Form 10-Q
November 02, 2018

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-23211

CASELLA WASTE SYSTEMS, INC.
(Exact name of registrant as specified in its charter)

Delaware 03-0338873
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)
25 Greens Hill Lane, Rutland, Vermont 05701
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: (802) 775-0325

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each of the registrant's classes of common stock, as of October 31, 2018:
Class A common stock, \$0.01 par value per share: 41,932,022

Class B common stock, \$0.01 par value per share: 988,200

CASELLA WASTE SYSTEMS, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

(in thousands, except for per share data)

1. BASIS OF PRESENTATION

Casella Waste Systems, Inc. (“Parent”), and its consolidated subsidiaries (collectively, “we”, “us” or “our”), is a regional, vertically integrated solid waste services company that provides collection, transfer, disposal, landfill, landfill gas-to-energy, recycling, and organics services in the northeastern United States. We market recyclable metals, aluminum, plastics, paper, and corrugated cardboard, which have been processed at our recycling facilities, as well as recyclables purchased from third-parties. We manage our solid waste operations on a geographic basis through two regional operating segments, the Eastern and Western regions, each of which provides a full range of solid waste services, and our larger-scale recycling and commodity brokerage operations through our Recycling segment. Organics services, ancillary operations, major account and industrial services, discontinued operations and earnings from equity method investees, as applicable, are included in our Other segment.

The accompanying unaudited consolidated financial statements, which include the accounts of the Parent and our wholly-owned subsidiaries, have been prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). All significant intercompany accounts and transactions are eliminated in consolidation. Investments in entities in which we do not have a controlling financial interest are accounted for under either the equity method or the cost method of accounting, as appropriate. Our significant accounting policies are more fully discussed in Item 8 of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, which was filed with the SEC on March 2, 2018. For comparative purposes, certain prior period amounts in the consolidated financial statements, including the presentation of contract balances associated with the adoption of Accounting Standards Update (“ASU”) 2014-09, as amended, Revenue from Contracts with Customers (Topic 606) have been reclassified. See Note 3, Revenue Recognition for additional disclosure.

Preparation of our consolidated financial statements in accordance with GAAP requires management to make certain estimates and assumptions. These estimates and assumptions affect the accounting for and recognition and disclosure of assets, liabilities, equity, revenues and expenses. We must make these estimates and assumptions because certain information that we use is dependent on future events, cannot be calculated with a high degree of precision given the available data, or simply cannot be readily calculated. In the opinion of management, these consolidated financial statements include all adjustments, which include normal recurring and nonrecurring adjustments, necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented. The results for the three and nine months ended September 30, 2018 may not be indicative of the results for any other interim period or the entire fiscal year. The consolidated financial statements presented herein should be read in conjunction with our audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Subsequent Events

We have evaluated subsequent events or transactions that have occurred after the consolidated balance sheet date of September 30, 2018 through the date of filing of the consolidated financial statements with the SEC on this Quarterly Report on Form 10-Q. We have determined that, except as disclosed, there are no subsequent events that require disclosure in this Quarterly Report on Form 10-Q.

2. ACCOUNTING CHANGES

A table providing a brief description of recent ASUs to the Accounting Standards Codification (“ASC”) issued by the Financial Accounting Standards Board (“FASB”) deemed to have a possible material effect on our consolidated financial statements upon adoption based on current account balances and activity follows:

Standard	Description	Effect on the Financial Statements or Other Significant Matters
	Accounting standards that are adopted effective January 1, 2018	

ASU 2017-12:
Derivatives and
Hedging (Topic
815)

Requires that an entity align its risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. This guidance expands and refines hedge accounting for both financial and commodity risk components and aligns the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements.

The adoption of this guidance affects the designation and measurement guidance for qualifying hedging relationships and the method of presenting hedge results, including the addition of a tabular disclosure related to the effect on the income statement of fair value and cash flow hedges and no longer measuring and reporting hedge ineffectiveness. We early adopted this guidance using a modified retrospective approach effective April 1, 2018 with an initial application date of January 1, 2018 with no adjustment to Accumulated Deficit. See Note 7, Long-Term Debt for additional disclosure.

ASU 2017-09:
Compensation -
Stock
Compensation
(Topic 718)

Requires that an entity should account for the effects of a modification to an award unless all of the following conditions are met: the fair value of the modified award is the same as the fair value of the original award immediately before the original award is modified; the vesting conditions of the modified award are the same as the vesting conditions immediately before the original award is modified; and the classification of modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified.

The adoption of this guidance could affect equity compensation expense and net income if there is a modification of an award.

ASU 2016-01, as
amended through
March 2018:
Financial
Instruments -
Overall (Topic
825-10)

Requires the following: (1) equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; (2) entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (3) separate presentation of financial assets and financial liabilities by measurement category and form of financial asset; and (4) the elimination of the disclosure requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost.

The adoption of this guidance resulted in a cumulative-effect adjustment to Accumulated Deficit, recognition of the change in fair value of certain equity investments in net income, and enhanced disclosure. The adoption of this guidance did not have a material impact on our consolidated financial statements.

<p>ASU 2014-09, as amended through November 2017: Revenue from Contracts with Customers (Topic 606)</p>	<p>The core principle of the guidance is that using a five step methodology an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard also requires enhanced qualitative and quantitative disclosure regarding revenue recognition from customer contracts.</p>	<p>We adopted the guidance using the modified retrospective approach effective January 1, 2018 with no adjustment to Accumulated Deficit. We adopted the standard through the application of the portfolio approach. We selected a sample of customer contracts to assess under the guidance of the new standard that were characteristically representative of each portfolio. Upon completion of our review, the guidance did not result in a significant change to the timing of revenue recognition. We identified certain immaterial sales commissions, which represent costs of obtaining a contract, that should be capitalized as contract acquisition costs under the guidance and amortized to general and administration expense over the expected life of the customer contract. Based on the immateriality of these sales commissions, no adjustment to Accumulated Deficit nor the accounting of these costs was deemed necessary. See Note 3, Revenue Recognition for additional disclosure.</p>
---	--	---

A table providing a brief description of recent ASUs to the ASC issued by the FASB that may have a material effect on our consolidated financial statements upon adoption based on current account balances and activity follows:

Standard	Description	Effect on the Financial Statements or Other Significant Matters
<p>Accounting standards that are pending adoption</p>	<p>Requires that when an entity is performing its annual, or interim, goodwill impairment test, it should compare the fair value of the reporting unit with its carrying amount when calculating its impairment charge, noting that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Additionally, if applicable, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when calculating its impairment charge.</p>	<p>As of December 31, 2017, we did not record a goodwill impairment charge related to our annual goodwill impairment test because at that time the fair value of each reporting unit exceeded its respective carrying value. Upon adoption, if the carrying value of any of these reporting units exceeds the fair value when we perform a goodwill impairment test, we would record an impairment charge equal to the amount by which the carrying value exceeds its fair value. This guidance is effective January 1, 2020 with early adoption permitted for interim or annual goodwill impairment tests performed after January 1, 2017.</p>
<p>ASU 2017-04: Intangibles - Goodwill and Other (Topic 350)</p>	<p>Requires that a lessee recognize at the commencement date: a lease liability, which is the obligation of the lessee to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.</p>	<p>We are currently assessing the provisions of this guidance and evaluating the impact the guidance will have on our consolidated financial statements and related disclosures. We have also engaged outside resources to assist in applying and implementing this guidance. We are currently in the process of completing the implementation of a third-party lease accounting software application. The adoption of this ASU is expected to impact the balance sheet through the presentation of a finance lease right-of-use asset and lease liability and the recognition of an operating lease right-of-use asset and lease liability for</p>
<p>ASU 2016-02, as amended through July 2018: Leases (Topic 842)</p>	<p>Requires that a lessee recognize at the commencement date: a lease liability, which is the obligation of the lessee to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.</p>	<p>We are currently assessing the provisions of this guidance and evaluating the impact the guidance will have on our consolidated financial statements and related disclosures. We have also engaged outside resources to assist in applying and implementing this guidance. We are currently in the process of completing the implementation of a third-party lease accounting software application. The adoption of this ASU is expected to impact the balance sheet through the presentation of a finance lease right-of-use asset and lease liability and the recognition of an operating lease right-of-use asset and lease liability for</p>

all operating leases with terms in excess of 12 months. This guidance is effective January 1, 2019 using either a modified retrospective transition approach, or a prospective upon adoption approach, with early adoption permitted. We will adopt this guidance using the prospective upon adoption approach.

3. REVENUE RECOGNITION

We adopted ASU 2014-09, as amended, Revenue from Contracts with Customers (Topic 606) effective January 1, 2018. We adopted this guidance using the modified retrospective approach, noting that no cumulative effect adjustment to the beginning balance of Accumulated Deficit was needed. The comparative periods have not been restated and continue to be reported under Revenue Recognition (Topic 605). We applied this guidance to contracts that were not substantially completed contracts at the date of adoption. Additionally, contract modifications that occurred before the adoption date were not separately evaluated, rather the guidance was applied to the current version of the contract only. We disaggregate our revenues by applicable service line: collection, landfill, transfer, customer solutions, recycling, organics, transportation and landfill gas-to-energy.

Under the new revenue recognition guidance, revenues are measured based on the consideration specified in a contract with a customer. The circumstances that impact the timing and amount of revenue recognized for each applicable service line may vary based on the nature of the service performed. We generally recognize revenues for services over time as we satisfy the performance obligation by transferring control over the service to the customer as the service is performed and the benefit is received and consumed by the customer. Services are typically delivered in a series as a single bundled performance obligation over either a designated period of time or for specified number of services. Services may also be delivered as a single bundled service, on a period-to-period basis, or in a spot transaction. Consideration may be variable on a per ton basis and/or fixed. Fixed consideration is allocated to each distinct service and variable consideration is allocated to the increment of time that the service is performed and we have the contractual right to the fee. Fees are typically billed weekly, monthly, quarterly or in advance. Generally, the amount of consideration that we have the right to receive that is invoiced to the customer directly corresponds to the value of our performance completed to date. We elected the optional exemption, to not disclose the amount of variable consideration included in the transaction price that is allocated to outstanding performance obligations when the variable consideration is allocated entirely to unsatisfied performance obligations or to a wholly unsatisfied promise to transfer a distinct good or service that forms part of a single performance obligation. Revenues that are not satisfied over time are recognized at a point-in-time. This typically includes the sale of recycled or organic materials, as well as renewable energy credits ("RECs"). Revenues from the sale of organic or recycled materials are recognized at a point-in-time as control of the materials transfers to the customer upon shipment or pick-up by the customer. Revenues from the sale of RECs are recognized at a point-in-time as the trade is executed and control transfers to the customer.

Payments to customers that are not in exchange for a distinct good or service are recorded as a reduction of revenues. Rebates to certain customers associated with payments for recycled or organic materials that are received and subsequently processed and sold to other third-parties amounted to \$1,648 and \$4,732 in the three and nine months ended September 30, 2018, respectively. Rebates are generally recorded as a reduction of revenues upon the sale of such materials, or upon receipt of the recycled materials at our facilities. These payments were previously recorded as a cost of operations. We did not record any revenues in the three and nine months ended September 30, 2018 from performance obligations satisfied in previous periods.

Contract receivables, which are included in Accounts receivable - trade, net are recorded when billed or when related revenue is earned, if earlier, and represent claims against third-parties that will be settled in cash. Accounts receivable - trade, net includes gross receivables from contracts of \$79,180 and \$66,227 as of September 30, 2018 and December 31, 2017, respectively. Certain customers are billed in advance and, accordingly, recognition of the related revenues is deferred as a contract liability until the services are provided and control transferred to the customer. Contract liabilities of \$2,674 and \$1,823 as of September 30, 2018 and December 31, 2017, respectively, were reclassified out of Other accrued liabilities and presented separately on the face of the Consolidated Balance Sheets. Due to the short term nature of advanced billings, substantially all of the deferred revenue recognized as a contract liability as of December 31, 2017 was recognized as revenue during the three and nine months ended September 30, 2018 when the services were performed.

Revenues by Service Line

Collection

Collection revenues are principally generated by providing waste collection and disposal services to our customers. Services may be provided as needed or as scheduled. We derive a substantial portion of our collection revenues from commercial and industrial services, which typically have a standard contract duration of three years, along with municipal services that are generally performed pursuant to contracts with municipalities with varying terms. The majority of our residential collection services are performed on a subscription basis with individual households.

Landfill

Landfill disposal services primarily consist of receiving some form of acceptable solid waste materials at one of our landfills and appropriately disposing of it. Landfill customers are typically charged a tipping fee on a per ton basis for disposing of their solid waste at our disposal facilities. In general, these fees are variable in nature.

Transfer Station

Transfer station disposal services primarily consist of receiving some form of acceptable solid waste materials at one of our transfer stations and appropriately disposing of it by transporting it to an appropriate disposal site. Transfer station customers are charged a tipping fee on a per ton basis for disposing of their solid waste at our transfer stations. In general, these fees are variable in nature.

8

Transportation

Transportation services consist of the transportation of large volumes of waste or recycled materials from a customer designated location to another location or disposal facility. Transportation customers are charged a fee on a per ton basis for transporting and/or disposal of the materials. In general, these fees are variable in nature.

Recycling

Recycling services primarily consist of the collection and/or receipt of recycled materials at one of our materials recovery facilities; the processing or sorting of the recycled materials; and the disposal or sale of the recycled materials. Revenues from recycling services consist of revenues derived from municipalities and customers in the form of processing fees, tipping fees and commodity sales. In brokerage arrangements, we act as an agent that facilitates the sale of recyclable materials between an inbound customer and an outbound customer. Revenues from the brokerage of recycled materials are recognized on a net basis at the time of shipment. In general, these fees are variable in nature.

Customer Solutions

Customer solutions services consist of commercial and industrial offerings. Commercial services consist of traditional collection, disposal and recycling services provided to large account multi-site customers. Industrial services consist of overall resource management services provided to large and complex organizations, such as universities, hospitals, manufacturers and municipalities, delivering a wide range of environmental services and zero waste solutions.

Organics

Organics services primarily consist of the collection and/or receipt of organic materials at one of our processing or disposal facilities; the processing of the organic materials; and the disposal or sale of the organic materials.

Landfill Gas-to-Energy

Landfill gas-to-energy services primarily consist of the generation and sale of electricity from landfill gas-to-energy facilities located at certain of our landfills; the reservation of electric generating capacity to be used by a customer on demand; and the sale of RECs.

A table of revenues disaggregated by service line and timing of revenue recognition by operating segment follows:
Three Months Ended September 30, 2018

	Eastern	Western	Recycling	Other	Total Revenues
Collection	\$36,392	\$44,452	\$ —	\$—	\$80,844

4. BUSINESS COMBINATIONS

In the months of October and November 2018, we acquired three solid waste collection businesses in our Western region and one solid waste collection and transfer business in our Eastern region. Total consideration for these acquisitions was approximately \$24,000, subject to purchase price adjustments and holdbacks.

We acquired one solid waste collection, transfer and processing business in our Eastern region, Complete Disposal Company, Inc. and its subsidiary United Material Management of Holyoke, Inc. (collectively, "Complete"), which provides residential and roll-off collection services, operates a construction and demolition processing facility, and operates a solid waste transfer station with both truck and rail transfer capabilities during the nine months ended September 30, 2018. We also acquired three solid waste collection businesses, including a solid waste transfer station, in our Western region during the nine months ended September 30, 2018. In the nine months ended September 30, 2017, we acquired one solid waste collection business in our Eastern region and two solid waste collection businesses in our Western region. The operating results of these businesses are included in the accompanying unaudited consolidated statements of operations from each date of acquisition, and the purchase price has been allocated to the net assets acquired based on fair values at each date of acquisition, with the residual amounts

recorded as goodwill. Acquired intangible assets other than goodwill that are subject to amortization include client lists and non-compete covenants. Such assets are amortized over a five to ten year period from the date of acquisition. All amounts recorded to goodwill, except amounts related to the Complete acquisition, are expected to be deductible for tax purposes.

A summary of the purchase price paid for these acquisitions and the allocation of the purchase price for these acquisitions follows:

	Nine Months Ended September 30, 2018		2017
Purchase Price:			
Cash paid for acquisitions	\$57,824		\$3,383
Notes payable	—		2,400
Common stock	4,258		—
Other non-cash consideration	—		101
Contingent consideration and holdbacks	4,996		376
Total	67,078		6,260
Allocated as follows:			
Current assets	2,968		—
Building	7,539		—
Equipment	11,520		2,452
Intangible assets	20,300		1,670
Other liabilities, net	(2,443)	(49)	
Deferred tax liability	(1,230)		—
Fair value of assets acquired and liabilities assumed	38,654		4,073
Excess purchase price allocated to goodwill	\$28,424		\$2,187

The purchase price allocations are preliminary and are based on information existing at the acquisition dates or upon closing the transaction. Accordingly, the purchase price allocations are subject to change. Unaudited pro forma combined information that shows our operational results as though each acquisition completed since the beginning of the prior fiscal year had occurred as of January 1, 2017 follows:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
Revenues	\$176,848	\$171,390	\$502,399	\$483,480
Operating income (loss)	\$29,182	\$19,001	\$46,083	\$(20,216)
Net income (loss)	\$22,464	\$12,486	\$20,755	\$(40,579)
Basic weighted average common shares outstanding	42,779	41,951	42,605	41,783
Basic earnings per share attributable to common stockholders	\$0.53	\$0.30	\$0.49	\$(0.97)
Diluted weighted average shares outstanding	44,175	43,295	43,938	41,783
Diluted earnings per share attributable to common stockholders	\$0.51	\$0.29	\$0.47	\$(0.97)

The pro forma results set forth in the table above have been prepared for comparative purposes only and are not necessarily indicative of the actual results of operations had the acquisitions occurred as of January 1, 2017 or of the results of our future operations. Furthermore, the pro forma results do not give effect to all cost savings or incremental costs that may occur as a result of the integration and consolidation of the completed acquisitions.

