Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

The number of outstanding shares of ABN AMRO Holding N.V.'s classes of capital or common stock as of 31 December 2006 was:

Title of Class	Number of Shares Outstanding
Ordinary Shares (EUR 0.56)	1,853,786,791
Convertible Financing Preference Shares (EUR 0.56)	1,369,815,864
Formerly Convertible Preference Shares (EUR 2.24)	44,988
Non-cumulative Guaranteed Trust Preferred Securities	131,400,000

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note - Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large Accelerated Non-accelerated
accelerated filer filer
filer

Indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The information contained in this report is incorporated by reference into the registration statements on Form S-8 with Registration Nos. 333-81400, 333-84044, 333-128621, 333-128619, 333-127660 and 333-74703, the registration statements on Form F-3 with Registration Nos. 333-137691 and 333-104778 and the registration statement on Form F-4 with Registration No. 333-108304.

THIS PAGE INTENTIONALLY LEFT BLANK

CERTAIN DEFINITIONS

As used herein, “Holding” means ABN AMRO Holding N.V. The terms “ABN AMRO,” “us,” “we,” “our company” or “the bank” refer to Holding and its consolidated subsidiaries. The “Bank” means ABN AMRO Bank N.V. and its consolidated subsidiaries.

As used herein, “Euro”, “euro” or “EUR” refers to Euros and “US\$”, “USD” or “\$” refers to US dollars.

PRESENTATION OF INFORMATION

Holding was incorporated under Dutch law on 30 May 1990. Holding owns all of the shares of the Bank, and itself has no material operations. Our consolidated financial statements include condensed financial information with respect to the Bank, which itself had total assets of EUR 987.1 billion as of 31 December 2006. As of that date and for the year then ended, the Bank accounted for approximately 100% of our consolidated assets, consolidated total revenue and consolidated net profit.

Unless otherwise indicated, the financial information contained in this annual report on Form 20-F has been prepared in accordance with International Financial Reporting Standards or “IFRS” which, as disclosed in Note 50 to our consolidated financial statements, vary in certain significant respects from accounting principles generally accepted in the United States, or “US GAAP”.

A body of generally accepted accounting principles such as US GAAP or IFRS is commonly referred to as “GAAP”. A “non-GAAP financial measure” is generally defined by the United States Securities and Exchange Commission (the “SEC”) as one that measures historical or future financial performance, financial position or cash flows but excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. This report presents certain non-GAAP financial measures as a result of excluding the consolidation effects of our private equity holdings. In accordance with applicable rules and regulations, we have presented definitions and reconciliations of non-GAAP financial measures to the most comparable GAAP measures in Item 5 “Operating and Financial Review and Prospects” of this report. The non-GAAP financial measures described herein are not a substitute for GAAP measures, for which management has responsibility.

All annual averages in this report are based on month-end figures. Management does not believe that these month-end averages present trends materially different from those that would be presented by daily averages.

Certain figures in this document may not sum up exactly due to rounding. In addition, certain percentages in this document have been calculated using rounded figures.

EXCHANGE RATES

The following table shows, for the years and months indicated, certain information regarding the Noon Buying Rate in the City of New York for cable transfers in Euros as certified for customs purposes by the Federal Reserve Bank of New York expressed in US dollar.

Period	At Period End(1)	Average Rate(2) (Value of 1 USD in Euro)	High	Low
2001	1.12	1.12	1.19	1.05
2002	0.95	1.06	1.16	0.95
2003	0.79	0.89	0.97	0.79
2004	0.74	0.81	0.85	0.73

Edgar Filing: ABN AMRO HOLDING N V - Form 20-F

2005	0.84	0.80	0.74	0.86
September 2006	0.79	0.79	0.79	0.78
October 2006	0.78	0.79	0.80	0.78
November 2006	0.75	0.78	0.79	0.75
December 2006	0.76	0.76	0.76	0.75
January 2007	0.77	0.77	0.77	0.75
February 2007	0.76	0.76	0.77	0.75
March 2007 (through 16 March 2007)	0.75	0.76	0.76	0.75

(1) The period-end rate is the Noon Buying Rate announced on the last day of the period.

- (2) The average rate for each yearly period is the average of the Noon Buying Rates on the last day of each month during the year. The average rate for each monthly period is the average of the Noon Buying Rates of each day of the month.

The Noon Buying Rate on 16 March 2007, the latest practicable date, was 1 USD = EUR 0.75.

These rates are provided solely for your convenience and are not necessarily the rates used by us in preparation of our consolidated financial statements or in financial data included elsewhere in this report, such as the unaudited translation into USD of the figures as of or for the year ended 31 December 2006 provided for your convenience. We do not make any representation that amounts in USD have been, could have been, or could be converted into Euros at any of the above rates.

A significant portion of our assets and liabilities are denominated in currencies other than the Euro. Accordingly, fluctuations in the value of the Euro relative to other currencies, such as the US dollar, can have an effect on our financial performance. See “Item 5. Operating and Financial Review and Prospects - A. Operating results”. In addition, changes in the exchange rate between the Euro and the US dollar are reflected in the US dollar equivalent to the price of our Ordinary Shares on Euronext Amsterdam and, as a result, affect the market price of Holding’s American Depositary Shares, or American Depositary Shares, on the New York Stock Exchange. Cash dividends are paid by Holding in respect of Ordinary Shares in Euros, and exchange rate fluctuations will affect the US dollar amounts of the cash dividends received by holders of American Depositary Shares on conversion by JPMorgan Chase Bank of New York, the Depositary for the American Depositary Shares.

CAUTIONARY STATEMENT ON FORWARD-LOOKING STATEMENTS

Certain statements included in this report are forward-looking statements. We also may make forward-looking statements in our other documents filed with the SEC, invitations to annual shareholders’ meetings and other information sent to shareholders, offering circulars and prospectuses, press releases and other written materials. In addition, our senior management may make forward-looking statements orally to analysts, investors, representatives of the media and others. Forward-looking statements can be identified by the use of forward-looking terminology such as “believe”, “expect”, “may”, “intend”, “will”, “should”, “anticipate”, “Value-at-Risk”, or by the use of similar expressions, variations on such expressions, or by the discussion of strategy or objectives. Forward-looking statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements.

In particular, this report includes forward-looking statements relating but not limited to management objectives, implementation of our strategic initiatives, trends in results of operations, margins, costs, return on equity, and risk management, including our potential exposure to various types of risk including market risk, such as interest rate risk, currency risk and equity risk. For example, certain of the market risk disclosures are dependent on choices about key model characteristics, assumptions and estimates, and are subject to various limitations. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future.

We have identified some of the risks inherent in forward-looking statements in “Item 3. Key Information - D. Risk factors” in this report. Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements in this report include, but are not limited to:

- general economic and business conditions in the Netherlands, the European Union, the United States, Brazil and other countries or territories in which we operate;
- changes in applicable laws and regulations, including taxes;

regulations and monetary, interest rate and other policies of central banks, particularly the Dutch Central Bank, the Bank of Italy, the European Central Bank, the US Federal Reserve Board and the Brazilian Central Bank;

- changes or volatility in interest rates, foreign exchange rates (including the Euro-US dollar rate), asset prices, equity markets, commodity prices, inflation or deflation;
- the effects of competition and consolidation in the markets in which we operate, which may be influenced by regulation, deregulation or enforcement policies;
- changes in consumer spending and savings habits, including changes in government policies which may influence investment decisions;

· our ability to hedge certain risks economically;

our success in managing the risks involved in the foregoing, which depends, among other things, on our ability to anticipate events that cannot be captured by the statistical models we use; and
force majeure and other events beyond our control.

Other factors could also adversely affect our results or the accuracy of forward-looking statements in this report, and you should not consider the factors discussed here or in “Item 3. Key Information - D. Risk factors” to be a complete set of all potential risks or uncertainties. We have economic, financial market, credit, legal and other specialists who monitor economic and market conditions and government policies and actions. However, because it is difficult to predict with accuracy any changes in economic or market conditions or in governmental policies and actions, it is difficult for us to anticipate the effects that such changes could have on our financial performance and business operations.

The forward-looking statements made in this report speak only as of the date of this report. We do not intend to publicly update or revise these forward-looking statements to reflect events or circumstances after the date of this report, and we do not assume any responsibility to do so. The reader should, however, consult any further disclosures of a forward-looking nature we may make in our annual reports on Form 20-F and our periodic reports on Form 6-K. This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995.

PART I

Item 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not required because this document is filed as an annual report.

Item 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not required because this document is filed as an annual report.

Item 3. KEY INFORMATION

A. Selected financial data

The selected financial data set forth below have been derived from our audited consolidated financial statements for the periods indicated. Our consolidated financial statements for each of the years ended 31 December 2006, 2005 and 2004 have been audited by Ernst & Young Accountants, independent auditors. The selected financial data is only a summary and should be read in conjunction with and are qualified by reference to our consolidated financial statements and notes thereto included elsewhere in this report and the information provided in “Item 5. Operating and Financial Review and Prospects”.

Our financial statements have been prepared in accordance with IFRS, which varies in certain respects from US GAAP. For a discussion of the significant differences and a reconciliation of certain IFRS amounts to US GAAP, see Note 50 to our consolidated financial statements. For selected financial data in accordance with US GAAP, see “—Selected Financial Data in Accordance with US GAAP” below.

Selected consolidated income statement

	For the year ended 31 December			
	2006 (1) (in millions of USD)	2006	2005	2004
		(in millions of EUR)		
Net interest income	13,371	10,575	8,785	8,525

Dividend Payout ratio(5)	46.0	45.3	42.9
Tier 1 Capital Ratio(6)	8.45	10.62	8.46
Total Capital Ratio(6)	11.14	13.14	11.06

Credit Quality Ratios

Provision for loan losses to private sector loans(7)	0.59	0.23	0.26
Provision for loan losses to private and public sector loans(7)	0.57	0.22	0.25
Non-performing loans to private sector loans (gross)(7)(8)	2.31	1.72	2.28
Non-performing loans to private and public sector loans (gross)(7)(8)	2.23	1.68	2.22
Allowance for loan loss to private sector loans(7)	1.15	1.09	1.36
Allowance for loan loss to private and public sector loans(7)	1.11	1.06	1.32
Allowance for loan losses to non-performing loans (gross) (10)	50.03	63.07	59.47
Write offs to private sector loans (gross)(7)	0.36	0.39	0.53
Write offs to private and public sector loans (gross)(7)	0.35	0.38	0.51
Consolidated ratio of earnings to fixed charges			
Excluding interest on deposits(9)	1.54	1.78	1.76
Including interest on deposits(9)	1.19	1.25	1.22

- (1) Net interest income as a percentage of average total assets.
- (2) Operating expenses as a percentage of total operating income.
- (3) Profit for the year as a percentage of average total assets.
- (4) Net profit attributable to Ordinary Shares as a percentage of average ordinary shareholders' equity excluding the reserves with respect to cash flow hedges and available for sale securities.
- (5) Dividend per Ordinary Share as a percentage of net profit per Ordinary Share.
- (6) Tier 1 capital and total capital as a percentage of risk-weighted assets under Bank for International Settlements guidelines. For more information on our capital ratios, see "Item 5. Operating and Financial Review and Prospects—B. Liquidity and capital resources".
- (7) Excludes professional transactions (2006: EUR 94 billion; 2005: EUR 75 billion; 2004: EUR 59 billion) because these primarily consist of reverse repurchase agreements with no credit risk and multi seller conduits (2006: EUR

- 26 billion; 2005: EUR 26 billion; 2004: EUR 24 billion).
- (8) Non-performing loans are doubtful loans for which there is objective evidence that not all contractually agreed amounts will be collected and for which an allowance for loan losses is established. For more information on non-performing loans see “Item 5. Operating and Financial Review and Prospects—C. Selected statistical Information—Analysis of Loan Loss Experience: Provisions and Allowances for Loan Losses—Potential credit risk loans”.
- (9) Deposits include banks and total customer accounts.
- (10) The decrease of the ratio is a result of the acquisition of Antonveneta. As a result of purchase accounting applied the loans of Antonveneta were consolidated at fair value, with the allowances for loan losses on (non-performing) loans embedded in the fair value. Therefore no allowances for loan losses were separately reported against these acquired non-performing loans at acquisition date.

Selected financial data in accordance with US GAAP

The following financial data in accordance with US GAAP illustrate the effect of reconciling items under US GAAP based on the IFRS balance sheet and income statement.

Basic earnings per Ordinary Share (in EUR)		2.35	1.57	1.68
Diluted earnings per Ordinary Share (in EUR)		2.34	1.56	1.67
Basic earnings per American Depositary Share (in USD)(2)		2.97	1.94	2.09
Shareholders' equity per Ordinary Share (in EUR)		14.73	14.76	12.44
Shareholders' equity per American Depositary Share (in USD)(3)		19.43	17.47	16.97

- (1) Amounts in this column are unaudited. Solely for your convenience, Euro amounts have been translated into USD for income statement items at an exchange rate of 1 USD = EUR 0.7909, the rate equal to the average of the month-end rates for 2006, and for balance sheet items at an exchange rate of 1 USD = EUR 0.75838, the exchange rate on 31 December 2006.
- (2) This item has been translated into US dollars at the rate equal to the average of the month-end rates for the applicable year.
- (3) This item has been translated into US dollars at the applicable year-end rate.

Selected ratios in accordance with US GAAP

The following ratios in accordance with US GAAP illustrate the effect of reconciling items under US GAAP based on the IFRS balance sheet and income statement.

	At or for the Year Ended 31 December		
	2006	2005	2004
	(in percentages)		
Profitability Ratios			
Net interest margin	1.1	1.1	1.2
Non-interest revenue to total revenue	57.1	49.1	40.3
Efficiency ratio	76.2	80.7	83.6
Return on average total assets	0.47	0.35	0.40
Return on average ordinary shareholders' equity	15.6	11.3	13.9
Credit Quality Ratios(1)			
Provision for loan losses (net) to private sector loans (gross)(2)(3)	0.61	0.19	(0.08)
Provision for loan losses (net) to private and public sector loans (gross)(2)(3)	0.58	0.19	(0.08)
Non-performing loans to private sector loans (gross)(3)(4)	2.31	1.72	2.28
Non-performing loans to private and public sector loans (gross)(3)(4)	2.23	1.68	2.22
Allowances for loan losses to private sector loans (gross)(3)	1.33	1.28	1.61
Allowances for loan losses to private and public sector loans (gross)(3)	1.28	1.25	1.56
Allowances for loan losses to non-performing loans (6)	57.44	74.43	70.43
Write-offs to private sector loans (gross)(3)	0.36	0.39	0.53
Write-offs to private and public sector loans (gross)(3)	0.35	0.38	0.51
Consolidated Ratios of Earnings to Fixed Charges			
Excluding interest on deposits(5)	1.53	1.49	1.46
Including interest on deposits(5)	1.19	1.15	1.13

- (1) Excludes specific provision for sovereign risk (2004: EUR 13 million) as the exposure for this risk is primarily classified under securities.
- (2) Includes release from the fund for general banking risks (2004: EUR 835 million).
- (3) Excludes professional securities transactions (2006: EUR 94 billion; 2005: EUR 75 billion; 2004: EUR 59 billion) because these primarily consist of reverse repurchase agreements with no credit risk and multi seller conduits (2006: EUR 26 billion; 2005: EUR 26 billion; 2004: EUR 24 billion).
- (4) Non-performing loans are doubtful loans for which there is objective evidence that not all contractually agreed amounts will be collected and for which an allowance for loan losses is established. For more information on non-performing loans see "Item 5. Operating and Financial Review and Prospects—C. Selected Statistical Information—Analysis of Loan Loss Experience: Provisions and Allowances for Loan Losses—Potential credit risk loans".
- (5) Deposits include banks and total customer accounts.
- (6)

The decrease of the ratio is a result of the acquisition of Antonveneta. As a result of purchase accounting applied the loans of Antonveneta were consolidated at fair value, with the allowances for loan losses on (non-performing) loans embedded in the fair value. Therefore no allowances for loan losses were separately reported against these acquired non-performing loans at acquisition date.

Dividends

Dividends on Ordinary Shares may be paid out of profits as shown in our consolidated financial statements, as adopted by the Supervisory Board and approved by the general meeting of shareholders, after the payment of dividends on preference shares and convertible preference shares and the establishment of any reserves. Reserves are established by the Managing Board subject to approval of the Supervisory Board.

Holding has paid an interim and final dividend for each of the last five years. The following tables set forth dividends paid in respect of the Ordinary Shares for 2006 through 2002.

Dividends	2006(1) USD	2006	2005 (in EUR)	2004
Interim dividend	0.70	0.55	0.50	0.50
Final dividend	0.80	0.60	0.60	0.50
Total dividend per Ordinary Share	1.50	1.15	1.10	1.00
Total dividends per share as a percentage of net profit per Ordinary Share	–	46.0%	45.3%	42.9%

(1) For your convenience, this item has been translated into US dollars at the applicable rate on the date of payment. The only one that is different is the 2006 final dividend, which has been translated into US dollars at the exchange rate of 1 USD = EUR 0.7515, the exchange rate on March 16, 2007.

The information for 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in a separate table. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Dividends	2003 (in EUR)	2002
Interim dividend	0.45	0.45
Final dividend	0.50	0.45
Total dividend per Ordinary Share	0.95	0.90
Total dividends per share as a percentage of net profit per Ordinary Share	49.0%	64.7%

B. Capitalisation and indebtedness

Not required because this document is filed as an annual report.

C. Reason for the offer and use of proceeds

Not required because this document is filed as an annual report.

D. Risk Factors

Set forth below are certain risk factors that could have a material adverse effect on our future business, operating results or financial condition. You should carefully consider these risk factors and the other information in this document before making investment decisions involving our shares. Additional risks not currently known to us or that we now deem immaterial may also harm us and affect your investment.

Our results can be adversely affected by general economic conditions and other business conditions

Changes in general economic conditions, the performance of financial markets, interest rate levels, the policies and regulations of central banks or other business conditions may negatively affect our financial performance by affecting the demand for our products and services, reducing the credit quality of borrowers and counterparties, putting pressure on our loan loss reserves, changing the interest rate margin between our lending and borrowing costs, changing the value of our investment and trading portfolios and putting pressure on our risk management systems.

Changes in interest rate and foreign exchange rates may adversely affect our results

Fluctuations in interest rates and foreign exchange rates, particularly in our three home markets of the Netherlands, the United States Midwest and Brazil and in Italy where we have a significant presence, influence our performance. The results of our banking operations are affected by our management of interest rate sensitivity. Interest rate sensitivity refers to the relationship between changes in market interest rates and changes in net interest income. A mismatch of interest-earning assets and interest-bearing liabilities in any given period may, in the event of changes in interest rates, have a material adverse effect on the financial condition of our business or results from operations. In addition, we publish our consolidated financial statements in euros. Fluctuations in the exchange rates used to translate other currencies into euros affect our reported consolidated financial condition, results of operations and cash flows from year to year.

For 2006, 14.9% of our operating income and 14.4% of our operating expenses were denominated in USD and 13.6% of our operating income and 10.2% of our operating expenses were denominated in Brazilian Real. For 2005, 18.5% of our operating income and 18.3% of our operating expenses were denominated in USD and 11.8% of our operating income and 10.1% of our operating expenses were denominated in Brazilian Real. For a discussion of how interest rate risk and foreign exchange rate fluctuation risk is managed, see “Item 11. Quantitative and Qualitative Disclosures about Market Risk” as well as Note 39 to our consolidated financial statements.

Our performance is subject to substantial competitive pressures that could adversely affect our results of operations

There is substantial competition for the types of banking and other products and services that we provide in the regions in which we conduct large portions of our business, including the Netherlands, the United States and Brazil. The intensity of this competition is affected by consumer demand, technological changes, the impact of consolidation, regulatory actions and other factors. We expect competition to intensify as continued merger activity in the financial services industry produces larger, better-capitalised companies that are capable of offering a wider array of products and services, and at more competitive prices. In addition, technological advances and the growth of e-commerce have made it possible for non-depository institutions to offer products and services that were traditionally banking products and for financial institutions to compete with technology companies in providing electronic and internet-based financial solutions. If we are unable to provide attractive product and service offerings that are profitable, we may lose market share or incur losses on some or all of our activities.

Regulatory changes or enforcement initiatives could adversely affect our business

We are subject to banking and financial services laws and government regulation in each of the jurisdictions in which we conduct business. Banking and financial services laws, regulations and policies currently governing us and our subsidiaries may change at any time in ways which have an adverse effect on our business. If we fail to address, or appear to fail to address, these changes or initiatives in an appropriate way, our reputation could be harmed and we could be subject to additional legal risk. This could, in turn, increase the size and number of claims and damages asserted against us or subject us to enforcement actions, fines and penalties. As previously reported, in July 2004 we signed a Written Agreement with the US regulatory authorities concerning our dollar clearing activities in the New York branch. In addition, in December 2005, we agreed to a Cease and Desist Order with the Dutch Central Bank and various US federal and state regulators. This involved an agreement to pay an aggregate civil penalty of USD 75 million and a voluntary endowment of USD 5 million in connection with deficiencies in the US dollar clearing operations at the New York branch and OFAC compliance procedures regarding transactions originating at the Dubai branch. See “Item 4. Information on the Company - B. Business overview - Legal and regulatory proceedings”. We and members of our management continue to provide information to law enforcement authorities in connection with ongoing criminal investigations relating to our dollar clearing activities, OFAC compliance procedures and other Bank Secrecy Act compliance matters. These compliance issues and the related sanctions and investigations have had, and

will continue to have, an impact on the Bank's operations in the United States, including limitations on expansion. The Bank is actively exploring all possible options to resolve these issues. The ultimate resolution of these compliance issues and related investigations and the nature and severity of possible additional sanctions cannot be predicted, but regulatory and law enforcement authorities have been imposing severe and significant monetary and other penalties against a number of banking institutions for violations of the Bank Secrecy Act and related statutes.

There is operational risk associated with our industry which, when realised, may have an adverse impact on our results

We, like all financial institutions, are exposed to many types of operational risk, including the risk of fraud or other misconduct by employees or outsiders, unauthorised transactions by employees and operational errors, including clerical or record keeping errors or errors resulting from faulty computer or telecommunications systems. We may also be subject to disruptions of our operating systems, arising from events that are wholly or partially beyond our control (including, for example, computer viruses or electrical or telecommunication outages), which may give rise to losses in service to customers and to loss or liability to us. We are further exposed to the risk that external vendors may be unable to fulfil their contractual obligations to us, and to the risk that their business continuity and data security systems prove to be inadequate. We also face the risk that the design of our controls and procedures prove to be inadequate or are circumvented. Although we maintain a system of controls designed to keep operational risk at appropriate levels, we have suffered losses from operational risk in the past and there can be no assurance that we will not suffer material losses from operational risk in the future.

For a discussion of how operational risk is managed see “Item 11. Quantitative and Qualitative Disclosures about Market Risk”.

We are subject to credit, market and liquidity risk, which may have an adverse effect on our credit ratings and our cost of funds

Our banking businesses establish instruments and strategies that we use to hedge or otherwise manage our exposure to credit, market and liquidity risk. To the extent our assessments of migrations in credit quality and of risk concentrations, or our assumptions or estimates used in establishing our valuation models for the fair value of our assets and liabilities or for our loan loss reserves, prove inaccurate or not predictive of actual results, we could suffer higher-than-anticipated losses. For more information relating to our credit ratings, refer to “Item 5. Operating and Financial Review and Prospects - B. Liquidity and capital resources”. Any downgrade in our ratings may increase our borrowing costs, limit our access to capital markets and adversely affect the ability of our businesses to sell or market their products, engage in business transactions - particularly longer-term and derivatives transactions - and retain our current customers. This, in turn, could reduce our liquidity and have an adverse effect on our operating results and financial condition.

Systemic risk could adversely affect our business

In the past, the general credit environment has been adversely affected by significant instances of fraud. Concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions because the commercial soundness of many financial institutions may be closely related as a result of their credit, trading, clearing or other relationships. This risk is sometimes referred to as ‘systemic risk’ and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges with whom we interact on a daily basis, and could have an adverse effect on our business.

Increases in our allowances for loan losses may have an adverse effect on our results

Our banking businesses establish provisions for loan losses, which are reflected in the loan impairment and other credit risk provisions on our income statement, in order to maintain our allowance for loan losses at a level that is deemed to be appropriate by management based upon an assessment of prior loss experiences, the volume and type of lending being conducted by each bank, industry standards, past due loans, economic conditions and other factors related to the collectability of each entity’s loan portfolio. For further information on our credit risk management, refer to “Item 11. Quantitative and Qualitative Disclosures about Market Risk”. Although management uses its best efforts to establish the allowances for loan losses, that determination is subject to significant judgment, and our banking

businesses may have to increase or decrease their allowances for loan losses in the future as a result of increases or decreases in non-performing assets or for other reasons. Please also refer to the section “Accounting Policies” included in our consolidated financial statements. Any increase in the allowances for loan losses, any loan losses in excess of the previously determined provisions with respect thereto or changes in the estimate of the risk of loss inherent in the portfolio of non-impaired loans could have an adverse effect on our results of operations and financial condition.

We depend on the accuracy and completeness of information about customers and counterparties

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of the customers and counterparties, including financial statements and other financial information. We also may rely on the audit report covering those financial statements. Our financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with generally accepted accounting principles or that are materially misleading.

We are subject to legal risk, which may have an adverse impact on our results

It is inherently difficult to predict the outcome of many of the litigations, regulatory proceedings and other adversarial proceedings involving our businesses, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve novel legal claims. In presenting our consolidated financial statements, management makes estimates regarding the outcome of legal, regulatory and arbitration matters and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Changes in our estimates may have an adverse effect on our results. Please also refer to “Item 4. Information on the Company - B. Business overview - Legal and regulatory proceedings”.

Our ownership structure and the laws of the Netherlands may contain restrictions on shareholder rights and holders of American Depositary Receipts (ADRs) are not able to exercise certain shareholder rights

Our Articles of Association and the laws of the Netherlands may contain restrictions on shareholder rights that differ from US practice. For instance, a holder of ADRs is not treated as one of our shareholders and is not able to exercise certain shareholder rights. JPMorgan Chase, as Depositary, is the holder of our ordinary shares underlying the ADRs. An ADR holder will have those rights contained in the Deposit Agreement between us, the Depositary and the ADR holders. These rights are different from those of the holders of our ordinary shares, including with respect to the receipt of information, the receipt of dividends or other distributions and the exercise of voting rights. In particular, an ADR holder must instruct JPMorgan Chase to vote the ordinary shares underlying the ADRs. As a result, it may be more difficult for ADR holders to exercise those rights. In addition, there are fees and expenses related to the issuance and cancellation of the ADRs.

For a discussion of our ownership structure see “Item 10. Additional Information - B. Memorandum and Articles of Association”.

You may have difficulty enforcing civil judgments against us

Holding is organised under the laws of the Netherlands and the members of its Supervisory Board, with two exceptions, and its Managing Board are residents of countries outside the United States. Although some of our affiliates, including the Bank, have substantial assets in the United States, substantially all of the assets of Holding and of the members of the Supervisory Board and the Managing Board are located outside the United States. As a result, it may not be possible for investors to effect service of process upon Holding or upon these persons, or to enforce judgments of US courts predicated upon the civil liability provisions of US securities laws against Holding or these persons. The United States and the Netherlands do not currently have a treaty providing for reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not predicated solely upon US federal securities laws, would not be enforceable in the Netherlands. However, a Dutch court may, under current practice, recognise the final judgment that has been rendered in the United States and may grant the same claim without rehearing the merits under certain circumstances, unless the consequences of the recognition of such judgment would contravene public policy in the Netherlands.

Item 4. INFORMATION ON THE COMPANY

A. History and development of the company

Please refer to the accounting policies section of our consolidated financial statements.

16

Selected recent acquisitions and disposals

Please refer to Note 2 to our consolidated financial statements.

Recent developments

General Meeting of Shareholders

By letter dated 20 February 2007, The Children's Investment Fund ("TCI") requested us to put the following five motions on the agenda for our upcoming annual General Meeting of Shareholders on 26 April 2007: (i) portfolio break-up; (ii) return of capital; (iii) investigate a sale or merger of the Bank; (iv) reporting back to our shareholders in six months, and (v) acquisitions moratorium for the coming six months. As TCI holds more than 1% of our shares, it has the right under Dutch law to put items on the agenda of our annual General Meeting of Shareholders and we have honored its request. We do not believe that the interests of our shareholders would be best served by the mere short-term cash generation actions embodied in these proposals. We have recommended our shareholders to vote against the first two motions and, as we have already materially incorporated the last three motions in our plans, we see no need for our shareholders to vote in favour of these motions. At this time, we can neither determine the outcome of the shareholders' vote on TCI's motions nor whether any other shareholders may take an activist stance.

Barclays PLC

On 19 March 2007, we issued a joint statement with Barclays PLC that we are in exclusive preliminary discussions with respect to a potential merger of the two organisations. At this time it is not yet clear if our talks with Barclays PLC will ultimately lead to a merger proposal. If our discussions do not lead to a merger proposal, we will examine other sustainable alternatives including our standalone business case. If our talks do lead to a merger proposal, we will recommend it to shareholders without prejudice to compliance with our fiduciary duties and communicate the benefits to our shareholders. The ultimate outcome of these discussions will depend on the consultation with and the approvals of the multiple regulators and other stakeholders in the various jurisdictions.

Prime Bank

On 5 March 2007 we announced that we entered into agreements to acquire a 93.4% interest in Prime Bank from shareholders for a cash consideration of PKR 13.8 billion (EUR 172 million). In addition, we announced our intention to launch a tender offer for all remaining shares of Prime Bank from minority shareholders.

B. Business overview

Overview

We are a prominent international banking group offering a wide range of banking products and financial services on a global basis through our network of 4,532 offices and branches in 56 countries and territories as of year-end 2006. We are one of the largest banking groups in the world, with total consolidated assets of EUR 987.1 billion at 31 December 2006. We are listed on Euronext and the New York Stock Exchange.

Our Bank is the result of the merger of Algemeen Bank Nederland N.V. and Amsterdam-Rotterdam Bank N.V. in 1990. Prior to the merger, these banks were, respectively, the largest and second-largest bank in the Netherlands. Our Bank traces its origin to the formation of the Nederlandsche Handel-Maatschappij, N.V. in 1825, pursuant to a Dutch Royal Decree of 1824.

Group Strategy

As an international bank with European roots, ABN AMRO focuses on consumer, commercial, and private banking activities. Our business mix gives us a competitive edge in our chosen markets and client segments. Our clients are the prime beneficiaries of our relationship-based business approach, which we apply through our Business Units (BUs).

Our growth strategy is to build on ABN AMRO's strong position with mid-market clients, and to provide clients in this segment with high-quality and innovative products and services from across the Group. In other words, our strategy is aimed at combining local client intimacy and global product excellence.

We serve our mid-market consumer and commercial clients - the bank's 'sweet spot' client segments - primarily through our five regional Client BUs: the Netherlands, Europe (including Antonveneta in Italy), North America, Latin America and Asia.

The consumer mid-market segment includes mass affluent customers served by our regional Client BUs, as well as the majority of our private banking clients served by BU Private Clients. The commercial mid-market segment includes a significant number of medium-to-large companies and financial institutions served through our regional Client BUs.

These clients typically require a local banking relationship, an extensive and competitive product suite, an

international network, efficient delivery, and, for corporates, sector knowledge. With our range of businesses and capabilities we can deliver on all of these requirements, in many cases uniquely so.

The dominance of the mid-market in our strategy does not diminish the importance of the top and bottom end of our client pyramid. In serving our top private banking clients, we are able to develop innovative investment products that can later be offered to our mid-market consumer clients as well. At the same time, serving large multinational corporations enables us to strengthen our industry knowledge and product innovation, both of which will eventually benefit our mid-market commercial clients. Both the mass retail segment and the small business segment deliver the necessary scale and act as a feeder channel for future mid-market clients.

We aim to continue to improve our strategic position by winning more clients in our chosen markets and client segments, and by making carefully targeted investments that enhance our corresponding product capabilities. Our activities in Italy and the emerging markets in Europe and Asia are clear examples of how our growth strategy is applied.

The acquisition and integration of Antonveneta, a new part of ABN AMRO, was completed in 2006. This acquisition further increases our footprint in the promising Italian market. Meanwhile, the BUs Europe and Asia are successfully exploiting the attractive opportunities that are opening up in several emerging markets. BU Asia is focusing specifically on Greater China (encompassing the People's Republic of China, Hong Kong and Taiwan), India, Pakistan, Singapore and Indonesia.

Our Business

In January 2006, ABN AMRO moved to reinforce its mid-market focus and realise the benefits of being one bank more effectively by adopting a new structure. This structure enables us to share expertise and operational excellence across the Group with greater impact.

ABN AMRO's Group structure comprises:

- seven Client BUs
- three Product BUs
- two cross-BU Segments
- Group Functions
- Services

The seven Client BUs consist of five regional BUs (Netherlands, Europe including Antonveneta in Italy, North America, Latin America and Asia) and two global BUs, Private Clients and Global Clients.

The three Product BUs (Global Markets, Transaction Banking and Asset Management) support the Client BUs by developing and delivering products for all of our clients globally.

We bind all our Client BUs together through a cross-BU Consumer Client Segment and a cross-BU Commercial Client Segment. These Segments drive winning formulas across our various geographies, and work with the Product BUs to deliver high-quality solutions to clients.

Group Functions delivers value-added support across the Group in areas ranging from Risk to Finance and from Human Resources to Sustainability, while always balancing global control with local flexibility and expertise.

