During the period January 1, 2012 through September 30, 2012, transfers of securities from Level 1 to Level 2 were \$54,411,840 and transfers from Level 2 to Level 1 were \$199,521,315. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Schedules of Investments.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended September 30, 2012:

	Common Stocks
	Utilities
Balance as of 12/31/11	\$ 117,735
Realized gain (loss)	
Change in unrealized appreciation	13,048
Purchases	
Sales	
Transfers in and/or out of level 3	
Balance as of 09/30/2012	\$ 130,783

The following table presents additional information about valuation methodologies and inputs used for investments that are measured at fair value and categorized within Level 3 as of September 30, 2012:

	Fair Value 9/30/12	Valuation Technique	Unobservable input (1)	%	Impact to Valuation from an Increase in Input (2)
Common Stocks					
Utilities	\$130,783	Periodic observable quotes Market comparable companies	Discount for lack of market	50%	Decrease

(1) In determining certain of these inputs, management evaluates a variety of factors including economic condition, industry and market developments, market valuations of comparable companies and company specific developments.

(2) This column represents the directional change in the fair value of the Level 3 investments that would result from an increase to the corresponding unobservable input. A decrease to the unobservable input would have the opposite effect. Significant increases or decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

NOTES TO SCHEDULES OF INVESTMENTS

Security Valuation The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Under procedures approved by the Funds' Board of Trustees, the Funds may utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Time) but after the last close of the securities primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount (points), which reflects the differences in the interest rates between the U.S. and foreign markets. Securities for which quotations are not available are stated at fair value as determined by a Pricing Committee of Van Eck Associates Corporation (the Adviser) appointed by the Board of Trustees. Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented on the Schedules of Investments.

The Funds utilize various methods to measure the fair value of most of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assumes the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of the inputs and the levels used to value the Fund's investments, and transfers between levels are located in the Schedules of Investments. Additionally, a table that reconciles the valuation of the Fund's Level 3 investments that summarizes the valuation techniques and describes unobservable inputs into those Level 3 investments, if applicable, is located in the Schedules of Investments.