5. GOODWILL AND INTANGIBLE ASSETS

A summary of the activity and balances related to goodwill by operating segment follows:

	December 31, 2017	Acquisitions	September 30, 2018
Eastern region (1)	\$ 19,192	\$ 5,601	\$ 24,793
Western region	89,369	22,823	112,192
Recycling	12,315	—	12,315
Other	1,729	—	1,729
Total	\$ 122,605	\$ 28,424	\$ 151,029

(1) The acquisitions amount includes a \$1,230 goodwill adjustment for the tax treatment associated with the Complete acquisition. See Note 13, Income Taxes for additional disclosure.

A summary of intangible assets by intangible asset type follows:

	Covenants Not-to-Compete	Client Lists	Total
Balance, September 30, 2018			
Intangible assets	\$ 19,192	\$ 37,287	\$ 56,479
Less accumulated amortization	(17,371)	(12,507)	(29,878)
	\$ 1,821	\$ 24,780	\$ 26,601
	Covenants Not-to-Compete	Client Lists	Total
Balance, December 31, 2017			
Intangible assets	\$ 18,092	\$ 18,087	\$ 36,179
Less accumulated amortization	(16,851)	(11,179)	(28,030)
	\$ 1,241	\$ 6,908	\$ 8,149

Intangible amortization expense was \$714 and \$1,848 during the three and nine months ended September 30, 2018, respectively, as compared to \$526 and \$1,518 during the three and nine months ended September 30, 2017, respectively.

A summary of intangible amortization expense estimated for the five fiscal years following the fiscal year ended December 31, 2017 and thereafter follows:

Estimated Future Amortization Expense as of September 30, 2018	
Fiscal year ending December 31, 2018	\$ 1,280
Fiscal year ending December 31, 2019	\$ 4,492
Fiscal year ending December 31, 2020	\$ 3,849
Fiscal year ending December 31, 2021	\$ 2,875
Fiscal year ending December 31, 2022	\$ 2,366
Thereafter	\$ 11,739

6. ACCRUED FINAL CAPPING, CLOSURE AND POST CLOSURE

Accrued final capping, closure and post-closure costs include the current and non-current portion of costs associated with obligations for final capping, closure and post-closure of our landfills. We estimate our future final capping, closure and post-closure costs in order to determine the final capping, closure and post-closure expense per ton of waste placed into each landfill. The anticipated time frame for paying these costs varies based on the remaining useful life of each landfill as well as the duration of the post-closure monitoring period.

A summary of the changes to accrued final capping, closure and post-closure liabilities follows:

	Nine Months Ended September 30,	
	2018	2017
Beginning balance	\$62,290	\$44,207
Obligations incurred	2,874	2,187
Revision in estimates (1)	1,492	9,598
Accretion expense	4,175	3,164
Obligations settled (2)	(2,310)	(586)
Ending balance	\$68,521	\$58,570

Relates to changes in estimates and assumptions associated with anticipated costs of future final capping, closure (1) and post-closure activities at the Town of Southbridge, Massachusetts landfill. See Note 8, Commitments and Contingencies and Note 11, Other Items and Charges for additional disclosure.

(2) Includes amounts that are being processed through accounts payable as a part of our disbursements cycle.

7. LONG-TERM DEBT

A summary of long-term debt and capital leases by debt instrument follows:

	September 30, 2018	December 31, 2017
Senior Secured Credit Facility:		
Revolving Credit Facility due May 2023; bearing interest at LIBOR plus 2.00%	\$ 44,800	\$ —
Refinanced Revolving Credit Facility due October 2021; bore interest at LIBOR plus 2.75%	—	36,000
Term Loan Facility due May 2023; bearing interest at LIBOR plus 2.00%	350,000	—
Term Loan B Facility due October 2023; bore interest at LIBOR plus 2.50%	—	346,500
Tax-Exempt Bonds:		
New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014 due December 2044 - fixed rate interest period through 2019; bearing interest at 3.75%	25,000	25,000
New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014R-2 due December 2044 - fixed rate interest period through 2026; bearing interest at 3.125%	15,000	15,000
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-3 due January 2025 - fixed rate interest period through 2025; bearing interest at 5.25%	25,000	25,000
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-1 due August 2035 - fixed rate interest period through 2025; bearing interest at 5.125%	15,000	15,000
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-2 due August 2035 - fixed rate interest period through 2025; bearing interest at 4.375%	15,000	—
Vermont Economic Development Authority Solid Waste Disposal Long-Term Revenue Bonds Series 2013 due April 2036 - fixed rate interest period through 2028; bearing interest at 4.625%	16,000	16,000
Business Finance Authority of the State of New Hampshire Solid Waste Disposal Revenue Bonds Series 2013 due April 2029 - fixed rate interest period through 2019; bearing interest at 4.00%	11,000	11,000
Other:		
Capital leases maturing through December 2107; bearing interest at a weighted average of 5.37%	8,934	5,595
	2,477	2,585

Edgar Filing: CASELLA WASTE SYSTEMS INC - Form 10-Q

Notes payable maturing through June 2027; bearing interest at a weighted average of 2.97%

Principal amount of long-term debt and capital leases	528,211	497,680
Less—unamortized discount and debt issuance costs (1)	11,524	15,178
Long-term debt and capital leases less unamortized discount and debt issuance costs	516,687	482,502
Less—current maturities of long-term debt	1,980	4,926
	\$ 514,707	\$ 477,576

(1) A summary of unamortized discount and debt issuance costs by debt instrument follows:

	September 30, 2018	December 31, 2017
Refinanced Revolving Credit Facility	\$ —	\$ 3,938
Credit Facility	7,528	—
Term Loan B Facility (including unamortized discount of \$0 and \$1,482)	—	7,392
New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014	894	1,034
New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014R-2	465	511
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-3	539	603
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-1	639	691
Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-2	511	—
Vermont Economic Development Authority Solid Waste Disposal Long-Term Revenue Bonds Series 2013	608	573
Business Finance Authority of the State of New Hampshire Solid Waste Disposal Revenue Bonds Series 2013	340	436
	\$ 11,524	\$ 15,178

Financing Activities

Credit Facility

In the quarter ended June 30, 2018, we entered into a credit agreement ("Credit Agreement"), which provides for a \$350,000 aggregate principal amount term loan A facility ("Term Loan Facility") and a \$200,000 revolving line of credit facility ("Revolving Credit Facility" and, together with the Term Loan Facility, the "Credit Facility"). The net proceeds from this transaction were used to repay in full the amounts outstanding of the \$350,000 aggregate principal amount term loan B facility ("Term Loan B Facility") and the \$160,000 revolving line of credit facility ("Refinanced Revolving Credit Facility") plus accrued and unpaid interest thereon and to pay related transaction expenses. We have the right to request, at our discretion, an increase in the amount of loans under the Credit Facility by an aggregate amount of \$125,000, subject to the terms and conditions set forth in the Credit Agreement.

The Credit Facility has a 5-year term and will initially bear interest at a rate of LIBOR plus 2.00% per annum, which will be reduced to a rate of LIBOR plus 1.25% upon us reaching a consolidated net leverage ratio of less than 2.25x. The Credit Facility is guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries and secured by substantially all of our assets. As of September 30, 2018, further advances were available under the Credit Facility in the amount of \$132,679. The available amount is net of outstanding irrevocable letters of credit totaling \$22,521, at which date no amount had been drawn.

The Credit Agreement requires us to maintain a minimum interest coverage ratio and a maximum consolidated net leverage ratio, to be measured at the end of each fiscal quarter. As of September 30, 2018, we were in compliance with the covenants contained in the Credit Agreement. In addition to these financial covenants, the Credit Agreement also contains a number of important customary affirmative and negative covenants which restrict, among other things, our ability to sell assets, incur additional debt, create liens, make investments, and pay dividends. We do not believe that these restrictions impact our ability to meet future liquidity needs. An event of default under any of our debt agreements could permit some of our lenders, including the lenders under the Credit Facility, to declare all amounts borrowed from them to be immediately due and payable, together with accrued and unpaid interest, or, in the case of the Credit Facility, terminate the commitment to make further credit extensions thereunder, which could, in turn, trigger cross-defaults under other debt obligations. If we were unable to repay debt to our lenders, or were otherwise in default under any provision governing our outstanding debt obligations, our secured lenders could proceed against us and against the collateral securing that debt.

Tax-Exempt Financings

In the quarter ended June 30, 2018, we completed the issuance of \$15,000 aggregate principal amount of Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-2 ("FAME Bonds 2015R-2"). The FAME

Bonds 2015R-2, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 4.375% per annum through July 31, 2025, at which time they may be converted from a fixed to a variable rate. Interest is payable semiannually each year on May 1 and November 1 until the FAME Bonds 2015R-2 mature on August 1, 2035. We borrowed the proceeds of the offering of the FAME Bonds 2015R-2 to finance or refinance the costs of certain of our solid waste landfill facilities and solid waste collection, organics and transfer, recycling and hauling facilities, and to pay certain costs of the issuance of the FAME Bonds 2015R-2.

In the quarter ended June 30, 2018, we completed the remarketing of \$16,000 aggregate principal amount of 4.75% fixed rate Vermont Economic Development Authority Solid Waste Disposal Revenue Bonds Series 2013 (“Vermont Bonds”). The Vermont Bonds, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 4.625% per annum through April 2, 2028 after which time there is a mandatory tender. The Vermont Bonds mature on April 1, 2036.

In the quarter ended March 31, 2017, we completed the remarketing of \$3,600 aggregate principal amount of Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-1 (“FAME Bonds 2005R-1”) and \$21,400 aggregate principal amount of Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-2 (“FAME Bonds 2005R-2”) into one series of \$25,000 aggregate principal amount Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-3 (“FAME Bonds 2005R-3”). The FAME Bonds 2005R-3, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 5.25% per annum until they mature on January 1, 2025.

Loss on Debt Extinguishment

We recorded losses on debt extinguishment of \$0 and \$7,352 during the three and nine months ended September 30, 2018, respectively, as compared to \$0 and \$517 during the three and nine months ended September 30, 2017, respectively, associated with the following:

- the write-off of debt issuance costs and unamortized discount in connection with the refinancing of our Credit Facility in the quarter ended June 30, 2018;

- the write-off of debt issuance costs in connection with the remarketing of our Vermont Bonds in the quarter ended June 30, 2018;

- the write-off of debt issuance costs in connection with the amendment and repricing of our Term Loan B Facility in the quarter ended June 30, 2017; and

- the write-off of debt issuance costs in connection with the remarketing of the FAME Bonds 2005R-1 and the FAME Bonds 2005R-2 into the FAME Bonds 2005R-3 in the quarter ended March 31, 2017.

Cash Flow Hedges

In the quarter ended June 30, 2018, we early adopted ASU 2017-12: Derivatives and Hedging (Topic 815) using a modified retrospective approach effective April 1, 2018 with an initial application date of January 1, 2018 with no adjustment to Accumulated Deficit. Under the new guidance, for highly effective hedging relationships the entire change in fair value of the hedging instruments, both the effective and ineffective portion, is recorded in equity as a component of accumulated other comprehensive income (loss), net of tax until the hedged item affects earnings. As of April 1, 2018, we had in place three interest rate derivative agreements to hedge interest rate risk associated with the variable rate portion of our long-term debt. According to the interest rate derivative agreements, we receive interest based on the 1-month LIBOR index with a 1.00% LIBOR floor and pay interest based on fixed rates. The refinancing of the Credit Facility resulted in changes to the critical terms of the hedged item in these hedging relationships. As a result, we dedesignated the original hedging relationship between the three interest rate derivative agreements and the variable rate interest payments related to the Term Loan B Facility and then subsequently designated new hedging relationships between the three interest rate derivative agreements and the variable rate interest payments related to the Term Loan Facility based on a quantitative assessment using a regression analysis, which indicated that the hedging relationships were highly effective. Because the interest rate payments associated with the variable rate portion of our long-term debt will still occur, the net gain of \$1,383 associated with the interest rate derivative agreements in accumulated other comprehensive income was not reclassified into earnings. Instead, this gain will continue to be reclassified from accumulated other comprehensive income into interest expense as the interest payments affect earnings.

Additionally, in the nine months ended September 30, 2018, we entered into six additional interest rate derivative agreements to hedge interest rate risk associated with the variable rate portion of our long-term debt. Given that the critical terms of these interest rate derivative agreements match those of the underlying long-term debt being hedged, we determined qualitatively that the hedging relationships were highly effective.

The total notional amount of all of our interest rate derivative agreements is \$190,000 and according to the terms of the agreements, we receive interest based on the 1-month LIBOR index and pay interest at a weighted average rate of approximately 2.54%. The agreements mature between February 2021 and May 2023. We have designated these derivative instruments as effective cash flow hedges.

A summary of the effect of cash flow hedges related to derivative instruments on the consolidated balance sheet follows:

	Balance Sheet Location	Fair Value	
		September 30, 2018	December 31, 2017
Interest rate swaps	Other current assets	\$350	\$ —
Interest rate swaps	Other non-current assets	1,809	401
Total		\$2,159	\$ 401
Interest rate swaps	Other accrued liabilities	\$326	\$ 123
Interest rate swaps	Other long-term liabilities	—	—
Total		\$326	\$ 123
Interest rate swaps	Accumulated other comprehensive income	\$1,811	\$ 278
Interest rate swaps - tax provision	Accumulated other comprehensive income	\$(525)	\$(112)
		\$1,286	\$ 166

A summary of the amount of gain or (loss) on cash flow hedging relationships related to interest rate swaps reclassified from accumulated other comprehensive income into earnings follows:

Statement of Operations Location	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	(Expense) Income	(Expense) Income	(Expense) Income	(Expense) Income
Interest expense	\$(156)	\$(112)	\$(247)	\$(320)

8. COMMITMENTS AND CONTINGENCIES

Legal Proceedings

In the ordinary course of our business and as a result of the extensive governmental regulation of the solid waste industry, we are subject to various judicial and administrative proceedings involving state and local agencies. In these proceedings, an agency may seek to impose fines or to revoke or deny renewal of an operating permit held by us. From time to time, we may also be subject to actions brought by special interest or other groups, adjacent landowners or residents in connection with the permitting and licensing of landfills and transfer stations, or allegations of environmental damage or violations of the permits and licenses pursuant to which we operate. In addition, we may be named defendants in various claims and suits pending for alleged damages to persons and property, alleged violations of certain laws and alleged liabilities arising out of matters occurring during the ordinary operation of a waste management business.

In accordance with FASB ASC 450 - Contingencies, we accrue for legal proceedings, inclusive of legal costs, when losses become probable and reasonably estimable. As of the end of each applicable reporting period, we review each of our legal proceedings to determine whether it is probable, reasonably possible or remote that a liability has been incurred and, if it is at least reasonably possible, whether a range of loss can be reasonably estimated under the provisions of FASB ASC 450-20. In instances where we determine that a loss is probable and we can reasonably estimate a range of loss we may incur with respect to such a matter, we record an accrual for the amount within the range that constitutes our best estimate of the possible loss. If we are able to reasonably estimate a range, but no amount within the range appears to be a better estimate than any other, we record an accrual in the amount that is the

low end of such range. When a loss is reasonably possible, but not probable, we will not record an accrual, but we will disclose our estimate of the possible range of loss where such estimate can be made in accordance with FASB ASC 450-20.

Environmental Remediation Liability (including related litigation)

We are subject to liability for environmental damage, including personal injury and property damage, that our solid waste, recycling and power generation facilities may cause to neighboring property owners, particularly as a result of the contamination of drinking water sources or soil, possibly including damage resulting from conditions that existed before we acquired the facilities. We may also be subject to liability for similar claims arising from off-site environmental contamination caused by pollutants or hazardous substances if we or our predecessors arrange or arranged to transport, treat or dispose of those materials. The following matters represent our material outstanding claims.

Southbridge Recycling & Disposal Park, Inc.

