annualized basis, divided by total shareholders' equity.

For the six months ended June 30, 2008, cash provided by operating activities was \$8.7 million, which was a \$10.1 million increase from the \$1.4 million of cash used in operating activities for the six months ended June 30, 2007. The \$10.1 million of additional cash generated was primarily due to an increase in net earnings between the two periods of \$11.5 million. This was partially offset by a net increase in use of cash by the largest drivers of working capital changes, accounts receivable, inventory and accounts payable. The net of these drivers was \$19.7 million of cash use in the first half of 2008 versus \$19.1 million of cash use during the first half of 2007, resulting in \$0.6 million more cash used in the current period. See the "Financial Condition" section in Item 2 of this Form 10-Q for further discussion regarding the accounts receivable and accounts payable balances at June 30, 2008. See the "Condensed Consolidated Statements of Cash Flows" contained in Item 1 of this Form 10-Q for the other various factors that represented the remaining fluctuation of cash from operations of \$0.8 million between the periods.

The cash provided from operating activities of \$8.7 million in 2008, combined with the cash on hand of \$13.5 million at December 31, 2007, allowed the Company to have a net pay off of \$9.2 million in long-term debt, pay dividends of \$1.6 million and fund purchases of property, plant of equipment of \$8.2 million.

Shareholders' equity increased \$24.6 million, from \$129.2 million as of December 31, 2007 to \$153.8 million as of June 30, 2008. The increase was driven by \$25.2 million in net income of the Company and \$1.0 million from compensation related to restricted stock. These were partially offset by \$1.6 million paid out in dividends.

On July 24, 2007, the Board of Directors authorized management to repurchase, over the course of the subsequent 12-month period, up to a total of 1,000,000 shares of its common stock in open market transactions. That authorization expired on July 24, 2008 with 300,000 shares being repurchased with an average price of \$9.23 per share. On July 22, 2008, the Board of Directors

authorized management to repurchase, over the course of the subsequent 12-month period, up to a total of 1,000,000 shares of its common stock in open market transactions. That authorization will expire on July 22, 2009.

During its April 22, 2008 meeting, the Board of Directors approved an additional \$10.0 million revolving note payable with JP Morgan Chase Bank, increasing the total unsecured borrowings available to \$75.0 million. The Company had borrowings of \$26.5 million under this debt agreement in the form of a line of credit as of June 30, 2008. The Company also had a \$10.0 million term note, which carried an interest rate of 4.70%, as of June 30, 2008 under the same debt agreement. The line of credit includes three one-year automatic extensions unless the bank provides notice of non-renewal 14 months in advance of the expiration date. Working capital and capital expenditures created the need for the additional borrowings. Under the terms of the line of credit and term note agreement, the Company is required to maintain certain financial ratios and other financial conditions. The agreement also prohibits the Company from incurring additional indebtedness, limits certain acquisitions, investments, advances or loans and restricts substantial asset sales. At June 30, 2008, the Company was in compliance with all debt covenants.

The Company has a private shelf agreement with Prudential Investment Management, Inc. This agreement allows the Company to borrow up to an additional \$40 million to be issued in \$5 million minimum increments. The interest rate is determined based on applicable rates at time of issuance. The Company had a \$10.0 million term note issued under this shelf agreement as of June 30, 2008, which carried an interest rate of 4.93%.

The Company has an unsecured fixed rate long term note which bears interest at 4.99%. The loan is repayable in equal monthly installments and matures in October 2011. At June 30, 2008, the total outstanding amount on this note was \$6.2 million of which \$466,667 is payable in 2008.

The Company has a secured line of credit for \$0.2 million, which had an expiration date of July 5, 2008. The Company is in the process of renewing this secured line of credit in the same amount of \$0.2 million. This line of credit was, and may continue to be, secured by accounts receivable, inventory and equipment. There were no borrowings under this line at June 30, 2008.

The Company has secured mortgage notes of which \$1.1 million and \$0.1 million were outstanding as of June 30, 2008. The mortgage notes carry an interest rate of 3.00% payable in monthly installments (for principal and interest) of \$6,933 and \$834, respectively, with balances due July 1, 2010 and March 1, 2009, respectively. These mortgage notes are secured by real estate and buildings.

The Company had construction in process as of June 30, 2008 for the site development and building construction for a new office building and renovations to manufacturing facilities. Total estimated construction costs for these projects are \$13.9 million of which \$7.9 million has been spent as of June 30, 2008. The related construction projects are expected to be completed by September 2008.

On April 22, 2008, the Board of Directors approved regular dividends of \$0.10 per share payable in the amount of \$0.05 per share on June 16, 2008 and \$0.05 per share on December 17, 2008 to shareholders of record on May 16, 2008 and November 17, 2008, respectively. The amount paid out on June 16, 2008 was \$1.6 million.

The Company believes it has sufficient resources from cash flows from operating activities and, if necessary, from additional borrowings under its lines of credit and anticipated renewals to satisfy ongoing cash requirements for the next 12 months.