Services continues to focus on increasing our operational efficiency through Group-wide consolidation and standardisation.

As we are embedding and mainstreaming sustainable development in our daily business operations, various examples of how sustainability is applied are included in the description of our BUs.

As it is customary for ABN AMRO to share the financial results of its Private Equity business separately, a

description of its operations is included as well.

For the financial results of the Group and each individual BU, please refer to “Item 5. Operating and Financial Review and Prospects”. The financial results of BU Global Markets and BU Transaction Banking are reported in the regional BUs.

Business Units

Client BUs

BU Netherlands

Serving a vast and diverse client base that comprises consumer and commercial clients, BU Netherlands is at the forefront of the Dutch banking industry. BU Netherlands employs approximately 21,800 people and serves its clients through a network of 561 bankshops, 78 advisory branches, five dedicated mid-market corporate client units and two large-corporate client units. BU Netherlands also operates some 1,600 ATMs, four integrated call centres, and internet and mobile channels. BU Netherlands’ call centres and internet banking services are now every bit as important as the advisory branches for serving its small to medium-sized enterprise (SME) clients.

Strategy, products and services

BU Netherlands’ aspiration is to become the primary bank for all its chosen clients. It aims to do this by delivering a service that makes a difference and is always personal, through every channel. In line with ABN AMRO’s mid-market strategy, BU Netherlands’ key competitive advantage lies with mass affluent individuals and SMEs. BU Netherlands is a fully integrated consumer and commercial bank offering a focused range of financial products and services. Alongside its own product capabilities, BU Netherlands actively uses product knowledge from the bank’s other BUs. In addition BU Netherlands offers insurance products provided by its joint venture with Delta Lloyd.

Through its integrated multi-channel service model, BU Netherlands provides clients with financial products and services 24 hours a day, seven days a week. In 2006, BU Netherlands’ enhanced operating model – consisting of Value Centre Consumer, Value Centre Commercial and centralised mortgage activities – led to a further improvement in its operational performance, which in turn enabled it to improve its client service still further.

The alignment of the Group structure with the bank’s strategy has brought benefits for BU Netherlands. In 2006, BU Netherlands was able to increase its product sales and number of clients by leveraging the current range of Global Markets products with SME and consumer clients. The resulting combination of improved service and wider

product range led to improved client satisfaction. At the same time, BU Netherlands continued to operate special service concepts for targeted client segments, such as young professionals.

Looking at the interests of Dutch society as a whole, ABN AMRO recognises the importance of entrepreneurship in sustaining economic growth. To help entrepreneurs – especially those from disadvantaged backgrounds – to start businesses, BU Netherlands has developed a special ‘StartersCoach’ credit facility through which the bank not only provides credit to start-ups, but offers coaching from experienced entrepreneurs as well. BU Netherlands also believes that entrepreneurs who do not succeed the first time should have the opportunity to start again if they have a sound business plan. This is part of BU Netherlands’ wider ambition to change Dutch society’s generally negative view on so-called failed entrepreneurs.

Bouwfonds

Bouwfonds is an international property group with three core activities: developing, financing and managing property. The business is active in both the residential and commercial markets and ranks among the Netherlands’ leading property companies.

In December 2005, ABN AMRO, in its capacity as Bouwfonds’ sole shareholder, announced its intention to sell the non-mortgage activities of Bouwfonds during the course of 2006. With effect from 1 January 2006, Bouwfonds’ mortgage business was transferred to ABN AMRO Mortgage Group, which is part of BU Netherlands.

On 31 July 2006, ABN AMRO agreed to sell Bouwfonds Property Development, Bouwfonds Asset Management, Bouwfonds Public Fund Management, Bouwfonds Holding and Rijnlandse Bank to Rabobank, and Bouwfonds Property Finance (encompassing project financing, investment financing and risk-bearing interests in projects) to SNS Bank. The share transfers to Rabobank and SNS Bank were completed on 1 December 2006.

Initiatives for 2007

In 2007, BU Netherlands will be rolling out the ‘Meerwaarde’ (‘Added Value’) strategy in both Value Centre Consumer and Value Centre Commercial. Customer advocacy is at the heart of the ‘Meerwaarde’ strategy for consumer clients, with whom BU Netherlands aims to capitalise on its position as a leading professional bank that is trustworthy and transparent, and that above all acts in the best interests of the client. The ‘Meerwaarde’ strategy will be targeted at both the mass retail segment and also the mass affluent segment, which consists of clients with more than EUR 50,000 in liquid assets or a net income of more than EUR 5,000 a month. The explicit focus with this segment will be on the acquisition of new clients. At the same time, the ‘feeder’ function of mass retail services will be strengthened by focusing on young professionals and top-end mass retail clients. To achieve this goal, BU Netherlands will continue to invest in people, processes and systems.

With commercial clients, the ‘Meerwaarde’ strategy will strengthen BU Netherlands claim to be a true partner in business by giving priority to investments in employees, internet and innovation. Investing in these areas will help BU Netherlands to fulfil its promise to act as enabler for its clients’ businesses, by supporting them with integrated financial advice and solutions based on thorough knowledge and international expertise.

BU Netherlands and BU Europe together will play a key role in ABN AMRO’s implementation of measures to comply with the EU’s Markets in Financial Instruments Directive (MiFID) and will seek to benefit from the business opportunities that arise as a result.

BU Europe

BU Europe (excluding Antonveneta in Italy)

BU Europe brings together all of ABN AMRO's activities in 27 countries: 23 countries in Europe (excluding the Netherlands) along with Kazakhstan, Uzbekistan, Egypt and South Africa. BU Europe employs approximately 8,000 people, including support functions serving all BUs operating in the region.

BU Europe provides its consumer and commercial clients with a focused range of financial products and services. Its regional strategies and operations are closely aligned with those of ABN AMRO's global BUs.

20

Strategy, products and services

In 2006, BU Europe focused a significant proportion of its efforts on improving its profitability by taking various measures and aligning its commercial activities and back-office services with the new Group structure.

BU Europe's strategy is to target 'sweet spot' clients, encompassing financial institutions, public sector organisations, mid-market and large corporations and mass affluent consumer clients. This strategy is executed by combining intimate local client knowledge with global product expertise, network capabilities and a global services platform. A number of revenue-enhancing initiatives have been put in place to help drive organic growth, such as focusing on financial institutions and the public sector, strengthening the consumer banking activities, and developing a new delivery model for mid-market clients.

BU Europe's revenues from financial institutions and public sector clients have increased by improving the focus on origination and delivery of products to these client groups. Special attention is paid to the delivery of derivatives and private investor products, complemented by Transaction Banking and other Global Markets products. This approach has proven to be very successful.

BU Europe has been grown its consumer banking activities in selected countries, with a focus on high-growth emerging market economies. This will enable consumer banking to make a substantial contribution to BU Europe's overall performance within the next few years.

In 2006, BU Europe developed a new sales and delivery model for mid-market commercial clients. By bundling products that meet the most frequently occurring client needs, combined with simplified back-office processes, the BU has created the foundation to enhance its services to mid-market clients, leading to greater volumes supported by a lower cost base. This new service concept will be rolled out in 2007 in selected markets.

In 2006 many new sustainability initiatives were launched across BU Europe, thereby contributing to ABN AMRO's sustainable development strategy and inspiring its employees. These initiatives included the launch of new products, such as water certificates aimed at private investors. Employees continued to volunteer their professional skills on a pro bono basis to support their local communities. Staff participation in community involvement programmes included projects in conservation work, mentoring young people, running career workshops for early school leavers, and reading with children.

Initiatives for 2007

BU Europe is committed to return to profitability in 2007 and will continue to pursue its organic growth strategy aimed at mid-market corporations, financial institutions, public sector organisations and consumer clients. BU Europe will also seek to improve its performance by reducing the cost base through the implementation of a common services platform and the elimination of inefficiencies in processes, support functions and client coverage models. Key initiatives in 2007 will include improved capital management and the reallocation of capital between different client segments and locations. As part of this, BU Europe aims to improve its returns on capital by focusing increasingly on the emerging markets of Eastern Europe and Central Asia. Financial institutions and the public sector segment will remain key growth areas for BU Europe.

During 2007, BU Transaction Banking will be developing new products for ABN AMRO's European client base that will be compliant with the new Single Euro Payments Area (SEPA) infrastructure. These products include new cross-border payments, insourcing solutions for financial institutions and payment card propositions. Together with BU Global Clients, BU Europe will invest in delivering dedicated industry expertise to regional clients.

BU Europe and BU Netherlands together will play a key role in ABN AMRO's implementation of measures to comply with the EU's Markets in Financial Instruments Directive (MiFID) and will seek to benefit from the business opportunities that arise as a result.

Antonveneta

ABN AMRO acquired a majority stake in Antonveneta in January 2006 and launched a tender offer for the remaining shares on 27 February 2006. It acquired 100% of the bank in July 2006 after it exercised its right to purchase the shares it did not yet own following its tender offer.

The integration of Antoveneta into the Group was started early on in the year and completed in December 2006. Antonveneta's structure and governance have now been aligned with that of the Group. However, due to the

complex and protracted nature of the bid battle that preceded the acquisition of Antonveneta, it has taken time to stabilise the bank's business operations.

Antonveneta and its main subsidiaries, Interbanca and AAA Bank, are among the leading banks in Italy, with Antonveneta holding a ranking among the top ten groups in the major banking classifications. Antonveneta has over 1,000 branches in Italy. The bank is strongly rooted in northeast Italy, where 459 of its domestic branches are located. Integrated with the branch network are more than 1,100 ATMs and about 63,000 points-of-sale, as well as home and remote banking facilities. As at 31 December 2006 its employees numbered approximately 9,600.

Strategy, products and services

During 2006, Antonveneta and its subsidiaries continued to operate successfully in the consumer banking, commercial banking, merchant banking and asset management sectors, in line with the strategy defined in its '2004 - 2006 Business Plan'. The results were helped by consolidation of the bank's competitive positioning in strategic sectors. In particular, its core activities were more closely defined and further strengthened; its focus on the consumer client segment and on small and medium-sized enterprises was intensified; and services for clients were further enhanced, especially in portfolio management.

In consumer banking, Antonveneta has undertaken several important initiatives aimed at widening its activities. These include actions aimed at acquiring new clients and retaining existing ones, as well as strengthening the bank's residential mortgage lending – a booming sector in Italy.

With regard to commercial clients, Antonveneta has been able to focus its lending activities on those companies most involved in the Italian economy's current growth phase, thanks partly to the strong presence and efforts of its branches and 'unità imprese' (corporate units), and partly to synergies with Interbanca, its specialist medium- and long-term financing and merchant banking subsidiary.

In asset management and more generally in portfolio management, Antonveneta and its subsidiary AAA Bank continued to help investors to diversify their financial assets.

As regards operations, Antonveneta has undertaken a number of initiatives to capitalise on potential synergies with ABN AMRO, creating full alignment between the structures of ABN AMRO and Antonveneta and improving operational efficiency and effectiveness in the process.

Initiatives for 2007

On 11 December 2006, ABN AMRO and Antonveneta announced plans for the further development of Antonveneta, which include transforming the consumer bank, strengthening the commercial bank and building the private bank. Antonveneta's new organisational structure is inspired by the ABN AMRO Group model. This model, adjusted to suit the specific attributes of the Italian marketplace, maintains the bank's focus on its clients – both individuals and SMEs – as well as defining a matrix organisation that enhances its ties to the Group's functions. This renewed focus on clients will be put into effect both through new products and personalised services, including those made possible by ABN AMRO's deep-rooted and widespread international structure, and also through ongoing innovations in operational skills and communications at Antonveneta. The last feature will become evident immediately in the bank's relationship with all its stakeholders and the entire domestic community, thanks to the completion of the rebranding process.

In the Italian banking system, Antonveneta will be characterised as a strongly rooted bank, able to support Italian businesses in their ongoing process of integration into the international economy.

BU North America

ABN AMRO's sizeable North American operations, collectively called BU North America, are headquartered in Chicago, Illinois, home of LaSalle Bank Corporation. BU North America also includes ABN AMRO's global businesses operating in the US and Canada. With approximately 15,000 employees, BU North America serves individuals, corporations, institutions, non-profit entities and municipalities in the US and Canada through its 434 branches and offices.

A premier relationship bank with assets of nearly USD 123 billion, LaSalle Bank is North America's 17th

largest bank holding company and the 15th largest in terms of deposits. It serves its clients through a comprehensive range of channels, including more than 400 retail branches and 1,600 ATMs. Access to ABN AMRO's global resources allows LaSalle's clients to tap markets virtually anywhere in the world.

Strategy, products and services

BU North America aims to establish enduring relationships with its clients by understanding their goals and providing the best and most appropriate financial products and services.

BU North America's offerings include commercial banking services, real estate finance, personal finance, small-business services, national mortgage origination and distribution, investment banking advisory, derivatives and risk management services, and treasury, trade, trust and securities services.

BU North America remains focused on two primary client groups: mass affluent individuals and mid-market companies. An important achievement in 2006 was the successful integration of its wholesale client-services unit with LaSalle's commercial businesses. In the process, a more efficient platform was created combining two debt capital-markets, foreign-exchange, derivatives, and loan-syndication businesses into a single delivery system.

In the consumer banking arena, BU North America continued to pursue its mass affluent strategy, which includes providing Preferred Banking services, enhancing the bank's wealth-management and small-business services, and addressing consumers' desire for convenience and ease of use. In commercial banking, BU North America opened offices in 2006 in San Francisco, Houston and Omaha, taking the BU's network of regional commercial banking offices across the continent to 23.

In common with other banks, BU North America faced pressures on margins, a slowing economy and fierce competition in 2006. In response, the BU took significant steps to address these challenges and improve its financial results by focusing on what is important to its clients and operating in the most effective, efficient manner possible. Following a strategic review that covered all aspects of BU North America's expenditure, structural changes will be effected in the North American business in 2007, including staff reductions across nearly all areas of the business and at all major locations. BU North America expects that approximately 900 positions, equivalent to 5% of the North American workforce, will be affected over the course of 2007, with most of those reductions coming in the first half of the year. The strategic review also resulted in the decision to sell ABN AMRO Mortgage Group, Inc., BU North America's US-based residential mortgage brokerage origination platform and servicing business, to Citigroup. The sale was announced in January 2007 and closed on 28 February 2007. Consumer mortgage and home equity loans will continue to be delivered as core products by LaSalle Bank Corporation through its retail branch network.

The planned changes will help BU North America with the continuous improvement of its operations, maintain its high standards of relationship management, and ensure efficient delivery of an outstanding set of products and services to its clients.

Despite these challenges, BU North America performed well on many fronts during 2006. For example, it:

- Expanded the amount of business it conducts with local subsidiaries of non-North American companies;

Increased the market share of, among others, its consumer, global securities and trust services, and loan syndications businesses;

- Became the dominant provider of Employee Stock Ownership Plan (ESOP) loans to the mid-market;
- Increased by more than 50% the number of cross-border, asset-based financing transactions;

Edgar Filing: ABN AMRO HOLDING N V - Form 20-F

- Launched a commodity derivatives distribution business, surpassing the first-year target by 100%;
 - Greatly enhanced its hedging products;
 - Broadened the number of financial-institution clients by 25%;
 - Further reinforced its culture of innovation and collaboration; and

- Made significant progress in building a strong culture of compliance.

BU North America also made important strides in sustainable development. As part of its Green Building Initiative, the BU hosted a programme for clients, real estate developers and employees to present the newest research on 'green' building. BU North America's three main office buildings are close to achieving LEED (Leadership in Energy and Environmental Design) certification. And, to promote greater adoption of renewable energies, BU North America invested in three wind-power projects in the US and Canada.

Initiatives for 2007

For 2007, BU North America's goal remains unchanged: to develop deep, long-term relationships with individuals, businesses, non-business institutions, its employees and the communities in which it operates. In consumer banking, this means providing each client with an exceptional experience characterised by ease of use and convenience, regardless of the channel he or she chooses. In commercial banking, it means making ABN AMRO's global capabilities available to more mid-sized and small-business clients.

In the coming year, BU North America will continue to target its 'sweet spot' of mass affluent individuals and mid-market businesses - the two markets that offer the BU the greatest opportunities to distinguish itself and grow profitably.

To help exploit these opportunities, the BU will focus on collaborating across departments, business lines and continents, in order to find more and better ways to serve clients, give them offerings they want and need, make it easier for them to do business, and help them grow.

At the same time, BU North America will seek additional ways to use technology to drive business results and further differentiate itself from competitors. It also will pursue opportunities to generate additional fee-based income. At the same time, it will remain vigilant in its efforts to use capital more efficiently and manage expenses more wisely.

BU North America is committed to strengthening its culture of compliance, strong controls, ethical behaviour and unassailable business practices. This is BU North America's formula for making good on its promises to its clients and other stakeholders - and to maintaining their enduring trust and loyalty.

BU Latin America

ABN AMRO has had a presence in Brazil since 1917. In recent years it has consolidated its already strong position in the top tier of Brazilian banks by acquiring Banco Real and Bandepe in 1998, Paraiban in 2001 and Banco Sudameris in 2003. ABN AMRO operates in the Brazilian market as Banco Real.

Banco Real functions as a fully integrated consumer and commercial bank on a nationwide basis through more than 1,900 stand-alone and in-company branches, 6,700 points-of-sale and 8,700 ATMs. Today, Banco Real is the third-largest privately owned bank in Brazil.

Since 1 January 2006, ABN AMRO's Caribbean and Latin American operations outside of Brazil have come together with Banco Real to form BU Latin America. Outside of Brazil, BU Latin America focuses primarily on the commercial client segment, although in Paraguay and Uruguay it also focuses on the consumer client segment. Currently, BU Latin America has approximately 28,000 employees. The Brazilian operations are BU Latin America's largest in the region by a substantial margin.

Strategy, products and services

Banco Real aims to differentiate itself by satisfying client needs through the offering of a focused range of financial products and services and by establishing close, long-term and sustainable relationships with its consumer, private and commercial clients.

Van Gogh Preferred Banking services, which Banco Real offers to its mass affluent clients across Brazil, reinforce the bank's international identity and provide a key aspirational element within its consumer banking strategy.

Through the Aymoré franchise, BU Latin America is also a major player in the Brazilian consumer finance business. Aymoré has relationships with more than 15,000 active car dealerships distributing vehicle financing and other consumer goods financing nationwide.

The commercial banking operation uses a single product platform and sophisticated segmentation to enhance its focus and efficiency – thereby enabling Banco Real to deliver a seamless product offering for multinational corporations and to capitalise on its large mid-market commercial client base, served by specialised regional and mid-market relationship management teams. This approach has enabled the bank to capture new business opportunities throughout the current economic cycle and increase its market share among commercial clients, strengthening its position as one of Brazil's leading commercial banks.

During the year, Banco Real's consumer and commercial banking activities enabled it to achieve strong credit portfolio growth and the highest credit-to-total-assets ratio among the main Brazilian banks. On the other hand, in common with other players in the Brazilian market, the bank suffered a significant deterioration in its provisioning during the first half of 2006, due to an increase in delinquencies in the market.

However, it should be noted that Banco Real achieved better provisioning results than its peers. This was testament to the risk management department's consistent efforts to mitigate growth in provisions, including maintaining constant close monitoring of the portfolio, approaching debtors through different channels and selling off portfolios of bad loans.

In the other countries in which BU Latin America is active (Argentina, Chile, Colombia, Ecuador, Mexico, Paraguay, Uruguay and Venezuela), revenue generation in 2006 was focused primarily on credit activities. Consumer markets and 'sweet spot' commercial banking activities have been thriving and show further potential for growth, mainly driven by the growth in credit usage and 'bankarisation' (i.e. clients' growing tendency to use banking services from duly regulated, formal financial institutions). However, competition in these countries has been increasing, as competitors from outside the region are once again targeting investments within it.

ABN AMRO is widely recognised as a pioneer and leader in the development of sustainable bank-society relationships in Brazil. BU Latin America's long-standing recognition of the importance of ethical principles in the way it does business has now developed into a strong overall commitment to society and the environment.

Banco Real has been named one of the best companies to work for in Brazil for the fifth consecutive year in a national business survey. It also undertakes several socially responsible initiatives such as implementing Brazil's first carbon credit transaction in 2006, applying an environmental, social and ethical risk policy to project finance, and providing microfinance services. By year-end 2006, BU Latin America's microfinance business reached out to 11,500 Brazilian clients, compared with 8,300 clients in 2005. The BU's microfinance business has evolved from a pilot to a sizeable business activity; it is now active in over 70 communities in nine cities across Brazil. In 2006, BU Latin America's microfinance business reached break-even. In addition, the BU now offers a range of social and environmental financing products, which are specifically geared towards promoting better consumption and management of natural resources by companies, encouraging professional improvement and training by individuals and reinforcing the inclusion of socially disadvantaged people.

Initiatives for 2007

In 2007, BU Latin America aims to continue to optimise the performance of its operating platform through a segmented approach to financial services. It will support and service individuals, entrepreneurs and small to medium-sized business owners. Hand-in-hand with its help for these major drivers of economic growth, it will contribute both to Brazil's and Latin America's development and to the sustainability of ABN AMRO's businesses.

The Aymoré consumer finance franchise plans to maintain its leading position in vehicle financing, by expanding new brand/dealer relationships and elongating financing terms at the same time as extending its acquisition finance activities to cover more types of goods. The bank's consumer finance client base will also provide an excellent cross-selling platform for Banco Real's retail banking business.

BU Asia

ABN AMRO has been operating for well over 100 years in several Asian countries including Indonesia, China, Singapore and Japan. BU Asia now covers 16 countries and territories, operating through 165 branches and offices

(excluding those of Saudi Hollandi Bank, in which ABN AMRO has a 40% stake). BU Asia's client base includes commercial clients as well as consumer and private banking clients. It employs approximately 14,000 people, including support functions serving all BUs operating in the region. Its employees' ability to combine global expertise with intimate knowledge of their local markets enables BU Asia to offer world-class financial products and services to its clients across the region.

Strategy, products and services

BU Asia puts its aggressive growth strategy into effect by combining ABN AMRO's global structure, products and expertise with its local knowledge and client relationships. To build and sustain these relationships, BU Asia provides its banking services through a consumer client and a commercial client segment.

With nearly 5,300 employees in eight countries, the consumer client segment focuses on delivering market-leading wealth management and consumer finance services – including Van Gogh Preferred Banking – to its Asian client base through 79 branches.

In 2006, BU Asia maintained its strong focus on the growth markets of China and India, where it opened five and three new branches respectively. A further four branches were opened across the BU's other operating countries.

BU Asia's credit cards business also expanded rapidly, with the number of cards issued in 2006 exceeding the previous year's issuance by over 19%, and ending net receivables reaching records levels across the operating countries. These results were achieved despite the credit crisis in Taiwan, which affected all players in that market and resulted in higher defaults. BU Asia's Taiwan business was successful in achieving lower losses than most other major issuers, and well below the market average.

The commercial client segment is comprised of 550 staff serving more than 10,000 corporate, financial institution and public sector clients. With coverage in 16 countries and territories, the commercial client segment is structured around in-country relationship management teams supported by smaller, regional industry-focused teams. It provides clients with a broad spectrum of products and services across Global Markets, Transaction Banking, Lending, Mergers & Acquisitions and Equity Capital Markets.

Through BU Asia's strategy, both the consumer client and commercial client segments aim to increase revenues significantly on a continuing basis and retain leading positions in several key markets.

Sustainability is a key component of BU Asia's strategy and the success of the microfinance business in India is a great example of this. Started less than three years ago, ABN AMRO has emerged as an important player in microfinance and continues to be one of the largest foreign banks in the sector. Partnering with over 25 microfinance institutions and reaching across eight states in India, the portfolio grew by 93% year on year. By year end 2006, BU Asia's microfinance business reached out to more than 340,000 households compared with 178,000 households in 2005. The BU's microfinance business in India continues to operate profitably.

Initiatives for 2007

The year 2007 will be important for BU Asia in its continuing drive to realise its long-term goals. The key focus in 2007 will be on sustaining its strong revenue growth, increasing new client acquisition rates, deepening existing client relationships, and retaining and recruiting high-quality staff.

The consumer client segment will concentrate on deepening the Van Gogh Preferred Banking value proposition for its mass affluent client base, increasing the breadth of BU Asia's product sub-segments, and expanding distribution channels through its branch network and internet banking.

The commercial client segment will continue to enhance its product offering through ongoing product development. Both BU Transaction Banking and BU Global Markets will continue to improve and expand their product offerings across the Asian region. Furthermore, the Commercial Client Segment plans to extend and strengthen its position in the SME and mid-market client segments.

BU Global Clients

BU Global Clients serves a group of clients who demand the most sophisticated financial solutions customised to their specific needs. These clients are attracted to ABN AMRO by the industry expertise of the BU's bankers, who can deliver the required financial solutions by accessing both ABN AMRO's network and the broad range of products across the Group's portfolio. The product innovation and accumulated experience that result from working with these clients actively drives the development of high-quality solutions for all clients of the bank, both within BU Global Clients and across the regional BUs.

The four client industry groups that BU Global Clients serves are Financial Institutions & Public Sector; Telecommunications, Media & Technology; Energy & Resources; and Global Industries (including Automotive, Consumer and Global Industrials). BU Global Clients also comprises dedicated Mergers & Acquisition and Equity Capital Markets teams.

BU Global Clients is organised around six hubs (Amsterdam, London, New York, Hong Kong, Sao Paulo and Sydney), and directly employs around 980 people. The financial results of BU Global Clients also reflect the contribution of 230 people employed by ABN AMRO Mellon, a joint venture with the Mellon Financial Corporation that provides global custody and value added services to institutional investors worldwide.

Strategy, products and services

In order to meet the sophisticated financing, advisory and risk management needs of its multinational client base, BU Global Clients' bankers access products and services, including specialist commercial banking coverage, from ABN AMRO's regional BUs, BU Global Markets and BU Transaction Banking. Simultaneously, Global Client's hub-based industry bankers deliver their knowledge to the regional clients. This structure allows BU Global Clients' industry expertise and Mergers & Acquisitions and Equity Capital Markets products to be made available to all chosen clients across the bank in support of the overall Group strategy.

BU Global Clients' senior relationship bankers and industry teams are dedicated to maintaining a strategic dialogue in order to create tailored structured financial solutions, while the Mergers & Acquisitions and Equity Capital Markets teams support origination, execute and deliver product and advisory services on strategic issues ranging from mergers and acquisitions, divestitures and takeover defences, corporate restructurings and strategic alliances. Via the ABN AMRO Rothschild joint venture, the Equity Capital Markets team offers a full range of Equity Capital Markets products and related advisory services.

Through its strong and established client relationships, BU Global Clients is consistently active in its contribution to the Group's sustainability development initiatives. BU Global Clients realises that many of its clients face global challenges ranging from climate change effects, security issues, health issues and demographic shifts in their customer base, to poverty alleviation and environmental issues. BU Global Clients' knowledge and understanding of these challenges allow its senior relationship bankers to engage with their clients to address their challenges and create new business opportunities, balancing people, planet and profit considerations. In addition, although BU Global Clients is not responsible for its clients' and suppliers' businesses, it is serious about the responsibility for selecting the businesses and transactions they want to deal with; its client-facing teams have environmental, social and ethical risk filters available to determine the clients' commitment to act responsibly.

Initiatives for 2007

In line with ABN AMRO's overall desire to improve returns, BU Global Clients aims to deliver a sustainable return on assigned risk capital of 20% in 2007 and beyond. The BU has identified a range of measures to achieve this target. These measures are designed to foster both revenue growth and product cost efficiency especially from BU Global

Markets and BU Transaction Banking. This will lead to a reallocation of capital and people towards fast-growing market segments in which the bank is able to benefit from its strong position. In addition, BU Global Clients already has exceptionally strong relationships and high share of chosen clients' wallets in the telecommunications, healthcare, metals/mining and consumer/retail industries, and will focus in 2007 on strengthening the relevant industry groups and driving growth in these sectors by providing idea-led coverage to its clients.

Further resources will be allocated to the growing financial institutions sector, with a greater focus on growth segments (such as insurance companies and pension funds/investor clients) and strengthening of dedicated solution teams.

BU Private Clients

BU Private Clients offers private banking services to wealthy individuals and institutions with EUR 1 million or more in net investable assets. With Assets under Administration of EUR 140 billion in 2006, BU Private Clients is one of the top five private banks in Europe and ranks among the largest private banks worldwide. BU Private Clients has more than 3,300 employees, operating in 23 countries from 103 branches.

The needs of wealthy clients vary greatly. Therefore, BU Private Clients tailors its services to suit the requirements of well-defined client segments and their different sources of wealth. Across all segments, the BU's consistent focus on building strong relationships and being engaged with its customers is key to its success. BU Private Clients' products are based on an open architecture model, enabling the BU to offer its clients the best available products regardless of the actual provider.

Strategy, products and services

BU Private Clients' private banking strategy for Europe is differentiated by its ability to nourish local brands while giving them the support of a strong international institution. BU Private Clients continues to be a leading player in private banking in the Netherlands and France, and has strong positions in Switzerland, Germany, Luxembourg and Belgium. Its position was further strengthened in 2006 by the successful integration of Bank Corluy into Private Clients Belgium, the acquisition of a majority share in VermogensGroep in the Netherlands, and the merger in France of Banque de Neuflyze and Banque OBC, creating Neuflyze OBC. BU Private Clients' status as a leading player in Europe continues to be supported by its strong revenue growth in specific markets, including the Netherlands, France and Belgium.

To accelerate growth in Asia, BU Private Clients promotes the use of its client engagement model and focuses on building a stronger sales force, and refining its product offer in the region. The BU has made further strides within Private Clients Asia in its Indian Private Banking unit including increases in customer engagement and well-received product innovations, such as becoming one of the first providers to offer its clients capital protection instruments. In cooperation with BU Latin America, BU Private Clients is expanding its presence successfully in the growing Brazilian market by opening a new branch in Sao Paulo.

The strategic divestments made in 2006 – the sale of our businesses in Monaco and Denmark – will allow BU Private Clients to focus on growth in other private banking markets and further enhance the efficiency of its global structure.

As the International Diamond and Jewelry Group's (ID&JG's) strategic focus on credit products has only limited alignment with the activities of BU Private Clients, it was decided to separate ID&JG from this BU. From 1 January 2007, ID&JG reports directly to the Managing Board.

Finally, the successful completion of ABN AMRO's Client Acceptance and Anti-Money Laundering (CAAML) policy within all BU Private Clients units was another important step forward during the past year.

Initiatives for 2007

BU Private Clients has set an ambitious growth target for Assets under Administration by 2010. It aims to meet this target by achieving strong organic growth and optimising its global reach through further strategic acquisitions in selected markets.

On 1 January 2007, BU Private Clients launched its private banking business in Italy. During the coming year the BU will further build its Italian domestic private banking business, strengthening the BU's European franchise in the process. In all its other chosen markets, BU Private Clients will continue to build scale to improve its competitive

position and efficiency throughout 2007.

A further area in which BU Private Clients will increasingly seize opportunities during 2007 is the Private Wealth Management segment. This segment, which consists of clients with more than EUR 25 million in liquid assets, is growing at a fast pace. To address its specific needs, BU Private Clients is expanding its service offering and creating dedicated Private Wealth Management units throughout Europe. In targeting this segment, the BU will actively leverage the expertise of VermogensGroep.

BU Private Clients believes that the commitment of its employees and clients is indispensable to the BU's efforts to reach its ambitious growth objectives. With this in mind, BU Private Clients will remain focused on its employee and customer engagement initiatives in 2007. Additionally, in order to make a positive contribution to sustainable development, BU Private Clients has developed a focused range of new sustainable investment products, which will be launched in 2007. Going forward, the BU aims to integrate sustainability considerations increasingly closely into its investment advice to clients.

Product BUs

BU Global Markets

BU Global Markets helps to drive the current and future growth of ABN AMRO by delivering product solutions that meet the diverse capital markets requirements of the bank's chosen clients. BU Global Markets is organised into four core areas: Equities (multi-product trading and distribution); Financial Markets (multi-asset-class trading and distribution); Fixed Income Capital Markets (integrated cross-border fixed-income origination); and Structured Lending (syndicated and structured loans). The BU Global Markets team is made up of approximately 3,500 employees with hubs in Amsterdam, Chicago, Hong Kong, London, New York, Singapore and Sydney.

Strategy, products and services

BU Global Markets combines the Group's global product expertise with local client intimacy. It develops innovative solutions for financial institutions, mid-market clients and sophisticated multinationals, working in close cooperation with the regional and global Client BUs.

Throughout 2006, BU Global Markets built up increased momentum across all lines of business, delivering operating income growth in each core area and in each of the bank's five regions. The BU surpassed its commitment to achieve a five percentage point improvement in its efficiency ratio for 2006, through a series of initiatives delivering sustained improvement in productivity and efficiency and providing a further platform to build on.

Key actions in 2006 included:

- Focusing investment in areas of established product strength (for example the Private Investor Product franchise) and in support of key growth opportunities (including structured and derivative products);
- Tighter cost control;
- Greater discipline in choices about the BU's participation in certain products or regions, based on the extent to which particular activities explicitly support its chosen client base (for example the sale of the BU's Global Futures business and the withdrawal from US Treasury primary dealer activities); and
- A number of human resource initiatives aimed at developing and supporting a high-performance culture, including tighter alignment of reward.

In delivering this improvement in performance, BU Global Markets has continued to build on its established reputation for innovative, sustainable product solutions that incorporate social and governance considerations. For example, in 2006 BU Global Markets developed socially responsible solutions across a number of business lines:

- The Commodity Derivatives team started trading on an over-the-counter basis in EU allowances and building a pipeline of potential carbon credit trades under the Kyoto protocol scheme;

- Equities established a market leading position in listing some of the first 'carbon' businesses; and
- Structured Lending developed new products backed by emissions allowances and carbon credits.