In October 2015, our Southbridge Recycling and Disposal Park, Inc. ("SRD") subsidiary reported to the Massachusetts Department of Environmental Protection ("MADEP") results of analysis of samples collected pursuant to our existing permit from private drinking water wells located near the Town of Southbridge, Massachusetts ("Town") Landfill ("Southbridge Landfill"), which is operated by SRD. Those results indicated the presence of contaminants above the levels triggering notice and response obligations under MADEP regulations. In response to those results, we are carrying out an Immediate Response Action pursuant to Massachusetts General Law Chapter 21E (the "Charlton 21E Obligations") pursuant to state law. Further, we have implemented a plan to analyze and better understand the groundwater near the Southbridge Landfill and we are investigating with the objective of identifying the source or sources of the elevated levels of contamination measured in the well samples. If it is determined that some or all of the contamination originated at the Southbridge Landfill, we will work with the Town (the Southbridge Landfill owner and the former operator of an unlined portion of the Southbridge Landfill, which was used prior to our operation of a double-lined portion of the Southbridge Landfill commencing in 2004) to evaluate and allocate the liabilities related to the Charlton 21E Obligations. In July 2016, we sent correspondence to the Town pursuant to Chapter 21E of Massachusetts General Laws demanding that the Town reimburse us for the environmental response costs we had spent and that the Town be responsible for all such costs in the future, as well as any other costs or liabilities resulting from the release of contaminants from the unlined portion of the Southbridge Landfill. The Town responded in September 2016, denying that the Southbridge Landfill is the source of such contamination, and claiming that if it is, that we may owe an indemnity to the Town pursuant to the Operating Agreement between us and the Town dated May 29, 2007, as amended. We entered into a Tolling Agreement with the Town to delay any further administrative or legal actions until our work with MADEP more specifically defines the parties' responsibilities for the Charlton 21E Obligations, if any. Please see below for further discussion of our relationship with the Town regarding the Charlton 21E Obligations.

In February 2016, we and the Town received a Notice of Intent to Sue under the Resource Conservation and Recovery Act ("RCRA") from a law firm purporting to represent residents proximate to the Southbridge Landfill ("Residents"), indicating its intent to file suit against us on behalf of the Residents alleging the groundwater contamination originated from the Southbridge Landfill. In February 2017, we received an additional Notice of Intent to Sue from the National Environmental Law Center under the Federal Clean Water Act ("CWA") and RCRA (collectively the "Acts") on behalf of Environment America, Inc., d/b/a Environment Massachusetts, and Toxics Action Center, Inc., which have referred to themselves as the Citizen Groups. The Citizen Groups alleged that we had violated the Acts, and that they intended to seek appropriate relief in federal court for those alleged violations. On or about June 9, 2017, a lawsuit was filed against us, SRD and the Town in the United States District Court for the District of Massachusetts (the "Massachusetts Court") by the Citizen Groups and the Residents alleging violations of the Acts (the "Litigation"), and demanding a variety of remedies under the Acts, including fines, remediation, mitigation and costs of litigation, and remedies for violations of Massachusetts civil law related to personal and property damages, including remediation, diminution of property values, compensation for lost use and enjoyment of properties, enjoinder of further operation of the Southbridge Landfill, and costs of litigation, plus interest on any damage award, on behalf of the Residents. We believe the Litigation to be factually inaccurate, and without legal merit, and we and SRD intend to vigorously defend the Litigation. Nevertheless, we believe it is reasonably possible that a loss will occur as a result of the Litigation although an estimate of loss cannot be reasonably provided at this time. We also continue to believe the Town should be responsible for costs or liabilities associated with the Litigation relative to alleged contamination originating from

the unlined portion of the Southbridge Landfill, although there can be no assurance that we will not be required to incur some or all of such costs and liabilities.

In December 2017, we filed a Motion to Dismiss the Litigation, and on October 1, 2018, the Massachusetts Court granted our Motion to Dismiss, and accordingly, dismissed the Citizen Groups claims under the Acts. The Massachusetts Court has retained jurisdiction of the Residents claims.

We entered into an Administrative Consent Order on April 26, 2017 (the “ACO”), with MADEP, the Town, and the Town of Charlton, committing us to equally share the costs with MADEP, of up to \$10,000 (\$5,000 each) for the Town to install a municipal waterline in the Town of Charlton (“Waterline”). Upon satisfactory completion of that Waterline, and other matters covered by the ACO, we and the Town will be released by MADEP from any future responsibilities for the Charlton 21E Obligations. We also entered into an agreement with the Town on April 28, 2017 entitled the “21E Settlement and Water System Construction Funding Agreement” (the “Waterline Agreement”), wherein we and the Town released each other from claims arising from the Charlton 21E Obligations. Pursuant to the Waterline Agreement, the Town will issue a twenty (20) year bond for our portion of the Waterline costs (up to \$5,000). We have agreed to reimburse the Town for periodic payments under such bond. The Town has recently advised us that it has solicited and received proposals for the construction of the Waterline as contemplated by the ACO, and that construction of the Waterline has commenced.

We have recorded an environmental remediation liability associated with the future installation of the Waterline in other accrued liabilities and other long-term liabilities. We inflate the estimated costs in current dollars to the expected time of payment and discount the total cost to present value using a risk-free interest rate of 2.6%. Our expenditures could be significantly higher if costs exceed estimates. The changes to the environmental remediation liability associated with the Southbridge Landfill are as follows:

	Nine Months Ended September 30,	
	2018	2017
Beginning balance	\$5,936	\$—
Accretion expense	116	41
Obligations incurred	—	6,379
Obligations settled (1)	(612)	(241)
Ending balance	\$5,440	\$6,179

(1) Includes amounts that are being processed through accounts payable as a part of our disbursements cycle.

In November 2016, SRD received a cease and desist order (“Order”) from the Charlton alternate zoning enforcement officer, alleging that two storm water detention basins on SRD’s property in Charlton existed in violation of Charlton zoning requirements. SRD appealed the Order to the Charlton Zoning Board of Appeals, which upheld the Order. In June 2018, the Massachusetts Land Court approved a settlement reached between SRD and Charlton resolving all issues associated with the Order. Based on this settlement with Charlton, we paid a total of \$850 in cash, and will provide ancillary services to Charlton over the next five (5) years for a total of cash and services of approximately \$1,200. This matter is now resolved. We have a remaining reserve of \$366 as of September 30, 2018. This settlement is recorded as part of the Southbridge Landfill closure (settlement) charge, net in the nine months ended September 30, 2018. See Note 11, Other Items and Charges for additional disclosure.

In August 2016, we filed a complaint against Steadfast Insurance Company (“Steadfast”) in the Superior Court of Suffolk County, Massachusetts (the “Court”), alleging among other things, that Steadfast breached its Pollution Liability Policy (“Policy”) purchased by us in April 2015, by refusing to acknowledge coverage under the Policy, and refusing to cover any of the costs and liabilities incurred by us as described above as well as costs and liabilities that we may incur in the future. Steadfast filed an answer and counterclaim in September 2016, denying that it has any obligations to us under the Policy, and seeking a declaratory judgment of Steadfast’s obligations under the Policy. Steadfast filed a Motion to Dismiss (the “Motion”) our litigation against it, and we filed our response on July 11, 2017. On September 7, 2017, the Court denied the Motion. On July 17, 2018, we reached an agreement with Steadfast settling this litigation (the “Settlement”). Pursuant to the Settlement, Steadfast agreed to partially reimburse us for direct costs incurred or to be incurred by us under the ACO, as well as for substantial investigative costs associated with our efforts to ascertain the source of contaminants and other costs related to the Charlton 21E Obligations. Additionally, the Settlement payment is intended to reimburse us for all costs and liabilities arising out of the Litigation. Steadfast agreed to pay us \$10,000, and we received the Settlement funds in the three months ended September 30, 2018. The recovery of funds is recorded as part of the Southbridge Landfill closure (settlement) charge, net in the nine months

ended September 30, 2018. See Note 11, Other Items and Charges for additional disclosure.

18

On June 13, 2017, Town voters rejected a non-binding ballot initiative intended to provide guidance to Town officials with respect to our pursuit of other landfill development opportunities at the Southbridge Landfill. Following such rejection by the Town voters, our board of directors and senior management determined after due consideration of all facts and circumstances that it is no longer likely that further development at the existing landfill site will generate an adequate risk adjusted return at the Southbridge Landfill, and accordingly we expect to cease operations at the Southbridge Landfill when no further capacity is available, expected by no later than early 2019. We delivered correspondence to the Town to this effect on August 3, 2017, citing events of Change in Law and Force Majeure pursuant to our May 29, 2007 Extension Agreement with the Town ("Extension Agreement") and the impacts of such events on further expansion of the Southbridge Landfill. We have advised the Town that we see no economically feasible way to operate the Southbridge Landfill beyond its current permitted life and we have filed a closure plan with MADEP. Following cessation of operations, we will proceed to conduct proper closure and other activities at the Southbridge Landfill in accordance with the Extension Agreement with the Town, and Federal, state and local law. We reached this conclusion after carefully evaluating the estimated future costs associated with the permitting, engineering and construction activities for the planned expansion of the Southbridge Landfill against the possible outcomes of the permitting process and the anticipated future benefits of successful expansions. Under the Extension Agreement, which we account for as an operating lease, there are potential contractual obligations and commitments, including future cash payments of \$2,199 and services that extend beyond the current useful life of the Southbridge Landfill. In accordance with FASB ASC 420 - Exit or Disposal Cost Obligations, a liability for costs to be incurred under a contract for its remaining term without economic benefit shall be recognized when we cease using the right conveyed by the contract. We may incur a loss associated with these potential contractual obligations upon cessation of operations at the Southbridge Landfill when remaining capacity is exhausted by the placement of waste at the site. In this respect, the Town had, on or about April 11, 2018, filed a motion for a declaratory judgment and injunctive relief in the Massachusetts Court seeking a judgment from the Massachusetts Court as to the rights of the parties pursuant to the Extension Agreement, and injunctive relief to prevent us from discontinuing free collection and disposal of the Town's municipal waste when the Southbridge Landfill ceases to accept waste (the "Town Equity Litigation"). We vigorously defended the Town Equity Litigation on its merits, and further, on the grounds that the Town Equity Litigation is not in compliance with the procedures for dispute resolution as set forth in the Extension Agreement. On June 26, 2018, the Massachusetts Court denied the Town's request for a preliminary injunction without prejudice. Subsequently, the Town filed a successor litigation to the Town Equity Litigation (the "Current Litigation"), again seeking equitable and legal relief. We are vigorously contesting the Current Litigation. Trial is now scheduled for November 27, 2018.

The costs and liabilities we may be required to incur in connection with the foregoing Southbridge Landfill matters could be material to our results of operations, our cash flows and our financial condition.

Potsdam Environmental Remediation Liability

On December 20, 2000, the State of New York Department of Environmental Conservation ("DEC") issued an Order on Consent ("Order") which named Waste-Stream, Inc. ("WSI"), our subsidiary, General Motors Corporation ("GM") and Niagara Mohawk Power Corporation ("NiMo") as Respondents. The Order required that the Respondents undertake certain work on a 25-acre scrap yard and solid waste transfer station owned by WSI in Potsdam, New York, including the preparation of a Remedial Investigation and Feasibility Study ("Study"). A draft of the Study was submitted to the DEC in January 2009 (followed by a final report in May 2009). The Study estimated that the undiscounted costs associated with implementing the preferred remedies would be approximately \$10,219. On February 28, 2011, the DEC issued a Proposed Remedial Action Plan for the site and accepted public comments on the proposed remedy through March 29, 2011. We submitted comments to the DEC on this matter. In April 2011, the DEC issued the final Record of Decision ("ROD") for the site. The ROD was subsequently rescinded by the DEC for failure to respond to all submitted comments. The preliminary ROD, however, estimated that the present cost associated with implementing the preferred remedies would be approximately \$12,130. The DEC issued the final ROD in June 2011 with proposed remedies consistent with its earlier ROD. An Order on Consent and Administrative Settlement naming WSI and NiMo as Respondents was executed by the Respondents and DEC with an effective date of October 25, 2013. On January 29, 2016, a Cost-Sharing Agreement was executed between WSI, NiMo, Alcoa Inc. ("Alcoa") and Reynolds Metal

Company (“Reynolds”) whereby Alcoa and Reynolds elected to voluntarily participate in the onsite remediation activities at a combined 15% participant share. It is unlikely that any significant expenditures relating to onsite remediation will be incurred until the fiscal year ending December 31, 2019. WSI is jointly and severally liable with NiMo, Alcoa and Reynolds for the total cost to remediate.

We have recorded an environmental remediation liability associated with the Potsdam site based on incurred costs to date and estimated costs to complete the remediation in other accrued liabilities and other long-term liabilities. Our expenditures could be significantly higher if costs exceed estimates. We inflate the estimated costs in current dollars to the expected time of payment and discount the total cost to present value using a risk-free interest rate of 1.5%.

A summary of the changes to the environmental remediation liability associated with the Potsdam environmental remediation liability follows:

	Nine Months Ended September 30,	
	2018	2017
Beginning balance	\$5,758	\$5,866
Obligations settled (1) (98) (21)		
Ending balance	\$5,660	\$5,845

(1) Includes amounts that are being processed through accounts payable as a part of our disbursements cycle.

North Country Environmental Services

On or about March 8, 2018, the Citizen Groups described above, delivered correspondence to our subsidiary, North Country Environmental Services, Inc. ("NCES") and us, providing notice of the Citizen Groups' intent to sue NCES and us for violations of the CWA in conjunction with NCES's operation of its landfill in Bethlehem, New Hampshire. On May 14, 2018, the Citizen Groups filed a lawsuit against NCES and us in the United States District Court for the District of New Hampshire (the "New Hampshire Court") alleging violations of the CWA, arguing that ground water discharging into the Ammonoosuc River is a "point source" under the CWA (the "New Hampshire Litigation"). The New Hampshire Litigation seeks remediation and fines under the CWA. On June 15, 2018, we and NCES filed a Motion to Dismiss the New Hampshire Litigation. On July 13, 2018, the Citizen Groups filed objections to our Motion to Dismiss. On July 27, 2018, we filed a reply in support of our Motion to Dismiss. On September 25, 2018, the New Hampshire Court denied our Motion to Dismiss. We intend to continue to vigorously defend against the New Hampshire Litigation, which we believe is without merit.

9. STOCKHOLDERS' EQUITY

Stock Based Compensation

Shares Available For Issuance

In the fiscal year ended December 31, 2016, we adopted the 2016 Incentive Plan ("2016 Plan"). Under the 2016 Plan, we may grant awards up to an aggregate amount of shares equal to the sum of: (i) 2,250 shares of Class A common stock (subject to adjustment in the event of stock splits and other similar events), plus (ii) such additional number of shares of Class A common stock (up to 2,723 shares) as is equal to the sum of the number of shares of Class A common stock that remained available for grant under the 2006 Stock Incentive Plan ("2006 Plan") immediately prior to the expiration of the 2006 Plan and the number of shares of Class A common stock subject to awards granted under the 2006 Plan that expire, terminate or are otherwise surrendered, canceled, forfeited or repurchased by us. As of September 30, 2018, there were 1,615 Class A common stock equivalents available for future grant under the 2016 Plan.

Stock Options

Stock options are granted at a price equal to the prevailing fair value of our Class A common stock at the date of grant. Generally, stock options granted have a term not to exceed ten years and vest over a one year to four year period from the date of grant.

The fair value of each stock option granted, with the exception of market-based performance stock option grants, is estimated using a Black-Scholes option-pricing model, which requires extensive use of accounting judgment and financial estimation, including estimates of the expected term stock option holders will retain their vested stock options before exercising them and the estimated volatility of our Class A common stock price over the expected term. The fair value of each market-based performance stock option granted is estimated using a Monte Carlo option-pricing model, which also requires extensive use of accounting judgment and financial estimation, including estimates of the expected term stock option holders will retain their vested stock options before exercising them and the estimated volatility of our Class A common stock price over the expected term, but also including estimates of share price appreciation plus the value of dividends of our Class A common stock as compared to the Russell 2000 Index over the requisite service period.

A summary of stock option activity follows:

	Stock Options (1)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding, December 31, 2017	727	\$ 5.82		
Granted	—	\$ —		
Exercised	(98)	\$ 4.80		
Forfeited	—	\$ —		
Outstanding, September 30, 2018	629	\$ 5.98	5.7	\$ 15,765
Exercisable, September 30, 2018	429	\$ 4.81	4.9	\$ 11,253
Unvested, September 30, 2018	240	\$ 9.16	7.5	\$ 5,256

Market-based performance stock options are included at the 100% attainment level. Attainment of the maximum (1) performance targets and market achievements would result in the issuance of an additional 40 shares of Class A common stock currently included in unvested.

Stock-based compensation expense for stock options was \$127 and \$377 during the three and nine months ended September 30, 2018, respectively, as compared to \$158 and \$505 during the three and nine months ended September 30, 2017, respectively.

During the three and nine months ended September 30, 2018, the aggregate intrinsic value of stock options exercised was \$361 and \$1,916, respectively.

As of September 30, 2018, total unrecognized stock-based compensation expense related to outstanding stock options, including market-based performance stock options assuming the attainment of maximum performance targets, was \$96, which will be recognized over a weighted average period of 0.1 years.

Other Stock Awards

Restricted stock awards, restricted stock units and performance stock units, with the exception of market-based performance stock units, are granted at a price equal to the fair value of our Class A common stock at the date of grant. The fair value of each market-based performance stock unit is estimated using a Monte Carlo pricing model, which requires extensive use of accounting judgment and financial estimation, including the estimated share price appreciation plus the value of dividends of our Class A common stock as compared to the Russell 2000 Index over the requisite service period.