CRITICAL ACCOUNTING POLICIES

The following discussion of accounting policies is intended to supplement Note 1, *General and Summary of Accounting Policies*, of the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 14, 2008. These policies were selected because they are broadly applicable within the Company's operating units, and they involve additional management judgment due to the sensitivity of the methods, assumptions and estimates necessary in determining the related income statement, asset and/or liability amounts.

Revenue Recognition - The Company recognizes revenue in accordance with SEC Staff Accounting Bulletin (SAB) No. 104, "Revenue Recognition". Accordingly, revenue is recognized when title to the product and risk of ownership passes to the buyer. In certain instances, risk of ownership and title passes when the unit has been completed in accordance with purchase order specifications and has been tendered for delivery to the customer. Sales are shown net of returns, discounts and sales incentives, which historically have not been significant. The collectability of any related receivable is reasonably assured before revenue is recognized.

Accounts Receivable - The Company maintains an allowance for customer accounts that reduces receivables to amounts that are expected to be collected. In estimating the allowance, management considers factors such as current overall economic conditions, industry-specific economic conditions, historical and anticipated customer performance, historical experience with write-offs and the level of past-due amounts. Changes in these conditions may result in additional allowances.

Inventory - Estimated inventory allowances for slow-moving and obsolete inventory are based upon current assessments about future demands, market conditions and related management initiatives. If market conditions are less favorable than those projected by management, additional inventory allowances may be required.

Impairment of Goodwill - Goodwill represents the difference between the purchase price and the related underlying tangible and identifiable intangible net asset values resulting from business acquisitions. Annually, or if conditions indicate an earlier review is necessary, the carrying value of the reporting unit is compared to an estimate of its fair value. If the estimated fair value is less than the carrying value, goodwill is impaired and will be written down to its estimated fair value. Goodwill is allocated to the reporting unit from which it was created.

Based upon the estimated fair value of the Company's reporting unit using a discounted cash flow valuation, the goodwill at its Crimson Fire subsidiary which is included in the Company's EVTeam reportable segment was not impaired as of October 1, 2007, the most recent annual impairment test date.

Warranties - The Company's policy is to record a provision for the estimated cost of warranty-related claims at the time of the sale, and periodically adjust the provision to reflect actual

experience. The amount of warranty liability accrued reflects management's best estimate of the expected future cost of honoring the Company's obligations under the warranty agreements. The Company's estimates are based on historical experience, the number of units involved and the extent of features and components included in product models. For military vehicles with limited historical data, estimates were based upon historical experience of commercial vehicles. See also Note 3 to the condensed consolidated financial statements included in Item 1 of this Form 10-Q.

Equity Compensation - SFAS 123(R), "Share-Based Payment", addresses the accounting for share-based employee compensation and was adopted by the Company on January 1, 2006 utilizing the modified prospective approach. SFAS 123(R) requires that share options and stock appreciation rights (SARs) awarded to employees are recognized as compensation expense based on their fair value at grant date. The fair market value of options and SARs granted under the Company's stock compensation plans was estimated on the date of grant using the Black-Scholes option-pricing model using assumptions for inputs such as interest rates, expected dividends, volatility measures and specific employee exercise behavior patterns based on historical statistical data. Some of the inputs we use are not market-observable and have to be estimated or derived from available data. Use of different estimates would produce different values, which in turn would result in higher or lower compensation expense recognized. We have not run the model with alternative inputs to quantify their effects on the fair value of the options or SARs.

To value options and SARs, several recognized valuation models exist. None of these models can be singled out as being the best or most correct one. The model we apply is able to handle some of the specific features included in the awards we grant, which is the reason for its use. If we were to use a different model, the values would differ despite using the same inputs. Accordingly, using different assumptions coupled with using a different valuation model could have a significant impact on the fair value of employee stock options and SARs. Fair value could be either higher or lower than the ones produced by the model we apply and the inputs we used.

NEW AND PENDING ACCOUNTING POLICIES

See note 6 to the condensed consolidated financial statements included in Item 1 of this Form 10-Q.

EFFECT OF INFLATION

Inflation affects the Company in two principal ways. First, the Company's revolving notes payable are generally tied to the prime and LIBOR interest rates so that increases in those interest rates would result in additional interest expense. Second, general inflation impacts prices paid for labor, parts and supplies. Whenever possible, the Company attempts to cover increased costs of production and capital by adjusting the prices of its products. However, the Company generally does not attempt to negotiate inflation-based price adjustment provisions into its contracts. Since order lead times can be as much as six months, the Company has limited ability to pass on cost increases to its customers on a short-term basis. In addition, the markets served by the Company are competitive in nature, and competition limits the Company's ability to pass through cost increases in many cases. The Company strives to minimize the effect of inflation through cost reductions and improved productivity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes to our exposures to market risk since December 31, 2007. The Company's primary market risk exposure is a change in interest rates in connection with its outstanding variable rate short-term and long-term debt. At June 30, 2008, the Company had no debt outstanding under its variable rate short-term and \$26.5 million outstanding under its variable rate long-term debt agreements. The Company does not enter into market risk sensitive instruments for trading purposes.