In addition, the Private Investor Products business successfully introduced a range of eco-related products in 2006. It is expected that revenues from this product line will grow significantly in 2007. BU Global Markets' portfolio includes index-based products in water and clean energy as well as sector-based solar and biofuels indices.

Initiatives for 2007

The focus of BU Global Markets in 2007 will be on continuing to deliver against its efficiency target from the stable base established during the past year. Critical to this will be the achievement of material growth by providing BU Global Markets' product solutions to the target 'sweet spot' client base.

Based on the structural improvements realised in 2006 and the momentum created across all business lines, BU Global Markets has brought forward its profitability improvement plans. It is now targeting an efficiency ratio of 75% for 2007, which it aims to achieve through a combination of revenue growth and tight cost control.

There is significant scope for further increases in revenues and improvements in BU Global Markets' efficiency ratio by more effectively leveraging the BU's product offering with the Group's existing clients, particularly the commercial and financial institution client segments that the Group is targeting. Financial institutions have underpinned much of the revenue growth in 2006 and are a particular area of emphasis for 2007 and 2008.

BU Global Markets will continue to analyse all aspects of its business and make participation choices that give the BU the best opportunity to serve ABN AMRO's clients profitably. In order to do this, it is willing to forgo market share in certain products or regions where these activities do not support the bank's targeted clients. At the same time, BU Global Markets will continue to invest in its infrastructure and in its people, continuing to build and maintain a high-performance culture.

BU Transaction Banking

BU Transaction Banking provides cash management, trade services and payment cards for all of ABN AMRO's client segments, across all regions worldwide. Bank accounts and payments services lie at the core of BU Transaction Banking's activities and at the heart of the bank's client relationships. Across all segments, these services provide the foundation for cross-selling, enabling us to expand the relationship with each client. With a focused team of approximately 1,600 mainly regionally based staff, BU Transaction Banking provides services in more than 50 countries and handles billions of transactions every year.

Strategy, products and services

Marked by good progress in several key areas, 2006 was a good year for BU Transaction Banking. These included growing the BU's overall business by 13%, making continued progress with its client satisfaction indices, increasing its footprint for web-based delivery to all major locations, providing thought leadership in the debate surrounding the Single Euro Payments Area (SEPA) and further improving its recognition in the marketplace by winning eight major awards. BU Transaction Banking continued to make solid progress towards achieving its strategic objectives – to increase its scale, expand its cross-border business and invest in selected growth markets.

Transaction banking is a scale-driven business that requires investment in state-of-the-art technology. BU Transaction Banking is tackling this challenge by growing its business with financial institutions and capitalising on opportunities in Europe arising from the implementation of SEPA and the Payment Services Directive. ABN AMRO's global capabilities give BU Transaction Banking a competitive advantage in terms of insourcing business from other banks, enabling it to engage in a worldwide effort to win mandates in a number of product areas, with particular strength in trade processing services. SEPA will level the playing field in Europe and enable the bank to build scale by offering payment products seamlessly across the eurozone.

Since ABN AMRO is one of the top global players in the transaction banking industry, and cross-border payment flows are forecast to grow significantly over the next decade, BU Transaction Banking is well-placed to capture a larger share of this business. Global expansion is encouraging mid-market companies to seek out lowest-cost sourcing

and to move into new geographic markets. BU Transaction Banking is already capitalising on these trends successfully by intermediating both sides of transactions via its supply chain solutions, and by helping its commercial clients to manage the flow of both funds and goods as they expand into international markets.

BU Transaction Banking believes there are good opportunities to grow its business further and faster, particularly in Asia and Eastern Europe. The BU's strategy is to invest in key growth markets to maximise the opportunities available in these fast-growing economies, and the results show that the BU is on track to achieve these goals.

BU Transaction Banking actively supports ABN AMRO's sustainability related initiatives through the bank's regional BUs. The Mobile Banking initiative for microfinance in India is an example of the BU's active engagement. The appointment of BU Transaction Banking's CEO Ann Cairns as Chairwoman of the 'ABN AMRO Foundation', the bank's charitable poverty alleviation organisation, will further support the BU's efforts to foster sustainable development.

Initiatives for 2007

BU Transaction Banking's strategic focus in 2007 will continue to be on increasing its scale and cross-border business volume as well as investing appropriately in selected growth markets. Other objective on the BU's list of priorities include improving its infrastructure to maximise the advantages the BU's scale provides, and focusing on integration to gain greater efficiencies.

The acquisition of Antonveneta in Italy has provided ABN AMRO with a large domestic transaction banking presence in the country. BU Transaction Banking's objective for 2007 is to drive forward a strategic agenda for the Italian market aimed at realising potential synergies and maximising the value of growth opportunities.

The high-quality earnings generated by BU Transaction Banking's business provide a stable and predictable annuity stream with an attractive return on equity. The BU's goal is to continue to build scale in this business in order to increase the returns to the bank even further. To help it do this, the BU will reduce unit costs by driving more volume through its infrastructure, leveraging its expertise and solid reputation to grow processing volumes insourced from other financial institutions. BU Transaction Banking will also build scale by improving its share of business from growth markets and by capitalising on the opportunities to expand its footprint in Europe as a result of SEPA.

BU Asset Management

BU Asset Management is ABN AMRO's global asset management business, managing approximately EUR 193 billion in specialist mandates and mutual funds. BU Asset Management has more than 1,500 employees and operates in 26 countries worldwide, offering investment products in all major regions and asset classes. Its products are distributed directly to institutional clients such as central banks, pension funds, insurance companies and leading charities. Funds for private investors are distributed through ABN AMRO's consumer and private banking arms, as well as via third-party distributors such as insurance companies and other banks. The business from institutional clients represents just over half of the assets managed by BU Asset Management. Consumer and third-party clients account for a further 30%, and the remainder is in discretionary portfolios managed for BU Private Clients.

Strategy, products and services

For BU Asset Management, 2006 represented the third year of a strategic programme to focus on markets in which it can establish critical mass and build sustainable profitable growth, both for the bank's shareholders and its clients. BU Asset Management acquired International Asset Management, a leading 'fund of hedge funds' manager, in February and completed its integration in May, enabling the BU to provide its clients with a broader range of specialised investment capabilities and enhanced expertise from a trusted provider.

April saw the sale of BU Asset Management's US mutual fund business to Highbury Financial Inc. This enabled the BU to strengthen its position in the US by concentrating on the institutional marketplace - BU Asset Management's core US business, representing more than USD 35 billion in Assets under Management. The sale involved 19 mutual funds accounting for USD 6 billion, the management of which remains with BU Asset Management.

In June, BU Asset Management increased its share in its Beijing joint venture to the 49% maximum permitted by Chinese law, and changed its local partner from XiangCai Securities to Northern Trust, a member of Tianjin TEDA

holdings - a major conglomerate with assets of approximately EUR 8 billion. Additionally, the BU raised the joint venture's registered capital to EUR 18 million from EUR 10 million to facilitate its foray into the institutional portfolio management business and the qualified domestic institutional investor business, allowing domestic offshore investment.

In July, the BU divested its onshore Taiwanese asset management business to ING Group. BU Asset Management will now provide retail and third-party distributors in this market with a focused range of offshore

investment opportunities and services. These achievements further underline the BU's commitment to focus on high-quality assets, profitable businesses, growth, and leveraging its global capabilities.

Throughout 2006, BU Asset Management's socially responsible investment (SRI) initiatives gained momentum, with products that allow clients to invest in companies that work towards sustainable development. The BU offers more than 20 SRI funds. These funds invest in companies that maintain rigorous environmental, social and corporate governance criteria, while also showing solid performance. BU Asset Management believes its clients will benefit from investing in its SRI funds because companies that protect the environment, have good relations with their employees and communities, and have strong corporate governance policies, are better investment options in the long term.

BU Asset Management is also committed to integrating environmental, social and governance factors into its (non-SRI) investment processes. This process is reflected in the United Nations Principles for Responsible Investment, which the BU signed onto in May 2006.

Initiatives for 2007

BU Asset Management will remain committed to its private, consumer and commercial clients, operating on a global basis, while delivering high-quality service and solutions to clients via strong local presences. Having successfully completed its strategic programme in the past three years, 2007 will see the BU embark on the strategic journey to take it to 2010.

Part of this strategy will involve building closer links with other parts of the bank - particularly the consumer and private banking channel - in order to deliver better customer experience and maximise returns for the Group. As part of the Group's integration of Antoveneta, BU Asset Management will merge its asset management operations and expand into the important Italian market. The BU will pursue organic growth in all regions where it operates, with a particular focus on growth opportunities in North America and Asia. In the year ahead, the BU will continue to examine its product portfolio with a view to optimising its capabilities and the performance of its major products. On a service level, the BU will further strengthen its core business by placing emphasis on sales and client retention.

Cross-BU Segments

Consumer Client Segment

The Consumer Client Segment comprises the Consumer Banking heads of all ABN AMRO's Client BUs. Led by a member of the Managing Board, the Consumer Client Segment meets frequently to share results and identify new opportunities for growth.

The Consumer Client Segment management agenda, which was outlined early in 2006, has a primary focus on delivering growth for the consumer business. Realising that consumer banking is a multi-local business, the Consumer Client Segment aims to leverage ABN AMRO's global capabilities by replicating successes, driving synergies, and identifying global consumer initiatives. The ambition for growth is the guiding principle that underlies all new initiatives.

The continued roll-out of the Preferred Banking offering in several markets is one example of ABN AMRO's ability to export successful concepts, skills and best practice across markets. In the US, Preferred Banking has been rolled out in selected locations in Illinois and Michigan. In the same vein, the Young Professionals concept has been extended from the Netherlands to selected markets in Asia and Latin America. The adaptation of winning marketing formulas across the Group is a cornerstone of the bank's drive to maximise the potential of the Group. Young Professionals proves its success as being a feeder of clients into the bank's 'sweet spot' consumer segment.

In 2006, the Consumer Client Segment continued executing comprehensive analyses of ABN AMRO's existing credit card operations. As a result, best practice from various areas has been shared to further improve local credit card operations. The Consumer Client Segment also seeks to expand this approach to other business areas as well.

The talent of ABN AMRO's employees is an important factor in increasing growth in the bank's consumer banking business. In 2006 a structural talent exchange programme was established that facilitates deployment of talent where it is needed most and helps ABN AMRO's employees to further broaden their international and cultural skills and knowledge of consumer banking.

The priorities for 2007 will be based on the path for growth that was paved in 2006 and further investigation of opportunities for creating cross-BU synergies and advantages. The main focus will be on delivering the results of the projects that were started in 2006: enhancing the bank's credit cards operations and rolling out winning market formulas across the Group.

Commercial Client Segment

The Commercial Client Segment encompasses all of ABN AMRO's commercial clients, ranging from large multinationals through mid-market corporate clients to the SME client portfolios. Client relationships are maintained in the bank's regional Client BUs and the BU Global Clients, while the Commercial Client Segment coordinates activities across both the Client and Product BUs, sharing best practice and the overall strategic framework supporting this essential component of the bank's portfolio.

The main priorities and challenges for 2006 were to ensure that ABN AMRO's network and product capabilities were aligned to efficiently serve the needs of the bank's commercial client base, in a way that enhances client satisfaction and makes a positive contribution to overall shareholder value for the Group. Much of what was achieved in 2006 revolved around implementing best practice in different regions or client sub-segments.

The year 2007 will see the Commercial Client Segment execute a number of product initiatives in selected locations, such as the wider establishment of Regional Treasury Desks - which bring the basic BU Global Markets products to ABN AMRO's smaller clients in a more efficient manner - and the roll-out of the supply chain services offered by BU Transaction Banking to a wider set of clients.

The Commercial Client Segment will continue to optimise the use of capital to ensure that selected clients and initiatives are supported, while also seeking to address those areas and clients from which the bank does not yet generate sufficient returns.

At the start of 2006, the Commercial Client Segment launched an initiative to compare the global footprint of ABN AMRO's clients with the bank's international structure. The analysis showed potential opportunities for incremental business contacts with clients; as a result, a coordinated and concerted effort to connect ABN AMRO's bankers with these opportunities was initiated. This initiative is now being rolled out globally, with expected growth in network revenues of up to 20% when complete. As ABN AMRO continues to build this increased connectivity, the bank's clients will benefit from a more comprehensive international offering.

Other businesses

Private Equity

The business model of ABN AMRO's Private Equity unit - branded as ABN AMRO Capital - involves providing capital and expertise to non-listed companies in a variety of sectors. By obtaining, in most cases, a majority stake, Private Equity has the ability to influence the company's growth strategy and increase its profitability. It then aims to sell its shareholding at a profit after a number of years. Private Equity specialises in European mid-market buyouts, but also manages a portfolio of investments in Australian buyouts, non-controlling and controlling shareholdings in small to medium-sized Dutch companies ('participaties'), and dedicated media and telecom sector investments. It operates from seven offices across Europe and Australia and has 93 employees.

Strategy, products and services

In the past two years, Private Equity has developed and implemented major improvements to its business and operational model. This programme has involved changing its investment focus from taking minority shareholdings in

small to medium-sized early and later stage companies, to obtaining full control of mature mid-sized companies. Private Equity also reduced its geographical footprint, while at the same time increasing the average size of its investments. It now operates from the Netherlands, France, the Nordic countries, the UK, Italy, Spain and Australia.

This strategy change has resulted in Private Equity becoming a major player in European mid-market buyouts. In recent years it has consistently appeared in the top five most active European mid-market firms, both by number of new deals and number of exits. In 2006, the core European mid-market buyout business added nine new investments to its portfolio by investing in management buyouts, management buy-ins, secondary buyouts and buy-and-build investments. At 31 December 2006, the European buyout portfolio consisted of 46 companies in sectors

ranging from consumer, industrial engineering, to support services and media.

In 2006, Private Equity realised seven investments in its core market segment, bringing the total of realised investments out of its 2000-2006 European buyout portfolio to 31 companies. On average, Private Equity achieved a money multiple of 2.7 times the cost of its investments in these companies.

From an operational perspective, Private Equity successfully reorganised its business in 2006 as a semi-independent subsidiary of ABN AMRO with greater autonomy in its operational and decision-making governance. The current structure allows Private Equity to raise future funding from third parties more easily if deemed opportune. Further changes to its early stage portfolio have resulted in outsourcing the management of its IT portfolio. Additionally, it sold its Life Sciences portfolio to Forbion Capital Partners. ABN AMRO will continue to be an investor in Forbion's fund.

Initiatives for 2007

Following the reorganisation, Private Equity is in a good shape to focus solely on its regional and country activities as defined in its strategy. Private Equity believes that the Netherlands, the Nordic region and the UK represent the greatest potential for commercial and organisational synergies and will therefore focus its regional activities on the Northern European market. 2007 will be used to further integrate Private Equity's regional teams to continue to develop the top position they hold in the mid-market buyout segment in this market. Additionally, Private Equity will continue its country activities in Australia, France, Italy and Spain.

Private Equity is continually looking for ways to improve its investment managers' ability to identify and initiate value-enhancing strategies and initiatives at their portfolio companies. It has set up a programme of training sessions and reviews for 2007.

In the current competitive marketplace, Private Equity will use 2007 to focus on strengthening its relationships with key intermediaries, advisers and its network of existing and former managers of investee companies, in order to increase its chances to get access to proprietary dealflow.

Through its 'participaties' team, Private Equity is also working together with the BU Netherlands to add development and expansion capital to ABN AMRO's product offering for small-cap commercial clients. The 'Participaties Fund', which was set up in 2006, will be further promoted in 2007, allowing ABN AMRO to strengthen relationships with its small-cap client base and to enhance the prospect of cross-selling its banking products to Private Equity's small to medium-sized investments.

Group Functions

Group Functions provides guidance on ABN AMRO's corporate strategy and supports the implementation of the strategy in accordance with the bank's Managing for Value methodology, Corporate Values and Business Principles. By aligning and uniting functions across ABN AMRO's BUs and geographical territories, Group Functions also facilitates Group-wide sharing of best practice, innovation and positioning to public authorities, and binds the bank in both an operational and cultural sense. Group Functions has approximately 3,800 employees.

Strategy, products and services

Group Functions aims to be a centre of excellence, exploring value-creating opportunities, providing capabilities where needed and helping BUs meet their objectives, while balancing the interests of the BUs with those of the bank as a whole. In doing so, Group Functions promotes the bank's global brand name and the combined strength of the Group as one bank.

This mandate translates into four roles:

- **Governance:** Group Functions enables ABN AMRO to exist as a single entity and is responsible for corporate governance. It is in charge of compliance with regulatory and legal requirements, including compiling and reporting consolidated financial statements.
- **Influencing and making policy:** Group Functions adds value by assisting in the execution of the Managing

Board's strategic guidance. It designs, implements and monitors the standards and policies within which the BUs work. It also monitors performance targets and progress towards reaching them, and provides expert advice and assistance in key areas.

- Service provision: Group Functions facilitates and exploits cross-BU synergies by providing support services in specific business areas for the Group, in close cooperation with the BUs.
- Challenging: Group Functions challenges the BUs in the execution of their business strategies.

Group Functions carries out its activities through several departments, ranging from Group Finance to Investor Relations, Group Compliance & Legal to Group Communications and Group Risk Management to Group Human Resources. In addition, Group Functions oversees the financial performance of certain shareholdings, including the 8.6% stake in Italian bank Capitalia. The sale of ABN AMRO's 40.2% stake in Hungarian Kereskedelmi és Hitelbank (K&H Bank) to KBC Bank, which was announced on 12 December 2005, was completed on 29 May 2006. In September 2006, ABN AMRO sold its Global Futures business to UBS.

In 2006, a new organisation structure was adopted, which enabled Group Functions to be managed in a more integrated way across the various BUs within the Group. The ties between Group Functions and the BUs were further strengthened through a greater focus on internal client satisfaction.

Initiatives for 2007

On 30 October 2006, ABN AMRO announced that activities to improve operating performance in 2007 would be accelerated, among others by improving operational efficiency in Group Functions. These changes will affect more than 500 full-time equivalents (FTEs) at head office, predominantly in Risk Management and corporate IT projects, through a combination of outsourcing, offshoring and redundancies.

The strategic agenda for 2007 aims to improve operational efficiency in Group Functions and capitalise on initiatives started in 2006. This includes:

- Restructuring the Group Risk Management organisation.
- Transforming to a new HR operating model.
- Implementing the IT operating model for Group Functions more expeditiously.
- Ensuring regulatory compliance with the Sarbanes-Oxley Act, the International Financial Reporting Standards (IFRS), Basel II and the Cease and Desist Order imposed against the bank by US federal and state bank regulatory agencies in conjunction with ABN AMRO's home country supervisor, the Dutch Central Bank.
- Further developing and implementing a standardised Management Information System infrastructure within ABN AMRO.
- Finalising the integration of sustainability into the core activities of the BUs, Group Functions and Services.
- Establishing Group Public Affairs; this new function will be in charge of effective analysis of and engagement in the global political, economic, social and environmental arenas, enabling ABN AMRO to be a responsible corporate citizen, creating competitive advantage and more value for all stakeholders.

Services

ABN AMRO's Services organisation is responsible for delivering internal support services across the bank's global, regional and product BUs worldwide. Its core areas are IT, Operations, and Corporate Services.

The Services organisation was created in 2006, bringing together all services units within the bank and building on the experience of the Group Shared Services (GSS) programme, which was initiated in 2004. It currently has approximately 900 employees.

Strategy, products and services

The objective of the Services organisation is to deliver best-in-class support services to ABN AMRO's internal clients by leveraging its scale and optimising the use of shared services across the bank.

Services manages a portfolio of initiatives to deliver 'fuel for growth' – helping to drive the efficiency improvements that are required to enable ABN AMRO to release funds for new investments in areas with strong growth potential. These efficiency improvements, which were started at the end of 2004, are expected to realise net savings for the Group of at least EUR 900 million by the end of 2008.

In addition to making the transition to the new Group-wide organisation in 2006, Services has focused its attention on consolidating activities in Operations, further aligning the IT organisation, and accelerating planned initiatives to optimise the global property portfolio.

Services Operations

As part of the 'fuel for growth' strategy, Operations introduced the Services Operations initiative in April 2006. This programme comprises a portfolio of projects covering the full scope of Services Operations activities, with each project aimed at creating value by driving regional and global synergies and reducing duplication. The initiative brings together approximately 150 projects at the global, regional and local levels under a single umbrella programme, and includes large-scale systems replacements, process reengineering and consolidation, outsourcing and offshoring.

Services IT

Since ABN AMRO restructured its organisation in January 2006, all IT areas across the bank have been aligning themselves to the global multi-vendor operating model of Services IT. A number of alignment programmes are under way to ensure that the bank realises the full potential of its global outsourced technology contracts. Initial target areas contributing significant savings have been identified by these programmes, with an initial focus on the UK as part of BU Europe. Recent initiatives have included further offshoring and outsourcing of application development, rationalisation of servers and data centres, and a significant reduction in contractors and consultants.

Corporate Services

Global Property & Facilities Management Services continued to identify, coordinate and implement best practice across the ABN AMRO occupied property portfolio in 2006. This included making workspaces as efficient as possible, getting rid of surplus space and improving facilities management across the BUs.

Global Procurement continued to work in close cooperation with the other Services functions and its internal business partners to ensure best value for money from suppliers. A more rigorous category-planning process was launched in 2006, which ensures that business goals are clearly understood, that requirements are identified proactively and that sourcing plans are put in place. This approach puts the bank in a position to achieve best value from the supply market before undertaking specific transactions.

Sustainability

Services is committed to continuously improving the integration of sustainability into its workplace and business processes. In 2006, Services continued to incorporate sustainability criteria into its procurement processes, putting codes of conduct in place for products and services sourced during the year. A further important step forward was the successful piloting of a web-based reporting tool for tracking sustainability data per region, country or facility. This Sustainability Dashboard displays key data such as energy performance, which enables the bank's various facilities to

optimise their energy consumption. Services is also instrumental in the realisation of ABN AMRO's global energy efficiency programme, targeting a reduction of 10% in Group-wide energy consumption by 2008 (compared with 2004) based on relative metrics - kWh per square meter, kWh per FTE - and with a proportionate reduction in carbon dioxide emissions.

Initiatives for 2007

Services will accelerate the delivery of its existing market commitments in 2007, while actively seeking out new

opportunities to realise further efficiencies.

Services IT will concentrate on completing the implementation of its target operating model and governance. IT initiatives in 2007 will focus on further offshoring of application maintenance, consolidation of server environments and the transition of most of the infrastructure operations to the chosen vendor. In addition, a global IT product and service catalogue will be implemented to improve control of service options, quality and price for our internal clients.

New initiatives that were announced in 2006 in Services IT in BU Europe and in Services Operations will get fully under way in 2007.

Global Property & Facilities Management Services will drive further efficiencies, pursuing opportunities for continuing cost reductions and portfolio optimisation through space efficiency and surplus space elimination programmes, enhanced facilities management, and rightsizing and standardisation.

Within Procurement, preparations were made to set up a purchase-to-pay (P2P) initiative, which is planned to go into operation in early 2007. This initiative aims to achieve substantial direct efficiency savings and – more importantly – increased control, transparency and standardisation through the use of one global set of standard P2P processes and tools.

Compliance

ABN AMRO's compliance function provides senior management with independent oversight of the core processes and related policies and procedures that ensure that the bank conforms - in both letter and spirit - with industry-specific laws and regulations, and thereby maintains the bank's reputation. This oversight includes - but is not limited to - sanctions, monitoring of compliance standards, client acceptance and anti-money laundering, and good citizenship. The compliance function also acts in areas such as personal account dealing, conflicts of interest and the maintenance of Chinese walls.

The Managing Board is fully committed to ABN AMRO's Corporate Values in order to preserve the bank's integrity and reputation. By complying with the relevant laws and regulations in each of the markets in which it operates, ABN AMRO safeguards its reputation, its licence to operate, and its ability to create sustainable value for all stakeholders.

With effect from 1 January 2006, the Group Compliance organisation was restructured in order to align it further with ABN AMRO's new BU structure. By including Country Executives in the management of compliance issues, this development has significantly improved the bank's regulatory oversight and accountability. The new structure for compliance also places greater emphasis on global policy coordination, and on ensuring that policies are consistent across the bank's various regions.

In December 2006, ABN AMRO received the Dutch Compliance Award. This prize is awarded annually by the Dutch Compliance Institute to organisations or individuals who have developed pioneering initiatives on compliance and integrity or have developed proposals that lead to an increase in efficiency and quality of the compliance function.

Structure

The head of Group Compliance & Legal reports directly to the Chairman of the Compliance Oversight Committee of the Supervisory Board and to the Chairman of the Managing Board.

The Compliance Oversight Committee is a major component in ensuring that the bank operates with effective, enterprise-wide compliance risk management. Its role is to supervise ABN AMRO's compliance organisation,

activities and risk profile. For more information on the Compliance Oversight Committee, please refer to “Item 6. Directors, Senior Management and Employees—C. Board practices—Compliance Oversight Committee activities”.

The Compliance Policy Committee - the governing body responsible for the global coordination of compliance across the Group - is led by the Chairman of the Managing Board. The Compliance Policy Committee takes decisions on key compliance activities and provides broad oversight of Group Compliance. The other members of the Compliance Policy Committee are the Chief Risk Officer, the chairman of the Group Business Committee, the

head of Group Compliance & Legal and the heads of Group Compliance, Group Legal, Group Risk Management, Group Audit and Group Finance.

Group Compliance tasks

In accordance with the recommendations and standards of the Basel Committee on Banking Supervision, the mandate of Group Compliance is to:

- Identify risks and regulations relevant to ABN AMRO's activities;
- Design policies and procedures to minimise regulatory and reputational risk;
- Advise, train and provide reports to senior management with regard to the regulations and compliance with these regulations;
- Promote effective compliance and ensure or oversee follow-up actions in the event of non-compliance; and
- Manage regulatory inquiries and incidents.

Enforcement Actions

Our obligations under the Cease and Desist Order - whereby ABN AMRO must take all relevant measures to improve oversight and compliance in its US branches and offices governed by US law - were a top priority for Group Compliance in 2006. ABN AMRO continues to be engaged in the US Bank Secrecy Act compliance issues and related written agreement. Investigations have had, and will continue to have, an impact on the bank's operations in the US, including procedural limitations on expansion and the powers otherwise exercisable as a financial holding company. Also for 2007 Group Compliance will continue to advise on and assist the bank in meeting the requirements of the Enforcement Actions. See also "Item 3. Key Information - D. Risk Factors - Regulatory changes or enforcement initiatives could adversely affect our business."

Focus areas

In 2006 Group Compliance has explicitly focused on the following areas:

Compliance Risk Assessment & Monitoring

The global implementation of Compliance Risk Assessment & Monitoring is an ambitious and challenging undertaking for ABN AMRO. All jurisdictions worldwide face heightened levels of compliance risk, as the regulatory framework and burden continues to grow in both volume and complexity. Compliance Risk Management will assist the bank's BUs in identifying, assessing and managing their respective compliance risks.

Mindset Programme Wave II: 'Our values in action: acting with integrity'

The focus of our 'Mindset' programme has continued to raise awareness and strengthen the global compliance mindset throughout the bank. Senior management's involvement in setting the right tone from the top and communicating the importance of compliance to all staff is paying off.

Client acceptance and anti-money laundering

The Client Acceptance and Anti-Money Laundering (CAAML) policy contains the philosophy and approach to our Know Your Client (KYC) controls, with which we combat money laundering and terrorist financing. ABN AMRO aims to be at the forefront of anti-money laundering efforts around the world. Our highly-developed transaction monitoring system enables the bank to monitor and test transactions for their compliance with anti-money laundering legislation in over 50 countries.

The implementation of the global Anti-Money Laundering Oversight Committee puts in place a solid governance structure to steer ABN AMRO's anti-money laundering agenda. A bank-wide client risk reassessment project was conducted in 2006 to ensure that, on a risk-based approach, all the bank's clients comply with the relevant client due diligence requirements.

Group Security

Group Security contributes to a secure environment across ABN AMRO by developing global policies and standards for promoting physical security and preventing financial crime, delivering input and operational services to support the business' commercial and strategic decisions, and investigating serious security incidents and compliance breaches. By acting in partnership with the business, Group Security provides a security framework and related services that enable the business to take ownership of its security responsibilities.

Sustainable development

To create sustainable value for all our stakeholders, we run our business responsibly. This means behaving with integrity and openness, and taking environmental, social and ethical issues into account. This approach helps us to build and sustain the trust that underpins our license to operate, and enables us to be a valued business partner for our clients. In 2006 we intensified our sustainability-related activities by focusing on providing responsible financial services, building employee engagement, protecting our assets, being accountable and transparent, minimizing our direct impact and supporting local communities. We discuss our approach to sustainability in our Sustainability Report, which is published alongside the Annual Report, or at www.abnamro.com.

General

Competition

In each of our markets we operate in a highly competitive environment. Many large financial services groups offer sophisticated banking or investment banking services to corporate and institutional customers on a global basis. In addition, in the national markets in which we operate, we compete with local banks and other financial services companies. We also compete with other banks, money market funds and mutual funds for deposits and other sources of funds. In certain jurisdictions, many of our competitors are not subject to the same regulatory restrictions to which we are subject. See also "Item 3. Key Information - D. Risk factors - Our performance is subject to substantial competitive pressures that could adversely affect our results of operations."

Our Employees

As at 31 December 2006, we had 106,999 full-time equivalent employees (excluding the consolidation impact of private equity investments under IFRS), an increase of 14,473 since 31 December 2005. Approximately 10% of these employees hold managerial and executive positions. A breakdown of employees by business unit as of 31 December 2006, 2005 and 2004 is set forth in "Item 5. Operating and Financial Review and Prospects - A. Operating results".

All of our employees in the Netherlands, other than senior management, are covered by one collective labor agreement which is periodically renegotiated.

We have not experienced any significant strike, work stoppage or labor dispute in recent years. Our management considers our relations with our employees to be good.

SUPERVISION AND REGULATION

Regulation in the Netherlands

General

Holding and its subsidiaries, on a worldwide basis, are regulated in the Netherlands by the Dutch Central Bank and the Netherlands Authority for the Financial Markets, or “AFM”.

The bank regulatory system in the Netherlands is a comprehensive system based on the provisions of the new Financial Supervision Act, the “FSA”, which came into effect per January 1, 2007. The FSA has replaced, among others, the Act on the Supervision of the Credit System 1992 without affecting the existing supervisory system. The FSA gives rules regarding prudential supervision (by the Dutch Central Bank) and supervision of conduct (by the

AFM). Prudential supervision focuses on the solidity of financial undertakings and contributes to the stability of the financial sector. Supervision of conduct focuses on orderly and transparent financial market processes, clear relations between market parties and due care in the treatment of clients (amongst which supervision of the securities and investment businesses).

The Bank is a “universal bank” under the terms of the FSA because it is engaged in the banking business as well as the securities business. Certain provisions of the FSA may restrict the Bank’s ability to make capital contributions or loans to its subsidiaries and to make dividends and distributions to Holding.

Supervision of credit institutions

In general, under the FSA, credit institutions are supervised by the Dutch Central Bank. No enterprise or institution established in the Netherlands may pursue the business of a credit institution unless it has obtained prior authorization from the Dutch Central Bank. Its supervisory activities under the FSA focus on supervision of solvency, liquidity and administrative organization, including internal control and risk management. If, in the opinion of the Dutch Central Bank, a credit institution fails to comply with the rules and regulations concerning solvency, liquidity or administrative organization, the Dutch Central Bank will so notify the credit institution, and it may instruct the credit institution to behave in a certain manner. If the credit institution does not respond to any such instructions to the satisfaction of the Dutch Central Bank, the Dutch Central Bank may exercise additional supervisory measures, which may include the imposition of fines.

The FSA provides that each supervised credit institution must submit periodic reports to the Dutch Central Bank. In accordance therewith the Bank files monthly reports with the Dutch Central Bank. At least one monthly report for each given year must be certified by a registered accountant. The report to be certified is selected by the registered accountant in his or her discretion.

Solvency supervision

The solvency rules require that we maintain a minimum level of total capital to support the risk-weighted total value of balance sheet assets and off-balance sheet items, the latter of which includes guarantees, documentary credits, certain interest and currency-related contracts, unused portions of committed credit facilities with an original maturity of over one year, note issuance facilities and revolving underwriting facilities, as well as the market risk for financial instruments in the trading book. This minimum level of total capital is the Capital Adequacy Ratio. The risk-weighting considers the debtor’s risk, which depends on the debtor’s classification, whether or not security is provided, and the country of origin of the debtor. The legally required minimum Capital Adequacy Ratio currently is 8.00%, however, in practice a minimum ratio of 10% is agreed with the Dutch Central Bank. The solvency rules are applied to the world-wide assets of Dutch credit institutions.

For our company, total capital consists of core capital (also referred to as Tier 1 capital) and secondary capital (also referred to as Tier 2 capital). We also are permitted to maintain an additional form of regulatory capital, Tier 3 capital, to support the market risks of financial instruments in our trading book and foreign exchange risk of all business activities. Tier 1 capital consists of those parts of shareholders’ equity and minority interests that qualify as Tier 1 capital and subordinated liabilities that qualify as Tier 1 capital. Secondary or Tier 2 capital is divided into upper Tier 2 capital and lower Tier 2 capital. Upper Tier 2 capital consists of revaluation reserves and perpetual subordinated liabilities; lower Tier 2 capital consists mainly of long-term subordinated liabilities. Tier 3 capital consists of subordinated liabilities that have a minimum original maturity of at least two years, are not subject to redemption prior to maturity without the prior written consent of the Dutch Central Bank (other than in the event of a winding-up of the Bank) and are subject to a provision which provides that neither interest nor principal may be paid if, prior to or as a result of such payment, our Capital Adequacy Ratio would be less than the required minimum.