Generally, restricted stock awards granted to non-employee directors vest incrementally over a three year period beginning on the first anniversary of the date of grant. Restricted stock units granted to non-employee directors typically vest in full on the first anniversary of the grant date. Restricted stock units granted to employees vest incrementally over an identified service period beginning on the grant date based on continued employment. Performance stock units granted to employees, including market-based performance stock units, vest at a future date following the grant date and are based on the attainment of performance targets and market achievements, as applicable.

A summary of restricted stock, restricted stock unit and performance stock unit activity follows:

	Restricted Stock, Restricted Stock Units and Performance Stock Units (1)	Grant Date Fair Value	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding, December 31, 2017	1,091	\$ 9.81		
Granted	228	\$ 24.87		
Class A Common Stock Vested	(378)	\$ 6.91		
Forfeited	(1)	\$ 19.28		
Outstanding, September 30, 2018	940	\$ 14.62	1.1	\$ 15,452
Unvested, September 30, 2018	1,390	\$ 14.79	1.1	\$ 22,614

Market-based performance stock unit grants are included at the 100% attainment level. Attainment of the (1) maximum performance targets and market achievements would result in the issuance of an additional 450 shares of Class A common stock currently included in unvested.

Stock-based compensation expense related to restricted stock, restricted stock units and performance stock units was \$2,007 and \$5,883 during the three and nine months ended September 30, 2018, respectively, as compared to \$1,684 and \$4,183 during the three and nine months ended September 30, 2017, respectively.

During the three and nine months ended September 30, 2018, the total fair value of other stock awards vested was \$207 and \$9,826, respectively.

As of September 30, 2018, total unrecognized stock-based compensation expense related to outstanding restricted stock and restricted stock units was \$3,680, which will be recognized over a weighted average period of 1.3 years. As of September 30, 2018, maximum unrecognized stock-based compensation expense related to outstanding performance stock units, assuming the attainment of maximum performance targets, was \$5,766 to be recognized over a weighted average period of 1.0 years.

The weighted average fair value of market-based performance stock units granted during the nine months ended September 30, 2018 was \$26.02 per award, which was calculated using a Monte Carlo pricing model assuming a risk free interest rate of 2.39% and an expected volatility of 32.70% assuming no expected dividend yield. The risk-free interest rate is based on the U.S. Treasury yield curve for the expected service period of the award. Expected volatility is calculated using the daily volatility of our Class A common stock over the expected service period of the award. The Monte Carlo pricing model requires extensive use of accounting judgment and financial estimation. Application of alternative assumptions could produce significantly different estimates of the fair value of stock-based compensation and consequently, the related amounts recognized in the consolidated statements of operations. We also recorded \$34 and \$106 of stock-based compensation expense related to our Amended and Restated 1997 Employee Stock Purchase Plan during the three and nine months ended September 30, 2018, respectively, as compared to \$31 and \$96 during the three and nine months ended September 30, 2017, respectively.

Accumulated Other Comprehensive Income

A summary of the changes in the balances of each component of accumulated other comprehensive income, net of tax follows:

	Marketable Securities	Interest Rate Swaps
Balance, December 31, 2017	\$ 18	\$166
Cumulative effect of new accounting principle	(18)	—
Other comprehensive income before reclassifications	—	1,286
Amounts reclassified from accumulated other comprehensive income	—	247
Income tax expense related to items of other comprehensive income	—	(413)
Net current-period other comprehensive income	—	1,120
Balance, September 30, 2018	\$ —	\$1,286

A summary of reclassifications out of accumulated other comprehensive income, net of tax follows:

Details About Accumulated Other Comprehensive Income Components	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017		Amounts Reclassified Out of Accumulated Other Comprehensive Income	Affected Line Item in the Consolidated Statements of Operations
	2018	2017	2018	2017		
Interest rate swaps	\$156	\$112	\$247	\$320		Interest expense
	156	112	247	320		Income (loss) before income taxes
	—	—	—	—		Provision (benefit) for income taxes
	\$156	\$112	\$247	\$320		Net income (loss)

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net income (loss) from continuing operations by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated based on the combined weighted average number of common shares and potentially dilutive shares, which include the assumed exercise of employee stock options, including market-based performance stock options based on the expected achievement of performance targets, unvested restricted stock awards, unvested restricted stock units and unvested performance stock units, including market-based performance units based on the expected achievement of performance targets. In computing diluted earnings per share, we utilize the treasury stock method.

A summary of the numerator and denominators used in the computation of earnings per share follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Numerator:				
Net income (loss)	\$22,302	\$12,080	\$20,096	\$(41,820)
Denominators:				
Number of shares outstanding, end of period:				
Class A common stock	41,932	41,055	41,932	41,055
Class B common stock	988	988	988	988
Unvested restricted stock	(32)	(82)	(32)	(82)
Effect of weighted average shares outstanding	(109)	(10)	(283)	(178)
Basic weighted average common shares outstanding	42,779	41,951	42,605	41,783
Impact of potentially dilutive securities:				
Dilutive effect of stock options and other stock awards	1,396	1,344	1,333	—
Diluted weighted average common shares outstanding	44,175	43,295	43,938	41,783
Anti-dilutive potentially issuable shares	—	—	2	2,560

11. Other Items and Charges

Expense from Acquisition Activities and Other Items

In the three and nine months ended September 30, 2018, we recorded charges of \$0 and \$211, respectively, associated with the write-off of deferred costs related to the expiration of our shelf registration statement and \$581 and \$719, respectively, associated with acquisition activities.

Contract Settlement Charge

In the three and nine months ended September 30, 2018, we recorded contract settlement charges of \$0 and \$2,100, respectively, associated with the termination and discounted buy-out of a commodities marketing and brokerage agreement.

Southbridge Landfill Closure (Settlement) Charge, Net

In June 2017, we initiated the plan to cease operations of the Southbridge Landfill as disclosed in Note 8, Commitments and Contingencies. Accordingly, in the three and nine months ended September 30, 2018 and 2017, we recorded charges associated with the closure of the Southbridge Landfill as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Asset impairment charge (1)	\$—	\$—	\$—	\$47,999
Project development charge (2)	—	—	—	9,149
Environmental remediation charge (3)	—	—	—	6,379
Charlton settlement charge (4)	—	—	1,216	—
Legal and transaction costs (5)	502	754	1,044	1,341
Recovery on insurance settlement (6)	(10,000)	—	(10,000)	—
Southbridge Landfill closure (settlement) charge, net	\$(9,498)	\$754	\$(7,740)	\$64,868

(1) We performed a test of recoverability under FASB ASC 360, which indicated that the carrying value of our asset group that includes the Southbridge Landfill was no longer recoverable and, as a result, the asset group was assessed for impairment with an impairment charge allocated to the long-lived assets of the Southbridge Landfill in accordance with FASB ASC 360.

- (2) We wrote-off deferred costs associated with Southbridge Landfill permitting activities no longer deemed viable.
- (3) We recorded an environmental remediation charge associated with the future installation of a municipal waterline.
- (4) We established a reserve associated with settlement of the Town of Charlton's claim against us. See Note 8, Commitments and Contingencies for additional disclosure.
- (5) We incurred legal and other transaction costs associated with various matters as part of the Southbridge Landfill closure. See Note 8, Commitments and Contingencies for additional disclosure.
- (6) We recorded a recovery on an environmental insurance settlement associated with the Southbridge Landfill closure. See Note 8, Commitments and Contingencies for additional disclosure.

Development Project Charge

In the three and nine months ended September 30, 2018, we recorded development project charges of \$0 and \$311, respectively, associated with previously deferred costs that were written off as a result of the negative vote in a public referendum relating to the NCES landfill.

12. FAIR VALUE OF FINANCIAL INSTRUMENTS

We use a three-tier fair value hierarchy to classify and disclose all assets and liabilities measured at fair value on a recurring basis, as well as assets and liabilities measured at fair value on a non-recurring basis, in periods subsequent to their initial measurement. These tiers include: Level 1, defined as quoted market prices in active markets for identical assets or liabilities; Level 2, defined as inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; and Level 3, defined as unobservable inputs that are not corroborated by market data.

We use valuation techniques that maximize the use of market prices and observable inputs and minimize the use of unobservable inputs. In measuring the fair value of our financial assets and liabilities, we rely on market data or assumptions that we believe market participants would use in pricing an asset or a liability.

Assets and Liabilities Accounted for at Fair Value

Our financial instruments include cash and cash equivalents, accounts receivable-trade, restricted investment securities held in trust on deposit with various banks as collateral for our obligations relative to our landfill final capping, closure and post-closure costs, interest rate swaps, trade payables and long-term debt. The carrying values of cash and cash equivalents, accounts receivable - trade and trade payables approximate their respective fair values due to their short-term nature. The fair value of restricted investment securities held in trust, which are valued using quoted market prices, are included as restricted assets in the Level 1 tier below. The fair value of the interest rate swaps included in the Level 2 tier below is calculated using discounted cash flow valuation methodologies based upon the one month LIBOR yield curves that are observable at commonly quoted intervals for the full term of the swaps.

Recurring Fair Value Measurements

Summaries of our financial assets and liabilities that are measured at fair value on a recurring basis follow:

	Fair Value Measurement at September 30, 2018 Using:			
	Quoted Prices in			Significant Unobservable Inputs (Level 3)
	Active Markets for Identical Assets (Level 1)	Significant Observable (Level 2)	Other Inputs	
Assets:				
Interest rate swaps	\$—	\$ 2,159	\$	—

Fair Value of Debt

As of September 30, 2018, the fair value of our fixed rate debt, including our FAME Bonds 2005R-3, Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-1 (“FAME Bonds 2015R-1”), FAME Bonds 2015R-2, Vermont Bonds, New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014 (“New York Bonds 2014”), New York State Environmental Facilities Corporation Solid Waste Disposal Revenue Bonds Series 2014R-2 (“New York Bonds 2014R-2”) and Solid Waste Disposal Revenue Bonds Series 2013 issued by the Business Finance Authority of the State of New Hampshire (“New Hampshire Bonds”) was approximately \$122,347 and the carrying value was \$122,000. The fair value of the FAME Bonds 2005R-3, the FAME Bonds 2015R-1, the FAME Bonds 2015R-2, the Vermont Bonds, the New York Bonds 2014, the New York Bonds 2014R-2 and the New Hampshire Bonds is considered to be Level 2 within the fair value hierarchy as the fair value is determined using market approach pricing provided by a third-party that utilizes pricing models and pricing systems, mathematical tools and judgment to determine the evaluated price for the security based on the market information of each of the bonds or securities with similar characteristics.

As of September 30, 2018, the carrying value of our Term Loan Facility was \$350,000 and the carrying value of our Revolving Credit Facility was \$44,800. Their fair values are based on current borrowing rates for similar types of borrowing arrangements, or Level 2 inputs, and approximate their carrying values.

Although we have determined the estimated fair value amounts of FAME Bonds 2005R-3, FAME Bonds 2015R-1, FAME Bonds 2015R-2, Vermont Bonds, New York Bonds 2014, New York Bonds 2014R-2 and New Hampshire Bonds using available market information and commonly accepted valuation methodologies, a change in available market information, and/or the use of different assumptions and/or estimation methodologies could have a material effect on the estimated fair values. These amounts have not been revalued, and current estimates of fair value could differ significantly from the amounts presented.

13. INCOME TAXES

During the nine months ended September 30, 2018, we recognized a \$(1,230) deferred tax benefit due to a reduction of the valuation allowance. In determining the need for a valuation allowance, we have assessed the available means of recovering deferred tax assets, including the existence of reversing temporary differences. The valuation allowance decreased due to the recognition of additional reversing temporary differences from the \$1,230 deferred tax liability recorded through goodwill related to the Complete acquisition. The \$1,230 deferred tax liability related to the Complete acquisition was based on the impact of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and such amounts recognized for income tax purposes. The valuation allowance was reduced by \$(1,635) in the quarter ended March 31, 2018, with the offsetting increase in the Complete

goodwill, based on initial estimates of the Complete temporary differences. The valuation allowance was increased by \$406 in the three months ended September 30, 2018, with an offsetting decrease in the Complete goodwill, based on the availability of better estimates of the Complete temporary differences upon the filing of the prior year returns by Complete's sellers in the three months ended September 30, 2018.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act") was enacted. The Act, which is also commonly referred to as "US tax reform," significantly changes US corporate income tax laws by, among other things, reducing the US corporate income tax rate from 35% to 21% starting in 2018. Under the Act, the alternative minimum tax has been repealed and minimum tax credit carryforwards become refundable beginning in 2018 and will be fully refunded, if not otherwise used to offset tax liabilities, in tax year 2021. Further, our \$101,200 in federal net operating loss carryforwards generated as of the end of 2017 continue to be carried forward for 20 years and are expected to be available to fully offset taxable income earned in 2018 and future tax years. Federal net operating losses generated after 2017 will be carried forward indefinitely, but generally may only

offset up to 80% of taxable income earned in a tax year. In the quarter ended December 31, 2017, we revalued our deferred tax assets and liabilities for changes under the Act including (a) revaluing our federal net deferred taxes assets before valuation allowance using the 21% tax rate; (b) revaluing our federal valuation allowance using the 21% tax rate; and (c) recognizing a federal deferred tax benefit for 80% of indefinite lived deferred tax liabilities, which are anticipated to be available as a source of taxable income upon reversal of deferred tax assets that would also have indefinite lives.

The benefit for income taxes for the three and nine months ended September 30, 2018 incorporates the changes under the Act, including use of the 21% US corporate income tax rate and applying the new federal net operating loss carryforward rules. We have \$3,804 minimum tax credit carryforwards of which we anticipate \$1,902 is refundable for 2018. Current income tax benefits of \$475 and \$1,426 in the three and nine months ended September 30, 2018, respectively, offset by \$475 and \$1,426 deferred tax provisions in the three and nine months ended September 30, 2018, respectively, were recognized for a portion of the minimum tax credit carryforward refundable for 2018.

14. SEGMENT REPORTING

We report selected information about operating segments in a manner consistent with that used for internal management reporting. We classify our solid waste operations on a geographic basis through regional operating segments, our Western and Eastern regions. Revenues associated with our solid waste operations are derived mainly from solid waste collection and disposal, landfill, landfill gas-to-energy, transfer and recycling services in the northeastern United States. Our revenues in the Recycling segment are derived from municipalities and customers in the form of processing fees, tipping fees and commodity sales. Organics services, ancillary operations, major account and industrial services, discontinued operations, and earnings from equity method investees, as applicable, are included in our Other segment.

Three Months Ended September 30, 2018

Segment	Outside revenues	Inter-company revenue	Depreciation and amortization	Operating income (loss)	Total assets
Eastern	\$56,006	\$ 14,557	\$ 7,267	\$ 15,370	\$180,896

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our unaudited consolidated financial statements and notes thereto included under Item 1. In addition, reference should be made to our audited consolidated financial statements and notes thereto and related Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017 filed with the Securities and Exchange Commission ("SEC") on March 2, 2018.

This Quarterly Report on Form 10-Q and, in particular, this Management's Discussion and Analysis of Financial Condition and Results of Operations, may contain or incorporate a number of forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Exchange Act of 1934, as amended, including:

- the projected development of additional disposal capacity or expectations regarding permits for existing capacity;
- the outcome of any legal or regulatory matter;
- expected liquidity and financing plans;
- expected future revenues, operations, expenditures and cash needs;
- fluctuations in or the level of commodity pricing of our recyclables, increases in landfill tipping fees and fuel costs and general economic and weather conditions;
- projected future obligations related to final capping, closure and post-closure costs of our existing landfills and any disposal facilities which we may own or operate in the future;
- our ability to use our net operating losses and tax positions;
- our ability to service our debt obligations;
- the recoverability or impairment of any of our assets or goodwill;
- estimates of the potential markets for our products and services, including the anticipated drivers for future growth;
- sales and marketing plans or price and volume assumptions;
- potential business combinations or divestitures; and
- projected improvements to our infrastructure and the impact of such improvements on our business and operations.

In addition, any statements contained in or incorporated by reference into this report that are not statements of historical fact should be considered forward-looking statements. You can identify these forward-looking statements by the use of the words "believes", "expects", "anticipates", "plans", "may", "will", "would", "intends", "estimates" and other similar expressions, whether in the negative or affirmative. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industry and markets in which we operate, as well as management's beliefs and assumptions, and should be read in conjunction with our consolidated financial statements and notes thereto. These forward-looking statements are not guarantees of future performance, circumstances or events. The occurrence of the events described and the achievement of the expected results depends on many events, some or all of which are not predictable or within our control. Actual results may differ materially from those set forth in the forward-looking statements.

There are a number of important risks and uncertainties that could cause our actual results to differ materially from those indicated by such forward-looking statements. These risks and uncertainties include, without limitation, those detailed in Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017 and, if applicable, those included under Part II, Item 1A of this Quarterly Report on Form 10-Q.

There may be additional risks that we are not presently aware of or that we currently believe are immaterial, which could have an adverse impact on our business. We explicitly disclaim any obligation to update any forward-looking statements whether as a result of new information, future events or otherwise, except as otherwise required by law.

