Bennett Environmental Inc.
(Registrant)

Date: April 1, 2005

By: /s/ Al Bulckaert

[Print] Name: Al Bulckaert
Title: Chief Executive Officer

For Immediate Release
**Bennett Provides an Update on Production for the 1st Quarter and Posts
Audited Financial Statements**

Oakville, Ontario, April 1, 2005 Bennett Environmental Inc. today announced that it had finalized its audited financial statements for the year ended December 31, 2004 and reported on production for the first quarter of 2005.

Audited Financial Statements for December 31, 2004

The Company finalized its audited year end statements for the year ended December 31, 2004. A final copy of these statements can be found on www.sedar.com. While there were no changes to earnings from those announced previously on March 3, 2005, there were changes to the Company's working capital position. On the financial statements that accompanied the March 3, 2005 press release, the Company disclosed that working capital was approximately \$28.6 million for the period ended December 31, 2004. The final audited financial statements for the same period disclose working capital of approximately \$26.2 million. The primary driver of the change was a shift in tax recoveries from current to deferred taxes.

Quarterly Production

Récupère Sol Inc.

The Company processed approximately 3,700 tonnes at its facility in Saint Ambroise, Quebec in the quarter or approximately 1,800 tonnes less that it had reported in its press release of March 3, 2005. A later than anticipated start up of the facility along with material that needed to be processed at a lower rate were the primary drivers of the reduced volume.

Closing inventory of soil is approximately 7,000 tonnes at the end of the first quarter. There is also approximately 2,000 tonnes of soil in-transit.

Quebec Preliminary Notice

The Company and the Quebec Ministry of the Environment continues to work cooperatively to develop an action plan regarding the levels of dioxin and furan. This is a long process and it is expected that the discussions will be completed during the next quarter.

About Bennett Environmental Inc.

Bennett Environmental Inc. is a North American leader in high temperature treatment services for the remediation of contaminated soil and has provided thermal solutions to contamination problems throughout Canada and the US. Bennett Environmental's technology provides for the safe, economical and permanent solution to contaminated soil. Independent testing has consistently proven that the technology operates well within the most stringent criteria in North America.