The amount of lower Tier 2 capital may not exceed 50% of the amount of Tier 1 capital, and the amount of Tier 2 capital included in total capital may not exceed the amount of Tier 1 capital. In addition, Tier 3 capital may not exceed 250% of the amount of Tier 1 capital that is necessary to support market and foreign exchange risks and the sum of Tier 2 and Tier 3 capital may not exceed Tier 1 capital. Goodwill and interests of more than 10% in non-consolidated banking and financial subsidiaries must be deducted from Tier 1 capital and total capital, respectively.

See “Item 3. Key Information - Selected financial data - Selected ratios” and “Item 5. Operating and Financial Review and Prospects - B. Liquidity and capital resources” for information concerning the Bank’s capital ratios.

Capital adequacy framework (Basel II)

On 26 June 2004, the Basel Committee on Banking Supervision endorsed the publication of the ‘International Convergence of Capital Measurement and Capital Standards: a Revised Framework’, commonly referred to as Basel II. The Capital Requirements Directive (CRD), representing the translation of Basel II to EU legislation and replacing the Capital Adequacy Directive (CAD), was approved by the European Parliament in September 2005. This acceptance by the European Parliament cleared the way in Europe for the implementation of the CRD, with a published compliance date of 1 January 2008.

The implementation process of Basel II into Dutch legislation and regulations was completed on 22 December 2006 when the Dutch Central Bank published its Supervisory rules.

Basel II allows for several different approaches to implement requirements for Credit, Market and Operational Risk. ABN AMRO aims to implement the most advanced approaches, for all risk types, at the earliest opportunity.

In setting up our Basel II programme, the teams across Risk, Finance, Services and the BUs have evolved as the implementation ramped up. Our key focus areas in 2006 included:

- validation of risk models;
- integration of granular risk and finance information relating the bank’s portfolios; and
- development of tools for calculating credit risk-weighted assets.

At the heart of Basel II is a series of best practice risk and capital management techniques that are the embodiment of ABN AMRO’s existing approach to risk and capital management.

Exposure supervision

The Dutch Central Bank has issued specific rules with respect to large exposures to a single borrower or group of interconnected borrowers or in relation to certain other businesses that involve a concentration of risk. Large exposures generally include all assets and off-balance sheet items of a credit institution with respect to a single borrower or a group of connected borrowers which exceed 10% of a credit institution’s total capital. Large exposures must be reported once every quarter to the Dutch Central Bank. There is a limit of 25% of total capital for a single large exposure being part of the banking book. Trading book positions may exceed this limit subject to additional solvency requirements. The aggregate amount of all large exposures of a credit institution may not exceed 800% of its total capital. In 2006, there were no exposures exceeding these thresholds.

In addition, under the Solvency rules, certain other exposures are limited as a percentage of total capital as follows: exposures to the Dutch central government, the Dutch local government and other central governments of the so-called “Zone A” countries which include the Organization for Economic Cooperation and Development countries, have no limit; exposures to local governments of Organization for Economic Co-operation and Development countries are weighted at 50%; exposures to banks with a remaining maturity of up to or less than one year or more than one year are weighted at 20% and 50%, respectively; and exposures to others are weighted at 100%. Equity participations in insurance companies are exempt up to a level of 40% of total capital of the credit institution.

Facilities and loans to, and investments in, non-banks by credit institutions of 1% or more of total capital must be registered with the Dutch Central Bank. For banks, the threshold is 3% of total capital. Regulations of the Dutch Central Bank also bar a credit institution from lending (on either a secured or an unsecured basis) more than the lesser

of 5% of its total capital and, if the loan is unsecured, five times the monthly salary for the borrower to any director or member of senior management of the credit institution without the prior approval of the Dutch Central Bank.

Liquidity supervision

The bank submits reports on its liquidity position on a monthly basis to the Dutch Central Bank, based on its liquidity supervision directive. The liquidity directive seeks to ensure that banks are in a position to cope with an

¹ The Member States of the European Community and all other countries which are full members of the Organization for Economic Cooperation and Development and the countries which have concluded special borrowing arrangements with the International Monetary Fund associated with the International Monetary Fund's General Arrangements to Borrow are considered "Zone A" countries. However, a country in the process of rescheduling its official external debt is excluded from this group for a period of five years. The "Zone A" countries currently comprise: Australia, Austria, Belgium, Canada, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Mexico, Monaco, the Netherlands, New Zealand, Norway, Poland, Portugal, Puerto Rico, Saudi Arabia, Slovakia, Slovenia, South Korea, Spain, Sweden, Switzerland, Turkey, the United States and the United Kingdom.

acute short-term liquidity shortage under the assumption that banks would remain solvent. The bank is required to report the group's liquidity position at consolidated level. In principle, the Dutch Central Bank liquidity directive covers all direct domestic and foreign establishments (subsidiaries/branches), including majority participations. Liquidity effects from off-balance sheet items, such as derivatives and irrevocable commitments, are measured in the liquidity report.

The directive places great emphasis on the short term in testing the liquidity position over a period of up to one month with a separate test of the liquidity position in the first week. For observation purposes, several additional maturity bands are included in the liquidity report (one to three months, three to six months and six months to one year).

The available liquidity must always exceed required liquidity. Available liquidity and required liquidity are calculated by applying weighting factors to the relevant on- and off-balance sheet items.

The liquidity test includes all currencies. Compliance reports concerning liquidity requirements of foreign subsidiaries are submitted to appropriate foreign regulatory authorities as required. At consolidated level and in every country in which we operate, the Group adheres to the liquidity standards imposed by the applicable regulatory authorities.

Structural supervision

A declaration of no-objection from the Dutch Central Bank (or in certain specified cases from the Dutch Minister of Finance), is required for certain changes in the structure of credit institutions, such as mergers, certain investments, the addition of a managing partner to the credit institution, repayments of capital or distribution of reserves of the credit institution and financial reorganization. Approval will be denied if, among other things, the Dutch Central Bank determines that sound banking policy may be jeopardized, that an undesirable development in the financial sector might result or that a conflict might arise in respect of certain solvency directives. Pursuant to the FSA, a declaration of no-objection is required for a participation by a credit institution of at least 10% in the issued share capital or the related voting rights (each, a "Qualifying Participation"), or the increase thereof, of a financial institution, such as a credit institution, or a non-financial institution, and, either (i) in case of a financial institution, if the total capital of such financial institution would exceed 1% of the credit institution's consolidated balance sheet total or (ii) in case of a non-financial institution, if the consideration for the Qualifying Participations exceeds 1% of the credit institution's consolidated equity. The Dutch Central Bank or the Dutch Minister of Finance can, on request, grant so-called bandwidths, umbrella and group-declarations of no-objection in respect of Qualifying Participations. The declaration of no-objection is not required in case of a Qualifying Participation by a credit institution in a company whose assets consist of more than 90% liquid assets. Furthermore, the FSA provides that a declaration of no-objection is required in case of a Qualifying Participation by a natural person or legal entity in a credit institution.

The Dutch Central Bank together with the Dutch Minister of Finance has developed a "structural policy" for equity participations by credit institutions in non-financial institutions. Under this policy an equity participation is not allowed if the value of the participation would exceed 15% of a credit institution's total capital or if the participation would cause the value of the credit institution's aggregate Qualifying Participations in non-financial institutions to exceed 60% of its total capital. Certain types of participations will be approved in principle, although in certain circumstances a declaration of no-objection will have a limited period of validity, such as, in the case of a debt rescheduling or rescue operation or when the participation is acquired and held as part of an issue underwriting operation. The approval generally will be given where the value of the non-financial institution concerned or the value of the participation does not exceed certain threshold amounts.

Supervision of the securities and investment businesses

The Bank is also subject to supervision of its activities in the securities business. The FSA, which has replaced the Act on the Supervision of the Securities Trade 1995 together with the decrees and regulations promulgated thereunder,

provides a comprehensive framework for the conduct of securities trading in or from the Netherlands. The AFM is charged by the Dutch Minister of Finance with supervision of the securities industry.

The Bank and/or certain subsidiaries of the Bank are also active as managers and/or custodians of collective investment plans, which comprise both investment funds and investment companies. Collective investment plans are subject to supervision by the Dutch Central Bank and the AFM.

Regulation in the European Union

The Financial Services Action Plan 1999-2005 laid the foundations for a single financial market in the EU and has already brought about many changes with 42 legislative and non-legislative measures adopted by the EU Institutions. In its future strategy on Financial Services for 2005-2010, the European Commission set out its objectives to achieve an integrated, and competitive EU financial market by removing any remaining barriers so that financial services can be provided and capital can circulate freely throughout the EU at the lowest possible cost, resulting in high levels of financial stability, consumer benefits and consumer protection.

The financial services sector includes three major areas for which European regulatory policies apply: banking, capital markets, and asset management. EU initiatives also deal with a number of issues related to company and corporate governance.

The Codified Banking Directive (2006/48/EC) for credit institutions and banking services governs the free provision of banking services. Under this Directive, the Bank can offer banking on the basis of a single banking license (“European passport”) through the establishment of a branch or cross-border in all the EU countries. In September 2006 the European Commission proposed a review of one specific article of the Codified Banking Directive with regards to procedural rules and evaluation criteria for the prudential assessment of acquisitions and increase of shareholding in the financial sector (the so-called prudential carve out of article 16). It aims at tightening the procedures that the supervisory authorities have to follow when assessing proposed M&A in the banking, insurance and securities sectors. In particular, it clarifies the criteria against which supervisors should assess possible M&A operations.

The Directive 2006/48 is also the legal vehicle which implements the Basel II framework into EU Law (the Capital Requirements Directive). The Capital Requirements Directive is based on a three pillars structure (minimum capital requirements, a supervisory review process and market discipline) with the aim of creating a better risk-sensitive regime than the current system. Financial Institutions are to apply the capital requirements with adopting the most advanced approaches with a published compliance deadline of 1 January 2008.

In the area of securities legislation, the Market Abuse Directive prohibits market manipulation and insider dealing in all securities admitted to trading on an EU regulated market. The Prospectus Directive regulates the process and the disclosure requirements for public offerings in and admissions to trading on an EU regulated market of securities, and allows European public offerings with one single prospectus. The Transparency Directive harmonizes the transparency requirements for information about issuers whose securities are admitted to trading on an EU regulated market.

The other important piece of legislation in this area is the Markets in Financial Instruments Directive (MiFID), which has to be implemented by financial institutions as of November 1, 2007. It regulates the cross-border provision of investment services and regulated markets and replaces the 1993 Investment Services Directive which established the single passport for investment firms. It streamlines supervision on the basis of home country control and enhances the transparency of markets. It harmonizes conduct of business rules, including best execution, conflicts of interests and client order handling rules. The Directive abolishes the concentration rule, which leads towards a more competitive regime between order execution venues. It also regulates market transparency rules for investment firms, regulated markets and alternative trading systems and both pre and post-trade but only for shares.

In the post-trading field, the European Commission has pushed the industry to agree on a clearing and settlement Code of Conduct, signed by the stock exchanges on November 2006. The Code aims at enhancing transparency and increasing competition in the post-trading sector.

Likewise, political initiatives in the area of retail financial services and payment services have been launched. Currently, the revised proposal for a Directive on Consumer Credit (latest proposal published in October 2006) is

being discussed in the EU. The proposed Directive introduces consumer protection provisions and at the same time aims at the creation of a single market for consumer credit in the EU. In December 2005, a Directive was proposed on a new legal framework for payment services, which will harmonize rules with regard to payments licensing, transparency conditions, information requirements and rights and obligations linked to the provision and use of payment services.

43

In the area of asset management, the EU has enacted legislation on pension and investment products. On investment funds, there are two ‘UCITS Directives’, the first regulating the product (e.g., types of assets in which to invest) and the second one giving management companies a “European passport” to operate throughout the EU. The Commission will come up with proposals for legislative amendments in autumn 2007 to do targeted changes to the current EU framework for investment funds. In the field of supplementary pensions, a Directive has liberalized the market for supplementary pension schemes by allowing pension providers to operate on an EU-wide basis and establishing “prudent person principles” for asset allocation.

By December 2007, Member States will have to implement the third Money Laundering Directive into national law. The aim of the Directive is to transpose the Financial Action Task Force’s (FATF) forty recommendations. It follows a risk-based approach by which all measures aimed at preventing money laundering must be applied on a proportionate basis, depending on the type of customer, business and other considerations.

As of January 1, 2007, the Regulation which transposes the FATF Special Recommendation VII (SR VII) on “wire transfers” into EU legislation has come into force. It lays down rules on information on the payer accompanying transfers of funds, in order to allow basic information to be immediately available to the authorities responsible for combating money laundering and terrorist financing.

Applicable from September 2007, the Data Retention Directive will require electronic communications providers to store data on phone-calls, e-mails and Internet use for a period between 6 and 24 months to help track down terrorism and organized crime.

In the field of Company Law and Corporate Governance, the two main guiding principles for EU legislative actions are to improve transparency and empower shareholders. Soft law instruments have been used to promote good corporate governance (e.g. corporate governance codes). To improve transparency in company accounts, the European Commission adopted recommendations on Directors’ Remuneration and role of non-executive or supervisory directors with a view to improving the on-going disclosure requirements for listed companies. In order to restore credibility of financial reporting and to enhance protection against the type of scandals involving Parmalat and Ahold, the Directive on statutory audit (2006/43) designed to strengthen corporate governance and auditor responsibilities was adopted and should be implemented into national law by June 2008. It aims at reinforcing and harmonizing the statutory audit function throughout the EU by setting out principles for public supervision in all Member States. It also introduces a requirement for external quality assurance and clarifies the duties of statutory auditors. In June 2006, the EU adopted a Directive (2006/46) which amends existing Accounting Directives to ensure collective board members responsibility and more disclosure on related-parties transactions, off-balance sheet vehicles and corporate governance. The Second Company Law Directive (2006/68) covering the formation, maintenance and alteration of capital was amended in September 2006 in order for public limited companies to take certain measures affecting the size, structure and ownership of their capital. Finally, the European Commission has presented in January 2006 a proposal on the exercise of shareholders’ rights, which mainly seeks to abolish share blocking, improve the flow and transparency of the information and remove all legal obstacles to electronic participation in general meetings. This new Directive on shareholders rights is expected to be adopted by the European Council in the second quarter of 2007.

Regulation in the United States

The Bank’s operations in the United States are subject to extensive regulation and supervision by both federal and state banking authorities. The Bank is a bank holding company within the meaning of the US Bank Holding Company Act of 1956, which restricts its non-banking activities in the United States. However, Holding elected to become a financial holding company on 11 March 2000.

See also “- Legal and regulatory proceedings,” below, and “Item 3. Key Information - D. Risk factors - Regulatory changes or enforcement initiatives could adversely affect our business” and “—We are subject to legal risk, which may

have an adverse impact on our results.”

Regulation in the rest of the world

Our operations elsewhere in the world are subject to regulation and control by local supervisory authorities, and our offices, branches and subsidiaries in such jurisdictions are subject to certain reserve, reporting and control and other requirements imposed by the relevant central banks and regulatory authorities.

44

Legal and regulatory proceedings

We are involved in a number of legal proceedings in the ordinary course of our business. Some of these proceedings involve the risk of a material adverse impact on our financial performance or stockholders' equity. In presenting our consolidated financial statements, management makes estimates regarding the outcome of legal, regulatory and arbitration matters, and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Charges, other than those taken periodically for costs of defense, are not established for matters when losses cannot be reasonably estimated. We cannot guarantee that these proceedings will be concluded in a manner favorable to us and should our assessment of the risk change, our view on changes to income will also change. See also "Item 3. Key Information - D. Risk factors - Regulatory changes or enforcement initiatives could adversely affect our business" and "—We are subject to legal risk, which may have an adverse impact on our results."

Regulatory sanctions

As previously reported, in July 2004 we signed a Written Agreement with the US regulatory authorities concerning our dollar clearing activities in the New York branch. In December 2005, we agreed to a Cease and Desist Order with the Dutch Central Bank, the Reserve Board, the US Department of the Treasury's Office of Foreign Assets Control ("OFAC") and the Financial Crime Enforcement Network ("FinCEN"), the State of Illinois Department of Financial and Professional Regulation and the New York State Banking Department. This involved an agreement to pay an aggregate civil penalty of USD 75 million (approximately EUR 62.5 million). In addition, ABN AMRO agreed to make a voluntary endowment of USD 5 million (approximately EUR 4 million) to the Illinois Bank Examiners' Education Foundation, bringing the total amount related to this sanction to USD 80 million (approximately EUR 66.5 million). Furthermore, the Bank committed to continue to implement improvements in its oversight and compliance programs. See "Item 4. Information on the Company - B. Business overview - Compliance." The sanctions principally related to deficiencies in the US dollar clearing operations at the New York branch and OFAC compliance procedures specifically in relation to certain US dollar payments originating at the Dubai branch. The actions that are the subject of the sanctions predominantly took place before the 2004 Written Agreement mentioned above, and many were discovered by investigations initiated by the Bank and voluntarily reported to regulatory authorities.

In January 2006, ABN AMRO Mortgage Group, Inc. reached a settlement with three US government agencies - the US Department of Justice, the Office of the Comptroller of the Currency ("OCC") and the US Department of Housing and Urban Development ("HUD") - regarding past actions in connection with Federal Housing Administration ("FHA") insurance certifications administered by the Mortgage Group on approximately 28,000 HUD-insured loans originated during the period 2000 to 2003. The loans were underwritten by HUD-authorized underwriters; however, the final certification process was not completed properly. The civil settlement includes a cash payment in the amount of \$16.85 million and represents a final resolution of a matter the Mortgage Group discovered, investigated and self-reported to the government in 2003. In addition, the Mortgage Group chose not to submit insurance claims on 783 defaulted loans that were originated during the affected period, resulting in an increased cost to the Mortgage Group. ABN AMRO Mortgage Group is committed to an FHA loan program that is in full compliance with all of the applicable requirements.

OFAC compliance procedures

In 2004, the Bank determined that certain employees of the Dubai branch were not observing the Bank's policies and standards in relation to certain US dollar payment instructions sent to the Bank's US dollar clearing centre in New York. An independent investigation determined that in certain instances US dollar payments were made from and to countries that were on a list of sanctioned countries maintained by OFAC. Payments from and to these countries or involving nationals of these countries (in particular Iran and Libya) are only allowed to be processed in the United States if the relevant payments meet certain specific requirements established by OFAC. The report prepared by external legal counsel determined that between 1997 and 2004, employees of the Bank in Dubai developed procedures

for certain fund transfers, check clearing operations and letter of credit transactions on behalf of Libyan and Iranian clients. They excluded or modified country and client-specific information from the relevant transactions so that the relevant transactions pass through the New York branch's OFAC filter without being detected and blocked. Once these procedures were detected internally, they were terminated.

We are in compliance with the sanction-related requirements of the Cease and Desist and OFAC Orders. We have upgraded our OFAC Compliance program through the hiring of a Senior OFAC Compliance Officer based in the

United States and the establishment of the United States Sanctions Team to support our US operations. The Bank's independent third party has completed three of the four transaction reviews required under the OFAC Order and has submitted its reports to OFAC. The fourth transaction review is due in December 2008. We continue to further enhance our OFAC Compliance program through the issuance and updating of enhanced and updated policies, procedures, training and compliance tools. See also "Item 4. Information on the Company - B. Business overview - Compliance." We are also in the process of taking disciplinary measures, including terminations, against the employees involved. While these procedures were regrettable, the Bank has reviewed the transactions involved and has found no evidence so far of any terrorist connection with these transactions.

Ongoing investigations

We and members of our management continue to provide information to law enforcement authorities in connection with an ongoing criminal investigation relating to our dollar clearing activities, OFAC compliance and other Bank Secrecy Act compliance matters. These compliance issues and the related sanctions and investigations have had, and will continue to have, an impact on the Bank's operations in the United States, including limitations on expansion. The Bank is actively exploring all possible options to resolve these issues. The ultimate resolution of these compliance issues and related investigations and the nature and severity of possible additional sanctions cannot be predicted, but regulatory and law enforcement authorities have been imposing severe and significant monetary and other penalties against a number of banking institutions for violations of the Bank Secrecy Act and related statutes. See also "Item 3. Key Information - D. Risk factors - Regulatory changes or enforcement initiatives could adversely affect our business" and "- We are subject to legal risk which may have an adverse impact on our results."

Iran

In April 2006 the Bank established a Steering Committee to oversee any activities or relationships connected with Iran. Cognizant of its legal duties, the Bank has continued to adopt a conservative approach to conducting business with Iran. As matter of policy, the Bank does not initiate new US Dollar transactions with an Iranian element, and does not engage in U-turns that would otherwise be exempt from OFAC regulations other than in exceptional circumstances which require approval from Group Compliance (e.g. to exit a relationship). Following these internal policies, there have been no new USD exposures with Iran since February 2006 and the existing USD exposure has been further reduced significantly. While our USD exposure in the past consisted of a mixture of loan, trade and currency transactions, our main current USD exposure represents historical loan facilities.

C. Organisational structure

A list of our significant subsidiaries can be found in Note 49 to our consolidated financial statements.

D. Property, plants and equipment

At 31 December 2006, the Group operated 664 offices and branches in the Netherlands (2005: 655) and 3,868 offices and branches (2005: 2,902) in 55 other countries and territories (2005:58). Of these offices and branches, 449 (2005: 448) were in North America, 2,154 (2005: 2,157) in Latin America and the Caribbean, 1,144 (2005: 142) were in Europe, 8 (2005: 44) were in the Middle East and Africa and 113 (2005:111) were in the Asia Pacific Region. Approximately 48% (2005: 52%) of the offices and branches are owned (based on square meters) and the remainder are under lease agreements.

Item 4A. UNRESOLVED STAFF COMMENTS

Our reconciliation between IFRS and US GAAP, as set out in Note 50 to our consolidated financial statements, includes a reconciling item with respect to allowances for loan losses. This item lowers shareholders' equity under US

GAAP by EUR 540 million (net of tax EUR 346 million) for 2006 and by EUR 538 million (net of tax EUR 344 million) for 2005. The impact on net profit is a lower US GAAP income of EUR 58 million (net of tax EUR 37 million) in 2006 and a higher US GAAP net profit of EUR 99 million (net of tax EUR 65 million) in 2005.

We are currently in discussions with the SEC accounting staff with respect to an unresolved SEC comment. The SEC is inquiring as to the nature of the difference in the application of US GAAP and IFRS with respect to determining loan loss allowances given the similarity of the underlying accounting principles.

This is explained in more detail in Note 50. We understand that as required by US law, the SEC is consulting with both the OCC, the credit supervisor of our subsidiaries in the US, and the Board of Governors of the Federal Reserve. We also understand that the SEC is or will be consulting with European regulatory bodies such as the Authority for Financial Markets ('AFM') and the Dutch Central Bank, as part of the IFRS convergence process.

Introduction

The following discussion is based on, and should be read in conjunction with, our consolidated financial statements, included elsewhere in this report. Unless otherwise indicated, the financial information contained in this annual report on Form 20-F has been prepared in accordance with International Financial Reporting Standards or “IFRS” which, as disclosed in Note 50 to our consolidated financial statements, vary in certain significant respects from accounting

principles generally accepted in the United States, or “US GAAP”. We have provided the financial information in accordance with IFRS last year for the first time. In previous years, we provided our financial information in accordance with generally accepted accounting principles in the Netherlands or “Dutch GAAP”. See Note 47 to our consolidated financial statements.

The following discussion includes non-GAAP financial measures in addition to GAAP results. See “- A. Operating results - Consolidation effect of controlled private equity investments” for an explanation of the reasons for presenting such measures.

Our business and results are affected by general economic conditions and other business conditions. See “Cautionary Statement on Forward-looking Statements” and “Item 3. Key Information - D. Risk factors”.

Changes in Accounting Rules

For all periods up to and including the year ended 31 December 2004, we prepared our consolidated financial statements in accordance with Dutch GAAP. From 1 January 2005, we were required under EU regulations to prepare our consolidated financial statements in accordance with IFRS. The financial statements for 2005 are the first financial statements prepared in accordance with IFRS and are also in full compliance with IFRS. In order to provide shareholders with comparative data, we made a transition to IFRS on a dual reporting basis as from January 1, 2004. This transition incorporated the impact of applying all IFRS standards and interpretations, including IAS 32 and 39, to our assets (such as loans and property), liabilities (such as pensions) and open contracts (such as derivatives and leases).

The application of IFRS resulted in differences in valuation and income recognition and also had an impact on the presentation of our financial statements. For example, certain preference shares must be presented as liabilities under IFRS. Changes to the cash flow statement were limited to those arising from changes in the balance sheet and income statement (because an indirect method of preparation is used). See Note 47 to the IFRS consolidated financial statements for a reconciliation of our shareholders' equity and income under Dutch GAAP to the comparable amounts determined under IFRS.

Critical Accounting Policies

Please refer to the accounting policies section of our consolidated financial statements.

A. Operating results

The following discussion of operating results is based on, and should be read in conjunction with, our consolidated financial statements. The financial information contained in this review has been prepared in accordance with International Financial Reporting Standards as adopted by the EU or 'IFRS'. In previous years this review was included within our Annual Report on Form 20-F.

This operating and financial review and prospects discusses the Group results under IFRS by comparing the results of operations for the years 2006 to 2005 and for 2005 to 2004, highlighting key notes by Business Unit (BU) for each line item. This is followed by a more detailed discussion of the results of operations for each BU, which explains significant variances in operating income and operating expenses referring to the relevant line items.

Constant foreign exchange rates

Throughout the discussion of the operating and financial review and prospects, the financial results and performance compared with the prior period, both in euros and percentage terms, are given in euros. We may also, where deemed significant, explain variances in terms of 'constant foreign exchange rates' or 'local currency'. Both 'constant foreign exchange rates' and 'local currency' exclude the effect of currency translation differences and are GAAP financial measures which, unlike actual growth, cannot be derived directly from the information in the financial statements. 'Local currency' performance is measured for single currency volume differences. Management assesses, in part, the underlying performance of our individual businesses by separating foreign exchange translation effects throughout the income statement so as to understand the underlying trend of the business performance. The adjustments relate in particular to the impact of fluctuations in exchange rates used in translating results reported by our BUs North America and Latin America respectively in US dollar and Brazilian real into euros, as well as the various currencies in BU Asia.

Management believes that the exclusion of these items provides a better understanding of the underlying operational performance of our businesses during such periods. Fluctuations in exchange rates are outside of the control or

influence of management and may distort the analysis of underlying operating performance of our businesses during the periods under review. External stakeholders, such as business analysts, also use these measures. However, we recognise that these measures should not be used in isolation and, accordingly, we begin our analysis on the performance of the Group and of the BUs with the comparable GAAP actual growth measures that reflect all the factors that affect our business.

We calculate the comparable constant foreign exchange rate performance by multiplying the local currency volumes over the period to be compared with the average monthly exchange rates during the previous period

being compared. For example, the volumes for the year ended 31 December 2006 have been multiplied with the average monthly exchange rates prevailing during 2005 in order to enable comparison with the 2005 results on a constant basis.

Consolidation effect of controlled private equity investments

IFRS requires the consolidation of private equity investments over which we have control, including non-financial investments managed as private equity investments. However, as a practical matter, our private equity business is managed separately from the rest of our banking business and management does not measure the performance of our banking business based on our consolidated results of operations. Our private equity business involves buying equity stakes in unlisted companies over which we can establish influence or control, and managing these shareholdings as an investor for a number of years with a view to selling these with a profit. The companies in which we have these temporary holdings are active in business outside the financial industry. We believe that combining these temporary holdings with our core banking business does not provide a meaningful basis for discussion of our financial condition and results of operations. Therefore, in the presentation of our 'Group results', we have removed the effects of a line-by-line consolidation in the income statement of the private equity holdings of Private Equity and BU Global Clients. The results excluding the consolidation effect include the 'de-consolidated' holdings based on the equity method. The measures excluding the effects of consolidation of our private equity holdings are non-GAAP financial measures. Our management refers to these non-GAAP financial measures when making operating decisions because the measures provide meaningful supplementary information regarding our operational performance. In accordance with applicable rules and regulations, we have presented, and investors are encouraged to review, reconciliations of non-GAAP financial measures to the most comparable IFRS measures, i.e., reconciliations of our results excluding the consolidation effects of our private equity holdings to our results including those effects.

Consolidated Results of Operations

Group results

The following table sets forth selected information pertaining to the Group for the years ended 31 December 2006, 2005 and 2004 showing the results both under IFRS and excluding the consolidation effect of our private equity investments.

	For the year ended 31 December								
	2006	IFRS	2004	Consolidation effect (1)			Excluding consolidation effect (non-GAAP measure)(2)		
		2005		2006	2005	2004	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)								
Net interest income	10,575	8,785	8,525	(342)	(280)	(83)	10,917	9,065	8,608

Number of branches and offices (3)	4,634	3,681	3,605	-	-	-	4,634	3,681	3,605
Efficiency ratio (in %) (4)	74.9%	73.0%	80.8%	99.1%	99.4%	99.8%	69.6%	68.3%	77.9%

(1) This is the impact per line item of the private equity investments which are required to be consolidated under IFRS. See the accounting policies section of our consolidated financial statements.

(2) See “-A. Operating results - Consolidation effect of controlled private equity investments” for an explanation of our use of non-GAAP financial measures.

(3) This number includes double counting of branches and offices that serve more than one BU. Adjusted for this double counting, the actual number of branches and offices amounts to 4,532 (2005: 3,557; 2004: 3,498).

(4) Efficiency ratio (in %) is the operating expenses divided by the operating income.

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year increased by EUR 337 million, or 7.6%, to EUR 4,780 million. Profit from continuing operations decreased by EUR 85 million, or 2.0%, to EUR 4,171 million. This reflects a mixed performance across the BUs. The major variances year-on-year are: BU Europe (plus EUR 146 million), BU Netherlands (plus EUR 105 million), Private Equity (plus EUR 146 million), BU Global Clients (minus EUR 249 million) and Group Functions (minus EUR 290 million). Profit from discontinued operations net of tax amounted to EUR 609 million, reflecting the divestment of the property development and management activities of Bouwfonds and the classification of ABN AMRO Mortgage Group, Inc., our US-based residential mortgage broker origination platform and residential mortgage servicing business, as held-for-sale. Profits from discontinued operations include the related operating results and applicable gain on the sale.

Operating income

Operating income increased by EUR 5,307 million, or 23.8%, to EUR 27,641 million (non-GAAP: operating income increased by EUR 3,712, or 19.6%). This mainly relates to BU Europe (plus EUR 2,302 million), Private Equity (plus EUR 1,796 million, non-GAAP plus 99 million), BU Latin America (plus EUR 675 million), BU Asia (plus EUR 282 million), BU North America (plus EUR 225 million) and BU Asset Management (plus EUR 116 million).

Key notes:

- Operating income in BU Europe increased as a result of the consolidation of Antonveneta and higher Global Markets revenues.
- The increase in Private Equity was caused by higher operating income of consolidated private equity investments.
- The increase in BU Latin America is mainly due to the continued growth in the retail and consumer finance loan portfolio, partly offset by the inclusion in 2005 of the book profit on the sale of Real Seguros (EUR 229 million).
- BU Asia grew revenues as its Preferred Banking activities and credit card business continued to expand, especially in India, China, Hong Kong and Taiwan.
- Operating income in BU North America increased, mainly due to an improved contribution from all business lines, despite challenges from the yield curve, which was inverted or flat for the most of the year, with pressure on interest spreads as a result, and to the impact of the settlement (EUR 110 million).
- The increase in BU Asset Management reflected the increase by EUR 14.9 billion in net new money.

Net interest income

Net interest income increased by EUR 1,790 million, or 20.4%, to EUR 10,575 million, mainly due to BU Europe (plus EUR 1,564 million), BU Latin America (plus EUR 695 million) and BU North America (plus EUR 137 million), partly offset by a decrease in BU Netherlands (minus EUR 250 million).

Key notes:

51

- The increase in BU Europe reflects the consolidation of Antonveneta in 2006.
- Net interest income in BU Latin America increased mainly due to the continued growth of the Brazil credit portfolio.
- The increase in BU North America was mainly due to continued commercial loan growth and higher deposit spreads.
- The decrease in BU Netherlands reflects the fact that mortgage prepayment penalty income is affected by higher offsetting transactions in 2006.

Net fee and commission income

The following table sets forth the net fee and commission income for the Group for the years ended 31 December 2006, 2005 and 2004.

	2006	2005	2004
Fee and commission income			
Securities brokerage fees	1,785	1,560	1,548
Payment and transaction services fees	2,123	1,530	1,401
Asset management and trust fees	1,562	1,153	1,041
Fees generated on financing arrangements	248	180	158
Advisory fees	500	336	311
Insurance related commissions	168	168	130
Guarantee fees	223	218	160
Other fees and commissions	518	427	436
Subtotal	7,127	5,572	5,185
Fee and commission expense			
Securities brokerage expense	330	321	281
Payment and transaction services expense	287	165	125
Asset management and trust expense	151	127	126
Other fee and commission expense	297	268	168
Subtotal	1,065	881	700
Total	6,062	4,691	4,485

Net fee and commission income increased by EUR 1,371 million, or 29.2%, to EUR 6,062 million, mainly due to an increase in BU Europe (plus EUR 482 million), BU Global Clients (plus EUR 415 million), BU Asia (plus EUR 172 million), BU Asset Management (plus EUR 121 million) and BU Latin America (plus EUR 105 million).