Company Overview

Founded in 1975 with a single truck, Casella Waste Systems, Inc., a Delaware corporation, its wholly-owned subsidiaries and certain partially owned entities over which it has a controlling financial interest (collectively, “we”, “us” or “our”), is a regional, vertically-integrated solid waste services company. We provide resource management expertise and services to residential, commercial, municipal and industrial customers, primarily in the areas of solid waste collection and disposal, transfer, recycling and organics services. We provide integrated solid waste services in six states: Vermont, New Hampshire, New York, Massachusetts, Maine and Pennsylvania, with our headquarters located in Rutland, Vermont. We manage our solid waste operations on a geographic basis through two regional operating segments, the Eastern and Western regions, each of which provides a full range of solid waste services, and our larger-scale recycling and commodity brokerage operations through our Recycling segment. Organics services, ancillary operations, major account and industrial services, discontinued operations, and earnings from equity method investees, as applicable, are included in our Other segment.

As of October 15, 2018, we owned and/or operated 33 solid waste collection operations, 48 transfer stations, 18 recycling facilities, nine Subtitle D landfills, four landfill gas-to-energy facilities and one landfill permitted to accept construction and demolition (“C&D”) materials.

Results of Operations

Revenues

We manage our solid waste operations, which include a full range of solid waste services, on a geographic basis through two regional operating segments, which we designate as the Eastern and Western regions. Revenues in our Eastern and Western regions consist primarily of fees charged to customers for solid waste collection and disposal, landfill, landfill gas-to-energy, transfer and recycling services. We derive a substantial portion of our collection revenues from commercial, industrial and municipal services that are generally performed under service agreements or pursuant to contracts with municipalities. The majority of our residential collection services are performed on a subscription basis with individual households. Landfill and transfer customers are charged a tipping fee on a per ton basis for disposing of their solid waste at our disposal facilities and transfer stations. We also generate and sell electricity at certain of our landfill facilities. Revenues from our Recycling segment consist of revenues derived from municipalities and customers in the form of processing fees, tipping fees and commodity sales. Revenues from organics services, ancillary operations, and major account and industrial services are included in our Other segment. Our revenues are shown net of inter-company eliminations.

A summary of revenues attributable to service provided (dollars in millions and as a percentage of total revenues) follows:

	Three Months Ended September						Nine Months Ended September					
	30, 2018		2017		\$ Change		30, 2018		2017		\$ Change	
Collection	\$79.6	46.1 %	\$70.0	43.7 %	\$9.6	\$220.7	45.4 %	\$196.2	43.8 %	\$24.5		
Disposal	48.7	28.2 %	44.9	28.0 %	3.8	136.2	28.0 %	118.3	26.4 %	17.9		
Power	0.9	0.5 %	1.2	0.8 %	(0.3)	4.0	0.8 %	4.1	0.9 %	(0.1)		
Processing	2.1	1.2 %	2.5	1.5 %	(0.4)	5.8	1.3 %	6.3	1.4 %	(0.5)

Organics	13.4	7.8 %	9.7	6.1 %	3.7	40.3	8.3 %	29.9	6.7 %	10.4		
Customer solutions	17.2	9.9 %	15.6	9.7 %	1.6	48.3	9.9 %	44.1	9.8 %	4.2		
Recycling	10.9	6.3 %	16.4	10.2 %	(5.5)	30.6	6.3 %	49.2	11.0 %	(18.6)		
Total revenues	\$172.8	100.0 %	\$160.3	100.0 %	\$12.5	\$485.9	100.0 %	\$448.1	100.0 %	\$37.8		

A summary of the period-to-period changes in solid waste revenues (dollars in millions and as a percentage of solid waste revenues) follows:

	Period-to-Period Change for the Three Months Ended September 30, 2018 vs. 2017			Period-to-Period Change for the Nine Months Ended September 30, 2018 vs. 2017		
	Amount	% of Growth		Amount	% of Growth	
Price	\$ 5.6	4.8 %		\$ 14.5	4.5 %	
Volume	(1.2)	(1.0)%		6.6	2.1 %	
Surcharges and other fees	2.4	2.0 %		5.7	1.7 %	
Commodity price and volume	(0.6)	(0.5)%		(0.4)	(0.1)%	
Acquisitions	6.5	5.4 %		15.4	4.7 %	
Solid waste revenues	\$ 12.7	10.7 %		\$ 41.8	12.9 %	

Price.

The price change component in quarterly solid waste revenues growth is the result of the following:

\$4.0 million from favorable collection pricing; and

\$1.6 million from favorable disposal pricing associated primarily with our landfills and transfer stations.

The price change component in year-to-date solid waste revenues growth is the result of the following:

\$10.1 million from favorable collection pricing; and

\$4.4 million from favorable disposal pricing associated primarily with our landfills and transfer stations.

Volume.

The volume change component in quarterly solid waste revenues growth is the result of the following:

\$(0.8) million from lower disposal volumes (of which \$(0.9) million relates to lower transfer station volumes

associated primarily with the temporary interruption of business due to a fire at one of our transfer stations, \$(0.8) million relates to lower transportation volumes and \$0.9 million relates to higher landfill volumes);

\$(0.3) million from lower collection volumes; and

\$(0.1) million from lower processing volumes.

The volume change component in year-to-date solid waste revenues growth is the result of the following:

\$6.2 million from higher disposal volumes (of which \$3.4 million relates to higher transportation volumes associated with a large contaminated soil project in the first and second quarters, \$2.9 million relates to higher landfill volumes

and \$(0.1) million relates to lower transfer station volumes associated primarily with the temporary interruption of business due to a fire at one of our transfer stations in the quarter, which more than offset higher volumes in the first and second quarters); and

\$0.6 million from higher collection volumes; partially offset by

\$(0.2) million from lower processing volumes.

Surcharges and other fees.

The surcharges and other fees change component in quarterly and year-to-date solid waste revenues growth is the result of the following:

\$2.4 million and \$5.7 million associated primarily with the Energy component of the Energy and Environmental fee and the portion of the Sustainability Recycling Adjustment fee, respectively, that has anniversary. The Energy component of the fee floats on a monthly basis based on diesel fuel prices. The Energy component of the fee

increased due to higher

diesel fuel pricing. The Sustainability Recycling Adjustment fee floats on a monthly basis based on recycled commodity prices.

Commodity price and volume.

The commodity price and volume change component in quarterly solid waste revenues growth is the result of the following:

• \$(0.7) million from unfavorable energy pricing and, to a lesser extent, unfavorable commodity pricing; partially offset by

• \$0.1 million from higher commodity volumes due to higher landfill gas-to-energy volumes more than offsetting lower commodity processing volumes.

The commodity price and volume change component in year-to-date solid waste revenues growth is the result of the following:

• \$(0.4) million from lower commodity processing volumes and, to a lesser extent, lower landfill gas-to-energy volumes.

Acquisitions.

The acquisitions change component in quarterly and year-to-date solid waste revenues growth is primarily the result of the acquisition of a solid waste collection, transfer and processing business in our Eastern region, Complete Disposal Company, Inc. and its subsidiary United Material Management of Holyoke, Inc. (collectively, "Complete"), in the quarter ended March 31, 2018, and the acquisition of two solid waste collection businesses, including a transfer station in our Western region, in the three months ended September 30, 2018. It is also impacted by the acquisition of a tuck-in collection business in the quarter ended March 31, 2018 and four solid waste collection businesses from March 2017 through December 2017.

Organics revenues

Quarterly organics revenues increased \$3.7 million as a result of higher commodity volumes, primarily driven by a new sludge transportation and disposal contract.

Year-to-date organics revenues increased \$10.4 million as a result of higher commodity volumes, primarily driven by a new sludge transportation and disposal contract, and higher commodity pricing in the quarter ended June 30, 2018.

Customer Solutions revenues

Quarterly and year-to-date customer solutions revenues increased \$1.6 million and \$4.2 million, respectively, as the result of higher volumes.

Recycling revenues

Quarterly recycling revenues decreased as a result of the following:

• \$(6.7) million from unfavorable commodity pricing in the marketplace; and

• \$(2.3) million from lower commodity volumes; partially offset by

- \$3.5 million from higher tipping fees.

Year-to-date recycling revenues decreased as a result of the following:

• \$(21.2) million from unfavorable commodity pricing in the marketplace;

• \$(6.6) million from lower commodity volumes; partially offset by

- \$9.2 million from higher tipping fees.

Operating Expenses

A summary of cost of operations, general and administration expense, and depreciation and amortization expense (dollars in millions and as a percentage of total revenues) is as follows:

	Three Months Ended				\$	Nine Months Ended				\$
	September 30,					September 30,				
	2018	2017				2018	2017			Change
Cost of operations	\$114.1	66.0%	\$103.9	64.8%	\$ 10.2	\$331.5	68.2%	\$301.0	67.2%	\$ 30.5
General and administration	\$20.5	11.9%	\$20.8	12.9%	\$(0.3)	\$62.4	12.8%	\$58.4	13.0%	\$ 4.0
Depreciation and amortization	\$18.2	10.5%	\$16.6	10.4%	\$ 1.6	\$51.6	10.6%	\$46.3	10.3%	\$ 5.3

Cost of Operations

Cost of operations includes labor costs, tipping fees paid to third-party disposal facilities, fuel costs, maintenance and repair costs of vehicles and equipment, workers' compensation and vehicle insurance costs, third-party transportation costs, district and state taxes, host community fees, and royalties. Cost of operations also includes accretion expense related to final capping, closure and post-closure obligations, leachate treatment and disposal costs, and depletion of landfill operating lease obligations.

The period-to-period changes in cost of operations can be primarily attributed to the following:

Third-party direct costs increased \$3.5 million quarterly and \$12.2 million year-to-date due to the following: higher hauling and third-party transportation costs associated with: higher quarterly collection volumes related to acquisition activity in the Western region; a large contaminated soil project in the Western region resulting in higher third-party costs for processing and transportation of soils in the first and second quarters; higher collection volumes related to organic growth and acquisition activity in the Eastern region; higher brokerage volumes in our Customer Solutions line-of-business with high pass through direct costs; and higher volumes being directed to third-party sites driven by a large new sludge transportation and disposal contract in our Organics line-of-business; and higher disposal costs associated with: higher year-to-date transportation volumes; increased third-party disposal pricing in the Western region; the Complete acquisition in the Eastern region; the reduction of contamination in the Recycling segment resulting in higher residual waste volumes; and the use of alternative third-party disposal sites in our Organics line-of-business; partially offset by

lower purchased material costs in our Recycling and Customer Solutions lines-of-business.

Labor and related benefit costs increased \$1.5 million quarterly and \$5.9 million year-to-date due to the following:

- higher labor costs related primarily to acquisition activity and higher collection volumes in the Eastern region;
- higher labor costs related primarily to acquisition activity and higher wages in the Western region;
- higher labor costs year-to-date as we slowed processing lines and added labor in an effort to improve product quality and reduce contamination in finished products in our Recycling line-of-business; and
- higher workers compensation insurance costs year-to-date based on claims activity.

Direct operational costs increased \$2.7 million quarterly and \$6.1 million year-to-date due to the following:

- higher host community fees associated with increased volumes at certain landfills in the Eastern and Western regions;
- higher accretion expense associated with the acceleration of asset retirement obligations due to the closure of the landfill located in Southbridge, Massachusetts ("Southbridge Landfill") in the Eastern region;
- higher landfill operating lease amortization associated primarily with increased landfill volumes at certain landfills in the Eastern and Western regions;
- higher landfill operating costs at certain landfills in the Eastern and Western regions; and
- higher supplies and consumables cost in our Organics and Recycling lines-of-business.

Fuel costs increased \$0.8 million quarterly and \$2.4 million year-to-date due to the higher diesel fuel pricing in the marketplace combined with higher volumes primarily associated with acquisition activity. The impact of higher fuel costs in the periods was

almost completely offset through higher revenues from fees associated with the Energy component of the Energy and Environmental fee.

Maintenance and repair costs increased \$1.6 million quarterly and \$4.1 million year-to-date due primarily to higher fleet and facility maintenance costs due to acquisition activity and new business growth.

General and Administration

General and administration expense includes management, clerical and administrative compensation, bad debt expense, as well as overhead costs, professional service fees and costs associated with marketing, sales force and community relations efforts.

The period-to-period changes in general and administration expense can be primarily attributed to the following: Labor and related benefit costs decreased \$(0.9) million quarterly and increased \$1.5 million year-to-date primarily due to lower accrued incentive compensation, being more than offset on a year-to-date basis by higher wages, increased costs on changes in our organizational structure, and higher equity compensation expense associated with stock unit grants that vest based on estimated future operational performance.

Professional fees increased \$0.5 million quarterly due to higher legal fees associated with various legal proceedings, as discussed in Note 8, Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q, and \$1.2 million year-to-date due to higher consulting, accounting and audit fees associated with the implementation of an enterprise resource planning and accounting software solution and the adoption of new accounting guidance.

Bad debt expense increased \$0.3 million quarterly and \$1.1 million year-to-date due primarily to the impact of revenue growth, a large recovery in the prior year and several customer bankruptcies.

Depreciation and Amortization

Depreciation and amortization expense includes: (i) depreciation of property and equipment (including assets recorded for capital leases) on a straight-line basis over the estimated useful lives of the assets; (ii) amortization of landfill costs (including those costs incurred and all estimated future costs for landfill development and construction, along with asset retirement costs arising from closure and post-closure obligations) on a units-of-consumption method as landfill airspace is consumed over the total estimated remaining capacity of a site, which includes both permitted capacity and unpermitted expansion capacity that meets certain criteria for amortization purposes; (iii) amortization of landfill asset retirement costs arising from final capping obligations on a units-of-consumption method as airspace is consumed over the estimated capacity associated with each final capping event; and (iv) amortization of intangible assets with a definite life, using either an economic benefit provided approach or on a straight-line basis over the definitive terms of the related agreements.

A summary of the components of depreciation and amortization expense (dollars in millions and as a percentage of total revenues) follows:

	Three Months Ended						Nine Months Ended					
	September 30, 2018		September 30, 2017		\$ Change	September 30, 2018		September 30, 2017		\$ Change		
Depreciation	\$8.6	5.0 %	\$8.0	5.0 %		\$ 0.6	\$25.4	5.2 %	\$24.1		5.4 %	\$ 1.3
Landfill amortization	8.9	5.2 %	8.1	5.0 %	0.8	24.4	5.0 %	20.6	4.6 %	3.8		
Other amortization	0.7	0.4 %	0.5	0.3 %	0.2	1.8	0.4 %	1.6	0.4 %	0.2		
	\$18.2	10.6 %	\$16.6	10.3 %	\$ 1.6	\$51.6	10.6 %	\$46.3	10.4 %	\$ 5.3		

The period-to-period changes in depreciation and amortization expense can be primarily attributed to acquisition activity and higher landfill volumes at certain landfills in the Eastern and Western regions, combined with an increase in our average overall amortization rate as a result of changes in cost estimates and other assumptions associated with our landfills.

Expense from Acquisition Activities and Other Items

In the three and nine months ended September 30, 2018, we recorded charges of \$0.0 million and \$0.2 million, respectively, associated with the write-off of deferred costs related to the expiration of our shelf registration statement and \$0.6 million and \$0.7 million, respectively, associated with acquisition activities.

Contract Settlement Charge

In the three and nine months ended September 30, 2018, we recorded contract settlement charges of \$0.0 million and \$2.1 million, respectively, associated with the termination and discounted buy-out of a commodities marketing and brokerage agreement.

Southbridge Landfill Closure Charge

In June 2017, we initiated the plan to cease operations of the Southbridge Landfill in the Eastern region as discussed in Note 8, Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q. Accordingly, we recorded charges associated with the closure of the Southbridge Landfill as follows (dollars in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Asset impairment charge (1)	\$—	\$—	\$—	\$48.0
Project development charge (2)	—	—	—	9.2
Environmental remediation charge (3)	—	—	—	6.4
Charlton settlement charge (4)	—	—	1.2	—
Legal and transaction costs (5)	0.5	0.8	1.0	1.3
Recovery on insurance settlement (6)	(10.0)	—	(10.0)	—
Southbridge Landfill closure (settlement) charge, net	\$(9.5)	\$0.8	\$(7.8)	\$64.9

We performed a test of recoverability under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 360, which indicated that the carrying value of our asset group that includes the (1) Southbridge Landfill was no longer recoverable and, as a result, the asset group was assessed for impairment with an impairment charge allocated to the long-lived assets of the Southbridge Landfill in accordance with FASB ASC 360.

(2) We wrote-off deferred costs associated with Southbridge Landfill permitting activities no longer deemed viable.

(3) We recorded an environmental remediation charge associated with the future installation of a municipal waterline.

We established a reserve associated with settlement of the Town of Charlton's claim against us. See Note 8,

(4) Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q for additional disclosure.

We incurred legal and other transaction costs associated with various matters as part of the Southbridge Landfill

(5) closure. See Note 8, Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q for additional disclosure.

We recorded a recovery on an environmental insurance settlement associated with the Southbridge Landfill

(6) closure. See Note 8, Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q for additional disclosure.

Development Project Charge

In the three and nine months ended September 30, 2018, we recorded a development project charge of \$0.0 million and \$0.3 million, respectively, associated with previously deferred costs that were written off as a result of the negative vote in a public referendum relating to our North Country Environmental Services landfill in the Eastern region.