Item 4. Controls and Procedures.

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of June 30, 2008. Based on and as of the time of such evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report to ensure that information required to be disclosed by us in the reports that we file or submit is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In addition, there has been no change in the Company's internal controls over financial reporting during the quarter ended June 30, 2008 that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

Changes to the U.S. Department of Defense's Mine Resistant Ambush Protected ("MRAP") vehicle program may have an adverse effect on our earnings.

Since 2005, the Company has derived significant revenue from the sale of specialty chassis for use in the U.S. Department of Defense's MRAP vehicle program. This program began in response to the need for better armored vehicles to protect U.S. soldiers from improvised explosive devices. The Department of Defense, through the various branches of the U.S. military, is expected to complete currently planned purchases of MRAP vehicles by 2009. There is no guarantee that the U.S. government will continue the MRAP program, or that a successor program, if any, would present opportunities for the Company. Whether we receive future orders for military vehicle chassis will depend upon the military's need and funding for vehicles and whether we are successful in submitting competitive bids for our chassis to prime contractors. The Company intends to pursue other opportunities pertaining to military vehicles, including service to existing vehicles and sales for foreign military use, but there can be no assurance that earnings from these opportunities will be realized.

Economic, legal and other factors could impact our customers' ability to pay accounts receivable balances due from them.

In the ordinary course of business, customers are granted terms related to the sale of goods and services delivered to them. These terms typically include a period of time between when the goods and services are tendered for delivery to the customer and when the customer needs to pay for these goods and services. The amounts due under these payment terms are listed as accounts receivable on our balance sheet. Prior to collection of these accounts receivable, our customers could encounter drops in sales, large legal settlements, or other factors which could impact their ability to continue as a going concern and which could affect the collectability of these amounts. Writing off uncollectible accounts receivable could have a material adverse effect on our earnings and cash flow as the company has major customers with material accounts receivable balances at any given time.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds Issuer Purchases of Equity Securities

A summary of the Company's purchases of its common stock during the second quarter of fiscal year 2008 is as follows:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
April 1 to April 30	--	--	--	700,000
May 1 to May 31	--	--	--	700,000
June 1 to June 30	35,591	\$7.47	--	700,000
Total	35,591	\$7.47	300,000	700,000

- (1) Shares reported in this column include those delivered by associates in satisfaction of tax withholding obligations that occur upon the vesting of restricted shares.
- (2) On July 24, 2007, the Board of Directors authorized management to repurchase, over the course of the subsequent 12-month period, up to a total of 1,000,000 shares of its common stock in open market transactions. The program expired July 23, 2008. The Company had repurchased 300,000 shares under that program as previously disclosed. On July 22, 2008, the Board of Directors reauthorized management to repurchase, over the course of the subsequent 12-month period, up to a total of 1,000,000 shares of its common stock in open market transactions. Repurchase of common stock is contingent upon market conditions. If the Company were to repurchase the full 1,000,000 shares of stock under the repurchase program, they would cost the Company approximately \$5,110,000 million based on the closing price of the Company's stock on August 1, 2008. The Company believes that it has sufficient resources to fund this potential stock buyback.

Item 4. Submission of Matters to a Vote of Security Holders.

The annual meeting of shareholders of Spartan Motors, Inc. was held on May 21, 2008. The purpose of the meeting was to elect directors, to ratify the appointment of BDO Seidman, LLP as the Company's independent registered public accounting firm for the current fiscal year, and to transact any other business that properly came before the meeting.

The name of each director elected to a term expiring in 2011 (along with the number of votes cast for or authority withheld) is as follows:

Elected Directors	For	Authority Withheld / Against
Hugh W. Sloan, Jr.	26,962,562	1,508,972
William F. Foster	22,095,770	6,375,764

The following persons continue to serve as directors: John E. Szykiel, Charles E. Nihart, Kenneth Kaczmarek, George Tesseris, and David R. Wilson. In addition, on July 22, 2008 the Board of Directors appointed Richard R. Current to the Board.

The following proposals were acted on:

Proposal	For	Against	Abstain	Broker Non-Vote
To ratify the Audit Committee's appointment of BDO Seidman, LLP as the Company's independent registered public accounting firm for the current fiscal year	28,193,771	208,494	69,264	0

Item 6. Exhibits.

(a) Exhibits. The following documents are filed as exhibits to this report on Form 10-Q:

<u>Exhibit No.</u>	<u>Document</u>
3.1	Spartan Motors, Inc. Restated Articles of Incorporation, as amended to date. Previously filed as an exhibit to the Company's Form 10-Q Quarterly Report for the period ended March 31, 2005, and incorporated herein by reference.
3.2	Spartan Motors, Inc. Bylaws, as amended to date.
10.1	Form of Restricted Stock Agreement.*
31.1	Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act.
31.2	Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act.
32	Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. § 1350.

*Management contract or compensatory plan or arrangement.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