Key notes:

- The increase in BU Europe reflects the consolidation of Antonveneta in 2006.

• The increase in BU Global Clients was mainly due to further focus on fee-driven products, which led to a change in the product mix with strong growth in primary and secondary capital markets products.

• The increase in BU Asia reflected the higher asset-under-management levels, the higher fee levels on existing products and a further shift in the asset mix towards more profitable products.

Additional notes by line item:

• Securities brokerage fees income increased by EUR 225 million, or 14.4%, to EUR 1,785 million, mainly due to our Hong Kong branch activities in BU Asia and the inclusion of Antonveneta.

• Payment and transaction services fees income increased by EUR 593 million, or 38.8%, to EUR 2,123 million, mainly due to the inclusion of Antonveneta and an increase in BU Latin America.

• Asset management and trust fees income increased by EUR 409 million, or 35.5%, to EUR 1,562 million, mainly due to the increases in BU Asset Management, BU Netherlands and BU Private Clients, and the inclusion of Antonveneta.

Net trading income

The following table sets forth the net trading income for the Group for the years ended 31 December 2006, 2005 and 2004.

	2006	2005	2004
Securities	61	978	179
Foreign exchange transactions	789	662	687
Derivatives	2,199	933	380
Other	(70)	48	63
Total	2,979	2,621	1,309

Net trading income increased by EUR 358 million, or 13.7%, to EUR 2,979 million, mainly due to BU Asia (plus EUR 179 million), BU Latin America (plus EUR 152 million) and BU Netherlands (plus EUR 94 million), partly offset by a decrease in BU Global Clients (minus EUR 148 million).

Key notes:

• Net trading income increased in BU Asia resulting from higher equity finance income in Hong Kong and Taiwan.

- The increase in BU Netherlands was mainly due to higher results on the sale of derivatives.

Results from financial transactions

The following table sets forth the results from financial transactions for the Group for the years ended 31 December 2006, 2005 and 2004.

	2006	2005	2004
Net gain from the disposal of available-for-sale debt securities	634	431	179
Net gain from the sale of available-for-sale equity investments	158	55	154
Dividend on available-for-sale equity investments	71	54	48
Net gain on other equity investments	491	514	694
Hedging ineffectiveness	58	39	(112)
Fair value change of credit default swaps	(280)	(51)	(12)
Other	(45)	239	(46)
Total	1,087	1,281	905

Results from financial transactions decreased by EUR 194 million, or 15.2%, to EUR 1,087 million, mainly due to Group Functions (minus EUR 438 million), partly offset by BU Europe (plus EUR 144 million) and BU North America (plus EUR 76 million).

Key notes:

• The decrease in Group Functions is mainly due to lower results on the sale of bonds and losses on credit default swaps due to tightening spreads, while 2005 included option results on Antonveneta.

- The increase in BU Europe is mainly due to the inclusion of Antonveneta.

Additional notes by line item:

Net gain from the disposal of available-for-sale debt securities increased by EUR 203 million, or 47.1%, to EUR 634 million, mainly due to an increase in BU North America, partly offset by lower asset and liability management results in Group Functions.

54

Share of result in equity accounted investments

Share of result in equity accounted investments decreased by EUR 20 million to EUR 243 million, mainly due to Group Functions (minus EUR 47 million) due to lower results from our interests in Antonveneta, which was consolidated in 2006, and Kereskedelmi és Hitelbank Rt., which was sold in 2006, partly offset by a higher contribution from our investment in Capitalia.

Other operating income

The following table sets forth the results from other operating income for the Group for the years ended 31 December 2006, 2005 and 2004.

	2006	2005	2004
Insurance activities	103	150	177
Leasing activities	61	60	63
Disposal of operating activities and equity accounted investments	553	347	187
Other	665	499	318
Total	1,382	1,056	745

Other operating income increased by EUR 326 million, or 30.9%, to EUR 1,382 million, mainly due to the Group Functions (plus EUR 435 million), BU North America (plus EUR 89 million), partly offset by BU Latin America (minus EUR 318 million).

Key notes:

• The increase in Group Functions was due to the gain on the sale of Kereskedelmi és Hitelbank Rt. (EUR 208 million) and the gain on the sale of the Futures business (EUR 229 million).

• Other operating income in BU North America increased due to the inclusion of the impact of the Talman settlement (EUR 110 million), see “—BU North America”, below, for details.

• The decrease in BU Latin America is due to the inclusion of the gain (EUR 229 million) on the sale of Real Seguros in 2005.

Income of consolidated private equity holdings

Income of consolidated private equity holdings increased by EUR 1,676 million, or 46.1%, to EUR 5,313 million, due to the increase in number and in size of the consolidated investments of private equity.

Operating expenses

Operating expenses increased by EUR 4,412 million, or 27.1%, to EUR 20,713 million (non-GAAP: EUR 2,839 million, or 21.9%), mainly due to Private Equity (plus EUR 1,640 million, non-GAAP minus EUR 37 million), the consolidation of Antonveneta (plus EUR 1,310 million), BU Global Clients (plus EUR 275 million, non-GAAP plus EUR 379 million), Group Functions (plus EUR 354 million), BU Latin America (plus EUR 371 million), BU Europe, excluding Antonveneta, (plus EUR 225 million) and BU Asia (plus EUR 175 million), partly offset by lower operating expenses in BU Netherlands (minus EUR 164 million).

Key notes:

•The increase in Private Equity was caused by higher operating expenses of consolidated private equity investments.

•The increase in BU Global Clients was mainly due to a shift in product mix, which led to an increase in allocated infrastructure and product costs. The operating expenses include a restructuring charge (EUR 19 million) for Group Shared Services reorganisations.

- Operating expenses increased in growth markets in BU Latin America and BU Asia and included branch

openings and marketing campaigns. Operating expenses in BU Latin America were also impacted by a stronger Brazilian real and the collective labour agreements that came into effect in September 2005 and September 2006.

Operating expenses increased in Group Functions, mainly due to the inclusion of a release of post-retirement healthcare benefit provision (EUR 392 million) in 2005.

- The BU Netherlands continued to benefit from strict cost control measures, resulting in lower staff costs.

Loan impairment and other credit risk provisions

Loan impairment and other credit provisions increased by EUR 1,220 million to EUR 1,855 million, of which EUR 1,154 million in the consumer portfolio and EUR 701 million in the commercial portfolio. The provisioning level was substantially higher as provisioning for consumer loan portfolios in the BU Latin America (plus EUR 374 million) and the BU Asia (plus EUR 191 million) went up while the consolidation of Antonveneta resulted in an increase of EUR 382 million in provisions.

Key notes:

• Higher loan impairment and other credit risk provisions in BU Latin America were due to the increase in absolute consumer loan volumes and increased delinquencies.

• The increase in BU Asia mainly reflected higher provisioning for credit card receivables in Taiwan, where the banking industry was significantly impacted by an increase in credit card defaults.

See also Note 50 to our consolidated financials regarding our allowance for loan loss.

Effective tax rate

The overall effective tax rate for 2006 was 17.8% versus 21.2% in 2005. Included in 2006 are tax credits, tax charges due to changes in the tax law and tax-exempt gains which exceeded the 2005 tax rate levels, as well as changes in tax rates.

Profit from discontinued operations net of tax

Profit from discontinued operations net of tax increased to EUR 609 million in 2006 from EUR 187 million in 2005. On 1 December 2006, the Group disposed of the property development and management activities of Bouwfonds, resulting in profits of EUR 505 million in BU Netherlands, EUR 338 million of which related to the net gain on the sale and EUR 167 million results from operations.

On 22 January 2007, the Group announced the sale of ABN AMRO Mortgage Group, Inc., our US-based residential mortgage broker origination platform and residential mortgage servicing business recording a result of EUR 104 million in BU North America. Profit from discontinued operations net of tax of EUR 187 million in 2005 was due to the classification as discontinued operations of Bouwfonds (EUR 136 million) in BU Netherlands and the ABN AMRO Mortgage Group, Inc. (EUR 51 million) in BU North America.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year 2005 increased by EUR 503 million, or 12.8%, to EUR 4,443 million.

Profit from continuing operations rose by EUR 1,967 million, or 85.9%, to EUR 4,256 million, with increases in all BUs, except Private Equity (minus EUR 142 million) and BU Asia (minus EUR 68 million), and a strong performance in BU Netherlands (plus EUR 373 million), BU Global Clients (plus EUR 364 million), BU Latin America (plus EUR 361 million), BU Europe (plus EUR 321 million), Group Functions (plus EUR 311 million) and BU North America (plus EUR 294 million).

Operating income

Operating income increased by EUR 3,543 million or 18.9% to EUR 22,334 million, driven by strong organic growth in all BUs, mainly in BU Latin America (plus EUR 1,032 million), Private Equity (plus EUR 599 million,

non-GAAP minus EUR 182 million), BU Europe (plus EUR 432 million), BU Netherlands (plus EUR 402 million), BU Global Clients (plus EUR 362 million), BU North America (plus EUR 294 million), BU Asia (plus EUR 167 million), BU Private Clients (plus EUR 151 million) and BU Asset Management (plus EUR 117 million).

Key notes:

- The increase in operating income in BU Latin America was partly due to the gain from the sale of Real Seguros (EUR 229 million), the strong growth in the retail loan portfolio and the appreciation of the Brazilian real.
- The increase in Private Equity resulted from the increase in operating income of consolidated private equity investments.
- The increase in BU Netherlands was driven by volume growth in consumer loans and savings, and higher levels of mortgage prepayment penalties.
- The increase in operating income in BU Global Clients was mainly due to enhanced activity and larger investments by our clients.
- Operating income in BU North America rose as the result of an increase in commercial banking revenues and lower hedging costs related to the available-for-sale portfolio.
- BU Asia's operating income continued to grow strongly, driven by the success of the credit card business, the Van Gogh Preferred Banking activities and strong operating income growth from Global Markets clients, mainly driven by fixed income, futures and foreign exchange products, in particular in structured derivatives.

Net interest income

Net interest income increased by EUR 260 million, or 3.1%, to EUR 8,785 million, mainly due to BU Latin America (plus EUR 674 million) and BU Netherlands (plus EUR 237 million), partly offset by BU Europe (minus EUR 459 million).

Key notes:

- The increase in BU Latin America was mainly driven by organic growth in the retail portfolio.
- The increase in BU Netherlands was mainly driven by increased loan and saving volumes and higher mortgage prepayment penalties.
- The decrease in BU Europe needs to be evaluated in the light of a reclassification in 2005 between net interest income and net trading income (impact approximately EUR 550 million) resulting from the transition to IFRS. This required changes to reporting and data flows that we completed in 2005. For 2004, we were only able to estimate the amount, due to the complexity and the volume of transactions involved.

Net fee and commission income

Net fee and commission income increased by EUR 206 million, or 4.6%, to EUR 4,691 million. The main contributors were BU North America (plus EUR 115 million), BU Asset Management (plus EUR 61 million) and BU Private Clients (plus EUR 52 million), partly offset by a decrease in BU Europe (minus EUR 111 million).

Key notes:

•The increase in BU North America was mainly due to higher Global Markets client commissions. The number of personal and small business checking accounts in BU North America increased by more than 27,000, which led to higher checking-related and trustee-related fees.

- The increase in BU Asset Management resulted from an improved asset mix towards more profitable

products and the higher fee levels on existing products. This increase is visible in the line asset management and trust fees income.

• The increase in BU Private Clients was mainly due to higher securities income resulting from a substantial number of new product launches.

- Payment services increased mainly in BU Asia following the growth in the credit card business.

Net trading income

Net trading income increased by EUR 1,312 million, or 100.2%, to EUR 2,621 million, mainly due to BU Europe (plus EUR 778 million), BU Global Clients (plus EUR 192 million), BU Netherlands (plus EUR 179 million) and BU North America (plus EUR 87 million).

Key notes:

• The increase in BU Europe needs to be evaluated in light of the aforementioned reclassification of interest (impact approximately EUR 550 million) resulting from the transition to IFRS.

- BU Global Clients net trading income increased due to growth in derivative trading.

• The increase in BU Netherlands was mainly due to higher Global Markets client trading results and higher results on the sale of derivatives.

- The increase in BU North America was mainly due to higher Global Markets trading results.

• Net trading income in Group Functions included a provision for balance-sheet adjustments (minus EUR 86 million).

Results from financial transactions

Results from financial transactions increased by EUR 376 million, or 41.6%, to EUR 1,281 million, mainly due to BU North America (plus EUR 275 million), BU Europe (plus EUR 143 million) and Group Functions (plus EUR 136 million), partly offset by a decrease in Private Equity (minus EUR 226 million).

Key notes:

• The increase in BU North America resulted from lower hedging costs related to the available-for-sale portfolio.

• The increase in Group Functions was mainly due to the revaluation of Antonveneta options, gain on the sale of available-for-sale bonds, and gains on derivative results, partly offset by the gain on the sale of our stake in Bank Austria in 2004.

Share of result in equity accounted investments

Share of result in equity accounted investments increased by EUR 57 million, or 27.7%, to EUR 263 million, mainly due to Group Functions (plus EUR 94 million), partly offset by a decrease in BU Asia (minus EUR 54 million).

Key notes:

-

The increase in Group Functions was due to higher results from our investments in Capitalia, Antonveneta, and Hungary's Kereskedelmi és Hitelbank Rt.

The decrease in BU Asia was mainly due to the inclusion in 2004 of the sale of shares in the Thai brokerage operations.

Other operating income

58

Other operating income increased by EUR 311 million, or 41.8%, to EUR 1,056 million, mainly due to the gain from the sale of Real Seguros (EUR 229 million) in BU Latin America, the gain from the sale of Nachenius, Tjeenk & Co (EUR 38 million) in BU Private Clients and the gain from the sale of the Bishopsgate office in London (EUR 43 million) in BU Europe.

Income of consolidated private equity holdings

Income of consolidated private equity holdings increased by EUR 1,021 million, or 39.0%, to EUR 3,637 million. Controlled private equity investments are consolidated under IFRS.

Operating expenses

Operating expenses increased by EUR 1,121 million, or 7.4%, to EUR 16,301 million (non-GAAP: EUR 254 million, or 2.0%), mainly due to Private Equity (plus EUR 777 million, non-GAAP plus EUR 14 million), BU Latin America (plus EUR 462 million), BU Asia (plus EUR 204 million), BU North America (plus EUR 135 million), partly offset by a decrease in Group Functions (minus EUR 319 million) and BU Netherlands (minus EUR 243 million).

Key notes:

- All BUs were impacted by greater expenditure on compliance. Our total expenditure on compliance in 2005 was approximately EUR 186 million (versus EUR 58 million in 2004).

• The increase in Private Equity was caused by higher operating expenses of consolidated private equity investments. The consolidation effect is the impact of the results of private equity investments, which are consolidated because these investments are controlled by the Group. Excluding consolidation effect (non-GAAP) Private Equity operating expenses increased by EUR 14 million.

• The increase in BU Latin America was driven by an increase in personnel costs as a result of the new collective labour agreement, the appreciation of the Brazilian real and the following expenses the settlement of pension fund obligations related to the bonus element of the collective labour agreements of previous years and information technology expenses.

• BU Asia operating expenses increased due to continued investments in the form of new branch openings and marketing campaigns.

• The increase in BU North America was mainly due to higher start-up costs of Group projects related to compliance, human resources and information technology.

• Operating expenses decreased in BU Netherlands, mainly due to the inclusion of a restructuring charge in 2004 results (EUR 408 million) for both former Wholesale Clients and Group Shared Services organisations. Additional costs arose from a new collective labour agreement, but more substantially from the buy-out of the profit-sharing agreements and the new flexible bonus scheme that replaced them.

• The decrease in Group Functions was mainly due to the release of the post-retirement healthcare benefit provision of 392 million). The results in 2004 included a charge (EUR 177 million) for the buy-out of the profit-sharing agreements.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 28 million, or 4.6%, to EUR 635 million, mainly due to BU Latin America (plus EUR 118 million) and BU Netherlands (plus EUR 108 million), partly offset by a decline in BU North America (minus EUR 247 million).

Key notes:

- The rise in BU Latin America should be viewed against the background of strong loan growth.
- The increase in BU Netherlands reflected the weak economic environment in the Netherlands and the

strong growth in the consumer finance portfolio.

BU North America benefited from an improvement in the quality of the credit portfolio as well as from releases and recoveries.

Effective tax rate

The effective tax rate for the Group declined from 23.8% in 2004 to 21.2% in 2005. This was mainly the result of the low effective tax rates at Group Functions and Private Equity.

Profit from discontinued operations net of tax

Profit from discontinued operations net of tax of EUR 187 million in 2005 was due to the classification as discontinued operations of the property development and management activities of Bouwfonds (EUR 136 million) in BU Netherlands and ABN AMRO Mortgage Group, Inc. (EUR 51 million) in BU North America.

Profit from discontinued operations net of tax of EUR 1,651 million in 2004 was due to the net profit of LeasePlan (EUR 1,207 million) in Group Functions, Bank of Asia (EUR 240 million) in BU Asia, Bouwfonds (EUR 146 million) in BU Netherlands and the ABN AMRO Mortgage Group, Inc. (EUR 58 million) in BU North America. LeasePlan and Bank of Asia were sold in 2004 and the gain on the sales of these investments of EUR 1,275 million is reflected in profit from discontinued operations net of tax.

Results of Operations by BU

Changes to reporting structure and presentation

The results of operations for the years ended 31 December 2005 and 2004 reflect the reconstructed results of operations for the years ended 31 December 2005 and 2004 of the new BUs assuming the new reporting structure had been in place during 2005 and 2004. In order to estimate the results presented, the former Wholesale Clients results have been allocated into those of the regional BUs, BU Global Clients and Group Functions, consistently applying relevant allocation keys for revenues and expenses. Operating income is attributed to BU Global Clients on the basis of a defined name-by-name list of global clients. The operating expenses of BU Global Clients include the directly attributable costs of the BU and the allocated costs of the products sold to BU Global Clients. The product costs are allocated on the basis of defined cost drivers. The results of Group Functions include the results of a defined set of products for which the product costs are allocated on the basis of defined cost drivers. The regional BU results include the results of our commercial clients in the respective regions and Global Markets products other than the results from proprietary trading and futures, which are included in Group Functions. The operating income is attributed to those regions where the transactions were performed and the costs allocated on the basis of defined cost drivers.

- The results from BU Netherlands include the results of the former Consumer & Commercial Clients BU Netherlands, the former Dutch Wholesale Clients and the mortgage activities from Bouwfonds.
- The results from BU Europe include the former European (excluding Dutch) commercial Wholesale Clients and former Consumer & Commercial Clients BU New Growth Markets.
- The results from BU North America include the results from the former Consumer & Commercial Clients BU North America and the North American activities of former Wholesale Clients.
- The results from BU Latin America include the results from the former Consumer & Commercial Clients BU Brazil and the Latin American activities of the former Wholesale Clients.

- The results from BU Asia include the results from the Asian activities of both the former Consumer & Commercial Clients BU New Growth Markets and the former Wholesale Clients.
- The results from BU Private Clients include the results from the International Diamond & Jewelry Group.
- The results from proprietary trading and futures trading (Global Markets operating income that can not be allocated to the regions as they are related to clients) are included in Group Functions. The results from Group

Functions also include the results from our participations in Capitalia and Antonveneta (up to 31 December 2005) and Kereskedelmi és Hitelbank Rt. (up to 29 May 2006).

BU Netherlands

The table sets forth selected information pertaining to BU Netherlands, for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)		
Net interest income	3,078	3,328	3,091
Net fee and commission income	751	710	668
Net trading income	486	392	213
Results from financial transactions	28	2	19
Share of result in equity accounted investments	51	13	32
Other operating income	246	184	204
Operating income	4,640	4,629	4,227
Operating expenses	3,118	3,282	3,525
Operating result	1,522	1,347	702
Loan impairment and other credit risk provisions	359	285	177
Operating profit before taxes	1,163	1,062	525
Income tax expense	319	323	159
Net operating profit	844	739	366
Profit from discontinued operations net of tax	505	136	146
Profit for the year	1,349	875	512
Total assets	169,862	176,874	174,102
Risk-weighted assets	75,617	78,725	85,320
Full-time equivalent staff	21,778	22,373	23,252
Number of branches and offices	643	683	676
Efficiency ratio (in %)	67.2%	70.9%	83.4%

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year increased by EUR 474 million, or 54.2%, to EUR 1,349 million. Profit from continuing operations increased by EUR 105 million, or 14.2%, to EUR 844 million, mainly as the result of a decrease in operating expenses of EUR 164 million, partly offset by an increase of loan impairment and other credit risk provisions of EUR 74 million. Profit from discontinued operations net of tax increased by EUR 369 million, reflecting the EUR 338 million net gain on the sale of Bouwfonds property development and management activities and EUR 31 million increase in results from operations (EUR 167 million in 2006 compared with EUR 136 million in 2005).

Operating income

Operating income was almost flat at EUR 4,640 million.

Net interest income decreased by EUR 250 million, or 7.5%, which was affected by EUR 215 million of mortgage prepayment penalties in 2005 that were not neutralised, compared with only EUR 14 million in 2006. This negatively affected the year-on-year growth in net interest income by EUR 201 million.

- Excluding the EUR 201 million year-on-year difference in net mortgage prepayment penalties, operating

61

income increased by 4.8% to EUR 4,626 million, mainly driven by the consumer and commercial clients business, which increased revenues on the back of higher net interest income.

• Net fee and commission income increased by EUR 41 million, or 5.8%, resulting from higher commission on banking transactions, securities and asset management.

• Net trading income increased by EUR 94 million, or 24.0%, mainly due to higher income on the sale of derivatives.

• Other operating income increased by EUR 62 million, or 33.7%, mainly due to gains on the disposal of real estate.

Operating expenses

Operating expenses decreased by EUR 164 million, or 5.0%, to EUR 3,118 million, mainly due to lower personnel costs as a result of a reduction in full-time equivalents (from 22,373 in 2005 to 21,778 in 2006), partly offset by EUR 29 million restructuring charges for the Services initiative and EUR 14 million restructuring charges for Risk and Global Markets reorganisations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 74 million, or 26.0%, to EUR 359 million, mainly due to higher provisions for the consumer credit portfolio and the small and medium-sized enterprises (SME) portfolio. The increase in provisioning was related to the overall loan growth and a shift in business mix, due to strong growth of consumer and SME credits, which is fully in line with the BU Netherlands' strategy.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year 2005 increased by EUR 363 million, or 70.9%, to EUR 875 million. This reflects an increase in operating income of EUR 402 million and a decrease in operating expenses of EUR 243 million, partly offset by an increase in loan impairment and other credit risk provisions of EUR 108 million.

Operating income

Operating income grew by EUR 402 million, or 9.5%, to EUR 4,629 million as BU Netherlands continued to benefit from the implementation of its strategy to become the primary bank for all its customers. Its continued improvements in services and product offerings led to much higher client satisfaction levels, especially for mid-market clients such as preferred banking customers, medium-sized enterprises and corporate clients. As a result, BU Netherlands grew its mid-market client base and also sold more products to these clients. In addition, it was able to gain market share in loans, savings, and life insurance products.

• Net interest income increased by EUR 237 million, or 7.7%, mainly driven by increased loan and saving volumes and higher mortgage prepayment penalties. Mortgage prepayment penalties in 2005 amounted to EUR 215 million, compared with EUR 116 million in 2004. This is a reflection of the high levels of mortgage refinancing in the Netherlands.

• Net fee and commission income increased by EUR 42 million, or 6.3%, mainly due to a strong growth in commission on securities resulting from the improved stock market climate.

• Net trading income increased by EUR 179 million, or 84.0%, mainly due to higher Global Markets trading results and due to higher results on the sale of derivatives. This is a reflection of the success of the regional treasury desk, which combines BU Netherlands' regional relationships with its mid-market corporate clients and product expertise

from former Wholesale Clients.

Operating expenses

Operating expenses decreased by EUR 243 million, or 6.9%, to EUR 3,282 million, mainly due to the restructuring charge in the 2004 results (EUR 408 million) for both former Wholesale Clients and Global Shared

62

Service organisations, partly offset by higher commercial expenses and costs arising from compliance with the Sarbanes-Oxley Act, Basel II and other regulations. Additional costs arose from compensating staff on the termination of profit-sharing agreements. A new collective labour agreement provided that staff will be compensated in 2005 and 2006 for 3.5 years of profit-sharing. The cost for the 2005 compensation was included in the income statements at the end of 2004 (in Group Functions). The costs for the 2006 pay-out were accrued over 2005 (in BU Netherlands).

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions rose by EUR 108 million, or 61.0%, to EUR 285 million, mainly in the SME and the consumer loan portfolio. This is a reflection of the continued expansion in the loan volume and higher than average growth in our consumer finance portfolio.

BU Europe

The table below sets forth selected information pertaining to BU Europe including Antonveneta, Antonveneta and BU Europe excluding Antonveneta, for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December								
	BU Europe including Antonveneta			Antonveneta			BU Europe excluding Antonveneta

Antonveneta

As we only took control of Antonveneta on 2 January 2006, we have not made a comparison between the results of operations for the years ended 31 December 2006, 2005 and 2004 for this entity. Profit for the year was EUR 192 million net of purchase accounting from the valuation of intangible assets (amounting to EUR 1,194 million) and fair value adjustments of financial assets and liabilities. The intangible assets are amortised over a period of approximately eight years within operating expenses. The fair value adjustments are substantially amortised through net interest income over a period ranging from one to eight years dependent on the duration of the respective assets and liabilities and adjusted realised gains on sales of related assets and liabilities.

BU Europe excluding Antonveneta***Results of operations for the years ended 31 December 2006 and 2005***

Results for the year decreased by EUR 46 million to a loss of EUR 149 million. This reflects an increase in operating income of EUR 231 million, an increase in operating expenses of EUR 225 million and an increase in

loan impairment and other credit risk provisions of EUR 50 million.

Operating income

Operating income increased by EUR 231 million, or 20.8%, to EUR 1,341 million, predominantly on the back of higher Global Markets income, as client income grew strongly.

Equity revenues benefited from increased client activity, particularly in derivative and structured products. Fixed Income Capital Markets had a strong year as it was able to successfully execute a number of deals for regional clients. Financial Markets also had a good year due to the introduction of a number of innovative new products.

The Private Investor Product offering, focused on Germany, Switzerland and Italy, grew during the year. Mergers & Acquisitions and Equity Capital Markets revenues were up on the back of strong deal volumes.

Transaction Banking revenues increased due to a strong performance of Central and Eastern Europe, particularly cash flow advisory for Russian and Kazakh energy sector clients.

Increased focus and an upgraded coverage model for financial institutions throughout 2006 led to almost 75% growth in revenues from Financial Institutions and Public Sector clients. Corporate client revenues also benefited from our focused regional client coverage, and revenues increased by over 30%. Other operating income in 2005 included the gain on the sale of the Bishopsgate office in London (EUR 43 million).

Operating expenses

Operating expenses increased by EUR 225 million, or 18.6%, to EUR 1,433 million, mainly due to EUR 40 million restructuring charges for Global Markets and Services and an increase in expenses linked to the growth in operating income, higher bonus expenses and higher costs for compliance with the Sarbanes-Oxley Act and other regulations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 50 million to a charge of EUR 15 million due to lower releases.

Results of operations for the years ended 31 December 2005 and 2004

Results for the year 2005 increased by EUR 321 million to a loss of EUR 103 million. This reflects an increase in operating income of EUR 432 million, a decrease in operating expenses of EUR 85 million and an increase in loan impairment and other credit risk provisions of EUR 25 million.

Operating income

Operating income increased by EUR 432 million, or 63.7%, to EUR 1,110 million, due to the increase in revenues from Global Markets. For the year 2005, the operating income lines net interest income and net trading income should be viewed together due to a reclassification in 2005 between net interest and net trading income resulting from the transition to IFRS (impact approximately EUR 550 million). This required changes to reporting and data flows that we completed in 2005. For 2004, we were only able to estimate the amount, due to the complexity and the volume of transactions involved.

- Net interest income decreased by EUR 459 million to minus EUR 248 million and net trading income increased by EUR 778 million to EUR 957 million. Viewed together, the increase was due to higher Global Markets results.

- Other operating income in 2005 included the gain on the sale of the Bishopsgate office in London (EUR 43 million).

Operating expenses

Operating expenses decreased by EUR 85 million, or 6.6%, to EUR 1,208 million. The 2004 results included

64

restructuring charges (EUR 123 million) for both former Wholesale Clients and Group Shared Services reorganisations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 25 million to a release of EUR 35 million, due to lower level of releases.

BU North America

The table sets forth selected information pertaining to BU North America for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)

Number of branches and offices	441	442	436
Efficiency ratio (in %)	65.6%	65.3%	67.1%

On 22 January 2007, the Group announced the sale of the ABN AMRO Mortgage Group, Inc. (AAMG), our US-based residential mortgage broker originating platform and the residential mortgage servicing business, to Citigroup. The decision to exit the wholesale mortgage business is part of the Group's strategy to streamline its activities and to align them around its mid-market commercial and consumer clients. LaSalle Bank Corporation, AAMG's corporate parent, will continue to serve consumer clients with residential mortgages and home equity loans through its retail branch network. The closing of this transaction occurred in the first quarter of 2007, and the results of the divested business are reported as discontinued operations net of tax and are therefore not part of the comparison made.

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year increased by EUR 102 million, or 9.4%, to EUR 1,188 million. Profit from continuing operations increased by EUR 49 million, or 4.7%, to EUR 1,084 million, mainly as a result of increases in operating income of EUR 225 million, EUR 158 million in operating expenses and EUR 124 million in loan impairment and other credit risk provisions. Discontinued operations net of tax increased by EUR 53 million. The US dollar depreciated 2.1% on average compared with the euro (comparing average rate in 2006 with the average

rate in 2005).

Operating income

Operating income increased by EUR 225 million, or 6.4%, to EUR 3,746 million, mainly due to an improved contribution from all business lines despite challenges from the yield curve. The yield curve was inverted or flat for most of the year, which resulted in pressure on interest spreads. Furthermore, operating income increased due to the impact of the Talman settlement (EUR 110 million).

Net interest income increased by EUR 137 million, or 6.2%, mainly due to continued commercial loan growth and higher deposit spreads.

Results from financial transactions increased by EUR 76 million, or 96.2%, mainly due to higher volumes and gains from commercial conduit and multi-family group loan sales and improved cross-selling efforts. Cross-selling income increased primarily from cash management and syndication fees and from Global Market products, such as derivatives, foreign exchange and capital market products.

Other operating income increased by EUR 89 million, or 39.7%, due to the inclusion of the impact of the Talman settlement. In December 2006, BU North America, through LaSalle Bank N.A., received a favourable judgement in its claim against the US-government related to the 1992 acquisition of the Talman Home Federal Savings and Loan Association. As a result, in December 2006, EUR 110 million was recognised in other operating income.

Operating expenses

Operating expenses increased by EUR 158 million, or 6.9%, to EUR 2,457 million mainly due to EUR 52 million restructuring charges related to a programme announced on 28 December 2006, EUR 12 million restructuring charges for the additional Services initiative and higher expenses related to investments in Group Service IT action tracks and increased compliance expenses.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 124 million, from a net release of EUR 86 million to a net charge of EUR 38 million, mainly as a result of lower recoveries and releases.

Income tax expense

The overall effective tax rate declined from 20.9% in 2005 to 13.4% in 2006 due to tax releases.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year increased by EUR 287 million, or 35.9%, to EUR 1,086 million. This is mainly the result of increased operating income of EUR 294 million, increased operating expenses of EUR 135 million and a decrease in loan impairment and other credit risk provisions of EUR 247 million. The US dollar appreciated by 0.8% on average compared with the euro (comparing average rate in 2005 with the average rate in 2004).

Operating income

Operating income increased by EUR 294 million, or 9.1%, to EUR 3,521 million, mainly driven by higher commercial banking revenues and lower hedging costs related to the available-for-sale portfolio.

- Net interest income decreased by EUR 121 million, or 5.2%, mainly due to the impact of the flattening yield curve and margin pressure in Global Markets and in commercial lending due to increased competition, partly offset by solid commercial loan growth and higher deposit spreads.
- Net fee and commission income increased by EUR 115 million, or 18.6%, mainly due to higher Global Markets client commissions. The number of personal and small business checking accounts increased by more than 27,000, which led to higher checking- and trustee-related fees.

- Net trading income increased by EUR 87 million, or 47.8%, mainly due to higher Global Markets trading results.
- Results from financial transactions increased by EUR 275 million to EUR 79 million, due to lower hedging costs and higher gains from investment securities. The hedging costs, related to the available-for-sale portfolio, were significantly lower due to lower volatility in interest rates in 2005.
- Other operating income in 2004 included the sale of the professional brokerage and domestic custody business (EUR 46 million).

Operating expenses

Operating expenses increased by EUR 135 million, or 6.2%, to EUR 2,299 million, mainly due to expenses with respect to higher start-up costs of Group projects related to compliance, human resources and information technology. The 2004 results included restructuring charges (EUR 89 million) for both former Wholesale Clients and Global Shared Service reorganisations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions decreased by EUR 247 million, or 153.4%, due to a net release of EUR 86 million. The decrease was due to lower gross provisioning levels as well as increased recoveries, reflecting the improving credit quality of the loan portfolio.