Other Expenses

Loss on Debt Extinguishment

We recorded losses on debt extinguishment of \$0.0 million and \$7.4 million during the three and nine months ended September 30, 2018, respectively, as compared to \$0.0 million and \$0.5 million during the three and nine months ended September 30, 2017, respectively, associated with the following:

-

the write-off of debt issuance costs and unamortized discount in connection with the refinancing of our term loan facility ("Term Loan Facility") and revolving line of credit facility ("Revolving Credit Facility" and, together with the Term Loan Facility, the "Credit Facility") in the quarter ended June 30, 2018;

35

the write-off of debt issuance costs in connection with the remarketing of our Vermont Economic Development Authority Solid Waste Disposal Revenue Bonds Series 2013 ("Vermont Bonds") in the quarter ended June 30, 2018; the write-off of debt issuance costs in connection with the amendment and repricing of our term loan B facility ("Term Loan B Facility") in the quarter ended June 30, 2017; and the write-off of debt issuance costs in connection with the remarketing of the Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-1 ("FAME Bonds 2005R-1") and the Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-2 ("FAME Bonds 2005R-2") into the Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2005R-3 ("FAME Bonds 2005R-3") in the quarter ended March 31, 2017.

Provision (Benefit) for Income Taxes

Our provision (benefit) for income taxes increased \$0.2 million and decreased \$1.8 million during the three and nine months ended September 30, 2018, respectively, as compared to the same periods in the prior year. During the nine months ended September 30, 2018, we recognized a \$(1.2) million deferred tax benefit due to a reduction of the valuation allowance, including a \$(1.6) million deferred tax benefit in the quarter ended March 31, 2018 and a \$0.4 million deferred tax expense in the quarter ended September 30, 2018. The valuation allowance decreased based upon the recognition of additional reversing temporary differences related to the \$1.2 million deferred tax liability recorded through goodwill related to the Complete acquisition. The \$1.2 million deferred tax liability related to the Complete acquisition was based on the impact of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and the related tax basis. The \$(1.6) million deferred tax benefit recognized in the quarter ended March 31, 2018 was based on initial estimates of the Complete temporary differences and was adjusted by \$0.4 million in the three months ended September 30, 2018 based on the availability of better estimates of the Complete temporary differences upon the filing of the prior year returns by Complete's sellers in the three months ended September 30, 2018.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act") was enacted. The Act, which is also commonly referred to as "US tax reform," significantly changes US corporate income tax laws by, among other things, reducing the US corporate income tax rate from 35% to 21% starting in 2018. Under the Act, the alternative minimum tax has been repealed and minimum tax credit carryforwards become refundable beginning in 2018 and will be fully refunded, if not otherwise used to offset tax liabilities, in tax year 2021. Further, our \$101.2 million in federal net operating loss carryforwards generated as of the end of 2017 continue to be carried forward for 20 years and are expected to be available to fully offset taxable income earned in 2018 and future tax years. Federal net operating losses generated after 2017 will be carried forward indefinitely, but generally may only offset up to 80% of taxable income earned in a tax year. In the quarter ended December 31, 2017, we revalued our deferred tax assets and liabilities for changes under the Act including (a) revaluing our federal net deferred taxes assets before valuation allowance using the 21% tax rate; (b) revaluing our federal valuation allowance using the 21% tax rate; and (c) recognizing a federal deferred tax benefit for 80% of indefinite lived deferred tax liabilities, which are anticipated to be available as a source of taxable income upon reversal of deferred tax assets that would also have indefinite lives.

The benefit for income taxes for the three and nine months ended September 30, 2018 incorporates the changes under the Act, including use of the 21% US corporate income tax rate and applying the new federal net operating loss carryforward rules. We have \$3.8 million minimum tax credit carryforwards of which we anticipate \$1.9 million is refundable for 2018. Current income tax benefits of \$0.5 million and \$1.4 million in the three and nine months ended September 30, 2018, respectively, offset by \$0.5 million and \$1.4 million deferred tax provisions in the three and nine months ended September 30, 2018, respectively, were recognized for a portion of the minimum tax credit carryforward refundable for 2018.

The provision for income taxes for the nine months ended September 30, 2017 includes \$0.4 million of deferred tax provision primarily due to an increase in the deferred tax liability for indefinite lived assets, offset by a benefit for additional minimum tax credit carryforward with no expiration and no valuation allowance. Since we cannot determine when the deferred tax liability related to indefinite lived assets will reverse, applying provisions prior to the Act, none of the deferred tax provision related to indefinite lived assets could be used as a future source of taxable income against which to benefit deferred tax assets.

Segment Reporting

Revenues

A summary of revenues by operating segment (in millions) follows:

	Three Months		\$	Nine Months		\$
	Ended	September 30, 2017		Ended	September 30, 2018	
Eastern	\$56.0	\$49.1	\$ 6.9	\$154.1	\$134.3	\$ 19.8
Western	74.4	68.0	6.4	210.2	186.5	23.7
Recycling	10.9	16.4	(5.5)	30.6	49.2	(18.6)
Other	31.5	26.8	4.7	91.0	78.1	12.9
Total revenues	\$172.8	\$160.3	\$ 12.5	\$485.9	\$448.1	\$ 37.8

Eastern Region

A summary of the period-to-period changes in solid waste revenues (dollars in millions) follows:

	Period-to-Period			Period-to-Period		
	Change for the	Three Months	Ended	Change for the	Nine Months	Ended
	September 30,	2018 vs. 2017	Amount	September 30,	2018 vs. 2017	Amount
		% of	Growth		% of	Growth
Price	\$ 2.3	4.7 %		\$ 6.0	4.5 %	
Volume	(0.1)	(0.2)%		0.3	0.1 %	
Surcharges and other fees	1.0	2.0 %		2.3	1.7 %	
Commodity price and volume	—	— %		0.1	0.1 %	
Acquisitions	3.7	7.6 %		11.1	8.3 %	
Solid waste revenues	\$ 6.9	14.1 %		\$ 19.8	14.7 %	

Price.

The price change component in quarterly solid waste revenues growth is the result of the following:

\$1.7 million from favorable collection pricing; and

\$0.6 million from favorable disposal pricing related to transfer stations and landfills.

The price change component in year-to-date solid waste revenues growth is the result of the following:

\$4.4 million from favorable collection pricing; and

\$1.6 million from favorable disposal pricing related to transfer stations and landfills.

Volume.

The volume change component in quarterly solid waste revenues growth is the result of the following:

\$(0.2) million from lower disposal volumes related to transfer stations, partially mitigated by higher volumes related to landfills; and

\$(0.1) million from lower processing volumes; partially offset by

\$0.2 million from higher collection volumes.

The volume change component in year-to-date solid waste revenues growth is the result of the following:

\$1.5 million from higher collection volumes; partially offset by

\$(0.3) million from lower processing volumes; and

\$(0.9) million from lower disposal volumes related to landfills and transfer stations.

Surcharges and other fees.

The surcharge and other fees change component in quarterly and year-to-date solid waste revenues growth of \$1.0 million and \$2.3 million is associated primarily with the Energy component of the Energy and Environmental fee and the portion of the Sustainability Recycling Adjustment fee that has anniversaried.

Acquisitions.

The acquisitions change component in quarterly and year-to-date solid waste revenues growth is primarily the result of the Complete acquisition in the quarter ended March 31, 2018. It was also impacted by the acquisition of a solid waste collection business in June 2017.

Western Region

A summary of the period-to-period changes in solid waste revenues (dollars in millions) follows:

	Period-to-Period		Period-to-Period	
	Change for the		Change for the	
	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,	
	2018 vs. 2017		2018 vs. 2017	
	Amount	% of	Amount	% of
		Growth		Growth
Price	\$ 3.3	4.8 %	\$ 8.3	4.5 %
Volume	(0.5)	(0.5)%	8.1	4.3 %
Surcharges and other fees	1.5	2.1 %	3.4	1.8 %
Commodity price and volume	(0.6)	(0.9)%	(0.4)	(0.2)%
Acquisitions	2.7	4.0 %	4.3	2.3 %
Solid waste revenues	\$ 6.4	9.5 %	\$ 23.7	12.7 %

Price.

The price change component in quarterly solid waste revenues growth is the result of the following:

\$2.3 million from favorable collection pricing; and

\$1.0 million from favorable disposal pricing related to landfills and transfer stations.

The price change component in year-to-date solid waste revenues growth is the result of the following:

\$5.7 million from favorable collection pricing; and

\$2.6 million from favorable disposal pricing related to landfills and transfer stations.

Volume.

The volume change component in quarterly solid waste revenues growth is the result of the following:

\$(0.6) million from lower collection volumes; partially offset by

\$0.1 million from higher disposal volumes related to landfills, partially offset by lower transfer station volumes associated with the temporary interruption of business due to a fire at one of our transfer stations.

The volume change component in year-to-date solid waste revenues growth is the result of the following:

\$8.9 million from higher disposal volumes related to transportation, landfills and transfer stations, despite the impact of lower transfer station volumes associated with the temporary interruption of business due to a fire at one of our transfer stations in the quarter; and

\$0.1 million from higher processing volumes; partially offset by

\$(0.9) million from lower collection volumes.

Surcharges and other fees.

The surcharge and other fees change component in quarterly and year-to-date solid waste revenues growth of \$1.5 million and \$3.4 million is associated primarily with the Energy component of the Energy and Environmental fee and the portion of the Sustainability Recycling Adjustment fee that has anniversaried.

Commodity price and volume.

The commodity price and volume change component in quarterly solid waste revenues growth of \$(0.6) million is the result of unfavorable energy pricing and, to a lesser extent, unfavorable commodity pricing, and lower commodity processing volumes; partially offset by higher landfill gas-to-energy volumes.

The commodity price and volume change component in year-to-date solid waste revenues growth of \$(0.4) million is the result of lower landfill gas-to-energy and commodity processing volumes.

Acquisitions.

The acquisitions change component in quarterly and year-to-date solid waste revenues growth is the result of the acquisition of two solid waste collection businesses, including a transfer station, in the three months ended September 30, 2018. It is also impacted by the acquisition of a tuck-in collection business in the quarter ended March 31, 2018 and three solid waste collection businesses from March 2017 through December 2017.

Operating Income (Loss)

A summary of operating income (loss) by operating segment (in millions) follows:

Segment	Three Months Ended September 30,		Nine Months Ended September 30,			
	2018	2017	\$ Change	2018	2017	\$ Change
Eastern	\$15.4	\$5.9	\$9.5	\$17.8	\$(54.4)	\$72.2
Western	14.1	11.6	2.5	33.3	26.4	6.9
Recycling	(0.5)	0.6	(1.1)	(7.9)	3.3	(11.2)
Other	(0.1)	0.2	(0.3)	1.7	2.3	(0.6)
Operating income (loss)	\$28.9	\$18.3	\$10.6	\$44.9	\$(22.4)	\$67.3

Eastern Region

Operating results increased \$9.5 million quarterly and \$72.2 million year-to-date. Excluding the impact of the Southbridge Landfill closure (settlement) charge, net, the development project charge and the expense from acquisition activities and other items, our operating performance in the three and nine month periods ended September 30, 2018 improved year-to-date and declined slightly quarterly as the result of revenue growth and the following cost changes:

Cost of operations: Cost of operations increased \$6.6 million quarterly and \$19.5 million year-to-date due to the following:

- higher hauling and third-party transportation costs associated with higher collection volumes related to organic growth and acquisition activity;

- higher disposal costs associated with the Complete acquisition;

- higher labor costs associated with acquisitions and higher collection volumes;

- higher workers compensation costs based on claims activity;

- higher fuel costs driven by higher diesel fuel pricing, which was offset by increased revenues from fees associated with the Energy and Environmental fee, combined with higher volumes;

- higher host community fees and landfill operating lease amortization associated with increased landfill volumes at certain landfills;

- higher accretion expense associated with the acceleration of asset retirement obligations due to the closure of the Southbridge Landfill;

- higher landfill operating costs at the Southbridge Landfill; and

higher fleet and facility maintenance costs.

General and administration: General and administration expense decreased \$(0.2) million quarterly due to lower shared quarterly overhead costs associated with a decrease in accrued incentive compensation and increased \$1.1 million year-to-date due to higher shared overhead costs associated with higher equity compensation expense.

Depreciation and amortization: Depreciation and amortization expense increased \$1.1 million quarterly and \$2.4 million year-to-date due primarily due to acquisition activity and higher landfill amortization expense associated with volume mix and changes to landfill amortization rates as a result of changes in cost estimates and other assumptions with certain of our landfills.

Western Region

Operating income increased \$2.5 million quarterly and \$6.9 million year-to-date. Excluding the impact of the expense from acquisition activities and other items, our operating performance in the three and nine months ended September 30, 2018 improved as revenue growth outweighed the following cost changes:

Cost of operations: Cost of operations increased \$4.9 million quarterly and \$17.8 million year-to-date due to the following:

higher hauling and third-party transportation costs associated with higher quarterly collection volumes related to acquisition activity and a large contaminated soils project resulting in higher third-party costs for processing and transportation of soils in the first and second quarters;

higher disposal costs associated with higher year-to-date transportation volumes and increased third-party disposal pricing;

higher labor costs related primarily to acquisition activity and higher wages;

higher year-to-date workers compensation costs based on claims activity;

higher fuel costs driven by higher diesel fuel pricing, which was offset by increased revenues from fees associated with the Energy and Environmental fee;

higher landfill operating lease amortization associated primarily with increased landfill volumes;

higher landfill operating costs at certain landfills;

higher host community fees associated with increased volumes at certain landfills; and

higher fleet maintenance costs.

General and administration: General and administration expense decreased \$(0.1) million quarterly due to lower shared quarterly overhead costs associated with a decrease in accrued incentive compensation and increased \$2.6 million year-to-date due to higher bad debt expense and an increase in shared overhead costs associated with higher equity compensation expense.

Depreciation and amortization: Depreciation and amortization expense increased \$0.2 million quarterly and \$2.4 million year-to-date due to acquisition activity and higher landfill amortization expense attributed to higher landfill volumes and changes to landfill amortization rates as a result of changes in cost estimates and other assumptions with certain of our landfills.

Recycling

Operating results decreased \$(1.1) million quarterly and \$(11.2) million year-to-date. Excluding the impact of the contract settlement charge, our operating performance in the three and nine months ended September 30, 2018 declined due primarily to a decline in revenues and higher operating costs, partially offset by lower purchased material costs, associated with: slower processing speeds and added labor in an effort to meet tighter quality standards and reduce contamination; higher disposal costs as we pulled higher rates of residue out of the stream; and higher supplies and consumables cost.

Other

Operating income decreased \$(0.3) million quarterly and \$(0.6) million year-to-date based on the following:

the impact of intercompany profits in our Organics line-of-business now passing through to landfill disposal sites, combined with declining margins as higher revenues, which were driven by a large new sludge transportation and

disposal contract, also resulted in higher third-party transportation and disposal costs as much of these new volumes were directed to third-party sites; partially offset by improved operating performance of our Customer Solutions line-of-business, as increased volumes and lower purchased material costs outweighed higher cost of operations associated with increased hauling and transportation costs.

Liquidity and Capital Resources

We continually monitor our actual and forecasted cash flows, our liquidity, and our capital requirements in order to properly manage our cash needs based on the capital intensive nature of our business. Our capital requirements include fixed asset purchases (including capital expenditures for vehicles), debt servicing, landfill development and cell construction, landfill site and cell closure, as well as acquisitions. We generally meet our liquidity needs from operating cash flows and borrowings from our Revolving Credit Facility.

A summary of cash and cash equivalents, restricted assets and long-term debt balances, excluding any unamortized debt discount and debt issuance costs (in millions), follows:

	September 30, 2018	December 31, 2017
Cash and cash equivalents	\$ 3.1	\$ 2.0
Restricted assets:		
Restricted investment securities - landfill closure	\$ 1.2	\$ 1.2
Long-term debt:		
Current portion	\$ 2.0	\$ 4.9
Long-term portion	526.2	492.8
Total long-term debt	\$ 528.2	\$ 497.7

Summary of Cash Flow Activity

A summary of cash flows (in millions) follows:

	Nine Months Ended September 30,		
	2018	2017	Change
Net cash provided by operating activities	\$89.9	\$79.1	\$10.8
Net cash used in investing activities	\$(109.9)	\$(50.0)	\$(59.9)
Net cash provided by (used in) financing activities	\$21.1	\$(29.3)	\$50.4

Cash flows from operating activities.

A summary of operating cash flows (in millions) follows:

	Nine Months Ended September 30,	
	2018	2017
Net income (loss)	\$20.1	\$(41.8)
Adjustments to reconcile net income (loss) to net cash provided by operating activities:		
Depreciation and amortization	51.6	46.3
Depletion of landfill operating lease obligations	7.8	6.8
Interest accretion on landfill and environmental remediation liabilities	4.3	3.2
Amortization of debt issuance costs and discount on long-term debt	1.9	2.0
Stock-based compensation	6.4	4.8
Gain on sale of property and equipment	(0.4)	—
Southbridge Landfill non-cash closure charge	1.4	63.5
Southbridge Landfill insurance recovery for investing activities	(3.5)	—
Non-cash expense from acquisition activities and other items	0.2	—
Development project charge	0.3	—
Loss on debt extinguishment	7.4	0.5
Deferred income taxes	0.1	0.4
	97.6	85.7
Changes in assets and liabilities, net	(7.7)	(6.6)
Net cash provided by operating activities	\$89.9	\$79.1

A summary of the most significant items affecting the change in our operating cash flows follows:

Improved operational performance in the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 due to the following:

increased revenues of \$37.8 million associated with: acquisition activity and higher revenues in our collection line-of-business, our Western region disposal line-of-business, our Customer Solutions line-of-business, and our Organics line-of-business; partially mitigated by lower commodity revenues in our Recycling line-of-business; partially offset by higher cost of operations of \$30.5 million driven by business growth resulting in higher third-party direct costs, higher labor costs, higher direct operational costs, higher fuel costs and higher fleet maintenance costs; and higher general and administration expense of \$4.0 million.

