MARKET VECTORS EGYPT INDEX ETF

Ticker: EGPT™
 Principal U.S. Listing Exchange: NYSE Arca, Inc.
 SUMMARY PROSPECTUS
 MAY 1, 2013, as revised on June 10, 2013

EGPTSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 888.MKT.VCTR, or by sending an email request to info@vaneck.com. The Fund's prospectus and statement of additional information, both dated May 1, 2013, as revised on June 10, 2013, are incorporated by reference into this summary prospectus.

INVESTMENT OBJECTIVE

Market Vectors Egypt Index ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors® Egypt Index (the Egypt Index).

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50 %
Other Expenses	0.58 %
Total Annual Fund Operating Expenses ^(a)	1.08 %
Fee Waivers and Expense Reimbursement ^(a)	0.12 %
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.96 %

^(a) Van Eck Associates Corporation (the Adviser)

has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.94% of the Fund's average daily net assets per year until May 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497K

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR	EXPENSES
1	\$ 98
3	\$ 332
5	\$ 584
10	\$ 1,306

vaneck.com

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund will normally invest at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Egypt Index is comprised of securities of Egyptian companies. A company is considered to be an Egyptian company if it is incorporated in Egypt or generates at least 50% of its revenues (or, in certain circumstances, has at least 50% of its assets) in Egypt. Such companies may include small- and medium-capitalization companies. As of December 31, 2012, the Egypt Index included 25 securities of companies with a market capitalization range of between approximately \$108 million and \$8.3 billion and a weighted average market capitalization of \$2.0 billion. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach will attempt to approximate the investment performance of the Egypt Index by investing in a portfolio of securities that generally replicates the Egypt Index. The Adviser expects that, over time, the correlation between the Fund's performance before fees and expenses and that of the Egypt Index will be 95% or better. A figure of 100% would indicate perfect correlation.

The Fund may also utilize convertible securities and participation notes to seek performance that corresponds to the Egypt Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Egypt Index concentrates in an industry or group of industries. As of December 31, 2012, the Egypt Index was concentrated in the financial services sector and each of the basic materials, industrials and telecommunications sectors represented a significant portion of the Egypt Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund.

Special Risk Considerations of Investing in Egyptian Issuers. Investment in securities of Egyptian issuers involves risks not typically associated with investments in securities of issuers in more developed countries that may negatively affect the value of your investment in the Fund. Such heightened risks include, among others, expropriation and/or nationalization of assets, confiscatory taxation, regional conflict, political instability, including authoritarian and/or military involvement in governmental decision making, armed conflict, the impact on the economy as a result of civil war, and social instability as a result of religious, ethnic and/or socioeconomic unrest. Issuers in Egypt are subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are issuers in more developed markets, and therefore, all material information may not be available or reliable.

The securities markets in Egypt are underdeveloped and may be less correlated to global economic cycles than those markets located in more developed countries. Securities markets in Egypt are subject to greater risks associated with

market volatility, lower market capitalization, lower trading volume, illiquidity, inflation, greater price fluctuations, uncertainty regarding the existence of trading markets, governmental control and heavy regulation of labor and industry. Moreover, trading on securities markets may be suspended altogether. Recently, the securities markets in Egypt were closed for an extended period of time due to political and civil unrest.

The government in Egypt may restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in Egypt. These restrictions and/or controls may at times limit or prevent foreign investment in securities of issuers located or operating in Egypt. Moreover, Egypt may require governmental approval or special licenses prior to investments by foreign investors and may limit the amount of investments by foreign investors in a particular industry and/or issuer and may limit such foreign investment to a certain class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of Egypt and/or impose additional taxes on foreign investors. These factors, among others, make investing in issuers located or operating in Egypt significantly riskier than investing in issuers located or operating in more developed countries, and any one of them could cause a decline in the value of the Fund's Shares.

Emerging markets can experience high rates of inflation, deflation and currency devaluation. The value of the Egyptian pound may be subject to a high degree of fluctuation. The Fund's assets will be invested primarily in equity securities of Egyptian issuers and the income received by the Fund will be principally in Egyptian pounds. The Fund's exposure to the Egyptian pound and changes

in value of the Egyptian pound versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and the Egyptian pound.

In Egypt, the marketability of quoted shares is limited due to the restricted opening hours of stock exchanges (normally 10:30 a.m. to 2:30 p.m., Sunday to Thursday), a narrow range of investors and a relatively high proportion of market value being concentrated in the hands of a relatively small number of shareholders. In addition, because Egyptian stock exchanges on which the Fund's portfolio securities may trade are open when the NYSE Arca is closed, the Fund may be subject to heightened risk associated with market movements.