BU Latin America

The table sets forth selected information pertaining to BU Latin America for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)		
Net interest income	2,905	2,210	1,536

Number of branches and offices	2,151	2,153	2,106

Efficiency ratio (in %)	59.4%	60.3%	68.2%
-------------------------	-------	-------	-------

Results of operations for the years ended 31 December 2006 and 2005

67

Profit for the year increased by EUR 46 million, or 7.6%, to EUR 648 million. This is mainly the result of an increase in operating income of EUR 675 million, an increase in operating expenses of EUR 371 million and an increase in loan impairment and other credit risk provisions of EUR 374 million. The Brazilian real appreciated by 8.3% on average compared with the euro (comparing average rate in 2006 with the average rate in 2005).

Operating income

Operating income increased by EUR 675 million, or 22.0%, to EUR 3,738 million, mainly due to the continued strong growth of the Brazil credit portfolio and a further improvement in non-interest income, partly offset by the inclusion in 2005 of the book profit on the sale of Real Seguros (EUR 229 million in other operating income). The contribution from Brazil to the operating income of the BU Latin America was unchanged at 95%.

At constant foreign exchange rates, the Brazilian retail banking business, which contributed 69.0% to the operating income from Brazil, grew by 19.7%, fuelled by a 31.8% increase in the retail loan portfolio at slightly lower net interest margins.

For the Aymoré consumer finance activities, which contributed 12.0% to the operating income from Brazil, operating income was up by 34.4% due to strong loan growth. Average balances grew by 32.1%. Commercial banking, which contributed 6.2% to the operating income from Brazil, increased its operating income by 18.8% on the back of loan growth, client-related trading income and net fee and commission income.

Operating expenses

Operating expenses increased by EUR 371 million, or 20.1%, to EUR 2,219 million, mainly due to a restructuring charge (EUR 12 million), higher investments related to Group Services IT outsourcing projects, the impact of the successive new collective labour agreements (collective labour agreements that came into effect in September 2005 and September 2006) and an increase in performance-related bonuses. The operating expense growth should also be seen in the context of an 8% increase in the number of customers in Brazil to 13.1 million at year-end 2006, as well as a further expansion of the network of sales outlets.

Loan impairment and other credit risk provisions

Loan impairments and other credit risk provisions increased by EUR 374 million, or 107.5%, to EUR 722 million, reflecting an increase in delinquencies in Brazil, mainly in the first half of the year 2006, as a result of the strong increase in credit availability in Brazil that started in 2005.

Income tax expense

The overall effective tax rate for the year 2006 declined by 11.9 percentage point to 18.7% as a result of tax credits related to the acquisition of Banca Intesa's minority holding in Banco ABN AMRO Real.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year increased by EUR 361 million, or 149.8%, to EUR 602 million. This is mainly due to an increase in operating income of EUR 1,032 million, an increase in operating expenses of EUR 462 million and an increase of loan impairment and other credit risk provisions of EUR 118 million. The Brazilian real appreciated by 22.6% on average compared with the euro (comparing average rate in 2005 with the average rate in 2004).

Operating income

Operating income increased by EUR 1,032 million, or 50.8%, to EUR 3,063 million.

- Net interest income increased by EUR 674 million, or 43.9%, mainly driven by robust organic growth in retail banking activities. The retail banking activities expanded by 16.0%, fuelled by a 31.4% increase in the retail loan portfolio. Lending to households, accounting for 53.8% of the retail loan portfolio, increased by 35.1%, driven by strong growth in personal loans and overdrafts. Lending to small and medium-sized enterprises grew by 27.3% on the back of increased account receivables financing and working capital needs. The average spread of the retail loan portfolio remained virtually unchanged.

Net fee and commission income increased by EUR 35 million, or 10.2%. At constant foreign exchange rates, the net fee and commission income decreased, mainly due to payment services (retail banking) and higher commissions paid to car dealers resulting from higher volume in car loans.

Net trading income increased by EUR 63 million to EUR 57 million, due to higher overall results from foreign exchange dealing and derivatives held for trading.

Share of result in equity-accounted investments increased by EUR 28 million to EUR 37 million, mainly due to Visanet and Usiminas investments.

Other operating income increased by EUR 217 million, due to the inclusion of the gain (EUR 229 million) on the sale of Real Seguros.

Operating expenses

Operating expenses increased by EUR 462 million, or 33.3%, to EUR 1,848 million driven by increases in personnel costs as a result of the new collective labour agreement, an increase in bonus accruals, new marketing and current account acquisition campaigns, the appreciation of the Brazilian real and expenses (EUR 37 million) in the last quarter of 2005 relating to the settlement of pension fund obligations regarding the one-time bonus element of the collective labour agreements of previous years, as well as information technology expenses.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions on loan losses increased by EUR 118 million, or 51.3%, to EUR 348 million, reflecting the strong growth in the retail portfolio.

Income tax expense

The overall effective tax rate for the year 2005 fell by 11.3 percentage points to 30.6%, mainly as a result of tax credits in the fourth quarter of 2005. The further appreciation of the Brazilian real against the US dollar in 2005 led to a hedge-related tax charge of EUR 39 million, compared with a hedge-related tax charge of EUR 24 million in 2004.

BU Asia

The table sets forth selected information pertaining to BU Asia for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)

Full-time equivalent staff	13,894	11,590	8,491
Number of branches and offices	114	144	140
Efficiency ratio (in %)	71.7%	73.9%	66.4%

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year decreased by EUR 95 million, or 46.1%, to EUR 111 million. This reflects an increase in operating income of EUR 282 million, an increase in operating expenses of EUR 175 million and an increase in loan impairment and other credit risk provisions of EUR 191 million.

Operating income

Operating income increased by EUR 282 million, or 22.8%, to EUR 1,519 million, mainly driven by strong client growth in consumer banking and higher operating income in the commercial segment.

Client growth in the consumer banking segment was mainly driven by the Van Gogh Preferred Banking business (a relationship banking approach to mass affluent clients serviced through a dedicated point of contact). The number of clients in Asia increased by 18% to 3.3 million and the number of credit cards in Asia increased by 19% to 2.8 million. The strongest-performing regions, from a consumer banking perspective, were India, China, Hong Kong and Taiwan, United Arab Emirates and Indonesia. India and China, Hong Kong and Taiwan are some of our key franchises in Asia and are a major focus for our growth efforts. The higher operating income in the commercial business segment was mainly driven by growth in Hong Kong, United Arab Emirates, Pakistan and China. Australia grew by 59%, driven by strong growth in its infrastructure capital business.

Net fee and commission income increased by EUR 172 million, or 40.9%, mainly due to payment services following the growth in the credit card business and due to large infrastructure and capital deals in Australia.

- Net trading income increased by EUR 179 million to EUR 310 million, mainly resulting from higher

70

equity finance income in Hong Kong and Taiwan.

Share of result in equity accounted investments decreased by EUR 11 million, or 15.1%. The contribution from our participation (40%) in Saudi Hollandi Bank decreased by EUR 9 million, or 12.3%, as the improved operating result was more than offset by our share in EUR 21 million provisioning.

Operating expenses

Operating expenses increased by EUR 175 million, or 19.1%, to EUR 1,089 million, which was mainly a reflection of staff hirings (from 11,590 full-time equivalents in 2005 to 13,894 full-time equivalents in 2006), continued investments in the expansion of the branch network in support of our Van Gogh Preferred Banking growth ambitions and continued growth in the consumer and credit card business and EUR 10 million restructuring charges for Global Markets and Risk.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 191 million to EUR 218 million, mainly reflecting higher provisions for the credit card receivables in Taiwan.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year 2005 decreased by EUR 308 million, or 59.9%, to EUR 206 million. Profit from continuing operations decreased by EUR 68 million, or 24.8%, to EUR 206 million. This is mainly the result of an increase in operating income of EUR 167 million, an increase in operating expenses of EUR 204 million and an increase in loan impairment and other credit risk provisions of EUR 24 million. Discontinued operations net of tax related to the classification as discontinued operations net of tax of Bank of Asia, which was sold in 2004.

Operating income

Operating income increased by EUR 167 million, or 15.6%, to EUR 1,237 million, largely due to strong growth in consumer banking revenues driven by the growth of the credit card business and the Van Gogh Preferred Banking activities. The number of credit cards in Asia increased by 48% to 2.4 million and the number of customers in Asia increased by 36% to 2.8 million.

Net interest income increased by EUR 143 million, or 34.0%, reflecting the increase in credit card lending, consumer finance and saving accounts.

Net fee and commission income increased by EUR 38 million, or 9.9%, due to payment services following the growth in the credit card business, partly offset by the reclassification of credit card lending fees from net fee and commission income to net interest income in 2005.

Share of result in equity accounted investments decreased by EUR 54 million, or 42.5%, mainly due to the inclusion in 2004 of the sale of shares in the Thai brokerage operation. The contribution from our participation (40%) in Saudi Hollandi Bank increased.

Operating expenses

Operating expenses increased by EUR 204 million, or 28.7%, to EUR 914 million, mainly due to higher expenses from Global Markets activities and continued investments in the various businesses in Asia, including the launch of new products, opening of new branches and intensive marketing campaigns. In 2005, 14 branches were opened, bringing the total in Asia to 67, of which 23 are located in India. The 2004 results included a restructuring charge

(EUR 27 million) for both former Wholesale Clients and Group Shared Services reorganisations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 24 million to EUR 27 million, reflecting the growth of the loan portfolio and higher credit card outstandings.

BU Global Clients

The table below sets forth selected information pertaining to BU Global Clients for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December								
	IFRS			Consolidation effect (1)			Excluding consolidation effect (non-GAAP measure) (2)

(1) This is the impact per line item of the private equity investments which are required to be consolidated under IFRS. See the accounting policies section of our financial statements.

(2) See “-A. Operating results - Consolidation effect of controlled private equity investments” for an explanation of our use of non-GAAP financial measures.

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year decreased by EUR 249 million, or 45.0%, to EUR 304 million. This is mainly the result of a decrease in operating income of EUR 42 million, an increase in operating expenses of EUR 275 million and a decrease in loan impairment and other credit risk provisions of EUR 23 million.

Operating income

Operating income decreased by EUR 42 million, or 1.7%, to EUR 2,408 million. Excluding the consolidation effect (non-GAAP measure) operating income rose by EUR 60 million, or 2.5%.

Net fee and commission income increased by EUR 415 million, or 49.9%, and net trading income decreased by EUR 148 million, or 20.8%. The product take-up of clients served in 2005 was approximately one-third mergers and acquisitions, fixed income capital markets, equity capital markets, structured lending and merchant banking; one-third equity and financial markets (rates, foreign exchange, credits and alternative local products) and one-third loan products and transaction banking. Further focus on fee-driven products led to a change in the product mix in 2006 with strong growth in primary and secondary capital markets products.

The 2006 results include the fair market adjustments of the indirect stake in Korean Exchange Bank (positive EUR 69 million in 2005 and negative EUR 13 million in 2006).

Results from financial transactions decreased by EUR 80 million, or 66.1%. As of the second half of 2005 the BU Global Clients implemented an ongoing programme of credit portfolio hedging,

securitisations and loan sales, in line with the Group's strategy to manage the balance sheet more actively. Costs associated with managing the portfolio are booked as a net charge to results from financial transactions.

Operating expenses

Operating expenses increased by EUR 275 million, or 14.7%, to EUR 2,144 million (non-GAAP measure EUR 379 million), due to a shift in the product mix, which led to an increase in allocated infrastructure and product costs, and in 2006 includes a restructuring charge (EUR 19 million) for Group Shared Services reorganisations.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions decreased by EUR 23 million to a net release of EUR 27 million, which was mainly caused by a release in the incurred-but-not-identified provision.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year increased by EUR 364 million, or 192.6%, to EUR 553 million. This is mainly the result of an increase in operating income of EUR 362 million, an increase in operating expenses of EUR 87 million and a decrease in loan impairment and other credit risk provisions of EUR 99 million.

Operating income

Operating income increased by EUR 362 million, or 17.3%, to EUR 2,450 million, mainly due to the operating income of our private equity holding (Priory) and due to enhanced activity of our clients and a greater share of their wallet.

Operating expenses

Operating expenses increased by EUR 87 million, or 4.9%, to EUR 1,869 million, mainly due to the consolidation of operating expenses of our private equity holding (Priory). The 2004 results included a restructuring charge (EUR 49 million) for both the former Wholesale Clients and Global Shared Service reorganisation.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions decreased by EUR 99 million to a net release of EUR 50 million, mainly due to releases.

BU Private Clients

The table sets forth selected information pertaining to BU Private Clients for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)

Assets under Administration (in billions of EUR)	142.0	131.0	115.0
Full-time equivalent staff	3,365	4,093	4,024
Number of branches and offices	96	85	83
Efficiency ratio (in %)	68.8%	70.5%	75.8%

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year decreased by EUR 7 million, or 2.5%, to EUR 272 million. This reflects an increase in operating income of EUR 92 million, an increase in operating expenses of EUR 41 million, an increase in loan impairment and credit risk provisions of EUR 24 million and an increase in income tax expense of EUR 34 million.

Operating income

Operating income increased by EUR 92 million, or 7.1%, to EUR 1,389 million driven by increases across all regions (especially the Netherlands, France and Germany) and the successful integration of Bank Corluy into Private Clients Belgium.

- Net interest income grew by EUR 15 million, or 2.8%, on the back of higher volumes in client deposits.

• The increase in non-interest income was driven by net fee and commission income, which grew by EUR 88 million, or 14.4%, reflecting the client appetite for equity products and Private Investor Products. Assets under Administration increased by EUR 11.0 billion to EUR 142.0 billion, reflecting an increase in net new assets and higher net asset values due to improved financial markets. The asset mix remained relatively stable with 69% in securities and 31% in cash.

Other operating income in 2005 included the gain on the sale of Nachenius, Tjeenk & Co in 2005 (EUR 38 million).

74

Operating expenses

Operating expenses increased by EUR 41 million, or 4.5%, to EUR 956 million as a consequence of the merger of Banque Neuflyze and Banque OBC in France, higher value-added tax in France following a change in legislation, higher expenses in Asia and Latin America to fund future growth and higher compliance costs. The 2005 results included restructuring charges (EUR 45 million versus EUR -27 million release in 2006) related to the merger of Banque Neuflyze and OBC in France.

Loan impairment and credit risk provisions

Loan impairment and credit risk provisions increased by EUR 24 million to EUR 40 million, mainly due to a higher provision in the International Diamonds & Jewelry Group.

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year 2005 increased by EUR 87 million, or 45.3%, to EUR 279 million. This is mainly the result of increased operating income of EUR 151 million and increased operating expenses of EUR 46 million.

Operating income

Operating income increased by EUR 151 million, or 13.2%, to EUR 1,297 million, mainly due to a strong performance in the Netherlands and Germany and the contribution of Bank Corluy (Private Clients Belgium).

• Net interest income increased by EUR 70 million, or 15.3%, due to higher client balances on savings accounts and deposits, and spreads in the Netherlands, Germany and the European growth markets.

• Net fee and commission income increased by EUR 52 million, or 9.3%, mainly due to higher Assets under Administration, as well as improved equity markets and a substantial number of new product launches.

• Share of result in equity accounted investments decreased by EUR 13 million. The results in 2004 included a book profit on the sale of fund management services in France.

• Other operating income increased by EUR 41 million, due to the gain on the sale of Nachenius, Tjeenk & Co (EUR 38 million).

Operating expenses

Operating expenses increased by EUR 46 million, or 5.3%, to EUR 915 million, partly due to higher costs related to the expansion of the business in the Netherlands. Expenses in Germany showed a decline, reflecting the cost synergies from the completed integration of Delbrück Bethmann Maffei.

The results in 2005 included restructuring charges (EUR 45 million) related to the merger of Banque Neuflyze and OBC in France and the results in 2004 included Group Shared Services restructuring charges (EUR 56 million).

Income tax expense

The overall effective tax rate for the year 2005 fell by 5.1% points to 23.8%, mainly due to tax exempt book profit on the sale of Nachenius, Tjeenk & Co and lower tax expense resulting from the statutory reduction of Swiss corporate income tax.

BU Asset Management

The table sets forth selected information pertaining to BU Asset Management for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)		
Net interest income	(15)	6	5
Net fee and commission income	717	596	535
Net trading income	(4)	14	9
Results from financial transactions	40	55	10
Share of result in equity accounted investments	1	18	2
Other operating income	89	23	34
Operating income	828	712	595
Operating expenses	528	501	444
Operating profit before taxes	300	211	151
Income tax expense	65	40	46
Net operating profit	235	171	105
Profit for the year	235	171	105
Total assets	1,402	1,199	954
Risk-weighted assets	870	823	1,182
Assets under Management (in billions of EUR)	193.3	176.2	160.7
Full-time equivalent staff	1,563	1,655	1,919
Number of branches and offices	22	33	31
Efficiency ratio (in %)	63.8%	70.4%	74.6%

In February 2006, BU Asset Management acquired International Asset Management Limited (IAM). IAM is a fund of hedge funds that manages approximately USD 2.6 billion of Assets under Management.

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year increased by EUR 64 million, or 37.4%, to EUR 235 million. This was mainly the result of an increase in operating income of EUR 116 million, partly offset by an increase in operating expenses of EUR 27 million.

Operating income

Operating income increased by EUR 116 million, or 16.3%, to EUR 828 million.

• Net fee and commission income increased by EUR 121 million, or 20.3%, reflecting the higher Assets under Management levels, the higher fee levels on existing products and a further shift in the asset mix towards more profitable products.

• Share of result in equity accounted investments decreased by EUR 17 million to EUR 1 million due to the sale of the trust business in 2005.

•

Results from financial transactions decreased by EUR 15 million, or 27.3%, due to a decline in revenues from seed capital positions.

Other operating income increased by EUR 66 million to EUR 89 million as a result of divestments. The 2006 results included the gain on the sale of the Asset Management operations in Curacao (EUR 28 million), the gain on the sale of the domestic asset management operations in Taiwan (EUR 38 million) and the gain on the sale of the US mutual fund business (EUR 17 million). The 2005

results included the sale of operations in Kazakhstan (EUR 13 million).

Operating expenses

Operating expenses increased by EUR 27 million, or 5.4%, to EUR 528 million. Lower operating expenses due to the sale of the trust business were more than offset by higher bonus accruals and the inclusion of IAM.

Income tax expense

The overall effective tax rate for the year increased from 19.0% in 2005 to 21.7% in 2006, mainly due to lower levels of tax-exempted seed capital gains. The income tax expense was also influenced in 2006 by the tax-exempted gain on the sale of the asset management operations in Curacao (EUR 28 million), the tax-exempted gain on the sale of the domestic asset management operations in Taiwan (EUR 38 million) and the tax-exempted gain on the sale on the sale of the United States mutual fund business (EUR 17 million). The income tax expense in 2005 was influenced by the inclusion of the tax-exempted gain on the sale of the trust business (EUR 17 million).

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year increased by EUR 66 million, or 62.9%, to EUR 171 million. This is mainly the result of an increase in operating income of EUR 117 million and an increase in operating expenses of EUR 57 million.

Operating income

Operating income increased by EUR 117 million, or 19.7%, to EUR 712 million.

- Net fee and commission income increased by EUR 61 million, or 11.4%, despite the loss in net fee and commission income from the sale of the trust business. The increase reflected the improved asset mix towards more profitable products, higher fee levels on existing products, the rise in Assets under Management levels due to a better capital markets environment and improved performance of our mandates.
- Results from financial transactions increased by EUR 45 million to EUR 55 million, due to the positive returns on seed capital and the book profit on small divestments.
- Share of result in equity accounted investments increased by EUR 16 million to EUR 18 million, due to the sale of the trust business.
- Other operating income decreased by EUR 11 million, or 32.4%, as a result of divestments driven by the strict focus on core activities. The 2005 results included the sale of operations in Kazakhstan (EUR 13 million). The 2004 results included the gain on the sale of the 401 K business in the United States (EUR 16 million) and the book profit on the sale of the Czech pension fund in the first quarter of the year (EUR 12 million).

Operating expenses

Operating expenses increased by EUR 57 million, or 12.8%, to EUR 501 million, mainly driven by higher performance-related remuneration, professional fees related to divestment processes, an increase in commercial activities and an impairment charge taken for software and commercial contracts.

Income tax expense

The overall effective tax rate for the year decreased from 30.5% in 2004 to 19.0% in 2005, due to the impact of non-taxable events including the impact of the sale of the trust business (EUR 17 million), small divestments and proceeds from seed capital. The income tax expense in 2004 also included the impact of the tax exempted gain on the sale of the Czech Pension Fund (EUR 12 million).

Private Equity

The table below sets forth selected information pertaining to Private Equity for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December						Excluding consolidation effect

(1) This is the impact per line item of the private equity investments which are required to be consolidated under IFRS. See the accounting policies section of our consolidated financial statements.

(2) See “-A. Operating results - Consolidation effect of controlled private equity investments” for an explanation of our use of non-GAAP financial measures.

Results of operations for the years ended 31 December 2006 and 2005

Private Equity made a total of EUR 483 million in new investments in 2006. A total of EUR 1,044 million in proceeds was realised from divestments. As a result of investments, divestments, unrealised fair market value changes including foreign exchange fluctuations of EUR 412 million, the value of the total portfolio under management by Private Equity decreased from EUR 2,458 million in 2005 to EUR 2,309 million in 2006.

Major new buy-out investments in 2006 were U-pol (United Kingdom, automotive manufacturing), OFIC (France, isolation materials), Lucas Bols (Netherlands, branded liqueurs and spirits), Nextira One (France, integrated enterprise network solutions), Volution (United Kingdom, constructions), Douglas Hanson (United States, manufacturing, add-on to Loparex, Sweden), Amitco (United Kingdom, manufacturing) and Saunatec (Finland, manufacturing).

Major divestments were Holland Railconsult (Netherlands, railway engineering), Kreatel communications (Sweden, telecommunications), Sogetrel (France, telecommunications), Radio Holland Group (Netherlands, maritime navigation and communication systems) and RTD (Netherlands, industrial non-destructive testing services), Jessops (United Kingdom, retail) and Dennis Eagle (United Kingdom, industrial).

The fair value of the unquoted buy-out portfolio at year-end 2006 amounted to EUR 1,729 million. The fair market value of the unquoted corporate investment portfolio amounted to EUR 533 million. The fair market value of the quoted portfolio was EUR 47 million.

In 2006, Private Equity completed 19 acquisitions and 58 add-ons for a total of EUR 483 million and 39 divestments for a total of EUR 1,044 million.

Profit for the year increased by EUR 146 million, or 55.5%, to EUR 409 million. This was mainly the result of an increase in operating income of EUR 1,796 million and an increase in operating expenses of EUR 1,640 million.

Operating income

Operating income increased by EUR 1,796 million, or 49.0%, to EUR 5,463 million, mainly due to higher income from consolidated private equity investments, higher unrealised fair market value returns from unconsolidated investments partially offset by increased interest expenses.

Net interest income decreased by EUR 99 million to a minus of EUR 299 million, due to higher interest expenses from consolidated private equity investments.

Operating expenses

Operating expenses increased by EUR 1,640 million, or 48.4%, to EUR 5,031 million, mainly due to higher expenses from consolidated private equity investments, lower overhead charges and lower goodwill impairments.

Results of operations for the years ended 31 December 2005 and 2004

The fair market value of the private equity portfolio increased from EUR 1,993 million in 2004 to EUR 2,458 million in 2005. This was the result of EUR 812 million in new investments, EUR 497 million of investments sold, EUR 188 million (including foreign exchange fluctuations) of unrealised fair market value changes on the existing portfolio and EUR 38 million of reclassifications (including foreign exchange fluctuations). Unrealised changes in the fair market value of the consolidated portfolio are only recognised as operating income at the time when a consolidated investment is sold.

Major new buy-out investments in 2005 were FlexLink (Sweden, engineering), Strix (UK, engineering), Fortex (Netherlands, support services), Loparex (Finland, industrial products), Everod (Australia, medical services), Bel'm (France, consumer products), IMCD (Netherlands, chemicals), Nueva Terrain (Spain, construction), Roompot (Netherlands, leisure), Scotts and McColls (Australia, transportation), Bonna Sabla (France, industrial products & services) and Bianchi Vending (Italy, business products & supplies). Major divestments were Handicare (Norway, medical equipment), MobiTel (Bulgaria, communications), AUSDOC (Australia, support services) and Puzzler Media (UK, media).

The fair market value of the unquoted buy-out portfolio at year-end 2005 amounted to EUR 1,711 million. The fair market value of the unquoted corporate investment portfolio amounted to EUR 579 million. The fair market value of the quoted portfolio was EUR 168 million.

Profit for the year decreased by EUR 142 million, or 35.1%, to EUR 263 million. This was mainly the result of an increase in operating income of EUR 599 million, an increase in operating expenses of EUR 777 million and an increase in loan impairment and other credit risk provisions of EUR 18 million.

Operating income

Operating income increased by EUR 599 million, or 19.5%, to EUR 3,667 million, mainly due to higher operating income from consolidated private equity investments.

- Net interest income decreased by EUR 87 million to a minus of EUR 200 million, mainly due to higher interest expenses from consolidated private equity investments.

- Results from financial transactions decreased by EUR 226 million, or 39.0%, mainly due to a lower level of exits of consolidated investments. Results from financial transactions related to consolidated investments are recorded only at the time of the sale, in contrast to unconsolidated investments, whose unrealised fair value results are recorded directly in income.

Operating expenses

Operating expenses increased by EUR 777 million, or 29.7%, to EUR 3,391 million, mainly due to higher

operating expenses from consolidated private equity investments and due to higher incentive compensation payments and expenses related to a higher volume of investments, which were higher in 2005 versus 2004.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 18 million to EUR 34 million, due to a provision taken in the United Kingdom portfolio.

Income tax expense

Income tax expense decreased by EUR 54 million to minus EUR 21 million, mainly due to a tax release of EUR 45 million.

Group Functions

The table sets forth selected information pertaining to Group Functions, for the years ended 31 December 2006, 2005 and 2004.

	For the year ended 31 December		
	2006	2005	2004
	(in millions of EUR, except staff, branches and offices and percentages)

Risk-weighted assets	(2,096)	7,053	3,871
Full-time equivalent staff	4,438	3,835	4,052
Efficiency ratio (in %)	85.9%	11.4%	59.5%

Group Functions includes the operating results of Group Services.

With the results for the third quarter of 2006, we announced measures to improve the cost efficiency and productivity in Group Functions. The improvement in operational efficiency will be achieved by focusing on efficiency and productivity that will affect more than 500 full-time equivalents predominantly at head office. In the fourth quarter of 2006 Group Functions took a restructuring charge of EUR 29 million.

Results of operations for the years ended 31 December 2006 and 2005

Profit for the year decreased by EUR 290 million, or 56.8%, to EUR 221 million. This was the result of a decrease in operating income of EUR 150 million, an increase in operating expenses of EUR 354 million and an increase in tax benefit of EUR 200 million.

80

Operating income

Operating income decreased by EUR 150 million, or 23.1%, to EUR 498 million, mainly due to lower asset and liability management results and a lower contribution from our share of result in equity accounted investments, partly offset by the gain on the sale of Kereskedelmi és Hitelbank Rt. (EUR 208 million), the gain on the sale of the Global Futures business (EUR 229 million) and a provision for balance-sheet adjustments in 2005 (minus EUR 86 million in 2005).

The lower asset and liability management income was due to higher funding costs as a result of higher euro and US dollar interest rates, lower returns on the investment portfolio as a result of the flattening yield curve, and marked-to-market losses on capital and risk hedging (credit default swap portfolio) as a result of credit spreads tightening. The loss on capital and risk hedging (credit default swap portfolio) of EUR 261 million in 2006 will be recovered over time as the underlying asset matures.

- Net interest income includes the funding costs from preferred shares.

Results from financial transactions decreased by EUR 438 million to EUR 182 million, mainly due to lower results on bonds and credit default swaps.

Share of result in equity accounted investments decreased by EUR 47 million, or 41.2%, due to the absence of the contribution of our stake in Antonveneta, which was consolidated in 2006, and Kereskedelmi és Hitelbank Rt., which was sold in 2006, partly offset by a higher contribution from our stake in Capitalia.

Other operating income increased by EUR 435 million to EUR 461 million due to the inclusion of the gain on the sale of Kereskedelmi és Hitelbank Rt. (EUR 208 million) and the gain on the sale of the Futures business (EUR 229 million).

Operating expenses

Operating expenses increased by EUR 354 million to EUR 428 million. The results in 2006 included a EUR 29 million restructuring charge related to the reorganisation as announced on 30 October 2006 mainly for Risk Management and IT, higher costs for compliance with the Sarbanes-Oxley Act, Basel II and other regulations. The results in 2005 included a release of the post-retirement healthcare benefit provision (EUR 392 million), a provision for compensating holidays not taken by staff (EUR 56 million) and the costs of the United States regulatory fine (EUR 67 million).

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions decreased by EUR 14 million to EUR 82 million. The 2006 results included the Futures provisions (EUR 72 million) and the 2005 results included mainly provisions related to incurred-but-not-identified loan losses, which as of 2006 are allocated to the BUs.

Income tax expense

Income tax expense declined by EUR 200 million to minus EUR 233 million, mainly due to a large tax credit in the Netherlands and some other countries, the impact on deferred taxes of the change in the tax rate of the Netherlands and the impact of the tax exempted gain on the sale of Kereskedelmi és Hitelbank Rt. (EUR 208 million). The results in 2005 included a tax release of EUR 100 million and the impact of a tax exempted United States regulatory fine (EUR 67 million).

Results of operations for the years ended 31 December 2005 and 2004

Profit for the year decreased by EUR 896 million, or 63.7%, to EUR 511 million. Discontinued operations net of tax in 2004 are related to the classification as discontinued operations net of tax of LeasePlan, which was sold in 2004. Profit from continuing operations increased by EUR 311 million, or 155.5%, to EUR 511 million. This was mainly the result of a decrease in operating income of EUR 13 million, a decrease in operating expenses of EUR 319 million, an increase in loan impairment and other credit risk provision of EUR 72 million and declined income tax expense of EUR 77 million.

Operating income

Operating income decreased by EUR 13 million, or 2.0%, to EUR 648 million, mainly due to lower US dollar profit hedge results and a provision for balance-sheet adjustments (minus EUR 86 million), offsetting higher results from share of result in equity accounted investments.

Net interest income decreased by EUR 276 million to minus EUR 261 million, mainly due to lower US dollar hedging results and lower asset and liability management results.

Net fee and commission income decreased by EUR 6 million, or 6.3%, mainly due to the inclusion of a EUR 30 million fee paid to BU Global Markets related to the equity issue of ABN AMRO shares.

Results from financial transactions increased by EUR 136 million, or 28.1%, mainly due to the revaluation of Antonveneta options, the sale of bonds, derivative results and partly offset by the gain on the sale of our stake in Bank Austria in 2004.

Share of result in equity accounted investments increased by EUR 94 million to EUR 114 million, due to better results from our stakes in Capitalia and Antonveneta and in Hungary's Kereskedelmi és Hitelbank Rt.

Operating expenses

Operating expenses decreased by EUR 319 million to EUR 74 million. The results in 2005 included a release of the post-retirement healthcare benefit provision (EUR 392 million), a provision for compensating holidays not taken by staff (EUR 56 million), the costs of the United States regulatory fine (EUR 67 million) and increased costs related to compliance with the Sarbanes-Oxley Act, Basel II and other regulations. The results in 2004 included a EUR 177 million charge for the buy-out or compensation paid to staff for the termination of the profit-sharing agreements, as provided by the new collective labour agreement.

Loan impairment and other credit risk provisions

Loan impairment and other credit risk provisions increased by EUR 72 million to EUR 96 million, mainly due to provisions related to the incurred-but-not-identified loan losses.

Income tax expense

Income tax expense declined by EUR 77 million to a favourable tax benefit of EUR 33 million, mainly due to releases of tax provisions. The results in 2005 included the impact of a tax exempted United States regulatory fine (EUR 67 million).

Reconciliation of net profit under IFRS and US GAAP

We refer to Note 50 of our consolidated financial statements for our reconciliation of net profit under IFRS and US GAAP.

B. Liquidity and capital resources

The following table shows our capital at 31 December 2006, 2005 and 2004 according to IFRS.

Group capital	2006	IFRS at 31 December	
		2005	2004
(in millions of EUR)			
Share capital	1,085	1,069	954
Share premium	5,245	5,269	2,604
Treasury shares	(1,829)	(600)	(632)
Retained earnings	18,599	15,237	11,580
Net gains (losses) not recognised in the income statement	497	1,246	309
Equity attributable to shareholders of the parent company	23,597	22,221	14,815
Equity attributable to minority interests	2,298	1,931	1,737
Total equity	25,895	24,152	16,552
Subordinated liabilities	19,213	19,072	16,687
Group capital	45,108	43,224	33,239

Group capital at year-end 2006 was EUR 45,108 million, an increase of EUR 1,884 million, or 4.4%, compared with 2005. The EUR 1,376 million, or 6.2%, increase in equity attributable to shareholders of the parent company equity was mainly due to retained earnings, partly offset by movements in special components of equity relating to cash flow hedges and available-for-sale securities, currency translation differences and purchase of treasury shares.

Group capital at year-end 2005 was EUR 43,224 million, an increase of EUR 9,985 million, or 30.0%, compared with 2004. The EUR 7,406 million, or 50.0%, increase in equity attributable to shareholders of the parent company was mainly due to retained earnings, private placements, exchange rate differences, share-based payments and exercise of staff options, partly offset by movements in special components of equity relating to cash flow hedges and available-for-sale securities.