The reduced cash flow impact associated with the changes in our assets and liabilities, net of effects of acquisitions and divestitures, which are affected by both cost changes and the timing of payments, in the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 was the result of the following:

lower cash inflows associated with accounts receivable; partially offset by lower cash outflows associated with accounts payable; lower cash outflows associated with prepaid expenses, inventories and other assets; and lower cash outflows associated with cash interest payments running through accrued expenses and other liabilities.

We recorded a \$10.0 million cash settlement for recovery on an environmental insurance settlement associated with the Southbridge Landfill closure, of which \$6.5 million related to the recovery of net cash used in operating activities. See Note 8, Commitments and Contingencies to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q for additional disclosure.

Cash flows from investing activities.

A summary of investing cash flows (in millions) follows:

	Nine Months Ended September 30,	
	2018	2017
Acquisitions, net of cash acquired	\$(58.2)	\$(3.6)
Additions to property, plant and equipment	(51.8)	(43.4)
Payments on landfill operating lease contracts	(5.0)	(3.7)
Proceeds from sale of property and equipment	0.6	0.7
Proceeds from Southbridge Landfill insurance recovery for investing activities	3.5	—
Proceeds from property insurance settlement	1.0	—
Net cash used in investing activities	\$(109.9)	\$(50.0)

A summary of the most significant items affecting the change in our investing cash flows follows:

Acquisitions, net of cash acquired. We acquired Complete, two collection operations, including a transfer station, and a tuck-in collection operation in the nine months ended September 30, 2018 for total consideration of \$67.1 million, including \$57.8 million in cash, as compared to the nine months ended September 30, 2017, when we acquired three tuck-in collection operations for total consideration of \$6.3 million, including \$3.4 million in cash.

Capital expenditures. Capital expenditures were \$8.4 million higher in the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 primarily due to timing differences, as well as capital expenditures associated with business growth and acquisition activities.

Payments on landfill operating lease contracts. Landfill operating lease payments increased \$1.3 million in the nine months ended September 30, 2018 as compared to the nine months ended September 30, 2017 due primarily to the timing of payments related to the landfill located in Chemung, New York.

Proceeds from Southbridge Landfill insurance recovery for investing activities. We recorded a recovery on environmental insurance settlement associated with the Southbridge Landfill closure, of which \$3.5 million related to the recovery of net cash previously used in investing activities.

Proceeds from property insurance settlement. We received insurance proceeds of \$1.0 million pertaining to property damage related to a fire at a transfer station in our Western region.

Cash flows from financing activities.

A summary of financing cash flows (in millions) follows:

	Nine Months Ended September 30,	
	2018	2017
Proceeds from long-term borrowings	\$566.8	\$146.4
Principal payments on long-term debt	(540.6)	(175.2)
Payments of debt issuance costs	(5.6)	(1.5)
Proceeds from the exercise of share based awards	0.5	1.0
Net cash provided by (used in) financing activities	\$21.1	\$(29.3)

A summary of the most significant items affecting the change in our financing cash flows follows:

Debt activity. Debt borrowings increased by \$420.4 million and our debt payments increased by \$365.4 million in the nine months ended September 30, 2018. The increase in financing cash flows related to debt activity is associated with increased borrowings related to acquisition activity and to a lesser extent debt issuance costs associated with financing activities.

Payments of debt issuance costs. We made \$5.6 million of debt issuance cost payments in the nine months ended September 30, 2018 related primarily to the issuance of Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015R-2 ("FAME Bonds 2015R-2") and the refinancing of our Credit Facility as compared to \$1.5 million in the nine months ended September 30, 2017 related to the repricing of our Term Loan B Facility and the remarketing of the FAME Bonds 2005R-1 and the FAME Bonds 2005R-2 into the FAME Bonds 2005R-3.

Outstanding Long-Term Debt

Credit Facility

In the quarter ended June 30, 2018, we entered into a credit agreement ("Credit Agreement"), which provides for a \$350.0 million aggregate principal amount Term Loan Facility and a \$200.0 million Revolving Credit Facility. The net proceeds from this transaction were used to repay in full the amounts outstanding of the \$350.0 million aggregate principal amount Term Loan B Facility and the \$160.0 million revolving line of credit facility plus accrued and unpaid interest thereon and to pay related transaction expenses.

As of September 30, 2018, we had outstanding \$350.0 million aggregate principal amount of borrowings under our Term Loan Facility and \$44.8 million aggregate principal amount of borrowings under our Revolving Credit Facility. The Credit Facility has a 5-year term and will initially bear interest at a rate of LIBOR plus 2.00% per annum, which will be reduced to a rate of LIBOR plus 1.25% upon us reaching a consolidated net leverage ratio of less than 2.25x. Our Credit Facility is guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries and secured by substantially all of our assets. As of September 30, 2018, further advances were available under the Revolving Credit Facility in the amount of \$132.7 million. The available amount is net of outstanding irrevocable letters of credit totaling \$22.5 million, at which date no amount had been drawn. We have the right to request, at our discretion, an increase in the amount of loans under the Credit Facility by an aggregate amount of \$125.0 million, subject to the terms and conditions set forth in the Credit Agreement.

The Credit Agreement requires us to maintain a minimum interest coverage ratio and a maximum consolidated net leverage ratio, to be measured at the end of each fiscal quarter. As of September 30, 2018, we were in compliance with all financial covenants contained in the Credit Agreement as follows:

	Twelve Months Ended September 30, 2018	Covenant Requirement at September 30, 2018
Maximum consolidated net leverage ratio (1)	3.54	4.75
Minimum interest coverage ratio	6.45	3.00

The maximum consolidated net leverage ratio is calculated as consolidated funded debt, net of unencumbered cash and cash equivalents in excess of \$2.0 million (calculated at \$527.1 million as of September 30, 2018, or \$528.2 million of consolidated funded debt less \$1.1 million of cash and cash equivalents in excess of \$2.0 million as of September 30, 2018), divided by consolidated EBITDA. Consolidated EBITDA is based on operating results for the twelve months preceding the measurement date of September 30, 2018. Consolidated funded debt, net of unencumbered cash and cash equivalents in excess of \$2.0 million, and consolidated EBITDA as defined by the Credit Agreement ("Consolidated EBITDA") are non-GAAP financial measures that should not be considered an alternative to any measure of financial performance calculated and presented in accordance with generally accepted accounting principles in the United States. A reconciliation of net cash provided by operating activities to minimum consolidated EBITDA is as follows (in millions):

	Twelve Months Ended September 30, 2018
Net cash provided by operating activities	\$ 118.4
Changes in assets and liabilities, net of effects of acquisitions and divestitures	5.6
Gain on sale of property and equipment	0.3
Non-cash expense from acquisition activities and other items	(0.2)
Developmental project charge	(0.3)
Loss on debt extinguishment	(7.4)
Southbridge Landfill non-cash closure charge	(1.4)
Southbridge Landfill insurance recovery for investing activities	3.5
Stock based compensation	(8.0)
Interest expense, less amortization of debt issuance costs and discount on long-term debt	22.9
Provision for income taxes, net of deferred taxes	(1.2)
Adjustments as allowed by the Credit Agreement	16.9
Consolidated EBITDA	\$ 149.1

In addition to the financial covenants described above, the Credit Agreement also contains a number of important customary affirmative and negative covenants which restrict, among other things, our ability to sell assets, incur additional debt, create liens, make investments, and pay dividends. We do not believe that these restrictions impact our ability to meet future liquidity needs. As of September 30, 2018, we were in compliance with the covenants contained in the Credit Agreement.

An event of default under any of our debt agreements could permit some of our lenders, including the lenders under the Credit Facility, to declare all amounts borrowed from them to be immediately due and payable, together with accrued and unpaid interest, or, in the case of the Credit Facility, terminate the commitment to make further credit extensions thereunder, which could, in turn, trigger cross-defaults under other debt obligations. If we were unable to repay debt to our lenders, or were otherwise in default under any provision governing our outstanding debt obligations, our secured lenders could proceed against us and against the collateral securing that debt.

Based on the seasonality of our business, operating results in the late fall, winter and early spring months are generally lower than the remainder of our fiscal year. Given the cash flow impact that this seasonality, the capital intensive nature of our business and the timing of debt payments has on our business, we typically incur higher debt borrowings in order to meet our liquidity needs during these times. Consequently, our availability and performance against our financial covenants may tighten during these times as well.

Tax-Exempt Financings

New York Bonds. As of September 30, 2018, we had outstanding \$25.0 million aggregate principal amount of Solid Waste Disposal Revenue Bonds Series 2014 ("New York Bonds 2014") and \$15.0 million aggregate principal amount of Solid Waste Disposal Revenue Bonds Series 2014R-2 ("New York Bonds 2014R-2") issued by the New York State Environmental Facilities Corporation under the indenture dated December 1, 2014 (collectively, the "New York Bonds"). The New York Bonds 2014 accrue interest at 3.75% per annum through December 1, 2019, at which time they may be converted from a fixed rate to a variable rate. The New York Bonds 2014R-2 accrue interest at 3.125% per annum through May 31, 2026, at which time they may be converted from a fixed rate to a variable rate. The New York Bonds, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, require interest payments on June 1 and December 1 of each year and mature on December 1, 2044. We borrowed the proceeds of the New York Bonds to finance or refinance certain capital projects in the state of New York and to pay certain costs of issuance of the New York Bonds.

FAME Bonds. As of September 30, 2018, we had outstanding \$25.0 million aggregate principal amount of FAME Bonds 2005R-3. The FAME Bonds 2005R-3, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 5.25% per annum, and interest is payable semiannually in arrears on February 1 and August 1 of each year until such bonds mature on January 1,

2025.

45

As of September 30, 2018, we had outstanding \$15.0 million aggregate principal amount of Finance Authority of Maine Solid Waste Disposal Revenue Bonds Series 2015 (“FAME Bonds 2015R-1”). The FAME Bonds 2015R-1, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 5.125% per annum through August 1, 2025, at which time they may be converted from a fixed to a variable rate, and interest is payable semiannually in arrears on February 1 and August 1 of each year. The FAME Bonds 2015R-1 mature on August 1, 2035. We borrowed the proceeds of the offering of the FAME Bonds 2015R-1 to finance or refinance the costs of certain of our solid waste landfill facilities and solid waste collection, organics and transfer, recycling and hauling facilities, and to pay certain costs of the issuance of the FAME Bonds 2015R-1.

In the quarter ended June 30, 2018, we completed the issuance of \$15.0 million aggregate principal amount of FAME Bonds 2015R-2. As of September 30, 2018, we had outstanding \$15.0 million aggregate principal amount of FAME Bonds 2015R-2. The FAME Bonds 2015R-2, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 4.375% per annum through July 31, 2025, at which time they may be converted from a fixed to a variable rate. Interest is payable semiannually each year on May 1 and November 1 until the FAME Bonds 2015R-2 mature on August 1, 2035. We borrowed the proceeds of the offering of the FAME Bonds 2015R-2 to finance or refinance the costs of certain of our solid waste landfill facilities and solid waste collection, organics and transfer, recycling and hauling facilities, and to pay certain costs of the issuance of the FAME Bonds 2015R-2.

Vermont Bonds. In the quarter months ended June 30, 2018, we completed the remarketing of \$16.0 million aggregate principal amount of 4.75% fixed rate Vermont Bonds. As of September 30, 2018, we had outstanding \$16.0 million aggregate principal amount Vermont Bonds. The Vermont Bonds, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, were remarketed in April 2018 and accrue interest at 4.625% per annum through April 2, 2028 after which time there is a mandatory tender. The Vermont Bonds mature on April 1, 2036.

New Hampshire Bonds. As of September 30, 2018, we had outstanding \$11.0 million aggregate principal amount of Solid Waste Disposal Revenue Bonds Series 2013 issued by the Business Finance Authority of the State of New Hampshire (“New Hampshire Bonds”). The New Hampshire Bonds, which are unsecured and guaranteed jointly and severally, fully and unconditionally by all of our significant wholly-owned subsidiaries, accrue interest at 4.00% per annum through October 1, 2019, at which time they may be converted from a fixed rate to a variable rate, and interest is payable in arrears on April 1 and October 1 of each year. The New Hampshire Bonds mature on April 1, 2029. We borrowed the proceeds of the New Hampshire Bonds to repay borrowings under our Credit Facility for qualifying property, plant and equipment assets purchased in the state of New Hampshire.

Inflation

Although inflationary increases in costs have affected our historical operating margins, we believe that inflation generally has not had a significant impact on our operating results. Consistent with industry practice, most of our contracts provide for a pass-through of certain costs to our customers, including increases in landfill tipping fees and in some cases fuel costs, intended to mitigate the impact of inflation on our operating results. We have also implemented a number of operating efficiency programs that seek to improve productivity and reduce our service costs, and a fuel surcharge, which is designed to recover escalating fuel price fluctuations above an annually reset floor. Based on these implementations, we believe we should be able to sufficiently offset most cost increases resulting from inflation. However, competitive factors may require us to absorb at least a portion of these cost increases. Additionally, management’s estimates associated with inflation have had, and will continue to have, an impact on our accounting for landfill and environmental remediation liabilities.

Regional Economic Conditions

Our business is primarily located in the northeastern United States. Therefore, our business, financial condition and results of operations are susceptible to downturns in the general economy in this geographic region and other factors affecting the region, such as state regulations and severe weather conditions. We are unable to forecast or determine the timing and/or the future impact of a sustained economic slowdown.

Seasonality and Severe Weather

Our transfer and disposal revenues historically have been higher in the late spring, summer and early fall months. This seasonality reflects lower volumes of waste in the late fall, winter and early spring months because:

the volume of waste relating to C&D activities decreases substantially during the winter months in the northeastern United States; and

decreased tourism in Vermont, New Hampshire, Maine and eastern New York during the winter months tends to lower the volume of waste generated by commercial and restaurant customers, which is partially offset by increased volume from the ski industry.

Because certain of our operating and fixed costs remain constant throughout the fiscal year, operating income is therefore impacted by a similar seasonality. Our operations can be adversely affected by periods of inclement or severe weather, which could increase our operating costs associated with the collection and disposal of waste, delay the collection and disposal of waste, reduce the volume of waste delivered to our disposal sites, increase the volume of waste collected under our existing contracts (without corresponding compensation), decrease the throughput and operating efficiency of our materials recycling facilities, or delay construction or expansion of our landfill sites and other facilities. Our operations can also be favorably affected by severe weather, which could increase the volume of waste in situations where we are able to charge for our additional services provided.

Our Recycling segment experiences increased volumes of fiber in November and December due to increased shipping boxes and retail activity during the holiday season.

Critical Accounting Policies and Estimates

The preparation of our financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities, as applicable, at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments which are based on historical experience and on various other factors that are believed to be reasonable under the circumstances. The results of their evaluation form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions and circumstances. Except for the adoption of the new accounting standards discussed in Note 2, Accounting Changes to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q, there were no material changes in the three and nine months ended September 30, 2018 to the application of critical accounting policies and estimates as described in Item 8 of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

New Accounting Pronouncements

For a description of the new accounting standards that may affect us, see Note 2, Accounting Changes to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q. For a description of the impact of ASU 2014-09, as amended, Revenue from Contracts with Customers (Topic 606), effective January 1, 2018 see Note 3, Revenue Recognition to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q. For a description of the impact of ASU 2017-12 Derivatives and Hedging (Topic 815), effective January 1, 2018 see Note 7, Long-Term Debt to our consolidated financial statements included under Part I, Item 1 of this Quarterly Report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business we are exposed to market risks, including changes in interest rates and certain commodity prices. We have a variety of strategies to mitigate these market risks, including at times using derivative instruments to hedge some portion of these risks.

Interest Rate Volatility

As of September 30, 2018, we are party to nine interest rate derivative agreements to hedge interest rate risk associated with the variable rate portion of our long-term debt. The total notional amount of these hedging instruments is \$190.0 million and we receive interest based on the 1-month LIBOR index, restricted by a 1.00% floor in certain instances, and pay interest at a weighted average fixed rate of approximately 2.54%. The agreements mature between February 2021 and May 2023. We have designated these derivative instruments as highly effective cash flow hedges, and therefore the change in fair value is recorded in our stockholders' deficit as a component of accumulated other comprehensive income and included in interest expense at the same time as interest expense is affected by the hedged transactions. Differences paid or received over the life of the agreements are recorded as additions to or reductions of interest expense on the underlying debt.