Risk of Investing in Foreign Securities. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because many foreign securities markets may be limited in size, the prices of securities that trade in such markets may be influenced by large traders. Certain foreign markets that have historically been considered relatively stable may become volatile in response to changed conditions or new developments. Increased interconnectivity of world economies and financial markets increases the possibility that adverse developments and conditions in one country or region will affect the stability of economies and financial markets in other countries or regions. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore, not all material information may be available or reliable. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. In addition, the Fund may not receive shareholder communications or be permitted to vote the securities that it holds, as the issuers may be under no legal obligation to distribute shareholder communications.

Risks of Investing in Emerging Market Issuers. Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

Risk of Investing in Depositary Receipts. Depositary receipts in which the Fund may invest are receipts listed on U.S. exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Egypt Index, may negatively affect the Fund's ability to replicate the performance of the Egypt Index.

Risk of Investing in the Financial Services Sector. The financial services sector includes companies engaged in banking, commercial and consumer finance, investment banking, brokerage, asset management, custody or insurance. Because as currently constituted the Egypt Index is concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates and by loan losses, which usually increase in economic downturns. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets have caused companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease

operations.

Risk of Investing in the Basic Materials Sector. The basic materials sector includes companies that manufacture chemicals, construction materials, glass and paper products, as well as metals, minerals and mining companies. Because as currently constituted the basic materials sector represents a significant portion of the Egypt Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the basic materials sector. Companies engaged in the production and distribution of basic materials may be adversely affected by changes in world events, political and economic conditions, energy conservation, environmental policies, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Industrials Sector. The industrials sector includes companies engaged in the manufacture and distribution of capital goods, such as those used in defense, construction and engineering, companies that manufacture and distribute electrical equipment and industrial machinery and those that provide commercial and transportation services and supplies. Because as currently constituted the industrials sector represents a significant portion of the Egypt Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and

vaneck.com

3

economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

Risk of Investing in the Telecommunications Sector. The telecommunications sector includes companies that provide telecommunications services. Because as currently constituted the telecommunications sector represents a significant portion of the Egypt Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the telecommunications sector. Companies in the telecommunications sector may be affected by industry competition, substantial capital requirements, government regulations and obsolescence of telecommunications products and services due to technological advancement.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. Returns on investments in securities of small- and medium- capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Investing in Micro-Capitalization Companies. Micro-capitalization companies are subject to substantially greater risks of loss and price fluctuations because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices tend to be more volatile and their markets less liquid than companies with larger market capitalizations. The shares of micro-capitalization companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the future ability to sell these securities.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have also experienced significantly more volatility in those returns.

Issuer-Specific Changes Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than that of larger issuers.

Market Risk. The prices of the securities in the Fund are subject to the risk associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Egypt Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Egypt Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Egypt Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units (defined herein). Because the Fund bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the Egypt Index, the Fund's return may deviate significantly from the return of the Egypt Index. In addition, the Fund may not be able to invest in certain securities included in the Egypt Index or invest in them in the exact proportions they represent of the Egypt Index, due to legal and regulatory rules and limitations imposed by the government of Egypt. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its net asset value (NAV) based on fair value prices and the value of the Egypt Index is based on the securities' closing prices on local foreign markets (*i.e.*, the value of the Egypt Index is not based on fair value prices), the Fund's ability to track the Egypt Index may be

adversely affected.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Egypt Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Premium/Discount Risk. Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Risk of Cash Transactions. Unlike most exchange-traded funds (ETFs), the Fund expects to effect creations and redemptions principally for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Non-Diversified Risk. The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single company represented in the Egypt Index. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk because the Egypt Index it seeks to replicate is comprised of securities of a very limited number of companies.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Egypt Index concentrates in a particular sector or sectors or industry or group of industries. Based on the current composition of the Egypt Index, the Fund's assets are concentrated in the financial services sector; therefore, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for one year and since inception compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.marketvectorsetfs.com.

Annual Total Returns Calendar Year

Best Quarter: 33.71% 1Q 12

Worst Quarter: -26.46% 3Q 11

Average Annual Total Returns for the Periods Ended December 31, 2012

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Since Inception (2/16/2010)
Market Vectors Egypt Index ETF (return before taxes)	41.94 %	-12.09 %
Market Vectors Egypt Index ETF (return after taxes on distributions)	38.55 %	-13.22 %
Market Vectors Egypt Index ETF (return after taxes on distributions and sale of Fund Shares)	27.26 %	-10.71 %
Market Vectors Egypt Index (reflects no deduction for fees, expenses or taxes)	43.56 %	-12.79 %
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	16.00 %	12.00 %

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	February 2010
George Cao	Portfolio Manager	February 2010

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares at NAV only in a large specified number of Shares, each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca Inc. (NYSE Arca) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.