The full-year addition to reserves resulting from profit attributable to the shareholders of the parent company less dividends paid equals EUR 3,252 million (2005: EUR 3,723 million). Private placements in 2005 included the issue on 5 April 2005 of 135 million ordinary shares at EUR 18.65 and the issue of 10.3 million ordinary shares at EUR 19.66 on 20 June 2005. Costs relating to these private placements of EUR 27 million were deducted from equity.

In 2006, the movements in net gains/(losses) not recognised in the income statement include the net movement in the reserve for available-for-sale assets consisting of net unrealised losses in available-for-sale assets of EUR 233 million and net realised gains reclassified to the income statement of EUR 602 million. The net movement in the cash flow hedge reserve consisting of the net unrealised gains on cash flow hedges of EUR 735 million and the realised gains reclassified to the income statement of EUR 215 million and exchange rate differences, amounting to a loss of EUR 434 million, of which EUR 59 million relates to the US dollar and EUR 101 million relates to the Brazilian real. Share-based payments resulted in a credit to equity of EUR 111 million (including deferred tax), and exercise of staff options resulting in a credit to equity of EUR 143 million.

In 2005, the movements in net gains/(losses) not recognised in the income statement include the net movement in the reserve for available-for-sale assets consisting of net unrealised gains in available-for-sale assets of EUR 717 million, partly offset by the net realised gains reclassified to the income statement of EUR 348 million and the net movement in the cash flow hedge reserve consisting of the net unrealised losses on cash flow hedges of EUR 386 million and the

realised gains reclassified to the income statement of EUR 126 million and exchange rate differences, amounting to a gain of EUR 1,080 million, of which EUR 92 million relates to the US dollar and EUR 659 million relates to the Brazilian real. Share-based payments resulted in a credit to equity of EUR 87 million (including deferred tax), and exercise of staff options resulted in a credit to equity of EUR 34 million.

The number of ordinary shares outstanding, minus treasury shares, at the end of 2006 decreased by 24.1 million to 1,853.8 million. This decrease was the result of a 32.8 million ordinary shares final stock dividend 2005 issued at an average price of EUR 21.30, 30.5 million ordinary shares 2006 interim dividend at an average price of EUR 23.40, 8.5 million shares due to exercise of staff options during 2006 and share buy-backs of 95.9 million ordinary shares.

The number of ordinary shares outstanding at the end of 2005 rose by 208.7 million to 1,877.9 million. This increase was the result of the private placement on 5 April 2005 of 135 million ordinary shares at EUR 18.65 and the issue of 10.3 million ordinary shares at EUR 19.66 on 20 June 2005, 32.3 million ordinary shares final stock dividend 2004 issued at an average price of EUR 18.50, 29.2 ordinary shares 2005 interim dividend at an average price of EUR 19.50 and 1.9 million shares due to exercise of staff options during 2005.

The EUR 367 million increase of minority interests in 2006 is explained by the currency translation loss of EUR 46 million, of which EUR 37 million relates to tier-1 capital ratio and a net addition of EUR 413 million.

The EUR 194 million increase of minority interests in 2005 is explained by the currency translation gain of EUR 133 million, of which EUR 68 million related to tier-1 capital ratio and a net addition of EUR 61 million.

The bank is able to raise funds by issuing subordinated liabilities. In 2006, subordinated liabilities increased by EUR 141 million (2005: EUR 2,385 million) to EUR 19,213 million (2005: EUR 19,072 million).

Issuances in 2006 amount to EUR 4,044 million and include GBP 750 million perpetual subordinated upper tier-2 notes issued on 17 February 2006 paying 5% fixed with a step-up from 17 February 2016, EUR 1.0 billion perpetual preference notes issued on 10 March 2006 and EUR 1.0 billion lower tier-2 Floating Rate Notes (three months Euribor) with a step-up on 14 September 2011 issued on 31 August 2006. Redemptions were EUR 4,430 million and include EUR 2.0 billion 6.5% perpetual subordinated upper tier-2 issued in 2001. The effect of foreign exchange rates decreased total subordinated liabilities by EUR 980 million. The cost and availability of subordinated liabilities finance are influenced by credit ratings. A reduction in these ratings could increase the cost and could reduce market access.

Issuances in 2005 amount to EUR 2,843 million and include EUR 1.5 billion Floating Rate Notes due 2015 issued in June 2005 and USD 1.5 billion Floating Rate Notes (LIBOR +0.20%) due 2015 and callable 2010. Redemptions were EUR 1,682 million and include USD 1.0 billion 7.25% notes 1995-2005 in May 2005 and the call of EUR 500 million Floating Rate Notes 2000-2010. The effect of foreign exchange rates increased total subordinated liabilities by EUR 1,199 million. The cost and availability of subordinated liabilities finance are influenced by credit ratings. A reduction in these ratings could increase the cost and could reduce market access.

At 31 December the credit ratings of ABN AMRO were as follows:

	2006		2005	
	Long term	Short term	Long term	Short term
Standard & Poor's	AA-	A-1+	AA-	A-1+
Moody's	Aa3	P-1	Aa3	P-1
Fitch	AA-	F1+	AA-	F1+
DBRS	AA	R-1	-	-

We apply capital adequacy ratios based on the Bank for International Settlements' guidelines and Dutch Central Bank directives. These ratios compare our capital with its assets and off-balance sheet exposure, weighted according to the relative risk involved. Capital is also set aside for market risk associated with our trading activities. We are continuously improving the relationship between our tier-1 capital and our risk-weighted assets in order to ensure we maintain our AA- credit rating. The minimum tier-1 ratio required is 4% and the minimum total capital ratio is 8%.

ABN AMRO comfortably meets these standards with a tier-1 ratio of 8.45% (2005: 10.62%), of which the core tier-1 ratio is 6.18% (2005: 8.47%), and a Bank for International Settlements total capital ratio of 11.14% (2005:13.14%) as at 31 December 2006.

The total capital base decreased by 7.7% (2005: increased by 32.2%) to EUR 31.3 billion (2005: EUR 33.9 billion) at 31 December 2006. Risk-weighted assets amounted to EUR 280.7 billion (2005: EUR 257.9

billion) at year-end 2006, an increase of EUR 22.9 billion (2005: EUR 26.2 billion), or 8.9%, (2005: 11.3%) from the end of the previous year. Securitisation programmes in 2006 increased by EUR 23.6 billion (2005: EUR 39.9 billion) to a total of EUR 89.1 billion (2005: EUR 65.5 billion).

The following table analyses our capital ratios at 31 December 2006, 2005 and 2004 in accordance with supervisory requirements under IFRS.

Capital ratios	IFRS at 31 December		
	2006	2005	2004
	(in millions of EUR, except percentages)		
Tier 1 capital	23,720	27,382	19,592
Tier 2 capital	9,372	9,851	7,433
Tier 3 capital	272	272	272
Supervisory deductions	(2,089)	(3,631)	(1,679)
Total capital	31,275	33,874	25,618
Risk-weighted assets on balance	209,134	192,735	174,256
Off-balance	67,489	59,107	52,493
Market risk requirements	4,081	6,012	4,873
Total Risk-weighted assets	280,704	257,854	231,622
Tier 1 capital ratio	8.45%	10.62%	8.46%
Total capital ratio	11.14%	13.14%	11.06%

Liquidity and liquidity risk

We refer to Note 39 to our consolidated financial statements for liquidity and liquidity risk.

C. Selected statistical information**Average balance sheet**

The following table present our average balances, based on month-end averages, and interest amounts and average rates for the years 2006, 2005 and 2004 under IFRS.

(2) Equity includes minority interests.

Changes in net interest income: volume and rate analysis

The following tables allocate, by categories of interest-earning assets and interest-bearing liabilities, changes in interest income and expenses due to changes in volume and in rates for 2006 compared to 2005 and for 2005 compared to 2004 under IFRS. Volume and rate variances have been calculated on movements in average balances and changes in interest rates. Changes due to a combination of volume and rate have been allocated proportionally.

	IFRS 2006 over 2005 Volume/Rate changes			IFRS 2005 over 2004 Volume/Rate changes

Yields, spreads and margins

The following table presents selected yield, spread and margin information applicable to us for 2006, 2005 and 2004 under IFRS.

Yields, spreads and margins	2006	2005	2004
Gross yield(1)			
The Netherlands	4.7%	5.0%	5.1%
North America	5.5%	4.7%	3.7%
Rest of the world	5.0%	4.2%	4.0%
Total Group	5.0%	4.6%	4.3%
Interest rate spread(2)			
The Netherlands	1.5%	1.9%	2.2%
North America	1.4%	1.4%	1.5%
Rest of the world	1.4%	0.8%	0.8%
Total Group	1.5%	1.3%	1.5%
Net interest margin(3)			
The Netherlands	1.0%	1.3%	1.4%
North America	1.4%	1.4%	1.5%
Rest of the world	1.1%	0.8%	1.0%
Total Group	1.1%	1.1%	1.2%

(1) Gross yield represents the interest rate earned on average interest earning assets.

(2) Interest rate spread represents the difference between the interest rate earned on average interest earning assets and the rate paid on average interest bearing liabilities.

(3) Net interest income as a percentage of average total assets.

Assets

The information at 31 December 2006, 2005 and 2004 is presented under IFRS.

Securities***Investment portfolios***

For an overview of our financial investments at 31 December, 2006 and 2005 under IFRS, see Notes 16 and 50 to our consolidated financial statements.

Trading portfolios

The following table analyses the book value, which is equal to fair market value because the trading portfolios are marked-to-market, of securities in our trading portfolios at 31 December, 2006, 2005 and 2004.

	2006	at 31 December 2005 (in millions of EUR)	2004
Financial assets held for trading			
Interest-earning securities:			
Dutch government	976	2,520	552
US treasury and US government agencies	1,115	7,843	5,759
Other OECD governments	29,529	37,855	28,409
Other interest-earning securities	28,670	13,789	17,114
Subtotal	60,290	62,007	51,834
Equity instruments	40,112	34,676	18,409
Derivative financial instruments	105,334	105,372	96,792
Total	205,736	202,055	167,035

Please refer to Note 15 to our consolidated financial statements.

Concentration

At 31 December 2006, we held the following securities positions in issuers, which exceeded 10% of our shareholders' equity at that date:

	IFRS	
	2006	2005
	(in millions of EUR)	
Brazilian central government	5,647	4,277
Japanese central government	3,787	7,329
French central government	3,085	3,573
German central government	2,760	19,634

Loans and receivables - banks

The following tables show loans to and receivables from banks at 31 December 2006, 2005 and 2004 and an analysis of their remaining life at 31 December 2006 under IFRS.

The information for 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in a separate table. The Dutch GAAP information is not comparable to the information prepared under IFRS.

Loans - Interest rate sensitivity	At variable Rate(1)	At Adjustable		At Fixed Rate(3)	Total
		Rate(2)	(in millions of EUR)		
Commercial		95	1	68	164
Consumer		572	16	101	689
Total rest of the World		667	17	219	903
Total (gross)		56,336	68,332	53,714	178,382

(1) Variable rate loans are EURIBOR, London interbank offering rate (LIBOR), prime rate-based loans as well as adjustable rate loans with fixed interest periods of up to one year.

(2) Adjustable rate loans are loans with fixed interest rates for a period that is shorter than the entire term of the loan.

(3) Fixed rate loans are loans for which the interest rate is fixed for the entire term.

Private sector loans by type of collateral

The following tables analyses private sector loans by type of collateral at the dates indicated. Unsecured loans include loans for which we have the right to require collateral. The information at 31 December 2006, 2005 and 2004 is presented under IFRS. The information at 31 December 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in a separate table. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Commercial Loans by Industry

Please note that we have changed our industry breakdown in order to align with our internal risk reporting as well as to anticipate on changes in respect of Basel II reporting. For the disclosure of IFRS figures we have provided comparatives under the new breakdown. As the disclosure of Dutch GAAP for the years 2002 and 2003 is not comparable to IFRS we have not prepared the figures according to the new industry breakdown.

The following table analyses commercial loans by industry at the dates indicated. The information at 31 December 2006, 2005 and 2004 is presented under IFRS. The information at 31 December 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in a separate table. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Loan Portfolio by Region

Set forth below is an analysis of our loan portfolio by region. The loan portfolio of our Dutch, European (non-Dutch) and North American operations comprised 86% of our total loan portfolio at 31 December 2006. The remainder of the total loan portfolio (described hereunder in “Rest of the World”) at 31 December 2006 includes 8% from Asian operations, 6% from Latin American operations and less than 1% from Middle East and African operations. The information at 31 December 2006, 2005 and 2004 is presented under IFRS. The information at 31 December 2003, 2002 and 2001 is not available under IFRS and is presented under Dutch GAAP in a separate table. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

The Netherlands loan portfolio

The Netherlands loan portfolio comprises loans originated from offices and branches located in the Netherlands. The following tables analyse, at the dates indicated, the Netherlands loan portfolio broken down into the location of the borrower, and, in the case of private sector loans, type of collateral and industry of the borrower.

Total commercial loans (gross)	12,559	13,976

(1) Please note that we have changed our industry breakdown in order to align with our internal risk reporting as well as to anticipate on changes in respect of Basel II reporting. For the disclosure of IFRS figures we have provided comparatives under the new breakdown. As the disclosure of Dutch GAAP for the years 2002 and 2003 is not comparable to IFRS we have not prepared the figures according to the new industry breakdown.

Analysis of loan loss experience: Provisions and allowances for loan losses

For details on our provisioning policy please refer to the accounting policies section of our consolidated financial statements as well as Note 19 to our consolidated financial statements.

Doubtful and non-performing loans

Loans are classified as doubtful as soon as there is doubt about the borrower's lack of ability to meet its payment obligations to us in accordance with the original contractual terms. Where deemed necessary an allowance for loan losses (impairment loss) is determined on a per item or portfolio basis. Any loan that bears an impairment loss on principal and/or interest cash flows is defined as non-performing.

Non-performing loans	2006	IFRS	
		2005	2004

Total non-performing loans (in millions of euros)	7,288	4,736	5,337
Non-performing loans to private sector loans (gross, in %)	2.31	1.72	2.28
Allowances for loan losses to private sector loans (gross, in %)	1.15	1.09	1.36

The volume of non-performing loans increased by EUR 2,552 million in 2006, reflecting the acquisition of Antonveneta as well as decreased quality of the credit portfolio. The ratio of non-performing loans to private sector loans developed accordingly. Finally the ratio of allowances for loan losses to private sector loans also decreased.

Non-performing loans as a percentage of total private sector loans (gross) increased to 2.31% in 2006, coming from 1.72% in 2005, mainly caused by the acquisition of Antonveneta.

Provisions for loan losses

The tables below show, for the years ended 31 December 2006, 2005 and 2004, the composition of the aggregate charge to income regarding the allowance for loan losses under IFRS.

Charge to income	IFRS		
	2006	2005	2004
	For the Year Ended 31 December		
	(in millions of EUR)		
Net provisions(1)	1,855	635	607

The information for the years ended 31 December 2003 and 2002 is not available under IFRS. The table below shows the composition of the aggregate charge to income regarding the allowance for loan losses under Dutch GAAP for these years. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Charge to income	Dutch GAAP	
	2003	2002
	For the Year Ended 31 December	
	(in millions of EUR)	
Net provisions for loan losses(1)	1,240	1,681
Net provisions for sovereign risk	34	14
Total provisions	1,274	1,695

(1) Net of recoveries and releases. See “—Movements in allowances for loan losses” below.

The tables below shows, for the years ended 31 December 2006, 2005 and 2004, the composition of our total provisions for loan losses under IFRS.

Provisions for loan losses	IFRS		
	2006	2005	2004
	For the Year Ended 31 December		
	(in millions of EUR, except percentages)		
The Netherlands	388	401	336
North America	86	(156)	116
Rest of the World	1,381	390	155
Total provisions	1,855	635	607
Provision / private sector loans	0.59%	0.23%	0.26%

The level of the provisions for the year 2006 increased by EUR 1,220 million or 192.1% as compared to the year 2005. In the Netherlands, provisions decreased by EUR 13 million to EUR 388 million, reflecting the relatively stable economic condition of the portfolio. North America, did not benefit from net releases in the provisions during 2006 while 2005 showed net releases amounting to EUR 156 million. In the Rest of the World, provisions increased by EUR 991 million to EUR 1,381 million, mainly caused by increased provisions in Brazil, as well as growth of the

portfolio in Europe and Asia.

The information for the years ended 31 December 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in separate tables. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Average RWA	302	86	65	74	19	13	28	17	260	239

Provisioning for loan losses went up by EUR 1,220 million to EUR 1,855 million in 2006. See “Item 5. Operating and Financial Review and Prospects - A. Operating results” for more details on provisioning.

Movements in allowances

The following tables analyze the movements of the allowances for loan losses and for sovereign risk: amounts written off (net of recoveries), new provisions charged against profit (increases and releases) and growth of the allowance for interest not recognised that is included in the specific allowance for loan losses.

The information for the years ended 31 December 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in separate tables. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

Allowances	IFRS		
	2006	at 31 December 2005	2004
	(in millions of EUR)		
The Netherlands	1,100	1,646	1,693
North America	353	180	361
Rest of the World	2,193	1,161	1,120
Total allowances for loan losses(1)	3,646	2,987	3,174

(1) Under IFRS, there are no separate allowances for sovereign risk. See the accounting policies section in our consolidated financial statements.

Allowances	Dutch GAAP at 31 December	
	2003	2002
	(in millions of EUR)	
The Netherlands	1,524	1,391
North America	388	479
Rest of the World	2,100	2,259

New and increased provisions (net)	1,855	635	607
Balance at end of year	3,646	2,987	3,174

- (1) Unrecognized interest is either (i) booked into a separate account, or (ii) if for administrative reasons it cannot be booked as a specific unpaid interest claim, it is booked directly into the specific allowance for loan losses. Cash receipts of interest on non-performing loans are only recorded as interest revenue if the principal has been fully collected.

Over 2006, the amounts written-off, excluding recoveries, increased EUR 83 million to EUR 1,389 million. This increase was driven by Rest of the World, mainly Brazil,, where the amounts written-off increased by EUR 146 million to EUR 748 million and the Netherlands where the amounts written-off increased by EUR 20 million to EUR 546 million, partly off-set by North America where the amounts written-off decreased by 83 million to EUR 95 million.

Total commercial(2)	3,446	3,624
Consumer(3)	566	505
Total private sector	4,012	4,129

(1) Please note that we have changed our industry breakdown in order to align with our internal risk reporting as well as to anticipate on changes in respect of Basel II reporting. For the disclosure of IFRS figures we have provided comparatives under the new breakdown. As the disclosure of Dutch GAAP for the years 2002 and 2003 is not comparable to IFRS we have not prepared the figures according to the new industry breakdown.

(2) Commercial loans are evaluated on an individual basis. For more details, see Note 19 to our consolidated financial statements.

(3)

Consumer loans are generally evaluated on a portfolio basis. For more details, see Note 19 to our consolidated financial statements.

Analysis of loans by industry

Please note that we have changed our industry breakdown in order to align with our internal risk reporting as well as to anticipate on changes in respect of Basel II reporting. For the disclosure of IFRS figures we have provided comparatives under the new breakdown. As the disclosure of Dutch GAAP for the years 2002 and 2003 is not comparable to IFRS we have not prepared the figures according to the new industry breakdown.

The following tables analyse the percentage of loans in each industry to total private sector loans at 31 December of each of the last five years.

Loans by industry	2006	IFRS at 31 December	
		2005	2004
	(in percentages)		
Basic materials	8.3	5.4	5.9
Real estate	13.2	17.3	16.9
Industrials	22.0	14.9	14.4
Energy	3.0	4.9	4.4
Financial services	11.9	14.8	16.5

Net provisions by industry	Dutch GAAP	
	2003	2002
(in millions of EUR)		
Agriculture, mining and energy	119	172
Manufacturing	147	433
Construction and real estate	20	39
Wholesale and retail trade	137	204
Transportation and communications	135	389
Financial services	57	58
Business services	77	127
Education, healthcare and other services	192	93
Total commercial(1)	884	1,515
Consumer(2)	427	273
Total private sector	1,311	1,788
Of which unrecognized interest	71	107
Total provisions (net)	1,240	1,681

(1) Commercial loans are evaluated on an individual basis. For more details, see Note 19 to our consolidated financial statements.

(2) Consumer loans are generally evaluated on a portfolio basis. For more details, see Note 19 to our consolidated financial statements.

Analysis of write-offs by industry

The following tables analyze the amounts written off by industry during each of the last five years.

Write-offs by industry (net)	2006	IFRS 2005	2004
	(in millions of EUR)		
Basic material	56	21	55
Real estate	26	13	20
Industrials	91	117	209
Energy	21	28	48
Financial services	68	39	47
TMT (media and communication)	39	16	52
Consumer cyclical	194	150	276
Consumer non-cyclical	103	68	89
Health	43	36	52
Total commercial	641	488	848
Total consumer	495	582	388
Total written-off (net)	1,136	1,070	1,236

The write-offs by Industries show an increase of EUR 153 million in Commercial portfolio to EUR 641 million and a decrease in the Consumer portfolio of EUR 87 million to EUR 495 million. The industry showing the sharpest increase was Consumer cyclical with EUR 44 million or 29%.

Write-offs by industry	Dutch GAAP	
	2003	2002
	(in millions of EUR)	
Agriculture, mining and energy	119	132
Manufacturing	195	405
Construction and real estate	41	28
Wholesale and retail trade	163	163
Transportation and communications	55	402
Financial services	179	98
Business services	100	127
Education, healthcare and other services	61	76
Total commercial	913	1,431
Consumer	430	280
Total private sector	1,343	1,711

Non-performing sovereign risk exposure and related specific allowances

The following table sets forth our non-performing sovereign risk exposure and related specific allowances at 31 December 2003 under Dutch GAAP.

Sovereign risk exposure(1)	Dutch GAAP At 31 December 2003 (in millions of EUR, except percentages)
Sovereign risk / country risk exposure	338
Sovereign risk / country risk specific allowances	(215)
Net exposure	123
Net exposure as a percentage of group capital	0.39%

(1) Under IFRS, there are no specific allowances for sovereign risk. See the accounting policies section in our consolidated financial statements.

Total non-performing sovereign risk exposure, excluding trade debts, was relatively stable in 2003. Specific allowances for sovereign risk represented 64% of total sovereign risk exposure at 31 December 2003.

Potential credit risk loans

The tables below provide an analysis of our doubtful loans for each of the last five years. “Doubtful loans” are all loans classified as “doubtful” or “loss” for which in general a specific provision has been made, although doubtful loans can still be performing. The amounts are stated before deduction of the value of collateral held, the specific allowances carried and interest not recognised. As we are not required by Dutch regulations to classify loans as “non-accrual”, “accruing past due”, “restructured” and “potential problem” loans, as defined by the SEC, the tables below are based on available data. The information at 31 December 2003 and 2002 is not available under IFRS and is presented under Dutch GAAP in

separate tables. The Dutch GAAP information is not comparable to the information prepared in accordance with IFRS.

119

Doubtful loans	2006	IFRS	2004
		at 31 December 2005 (in millions of EUR)	
Non-performing loans(1)			
The Netherlands	1,740	2,048	2,400
Rest of Europe	3,940	628	864
North America	719	933	1,402
Latin America	657	834	375
Rest of the World	232	293	296
Total non-performing loans	7,288	4,736	5,337
Other doubtful loans(2)			
The Netherlands	852	626	989
Rest of Europe	13	14	24
North America	6	153	152
Latin America	256	68	27
Rest of the World	5	2	5
Total other doubtful loans	1,132	863	1,197
Total doubtful loans	8,420	5,599	6,534

(1) Under IFRS, "Non-performing loans" are doubtful loans for which there is objective evidence that not all contractually agreed amounts will be collected and for which an allowance for loan losses is established.

(2) "Other doubtful loans" are potential problem loans on which we charge interest also on non-performing that is included in interest revenue.

Doubtful loans	Dutch GAAP at 31 December	
	2003	2002
Non-accrual loans and non-performing loans(1)		
The Netherlands	1,041	1,539
Rest of Europe	1,255	1,033
North America	1,092	2,092
Latin America	490	301
Rest of the World	1,077	1,167
Total non-accrual and non-performing loans	4,955	6,132
Doubtful, still accruing loans(2)		
The Netherlands	1,718	1,914
Rest of Europe	68	183
North America	442	264
Latin America	143	400
Rest of the World	82	539
Total accruing loans	2,453	3,300
Total doubtful loans	7,408	9,432

- (1) Under Dutch GAAP, “Non-performing loans” are doubtful loans that are placed on a non-accrual basis, which means that the contractual interest is no longer recognized in our income statement. Such unrecognized interest is then either (i) booked into a separate account, or (ii) if for administrative reasons it cannot be booked as a specific unpaid interest claim, it is booked directly into the specific allowance for loan losses. Cash receipts of interest on non-performing loans are only recorded as interest revenue if the principal has been fully collected.
- (2) “Accruing loans” are potential problem loans on which we continue to charge interest that is included in interest revenue.

Cross-border outstandings

Our operations involve significant exposure in non-local currencies. Cross-border outstandings are based on the country of domicile of the borrower and comprise loans denominated in currencies other than the borrower’s local currency. For an explanation of how we define and measure cross-border risk, see “Item 11. Quantitative and Qualitative Disclosures about Market Risk—Cross Border Risk”.

Cross-border outstandings exceeding 1% of total assets at 31 December 2006, 2005, 2004 and 2003 are shown in the following tables. These figures are not netted for any legally enforceable written guarantees of principal or interest by domestic or other non-local third parties. At the dates below, there are no outstandings exceeding 1% of total assets in any country where current conditions give rise to liquidity problems which are expected to have a material impact on the timely repayment of interest or principal. The table does not include off-balance sheet items.

Cross-border outstandings	Percentage of Total Assets	IFRS			Private Sector
		Total Amount (in millions of EUR, except percentages)	Banks	Government	
At 31 December 2006					
United Kingdom	6.14	60,590	33,250	637	26,703

122

Cross-Border Outstandings Between 0.75% and 1% of Total Assets

Cross-border outstandings to borrowers in countries in which such outstandings amounted to between 0.75% and 1% of total assets totaled EUR 17,415 million at 31 December 2006 (2005: EUR 14,525) and related to Ireland and Belgium (2005: Sweden and Ireland).

Loan Concentrations

One of the principal factors influencing the quality of our earnings and loan portfolio is diversification of loans by region, industry and borrower. A concentration exists when loans are made to a multiple number of borrowers engaged in similar activities, all of whom are subject to roughly the same effects of economic conditions or other changes. At 31 December 2006, there was no concentration of loans exceeding 10% of our total loans (gross).

Liabilities

Deposits and short-term borrowings are included in the balance sheet items Banks, Total customer accounts and Debt securities.

Deposits

The following table presents the average amount of and the average rate paid on each deposit category representing in excess of 10% of average total deposits during the three most recent fiscal years. All our demand deposits in the Netherlands reflected in the table below are interest-bearing. We do not have non-interest bearing demand deposits in the Netherlands in excess of 10% of average total deposits. The geographic allocation is based on the location of the office or branch where the deposit is made.

Deposits	2006		2005		2004

(1) Includes our Eurodollar deposit activities and professional securities transactions. Time deposits are funds whereby the original term, the period of notice and interest payable have been agreed upon with the counterparty.

123

Deposits of \$100,000 or more

At 31 December 2006, deposits of \$100,000 or more or the equivalent in other currencies, held in the United States, in time deposits and certificates of deposits by term remaining until maturity were:

Deposits of \$100,000 or more	At 31 December 2006 (in millions of EUR)
3 months or less	10,350
more than 3 months but less than 6 months	3,607
more than 6 months but less than 12 months	2,946
over 12 months	6,321
Total	23,224

Short-term borrowings

Short-term borrowings are borrowings with an original maturity of one year or less. These are included in our consolidated balance sheet under the items Banks, Total customer accounts and Debt securities. Categories of short-term borrowings for which the average balance outstanding during the preceding three fiscal years was equal to or greater than 30% of consolidated shareholders' equity at 31 December, were included in the item Debt Securities and consisted of certificates of deposits and commercial paper. An analysis of the balance and interest rates paid on these short-term borrowings is provided below.

Short-term borrowings	2006	IFRS 2005	2004
	(in millions of EUR, except percentages)		
Year-end balance	56,375	51,873	32,326
Average balance	55,494	44,878	29,857
Maximum month-end balance	58,771	55,905	41,497
Average interest rate during the year	4.2%	2.6%	2.2%
Average interest rate at year-end	4.8%	2.9%	2.1%

D. Research and Development, Patents and Licenses etc.

Not applicable.

E. Trend Information

The composition of our revenues and the structure of our assets and liabilities in recent years have been affected by changing economic conditions. This included a currency appreciation of the Brazilian real against the Euro of 10.0% (comparing the average rate in 2006 with the average rate in 2005), a highly competitive environment for commercial lending and mortgages in the United States impacting our margins. In addition, a flattening of the yield curve has had a negative impact on our net interest income both in the United States and the Euro zone. However, we expect that in 2007 the decline in the asset yield will slow and that the negative impact of the flattening of the yield curve will be compensated by growth in loan volume.

F. Off-Balance Sheet Arrangements

We have no off-balance sheet entities or off-balance sheet arrangements that are reasonably likely to have a material adverse effect on liquidity or the availability of or the requirements for capital resources, and our hedging activities are non-speculative. For a discussion of the impact of off-balance sheet commitments and contingent liabilities see Note 35 to our consolidated financial statements.

G. Tabular Disclosure of Contractual Obligations

Our contractual and contingent obligations and commitments at 31 December 2006 are summarised in Note 35 to our consolidated financial statements.

Item 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

ABN AMRO Holding N.V. and ABN AMRO Bank N.V. are public companies with limited liability incorporated under the laws of the Netherlands. Both companies have a two-tier system of corporate governance, consisting of a Supervisory Board and a Managing Board. The day-to-day management of the companies is vested with the Managing Board.

The memberships of the Supervisory Boards of ABN AMRO Holding N.V. and ABN AMRO Bank N.V. are the same, as are the memberships of the Managing Boards of ABN AMRO Holding N.V. and ABN AMRO Bank N.V.

ABN AMRO Holding N.V.'s Supervisory Board supervises the policy conducted by the Managing Board, as well as the company's general course of affairs and its business. In addition, it is charged with assisting and advising management. In performing their duties, the members of the Supervisory Board are guided by the interests of the company and its enterprise. Certain powers are vested with the Supervisory Board, including the approval of certain resolutions by the Managing Board.

The Supervisory Board is an independent body. Members of the Supervisory Board are appointed by the General Meeting of Shareholders. The Supervisory Board nominates one or more candidates for each vacant seat.

Supervisory Board members are appointed for a term of four years and may be re-appointed after that term. Members of the Supervisory Board may serve a maximum term of 12 years from the date of their first appointment. In principle, each member agrees to retire by the day on which the annual General Meeting of Shareholders is held in the year in which he or she reaches the age of 70.

Candidates recommended for appointment or reappointment to the Supervisory Board should meet the criteria of the membership profile, which are set out in the Rules Governing the Supervisory Board's Principles and Best Practices of ABN AMRO Holding N.V. In order to ensure the Supervisory Board's independence, we apply the criteria of independence as set out in the Dutch Corporate Governance Code.

All members of the Supervisory Board must be independent, with the exception of no more than one. All current members of the Supervisory Board qualify as independent. For more information about the Supervisory Board's independence criteria, please refer to our website at www.abnamro.com, which does not form part of this report.

Supervisory Board members may not represent particular interests. If an interest of a member of the Supervisory Board conflicts with that of the company, the Chairman of the Supervisory Board shall be notified. Details of the Supervisory Board's remuneration package can be found in Note 43 to our consolidated financial statements.

The Chairman and Vice Chairman are appointed by the Supervisory Board from its members. The Supervisory Board also appoints from its members the Audit Committee of at least four members, the Nomination & Compensation Committee of at least three members and the Compliance Oversight Committee of at least three members. The committee members are appointed until further notice.

The Rules Governing the Supervisory Board's Principles and Best Practices of ABN AMRO Holding N.V. are available on our website at www.abnamro.com, which does not form part of this report.. These rules also include the terms of reference of the Audit Committee, the Nomination & Compensation Committee, and the Compliance Oversight Committee.

On our website you may also find a detailed curriculum vitae of each of the Supervisory Board members. In addition, a curriculum vitae for each new member of the Supervisory Board is included in ABN AMRO Holding N.V.'s Annual Report published in the year in which he or she is appointed.

At 14 March 2007, the composition of the Supervisory Board of ABN AMRO Holding N.V. and ABN AMRO Bank N.V. was as follows:

125

Curriculum vitae – Managing Board members (as at 14 March 2007)

Rijkman Groenink was appointed Chairman of the Managing Board in May 2000. He is responsible for the strategy of ABN AMRO as well as for Group Audit, Group Legal & Compliance and Human Resources.

A Dutch citizen, Mr Groenink was born on 25 August 1949 and joined Amro Bank in 1974. He was appointed Head of Product Management Retail Accounts in 1976, Head of Syndicated Loans in 1978, Head of International Corporate Accounts in the International Division in 1980, Director of the Dutch Special Credit department in 1982 and Senior Executive Vice President of Dutch Corporate Business in 1986. He was appointed to the Managing Board of Amro Bank in 1988. Following the merger of ABN Bank and Amro Bank in 1990 he was appointed to the Managing Board of ABN AMRO Bank, and became responsible for the Netherlands Division in 1995. He holds a number of external directorships including Flint Holding, Struik Holding and several charitable societies and foundations. Mr Groenink's educational credentials include a Masters degree in Law from Utrecht University, the Netherlands.