We have \$133.4 million of fixed rate debt as of September 30, 2018 in addition to the \$190.0 million fixed through our interest rate derivative agreements. We had interest rate risk relating to approximately \$204.8 million of long-term debt at September 30, 2018. The weighted average interest rate on the variable rate portion of long-term debt was approximately 4.2% at September 30, 2018. Should the average interest rate on the variable rate portion of long-term debt change by 100 basis points, we estimate that our quarterly interest expense would change by up to approximately \$0.5 million. The remainder of our long-term debt is at fixed rates and not subject to interest rate risk.

Commodity Price Volatility

Should commodity prices change by \$10 per ton, we estimate that our annual operating income margin would change by approximately \$1.2 million annually, or \$0.3 million quarterly. Our sensitivity to changes in commodity prices is complex because each customer contract is unique relative to revenue sharing, tipping or processing fees and other arrangements. The above operating income impact may not be indicative of future operating results and actual results may vary materially.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures. Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2018. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act"), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2018, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in internal controls over financial reporting. No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the three months ended September 30, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II.

ITEM 1. LEGAL PROCEEDINGS

Legal Proceedings

In the ordinary course of our business and as a result of the extensive governmental regulation of the solid waste industry, we are subject to various judicial and administrative proceedings involving state and local agencies. In these proceedings, an agency may seek to impose fines or to revoke or deny renewal of an operating permit held by us. From time to time, we may also be subject to actions brought by special interest or other groups, adjacent landowners or residents in connection with the permitting and licensing of landfills and transfer stations, or allegations of environmental damage or violations of the permits and licenses pursuant to which we operate. In addition, we may be named defendants in various claims and suits pending for alleged damages to persons and property, alleged violations of certain laws and alleged liabilities arising out of matters occurring during the ordinary operation of a waste management business.

Environmental Remediation Liability (including related litigation)

We are subject to liability for environmental damage, including personal injury and property damage, that our solid waste, recycling and power generation facilities may cause to neighboring property owners, particularly as a result of the contamination of drinking water sources or soil, possibly including damage resulting from conditions that existed before we acquired the facilities. We may also be subject to liability for similar claims arising from off-site environmental contamination caused by pollutants or hazardous substances if we or our predecessors arrange or arranged to transport, treat or dispose of those materials. The following matters represent our material outstanding claims.

Southbridge Recycling & Disposal Park, Inc.

In October 2015, our Southbridge Recycling and Disposal Park, Inc. ("SRD") subsidiary reported to the Massachusetts Department of Environmental Protection ("MADEP") results of analysis of samples collected pursuant to our existing permit from private drinking water wells located near the Town of Southbridge, Massachusetts ("Town") Landfill ("Southbridge Landfill"), which is operated by SRD. Those results indicated the presence of contaminants above the levels triggering notice and response obligations under MADEP regulations. In response to those results, we are carrying out an Immediate Response Action pursuant to Massachusetts General Law Chapter 21E (the "Charlton 21E Obligations") pursuant to state law. Further, we have implemented a plan to analyze and better understand the groundwater near the Southbridge Landfill and we are investigating with the objective of identifying the source or sources of the elevated levels of contamination measured in the well samples. If it is determined that some or all of the contamination originated at the Southbridge Landfill, we will work with the Town (the Southbridge Landfill owner and the former operator of an unlined portion of the Southbridge Landfill, which was used prior to our operation of a double-lined portion of the Southbridge Landfill commencing in 2004) to evaluate and allocate the liabilities related to the Charlton 21E Obligations. In July 2016, we sent correspondence to the Town pursuant to Chapter 21E of Massachusetts General Laws demanding that the Town reimburse us for the environmental response costs we had spent and that the Town be responsible for all such costs in the future, as well as any other costs or liabilities resulting from the release of contaminants from the unlined portion of the Southbridge Landfill. The Town responded in September 2016, denying that the Southbridge Landfill is the source of such contamination, and claiming that if it is, that we may owe an indemnity to the Town pursuant to the Operating Agreement between us and the Town dated May 29, 2007, as amended. We entered into a Tolling Agreement with the Town to delay any further administrative or legal actions until our work with MADEP more specifically defines the parties' responsibilities for the Charlton 21E Obligations, if any. Please see below for further discussion of our relationship with the Town regarding the Charlton 21E Obligations.

In February 2016, we and the Town received a Notice of Intent to Sue under the Resource Conservation and Recovery Act ("RCRA") from a law firm purporting to represent residents proximate to the Southbridge Landfill ("Residents"), indicating its intent to file suit against us on behalf of the Residents alleging the groundwater contamination originated from the Southbridge Landfill. In February 2017, we received an additional Notice of Intent to Sue from the National Environmental Law Center under the Federal Clean Water Act ("CWA") and RCRA (collectively the "Acts") on behalf of Environment America, Inc., d/b/a Environment Massachusetts, and Toxics Action Center, Inc., which have referred

to themselves as the Citizen Groups. The Citizen Groups alleged that we had violated the Acts, and that they intended to seek appropriate relief in federal court for those alleged violations. On or about June 9, 2017, a lawsuit was filed against us, SRD and the Town in the United States District Court for the District of Massachusetts (the “Massachusetts Court”) by the Citizen Groups and the Residents alleging violations of the Acts (the “Litigation”), and demanding a variety of remedies under the Acts, including fines, remediation, mitigation and costs of litigation, and remedies for violations of Massachusetts civil law related to personal and property damages, including remediation, diminution of property values, compensation for lost use and enjoyment of properties, injunction of further

operation of the Southbridge Landfill, and costs of litigation, plus interest on any damage award, on behalf of the Residents. We believe the Litigation to be factually inaccurate, and without legal merit, and we and SRD intend to vigorously defend the Litigation. Nevertheless, we believe it is reasonably possible that a loss will occur as a result of the Litigation although an estimate of loss cannot be reasonably provided at this time. We also continue to believe the Town should be responsible for costs or liabilities associated with the Litigation relative to alleged contamination originating from the unlined portion of the Southbridge Landfill, although there can be no assurance that we will not be required to incur some or all of such costs and liabilities.

In December 2017, we filed a Motion to Dismiss the Litigation, and on October 1, 2018, the Massachusetts Court granted our Motion to Dismiss, and accordingly, dismissed the Citizen Groups claims under the Acts. The Massachusetts Court has retained jurisdiction of the Residents claims.

We entered into an Administrative Consent Order on April 26, 2017 (the “ACO”), with MADEP, the Town, and the Town of Charlton, committing us to equally share the costs with MADEP, of up to \$10.0 million (\$5.0 million each) for the Town to install a municipal waterline in the Town of Charlton (“Waterline”). Upon satisfactory completion of that Waterline, and other matters covered by the ACO, we and the Town will be released by MADEP from any future responsibilities for the Charlton 21E Obligations. We also entered into an agreement with the Town on April 28, 2017 entitled the “21E Settlement and Water System Construction Funding Agreement” (the “Waterline Agreement”), wherein we and the Town released each other from claims arising from the Charlton 21E Obligations. Pursuant to the Waterline Agreement, the Town will issue a twenty (20) year bond for our portion of the Waterline costs (up to \$5.0 million). We have agreed to reimburse the Town for periodic payments under such bond. The Town has recently advised us that it has solicited and received proposals for the construction of the Waterline as contemplated by the ACO, and that construction of the Waterline has commenced.

We have recorded an environmental remediation liability associated with the future installation of the Waterline in other accrued liabilities and other long-term liabilities. We inflate the estimated costs in current dollars to the expected time of payment and discount the total cost to present value using a risk-free interest rate of 2.6%. Our expenditures could be significantly higher if costs exceed estimates. The changes to the environmental remediation liability associated with the Southbridge Landfill are as follows (in millions):

	Nine Months Ended September 30, 2018 2017	
Beginning balance	\$5.9	\$—
Accretion expense	0.1	—
Obligations incurred	—	6.4
Obligations settled (1) (0.6) (0.2)		
Ending balance	\$5.4	\$6.2

(1) Includes amounts that are being processed through accounts payable as a part of our disbursements cycle.

In November 2016, SRD received a cease and desist order (“Order”) from the Charlton alternate zoning enforcement officer, alleging that two storm water detention basins on SRD’s property in Charlton existed in violation of Charlton zoning requirements. SRD appealed the Order to the Charlton Zoning Board of Appeals, which upheld the Order. In June 2018, the Massachusetts Land Court approved a settlement reached between SRD and Charlton resolving all issues associated with the Order. Based on this settlement with Charlton, we paid a total of \$0.9 million in cash, and will provide ancillary services to Charlton over the next five (5) years for a total of cash and services of approximately \$1.2 million. This matter is now resolved. We have a remaining reserve of \$0.4 million as of September 30, 2018. This settlement is recorded as part of the Southbridge Landfill closure (settlement) charge, net in the nine months ended September 30, 2018. See Note 11, Other Items and Charges for additional disclosure.

In August 2016, we filed a complaint against Steadfast Insurance Company (“Steadfast”) in the Superior Court of Suffolk County, Massachusetts (the “Court”), alleging among other things, that Steadfast breached its Pollution Liability Policy (“Policy”) purchased by us in April 2015, by refusing to acknowledge coverage under the Policy, and refusing to cover any of the costs and liabilities incurred by us as described above as well as costs and liabilities that we may incur in the future. Steadfast filed an answer and counterclaim in September 2016, denying that it has any obligations to us under the Policy, and seeking a declaratory judgment of Steadfast’s obligations under the Policy. Steadfast filed a Motion to Dismiss (the “Motion”) our litigation against it, and we filed our response on July 11, 2017. On September 7, 2017, the Court denied the Motion. On July 17, 2018, we reached an agreement with Steadfast settling this litigation (the “Settlement”). Pursuant to the Settlement, Steadfast agreed to partially reimburse us for direct costs incurred or to be incurred by us under the ACO, as well as for substantial investigative costs associated with our efforts to ascertain the source of contaminants and other costs related to the Charlton 21E Obligations. Additionally, the Settlement payment is intended to reimburse us for all costs and liabilities arising out of the Litigation. Steadfast agreed to pay us \$10.0 million, and we received the Settlement funds in the three months ended September 30, 2018. The recovery of funds is recorded as part of the Southbridge Landfill closure (settlement) charge, net in the nine months ended September 30, 2018. See Note 11, Other Items and Charges for additional disclosure.

On June 13, 2017, Town voters rejected a non-binding ballot initiative intended to provide guidance to Town officials with respect to our pursuit of other landfill development opportunities at the Southbridge Landfill. Following such rejection by the Town voters, our board of directors and senior management determined after due consideration of all facts and circumstances that it is no longer likely that further development at the existing landfill site will generate an adequate risk adjusted return at the Southbridge Landfill, and accordingly we expect to cease operations at the Southbridge Landfill when no further capacity is available, expected by no later than early 2019. We delivered correspondence to the Town to this effect on August 3, 2017, citing events of Change in Law and Force Majeure pursuant to our May 29, 2007 Extension Agreement with the Town (“Extension Agreement”) and the impacts of such events on further expansion of the Southbridge Landfill. We have advised the Town that we see no economically feasible way to operate the Southbridge Landfill beyond its current permitted life and we have filed a closure plan with MADEP. Following cessation of operations, we will proceed to conduct proper closure and other activities at the Southbridge Landfill in accordance with the Extension Agreement with the Town, and Federal, state and local law. We reached this conclusion after carefully evaluating the estimated future costs associated with the permitting, engineering and construction activities for the planned expansion of the Southbridge Landfill against the possible outcomes of the permitting process and the anticipated future benefits of successful expansions. Under the Extension Agreement, which we account for as an operating lease, there are potential contractual obligations and commitments, including future cash payments of \$2.2 million and services that extend beyond the current useful life of the Southbridge Landfill. In accordance with FASB ASC 420 - Exit or Disposal Cost Obligations, a liability for costs to be incurred under a contract for its remaining term without economic benefit shall be recognized when we cease using the right conveyed by the contract. We may incur a loss associated with these potential contractual obligations upon cessation of operations at the Southbridge Landfill when remaining capacity is exhausted by the placement of waste at the site. In this respect, the Town had, on or about April 11, 2018, filed a motion for a declaratory judgment and injunctive relief in the Massachusetts Court seeking a judgment from the Massachusetts Court as to the rights of the parties pursuant to the Extension Agreement, and injunctive relief to prevent us from discontinuing free collection and disposal of the Town’s municipal waste when the Southbridge Landfill ceases to accept waste (the “Town Equity Litigation”). We vigorously defended the Town Equity Litigation on its merits, and further, on the grounds that the Town Equity Litigation is not in compliance with the procedures for dispute resolution as set forth in the Extension Agreement. On June 26, 2018, the Massachusetts Court denied the Town’s request for a preliminary injunction without prejudice. Subsequently, the Town filed a successor litigation to the Town Equity Litigation (the “Current Litigation”), again seeking equitable and legal relief. We are vigorously contesting the Current Litigation. Trial is now scheduled for November 27, 2018.

The costs and liabilities we may be required to incur in connection with the foregoing Southbridge Landfill matters could be material to our results of operations, our cash flows and our financial condition.

Potsdam Environmental Remediation Liability

On December 20, 2000, the State of New York Department of Environmental Conservation (“DEC”) issued an Order on Consent (“Order”) which named Waste-Stream, Inc. (“WSI”), our subsidiary, General Motors Corporation (“GM”) and Niagara Mohawk Power Corporation (“NiMo”) as Respondents. The Order required that the Respondents undertake certain work on a 25-acre scrap yard and solid waste transfer station owned by WSI in Potsdam, New York, including the preparation of a Remedial Investigation and Feasibility Study (“Study”). A draft of the Study was submitted to the DEC in January 2009 (followed by a final report in May 2009). The Study estimated that the undiscounted costs associated with implementing the preferred remedies would be approximately \$10.2 million. On February 28, 2011, the DEC issued a Proposed Remedial Action Plan for the site and accepted public comments on the proposed remedy through March 29, 2011. We submitted comments to the DEC on this matter. In April 2011, the DEC issued the final Record of Decision (“ROD”) for the site. The ROD was subsequently rescinded by the DEC for failure to respond to all submitted comments. The preliminary ROD, however, estimated that the present cost associated with implementing the preferred remedies would be approximately \$12.1 million. The DEC issued the final ROD in June 2011 with proposed remedies consistent with its earlier ROD. An Order on Consent and Administrative Settlement naming WSI and NiMo as Respondents was executed by the Respondents and DEC with an effective date of October 25, 2013. On January 29, 2016, a Cost-Sharing Agreement was executed between WSI, NiMo, Alcoa Inc. (“Alcoa”) and Reynolds Metal Company (“Reynolds”) whereby Alcoa and Reynolds elected to voluntarily participate in the onsite remediation activities at a combined 15% participant share. It is unlikely that any significant expenditures relating to onsite remediation will be incurred until the fiscal year ending December 31, 2019. WSI is jointly and severally liable with NiMo, Alcoa and Reynolds for the total cost to remediate.

We have recorded an environmental remediation liability associated with the Potsdam site based on incurred costs to date and estimated costs to complete the remediation in other accrued liabilities and other long-term liabilities. Our expenditures could be significantly higher if costs exceed estimates. We inflate the estimated costs in current dollars to the expected time of payment and discount the total cost to present value using a risk-free interest rate of 1.5%. A summary of the changes to the environmental remediation liability associated with the Potsdam environmental remediation liability follows (in millions):

	Nine Months Ended September 30, 2018 2017	
Beginning balance	\$5.8	\$5.9
Obligations settled (1) (0.1)	—	—
Ending balance	\$5.7	\$5.9

(1) Includes amounts that are being processed through accounts payable as a part of our disbursements cycle.

North Country Environmental Services

On or about March 8, 2018, the Citizen Groups described above, delivered correspondence to our subsidiary, North Country Environmental Services, Inc. (“NCES”) and us, providing notice of the Citizen Groups' intent to sue NCES and us for violations of the CWA in conjunction with NCES's operation of its landfill in Bethlehem, New Hampshire. On May 14, 2018, the Citizen Groups filed a lawsuit against NCES and us in the United States District Court for the District of New Hampshire (the “New Hampshire Court”) alleging violations of the CWA, arguing that ground water discharging into the Ammonoosuc River is a "point source" under the CWA (the "New Hampshire Litigation"). The New Hampshire Litigation seeks remediation and fines under the CWA. On June 15, 2018, we and NCES filed a Motion to Dismiss in the New Hampshire Court. On July 13, 2018, the Citizen Groups filed objections to our Motion to Dismiss. On July 27, 2018, we filed a reply in support of our Motion to Dismiss. On September 25, 2018, the New Hampshire Court denied our Motion to Dismiss. We intend to continue to vigorously defend against the New

Hampshire Litigation, which we believe is without merit.

52

ITEM 1A. RISK FACTORS

Our business is subject to a number of risks, including those identified in Item 1A, “Risk Factors” of our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, that could have a material effect on our business, results of operations, financial condition and/or liquidity and that could cause our operating results to vary significantly from period to period. As of September 30, 2018, there have been no material changes to the risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017. We may disclose additional changes to our risk factors or disclose additional factors from time to time in our future filings with the SEC.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On August 31, 2018, we issued 150,032 shares of our common stock to Youngblood Disposal Enterprises of Western New York, LLC (“Youngblood”) in connection with our acquisition of the assets of Youngblood and its wholly owned subsidiaries.

Such shares were issued in reliance upon the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.
