FOR IMMEDIATE RELEASE

**ALVARION TO DEMONSTRATE PERSONAL BROADBAND SERVICES WITH
A LIVE SHOWCASE OF ITS 4MOTION™ MOBILE WiMAX SOLUTION AT CTIA WIRELESS**

***4Motion Enables Carriers to Build Complete Networks For Triple Play Services to
Users Anytime, Anywhere***

CTIA Wireless 2006, Las Vegas Nevada, April 4, 2006 - Alvarion Ltd., (NASDAQ: ALVR), the world's leading provider of wireless broadband solutions and specialized mobile networks, will be demonstrating personal broadband services with a live showcase of its new 4Motion solution, the company's comprehensive mobile WiMAX solution based on the IEEE 802.16e-2005 standard, at the show which opens tomorrow. 4Motion™ is a complete WiMAX 802.16e-2005 solution portfolio being developed in conjunction with leading providers of core network and IP technology, terminals and integration services. Powered by Alvarion's advanced radio technologies, the demonstration—featuring dynamic bandwidth allocation to multiple services and seamless hand offs —offers a glimpse of the future where mobile users receive bandwidth intensive triple play services anytime, anywhere.

Called "personal broadband," this untethered and unbound availability of broadband will fundamentally change the way people work and play, similar to how cellular phones have integrated mobile voice and messaging into everyone's daily lives in the past decade. Delivering on Alvarion's previously announced goal to demonstrate mobile WiMAX technology in early 2006, the showcase will be at the company's booth (#1612) and is open to the public. More information is available everyday at 14:00 at a seminar on mobile WiMAX in MR-58.

"With a leading position in the pre-WiMAX market, it's no surprise that Alvarion would be a major force in driving WiMAX development and the industry as a whole," noted Peter Jarich, principal analyst with Current Analysis. "Likewise, as the industry begins to coalesce around 802.16e-2005, it's no surprise that Alvarion would again be leading the charge in pushing the technology with an eye towards fundamentally impacting the way people live and work."

Leveraging Alvarion's BreezeMAX, the most widely deployed WiMAX solution in the world with more than 150 networks in more than 30 countries, 4Motion is a complete end-to-end mobile WiMAX solution incorporating advanced radio technologies, QoS mechanisms, IP mobility core

components and multimedia subsystems, along with subscriber terminals, an OMC and backend interfaces. With this combination of software defined radio (SDR), beam forming, multi-in multi-out (MIMO), dynamic bandwidth allocation, and scalable OFDMA technologies, the benefit to service providers is flexibility in network deployment, greater capacity, better overall coverage, efficient handling of shared resources, optimized user throughput by application, and robustness in providing mobility services. Compliance with 802.16e-2005 standards and a fully distributed, all-IP architecture means that 4Motion facilitates operators the flexibility to choose the multi-vendor partners to add third party IP services, while controlling costs.

“4Motion gives operators the full benefit of our two years of WiMAX deployments enabling them to start with a small network and evolve over time from fixed and portable services, to full mobility services, while also offering current customers a similar ability to augment their networks,” said Tzvika Friedman, CEO and President of Alvarion. “This solution offers carriers greater overall capacity and superior coverage, while having extreme flexibility and robustness in their network. Equally important, 4Motion’s all-IP core means that it will seamlessly integrate with other vendors’ network equipment, allowing carriers to deliver all manner of multimedia services as they develop.”

BreezeMAX is Alvarion’s WiMAX platform, designed from the ground up to support fixed, nomadic, portable and mobile WiMAX applications. It is built to support present needs, while enabling service providers to deploy a scalable and flexible network that is optimized for both operators and subscribers needs at every stage as the network grows. The fully commercial version of 4Motion, including standards compliant BreezeMAX base stations and a variety of Alvarion and third party systems and subscriber units, is planned for operator trials in the first half of 2007.

About Alvarion

With more than 2 million units deployed in 150 countries, Alvarion is the world’s leading provider of innovative wireless network solutions enabling *personal broadband* services to improve lifestyles and productivity. Providing systems to carriers, ISPs and private network operators, the company also supplies solutions to extend coverage of GSM and CDMA mobile networks to developing countries and other hard to serve areas.

Leading the WiMAX market with the most widely deployed WiMAX system in the world, Alvarion has the most extensive networks deployments and proven product portfolio in the industry covering the full range of frequency bands with both fixed and mobile solutions. Alvarion’s products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications, and mobile voice and data. Alvarion works with several global OEM providers and more than 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for more than 10 years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, the Company's prominent work in the WiMAX Forum™ is

focused on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions.