Wilco Jiskoot is the Managing Board member responsible for BU Netherlands, BU Global Clients, BU Private Clients, BU Asset Management, and Private Equity (ABN AMRO Capital). He joined the Managing Board in January 1997, with responsibility for several investment banking product lines. From November 2001 to January 2006, he was the Managing Board member responsible for SBU Wholesale Clients and Private Equity. Mr Jiskoot was born on 2 June 1950 and is a Dutch citizen. He joined Amro Bank in 1976 and held several positions during the following ten years in Corporate Clients, Project Finance and Relationship Management. He was appointed head of Capital Markets Group in 1986, head of Institutional Banking Division in 1987 and Senior Executive Vice President of Financial Markets Group in 1988. After the merger of ABN Bank and Amro Bank in 1990, he was appointed Senior Executive Vice President of New Issues and Corporate Finance, and was named Senior Executive Vice President Equity and Merchant Banking in 1994. Mr Jiskoot holds no directorships or positions outside ABN AMRO. He has a Masters degree in Business Administration from Rotterdam University, the Netherlands.

Joost Kuiper is the Managing Board member responsible for BU North America and is Chairman of the Group Business Committee (GBC). He was previously responsible for the BUs Netherlands and North America within the SBU Consumer & Commercial Clients, a position he held from November 2003 until January 2006. He shared responsibility for Consumer & Commercial Clients with Dolf Collee from 2000, having joined the Managing Board in May 1999 with responsibility for the International Division. Mr Kuiper, a Dutch citizen, was born on 23 July 1947. He joined ABN AMRO in 1998 as a Senior Executive Vice President in Treasury and Fixed Income, having previously held several senior positions in Dutch financial institutions, including Chairman of MeesPierson (1996-98) and President of the European Options Exchange (1993-96). Having started his career in 1973 in the new Issue and Syndicate department of Amro Bank, he left in 1976 to work at Banque Européenne de Crédit in Brussels and Sogen-Swiss International in New York, before rejoining Amro Bank, first in New York and later in London and the Netherlands. His principal outside directorships include Hespri Holding and several charitable societies and foundations. Mr Kuiper holds a Masters degree in Law from Leiden University, the Netherlands.

Hugh Scott-Barrett has been Chief Financial Officer since 1 January 2006. He is also responsible for Group Finance, Investor Relations, Group Communications, Group Public Affairs and Group Strategic Decision Support. From November 2003 to January 2006, he was Chief Operating Officer responsible for Group Shared Services, Transaction Banking, Group Human Resources, Group Communications and Investor Relations. He also launched a Group-wide Services programme focused on improving service quality, efficiency and agility while reducing operational risk across the Group. He was previously one of the two Managing Board members responsible for the SBU Wholesale Clients. He was also responsible for the BUs Corporate Finance (including the ABN AMRO Rothschild joint venture), Working Capital, Change Management, and Technology Operations & Property Services within that SBU. He was appointed to the Managing Board in June 2000. Mr Scott-Barrett was born on 26 September 1958 and is a British citizen. He joined ABN AMRO in 1996 as Head of Corporate Finance in Europe before becoming Global Head of Mergers & Acquisitions. He started his career in 1980 in the Corporate Finance Department at Kleinwort Benson. In

1984 he joined Swiss Bank Corporation (SBC), becoming Deputy Chief Executive of SBC's European activities in 1994 and subsequently Managing Director Corporate Finance of SBC Warburg. Mr Scott-Barrett holds no directorships outside ABN AMRO. He was educated at the Université de Paris, Sorbonne, France, and Merton College, Oxford, UK.

Huibert Boumeester is the Managing Board member responsible for Corporate Development, Group M&A Portfolio, Group Risk Management and Antonveneta. He was appointed to the Managing Board in January 2006, having previously been Chief Executive of ABN AMRO Asset Management. Mr Boumeester was born on 16 March 1960 and is a Dutch citizen. He joined ABN Bank in 1987 as a management trainee in Investment Banking. He subsequently became head of the Energy Desk Europe, head of Power Project Finance Europe, head of Project Finance Asia in Hong Kong, and head of Structured Finance Asia, based in Singapore, where he was responsible for Project Finance, Structured Trade Finance, Financial Engineering, Loan Syndication, Asset Securitisation and Project Advisory. From 1998 to 2000 he was Country Manager for ABN AMRO Malaysia Berhad. In 2000 he became Managing Director Global Financial Markets, with responsibility for Leveraged Finance, Emerging Markets Debt Origination and Asset Securitisation. In May 2002 he was appointed global head of Integrated Energy. Directorships within ABN AMRO include Montag & Caldwell Inc. and Artemis Investment Management Ltd. He holds directorships outside ABN AMRO at three charities. Mr Boumeester holds a Masters degree in Law from Leiden University, the Netherlands.

Piero Overmars is the Managing Board member responsible for BU Asia, BU Europe and BU Global Markets and is also Chairman of the Commercial Client Segment. He was appointed to the Managing Board in January 2006. Mr Overmars was born on 22 April 1964 and is a Dutch citizen. In 1989 he joined ABN Bank as a derivatives dealer and in 1996 was appointed Chief Dealer Cross Market Arbitrage, Bond Trading Europe. In 1997 he was named co-head Global Interest Rate Trading based in Amsterdam, and regional head Treasury & Fixed Income Asia, Singapore from 1999. In 2001 he became Country Representative and head of Financial Markets Japan, before being appointed head of Global Financial Markets based in Amsterdam in 2002 and head of Global Markets in 2004. He was named Chief Executive Officer of Wholesale Clients in 2005. Directorships within ABN AMRO include ABN AMRO Japan. Outside ABN AMRO he holds a directorship of a charitable foundation. Mr Overmars holds a Masters degree in Business Administration from Nyenrode Business University, Breukelen, the Netherlands.

Ron Teerlink is the Managing Board member responsible for BU Latin America, BU Transaction Banking, Services and Market Infrastructures and is also Chairman of the Consumer Client Segment. He was appointed to the Managing Board in January 2006. Mr Teerlink was born on 28 January 1961 and is a Dutch citizen. He joined ABN Bank in 1986 as an IT/System Analyst, and was appointed head project and Development ASI in 1992, International/Director Administration and Organisation in Cologne in 1994, and Director Administration and Organisation in Frankfurt in 1995. He has been responsible for the International Organisation and Information division in Amsterdam since 1999 and for the Operations Europe division since 2000. He was named Managing Director, Wholesale Clients/Operations Europe in 2001 and Senior Executive Vice President in 2002, before becoming Chief Operating Officer Wholesale Clients in 2002 and Chief Executive of Group Shared Services in 2004. His directorships within ABN AMRO include ABN AMRO Central Enterprise Services - India. Directorships outside ABN AMRO include Equens Nederland. Mr Teerlink holds a Masters degree in Economics from the Vrije Universiteit, Amsterdam, the Netherlands.

Tom de Swaan retired from the Managing Board on 1 May 2006.

Dolf Collee stepped down from the Managing Board on 31 December 2006.

The senior executive vice presidents of the Bank are currently as follows:

Name	Year of Appointment	Principal Occupation

C. Board practices

We refer to the information set forth in “Item 6. Senior Management and Employees - A. Directors and Senior Management”.

Audit Committee activities

The Audit Committee of the Supervisory Board is currently chaired by Lord Sharman of Redlynch. Its other members are Mr Martinez, Mr Pratini de Moraes and Mr Olijslager.

The members collectively have adequate accounting and financial management expertise to understand the company’s business, financial statements and risk profile.

In addition, the Supervisory Board has determined that both Lord Sharman of Redlynch and Mr Martinez possess the necessary relevant expertise in financial administration and accounting for listed companies and other large companies and therefore qualify as financial experts within the meaning of the Dutch Corporate Governance Code. The Supervisory Board has also determined that both Lord Sharman of Redlynch and Mr Martinez qualify as audit committee financial experts for the purpose of Section 407 of the Sarbanes-Oxley Act and that both are independent under the applicable US standards.

The Audit Committee of the Supervisory Board reviews and advises the Supervisory Board and subsequently the Managing Board on the quarterly statements, the Annual Report, the annual financial statements, and the internal and external auditors' management letters. It regularly reviews the overall risk profile, the quality of the loan portfolio and the bank's large exposures. In addition, the Audit Committee reviews the consistency of our accounting policies, the internal audit function, the Group Audit Charter, and the internal risk management and control systems. The Audit Committee also reviews our risk management policy, and reports on litigation and

acquisitions. In accordance with the Group Audit Charter, the head of Group Audit has a direct reporting line to the chairman of the Audit Committee.

The Audit Committee is responsible for pre-approving audit, audit-related and permitted non-audit services provided by the external auditor. In exercising its pre-approval authority, the Audit Committee considers whether the proposed services are consistent with the continued independence of the external auditor. Both the Auditor Independence Policy and the Audit Committee Pre-Approval Policy for External Audit Firm Services can be viewed on our website at www.abnamro.com.

During 2006 the Audit Committee met with the Chairman of the Managing Board and the Chief Financial Officer on five occasions. Each meeting of the Audit Committee was followed by an executive session with the head of Group Audit. The Audit Committee reviewed, discussed, and advised the Supervisory Board on the annual and interim financial statements, the Annual Report, the long-form external auditors' report, the internal auditors' management letter (including the Managing Board's related comments), the structure and operation of the internal risk management and control systems, and the impact of the US Sarbanes-Oxley Act, in particular as to ABN AMRO's compliance with the requirements of Section 404 of this Act. These topics were discussed in the presence of internal and external auditors and senior representatives from Group Finance.

In 2006, the Audit Committee reviewed its pre-approval policy for audit services by the external auditor. Following this review, the Audit Committee pre-approved the nature and the budget for audit, audit-related and non-audit services, in line with this policy.

Nomination & Compensation Committee activities

The tasks and responsibilities of the Nomination & Compensation Committee of the Supervisory Board can be divided into tasks related to nomination and to compensation.

Its nomination responsibilities include preparing for the selection and nomination of members of the Supervisory and Managing Boards by preparing and periodically reviewing the succession plans of these Boards on the basis of agreed profiles. The granting of the title of Senior Executive Vice President to eligible persons and the management development programmes for top executives are also discussed in the Nomination & Compensation Committee. Where relevant, the Nomination & Compensation Committee informs the full Supervisory Board.

The Nomination & Compensation Committee also acts on reward and performance issues. Standards and criteria for performance are defined, and on that basis the performance of the members of both Boards is reviewed periodically. The framework, concept and content of compensation and benefits, pension schemes and other relevant schemes are discussed and decided. Resolutions concerning the remuneration policies for the Managing Board are submitted to the full Supervisory Board and are then put forward for adoption by the General Meeting of Shareholders. On an annual basis the Nomination & Compensation Committee prepares a report on the remuneration and implementation of these policies in the relevant financial year.

The membership of the Nomination & Compensation Committee of the Supervisory Board changed in 2006. Mr Loudon resigned from the Supervisory Board with effect from 27 April 2006 and subsequently also stepped down from the Nomination & Compensation Committee. Mr Martinez succeeded Mr Loudon as Committee chairman. Mr Burgmans also resigned from the Supervisory Board with effect from 27 April 2006 and therefore ceased to be a member of the Nomination & Compensation Committee. He was replaced by Mr Ruys as committee member.

With effect from 27 April 2006, the Nomination & Compensation Committee consists of the following three members: Mr Martinez (chairman), Mrs Maas-de Brouwer and Mr Ruys.

During 2006, the Nomination & Compensation Committee prepared several proposals for consideration by the Supervisory Board. The Chairman of the Managing Board and the head of Group Human Resources are invited to the committee's meetings to discuss relevant issues, such as the Managing Board's composition, succession planning and compensation.

The Nomination & Compensation Committee met four times in 2006. As in previous years the committee was assisted by Towers Perrin, an external remuneration consultancy, which provides the committee with market-related information and professional advice on commonly applied reward elements, best practice and expected developments. These services to the Nomination & Compensation Committee are provided under an arrangement

that is separate from Towers Perrin's other consultancy services to ABN AMRO.

Compliance Oversight Committee activities

The membership of the Compliance Oversight Committee of the Supervisory Board changed in 2006. Mr Burgmans resigned from the Supervisory Board with effect from 27 April 2006 and subsequently also stepped down from the Compliance Oversight Committee. Mr Burgmans was replaced by Mr Van den Bergh as committee member. With effect from 27 April 2006, the Compliance Oversight Committee consists of the following three members: Mr Martinez (Chairman), Mrs Maas-de Brouwer and Mr Van den Bergh.

The Compliance Oversight Committee met six times in 2006. Each committee meeting was followed by an executive session with the head of Group Compliance & Legal. During its meetings in 2006, the Compliance Oversight Committee discussed and closely monitored the actions following the Enforcement Actions against ABN AMRO by US and Dutch regulators. Specific attention was paid to the US Law Compliance Program and the US Branches Activity Reports. On a quarterly basis the Compliance Oversight Committee discussed the Group Compliance Reports, elaborating on global regulatory developments and key Group Compliance initiatives such as the Mindset Programme, Compliance Risk Assessment and issues with regard to client acceptance and anti-money laundering (CAAML). All three committee members undertook the CAAML training provided by Group Compliance and passed the ensuing test.

In line with its Charter, in 2006 the Compliance Oversight Committee for the first time conducted a self-assessment of its effectiveness. It was concluded that the Compliance Oversight Committee effectively supervised, monitored, and advised the Managing Board on the effects of the internal risk management and control systems. In addition, the Compliance Oversight Committee effectively communicated the importance of compliance to the Managing Board and supervised the Managing Board's communications regarding the importance of compliance to the rest of the bank. The Compliance Oversight Committee also reviewed and discussed ABN AMRO's risk profile at length.

Corporate governance

Corporate governance at ABN AMRO is defined by the way we organise and conduct the relationship between the Managing Board, the Supervisory Board and our shareholders.

For ABN AMRO, good corporate governance is critical to our ability to realise our strategic goal of creating sustainable long-term value for all our stakeholders, including our shareholders, our clients, our employees and society at large. It is the foundation of our licence to operate.

In order to achieve good corporate governance, we organise the company in a way that promotes first-class entrepreneurship by the Managing Board and effective supervision by the Supervisory Board. Integrity, transparency and accountability are key elements of our corporate governance, as they are in our business as a whole. These key elements ensure that the controls and oversight necessary for effective risk management, proper compliance with regulations, and accurate and complete disclosure of information to the market are in place and functioning well.

Our guiding compass in these matters is provided by our Corporate Values and Business Principles, which constitute ABN AMRO's 'code of ethics'.

As a Netherlands-based and listed company, we adhere to the Dutch Corporate Governance Code. Also, as a company registered with the US Securities and Exchange Commission (SEC) and listed on the New York Stock Exchange, we are subject to US securities laws and the applicable corporate governance rules imposed by the New York Stock Exchange.

Corporate governance in the Netherlands

ABN AMRO Holding N.V. and ABN AMRO Bank N.V. are public companies with limited liability incorporated under the laws of the Netherlands. Both companies have a two-tier system of corporate governance, consisting of a Supervisory Board and a Managing Board. The day-to-day management of the companies is vested with the Managing Board.

The memberships of the Supervisory Boards of ABN AMRO Holding N.V. and ABN AMRO Bank N.V. are

the same, as are the memberships of the Managing Boards of ABN AMRO Holding N.V. and ABN AMRO Bank N.V.

Dutch Corporate Governance Code

The Dutch Corporate Governance Code (the Code) took effect on 1 January 2004. ABN AMRO's Corporate Governance Supplement for 2006, in which we report on our compliance with the Code, can be viewed on our website at www.abnamro.com.

We are pleased to confirm that we - and, where relevant, the Trust Office - apply the principles and (applicable) best practice provisions of the Code, with the exception of the following best practice provisions: II.1.1, II.2.7, III.5.11 and IV.1.1. It remains our belief that it is in our best interest and in the best interest of our various stakeholders, to apply different best practices in these specific areas. Our explanations for this have remained materially unchanged, but they are repeated below for the purpose of clarity.

Best practice provision II.1.1 states that a managing board member is appointed for a maximum period of four years and that a member may be reappointed for a term of not more than four years at a time.

The current members of our Managing Board, with the exception of Mr Boumeester, Mr Overmars and Mr Teerlink, have been appointed for an indefinite period in accordance with the statutory obligations applicable at the time of their appointment.

We apply best practice provision II.1.1 if and when new members of the Managing Board are appointed. The appointments of Mr Boumeester, Mr Overmars and Mr Teerlink to the Managing Board with effect from 1 January 2006 is in line with best practice provision II.1.1, as these new members of the Managing Board have been appointed for a maximum period of four years and may be reappointed for a term of not more than four years at a time.

Best practice provision II.2.7 states that the maximum remuneration in the event of dismissal is one year's salary (the 'fixed' remuneration component). If the maximum of one year's salary would be manifestly unreasonable for a managing board member who is dismissed during his first term of office, this board member shall be eligible for a severance payment not exceeding twice the annual salary.

The employment contracts of the current members of our Managing Board that were already in place as at 1 January 2004 (the date on which the Dutch Corporate Governance Code took effect) remain unchanged. The Supervisory Board intends to interpret the redundancy scheme as set out in these employment contracts in accordance with best practice provision II.2.7.

For new members of the Managing Board we do not fully apply this best practice provision. The underlying employment contracts of the three members who were appointed to the Managing Board with effect from 1 January 2006, which are Senior Executive Vice President employment contracts under Dutch law, continue. However, all entitlements under these contracts, including the entitlements under the redundancy clause, have been suspended during membership of the Managing Board, and replaced by another employment contract applicable to Managing Board members. We have not included a redundancy clause in these contracts and shall apply best practice provision II.2.7 as follows: in the event of a termination of the Managing Board membership, the suspended employment contract will be reinstated. If it is deemed necessary to terminate that contract in the future, this will happen in accordance with Dutch labour law.

Best practice provision III.5.11 states that the remuneration committee shall not be chaired by the chairman of the supervisory board or by a former member of the management board of the company, or by a supervisory board member who is a member of the managing board of another listed company.

As stated under best practice provision III.5.1 in our Corporate Governance Supplement 2006, which can be viewed on our website at www.abnamro.com, our Supervisory Board has a combined remuneration and selection / appointment committee, entitled the Nomination & Compensation Committee. As we attach great value to the coordinating role of the Chairman of the Supervisory Board, especially in respect of the selection and nomination process of Supervisory Board and Managing Board members, the Chairman of the Supervisory Board will continue to chair the Nomination & Compensation Committee.

Best practice provision IV.1.1 states that the general meeting of shareholders of a company not having a statutory two-tier status ('structuurregime') may pass a resolution to cancel the binding nature of a nomination for the appointment of a member of the managing board or of the supervisory board, and/or a resolution to dismiss a member of the managing board or of the supervisory board by an absolute majority of the votes cast. It may be provided that this majority should represent a given proportion of the issued capital, which proportion may not exceed one third. If the given proportion of the capital is not represented at the meeting, but an absolute majority of the votes cast is in favour of a resolution to cancel the binding nature of a nomination, or to dismiss a board member, a new meeting may be convened at which the resolution may be passed by an absolute majority of the votes cast, regardless of the proportion of the capital represented at the meeting.

ABN AMRO does not have a statutory two-tier status ('structuurregime'). Our Supervisory Board has decided, for the time being, to make non-binding nominations for the appointment of its members and for the appointment of members of the Managing Board. This means that the appointment of a candidate for the Supervisory Board or the Managing Board - if made on the basis of a non-binding nomination - requires an absolute majority in the General Meeting of Shareholders, in which case we apply best practice provision IV.1.1. If a candidate for the Supervisory Board or the Managing Board is proposed on the basis of a binding nomination, in accordance with its Articles of Association, the binding nature of the nomination can be set aside by the General Meeting of Shareholders passing a resolution with at least a two-thirds majority of the votes cast representing more than half of the economic value of the capital. Candidates that have been nominated by the shareholders require a similar majority in order to be appointed. This means that in the event that the Supervisory Board would decide in the future to make binding nominations (or a binding nomination) or in the event of a nomination by shareholders, we would not apply best practice provision IV.1.1.

Pursuant to ABN AMRO's Articles of Association, the following procedure has to be followed for the dismissal of members of the Managing Board and Supervisory Board. A distinction is made between situations in which the Supervisory Board submits a proposal to the General Meeting of Shareholders to dismiss a member of the Managing Board or Supervisory Board and situations in which the proposal to dismiss a member of the Managing Board or Supervisory Board is submitted at the initiative of shareholders. The first of these situations requires an absolute majority of the General Meeting of Shareholders, and in this case ABN AMRO applies best practice provision IV.1.1. In the event of the second situation arising, a two-thirds majority of the votes cast, representing more than half of the economic value of the capital is required. We place great importance on the delivery of long-term shareholder value, so maintaining continuity in the management of the company is critical. For this reason, we will continue to apply the procedure with regard to the nominations for the appointment and dismissal of Supervisory Board and Managing Board members.

Best practice provision II.1.4 of the Dutch Corporate Governance Code states that the managing board shall declare in the annual report that the internal risk management and control systems are adequate and effective; it shall provide clear substantiation of this. In the annual report, the managing board shall report on the operation of the internal risk management and control system during the year under review. In doing so, it shall describe any significant changes that have been made and any major improvements that are planned, and shall confirm that they have been discussed with the audit committee and the supervisory board.

In its first report of December 2005 on compliance with the Dutch Corporate Governance Code, the Corporate Governance Code Monitoring Committee made recommendations concerning the application of best practice provision II.1.4. The Corporate Governance Code Monitoring Committee differentiates between financial reporting risks and other risks, such as operational, strategic, legislative and regulatory risks.

With regards to financial reporting risks the Managing Board declares that:

- There is reasonable assurance that ABN AMRO's financial reporting does not contain any errors of material importance.
- The bank's risk management and control systems have worked properly in 2006.
- There are no indications that the bank's risk management and control systems will not work properly in 2007.

The other risks, such as operational, strategic, legislative and regulatory risks, and additional risks ABN AMRO

has identified and manages are described in different sections of this annual report, including the chapters Compliance - See “Item 4.B. - Business overview - Compliance”, Risk and the Capital Framework - See “Item 11. Quantitative and qualitative disclosures about market risk”, and Corporate governance - See “Item 6.B. - Board practices - Corporate governance”.

The above declaration and reference to other risks do not imply that the bank’s risk management and control systems provide certainty as to the realisation of operational and financial business objectives, nor that these systems can at all times prevent misstatements, inaccuracies, errors, fraud and non-compliance with rules and regulations.

In view of the above, the Managing Board believes that best practice provision II.1.4. of the Dutch Corporate Governance Code, taking into account the recommendations of the Corporate Governance Code Monitoring Committee, is fulfilled.

ABN AMRO’s internal control system is in line with the recommendations of the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Corporate governance in the United States

As an SEC-registered company, listed on the New York Stock Exchange, we are subject to US securities laws, including the Sarbanes-Oxley Act, and certain corporate governance rules imposed by the New York Stock Exchange. Following the introduction of the Sarbanes-Oxley Act, we established a Disclosure Committee that formalised the roles, tasks and disciplines that were already in place for ensuring the accuracy and completeness of information disclosed to the market.

Our report on internal control over financial reporting under section 404 of the US Sarbanes-Oxley Act is included in this annual report.

The New York Stock Exchange listing rules

As a foreign issuer with American Depositary Shares listed on the New York Stock Exchange, ABN AMRO is allowed to follow its home country practices with respect to most corporate governance matters, but we are generally obliged to disclose any significant ways in which our corporate governance practices differ from the New York Stock Exchange standards applicable to US companies. The main exception to this is that we must fully comply with the SEC rules relating to the composition, responsibilities and operation of audit committees.

The following are the significant differences between ABN AMRO’s corporate governance practices and the New York Stock Exchange standards applicable to US companies:

- Like many public Dutch companies, we have a two-tier governance structure. As described here in more detail, our Managing Board is composed of our principal officers and is responsible for the day-to-day management of our affairs. The Managing Board functions under the supervision of our Supervisory Board, which must approve specified decisions of the Managing Board. Members of the Managing Board and other officers and employees are excluded from membership of the Supervisory Board. Members of the Managing Board and Supervisory Board are appointed by the General Meeting of Shareholders upon a nomination by the Supervisory Board.
- Both sets of practices require that a majority of the members of the board of directors must be independent, but the relevant definitions of independence differ. In some cases ABN AMRO’s definition is stricter; for example, we have a longer ‘look-back’ period for former executive directors. In other cases, the definition applied by the New York Stock Exchange is stricter.

- Unlike the New York Stock Exchange rules, our corporate governance practices permit the Supervisory Board's sub-committees to have a member who is not independent. At this moment, however, all members of the sub-committees of ABN AMRO's Supervisory Board are, in fact, independent.

The responsibility for our corporate governance practices lies with the Managing Board and the Supervisory Board as a whole, and is not delegated to a sub-committee of the Supervisory Board. In general, we believe that our current corporate governance practices are consistent in principle with the New York Stock Exchange standards applicable to US companies.

Shareholders' influence

With effect from June 2005, ABN AMRO Bank N.V. has changed from applying the full large company regime to applying the large company regime in its mitigated form. This means that the Managing Board of ABN AMRO Bank N.V., like its Supervisory Board, is appointed by its shareholder, ABN AMRO Holding N.V.

The (depository receipts of) preference shares are not listed on an exchange and are administered by a trust office, 'Stichting Administratiekantoor Preferente Financieringsaandelen ABN AMRO Holding' (the Trust Office). The voting rights on the preference shares, although formally held by the Trust Office, are exercised in practice by the depository receipt holders, as voting proxies will be issued to the depository receipt holders by the Trust Office under all circumstances. The Trust Office will not exercise its voting rights. The voting rights will be calculated on the basis of the equity participation of the (depository receipts of) preference shares in proportion to the value of the ordinary shares. Voting rights on preference shares granted to a depository receipt holder by proxy will correspond to the amount of depository receipts held by the depository receipt holder, in relation to the stock price of the ordinary shares on Euronext Amsterdam at the close of the last trading day in the month preceding the calling of the shareholders' meeting.

The Trust Office holds preference shares representing 100% of the total preference share capital on the basis of nominal issued share capital outstanding on 31 December 2006. The actual voting power that can be exercised on the (depository receipts of) preference shares is approximately 1.58% of our total issued capital, based on the closing share price as at 31 December 2006.

ABN AMRO Holding N.V.'s Articles of Association allow for a number of provisions based on the legislative changes in recent years giving shareholders broader powers. These include, subject to certain conditions, the right of shareholders and/or holders of depository receipts representing at least 1% of the economic value of the share capital, or a block of shares representing a market value of at least EUR 50,000,000, to request that additional items be included on the agenda of the annual General Meeting of Shareholders. One consequence of shareholders' increasing influence is that the shareholders of ABN AMRO Holding N.V. are entitled to approve decisions made by the Managing Board that would lead to an important change in the identity or character of our company or business. This applies in any case to resolutions concerning a) the transfer of (almost) the entire business of the company to a third party; b) entering into or breaking off a long-term cooperation; or c) acquiring or disposing of participating interests with a value of at least of one-third of the sum of assets. The General Meeting of Shareholders must also adopt the remuneration policy for the Managing Board and approve the share and option plans for the Managing Board.

Supervisory Board

ABN AMRO Holding N.V.'s Supervisory Board supervises the policy conducted by the Managing Board, as well as the company's general course of affairs and its business. In addition, it is charged with assisting and advising management. In performing their duties, the members of the Supervisory Board are guided by the interests of the company and the enterprise connected with it. Certain powers are vested with the Supervisory Board, including the approval of certain resolutions by the Managing Board.

The Supervisory Board is an independent body. Members of the Supervisory Board are appointed by the General Meeting of Shareholders. The Supervisory Board nominates one or more candidates for each vacant seat. Details of the Supervisory Board's nomination process can be found in the section "—Dutch Corporate Governance Code", above.

Supervisory Board members are appointed for a term of four years and may be re-appointed after that term. Members of the Supervisory Board may serve a maximum term of 12 years from the date of their first appointment. In principle, each member agrees to retire by the day on which the annual General Meeting of Shareholders is held in the year in which he or she reaches the age of 70.

Candidates recommended for appointment or reappointment to the Supervisory Board should meet the criteria of the membership profile, which are set out in the Rules Governing the Supervisory Board's Principles and Best Practices of ABN AMRO Holding N.V. In order to ensure the Supervisory Board's independence, we apply the criteria of independence as set out in the Dutch Corporate Governance Code.

All members of the Supervisory Board must be independent, with the exception of no more than one. All current members of the Supervisory Board qualify as independent. For more information about the Supervisory Board's independence criteria, please refer to our website at www.abnamro.com.

Supervisory Board members may not represent particular interests. If an interest of a member of the Supervisory Board conflicts with that of the company, the Chairman of the Supervisory Board shall be notified. Details of the Supervisory Board's remuneration package can be found in Note 43 to our consolidated financial statements.

The Chairman and Vice Chairman are appointed by the Supervisory Board from among its members. The Supervisory Board also appoints from its members the Audit Committee of at least four members, the Nomination & Compensation Committee of at least three members and the Compliance Oversight Committee of at least three members. The committee members are appointed until further notice.

The Rules Governing the Supervisory Board's Principles and Best Practices of ABN AMRO Holding N.V. are available on our website at www.abnamro.com. These rules also include the terms of reference of the Audit Committee, the Nomination & Compensation Committee, and the Compliance Oversight Committee.

On our website you may also find a detailed curriculum vitae of each of the Supervisory Board members. In addition, a curriculum vitae for each new member of the Supervisory Board is included in ABN AMRO Holding N.V.'s Annual Report published in the year in which he or she is appointed.

Audit Committee

The Audit Committee of the Supervisory Board reviews and advises the Supervisory Board and subsequently the Managing Board on the quarterly statements, the Annual Report, the annual financial statements, and the internal and external auditors' management letters. It regularly reviews the overall risk profile, the quality of the loan portfolio and the bank's large exposures. In addition, the Audit Committee reviews the consistency of our accounting policies, the internal audit function, the Group Audit Charter, and the internal risk management and control systems. The Audit Committee also reviews our risk management policy, and reports on litigation and acquisitions. In accordance with the Group Audit Charter, the head of Group Audit has a direct reporting line to the chairman of the Audit Committee.

Auditor independence is a particularly important issue for the Audit Committee. It formally evaluates the independence of the external auditor, the measures used to control the quality of the external auditor's work, and the annual audit budget. The Audit Committee's policy on auditor independence governs the appointment, compensation and oversight of the external auditor. The external audit firm is appointed or reappointed by the General Meeting of Shareholders for a period of five years on the advice of the Supervisory Board. To ensure its independence, the Auditor Independence Policy prohibits the external auditor from providing certain non-audit services to us.

The Audit Committee is responsible for pre-approving audit, audit-related and permitted non-audit services provided by the external auditor. In exercising its pre-approval authority, the Audit Committee considers whether the proposed services are consistent with the continued independence of the external auditor. Both the Auditor Independence Policy and the Audit Committee Pre-Approval Policy for External Audit Firm Services can be viewed on our website at www.abnamro.com.

Nomination & Compensation Committee

The tasks and responsibilities of the Nomination & Compensation Committee of the Supervisory Board can be divided into tasks related to nomination and to compensation.

Its nomination responsibilities include preparing for the selection and nomination of members of the Supervisory and Managing Boards by preparing and periodically reviewing the succession plans of these Boards on the basis of agreed profiles. The granting of the title of Senior Executive Vice President to eligible persons and the management development programmes for top executives are also discussed in the Nomination & Compensation Committee. Where relevant, the Nomination & Compensation Committee informs the full Supervisory Board.

The Nomination & Compensation Committee also acts on reward and performance issues. Standards and criteria for performance are defined, and on that basis the performance of the members of both Boards is reviewed

periodically. The framework, concept and content of compensation and benefits, pension schemes and other relevant schemes are discussed and decided. Resolutions concerning the remuneration policies for the Managing Board are submitted to the full Supervisory Board and are then put forward for adoption by the General Meeting of Shareholders. On an annual basis the Nomination & Compensation Committee prepares a report on the remuneration and implementation of these policies in the relevant financial year.

Compliance Oversight Committee

The role of the Compliance Oversight Committee of the Supervisory Board is to supervise ABN AMRO's compliance organisation, activities and risk profile. More specifically, the committee is responsible for supervising and monitoring – and advising the Managing Board on – the effects of internal risk management and control systems relating to compliance. These duties include supervising the enforcement of the relevant legislation and regulations, and overseeing the implementation of codes of conduct. The Compliance Oversight Committee is also responsible - along with the full Supervisory Board - for emphasising the importance of compliance to the Managing Board and the bank as a whole, and for overseeing the Managing Board's communications with the bank about the importance of compliance.

The Compliance Oversight Committee discusses the bank's compliance risk profile on a regular basis. In addition, it reviews the compliance plan developed by the Compliance Policy Committee and approved by the Managing Board, and monitors its implementation. The Compliance Oversight Committee is also responsible for supervising the functioning of Group Compliance, and, in particular, for ensuring that Group Compliance is appropriately staffed, compensated, resourced, and supported by other units of the bank. The head of Group Compliance & Legal has a direct reporting line to the Chairman of the Compliance Oversight Committee.

One of the Compliance Oversight Committee's specific duties, subject to the ultimate decision of the full Supervisory Board, is to take charge of any remedial actions and/or disciplinary proceedings against members of the Managing Board for breaches of compliance policies, and to provide oversight of any disciplinary processes against other company employees for breaches of compliance policies.

The Compliance Oversight Committee plays an important role in establishing a tone from the top that emphasises a zero tolerance and non-negotiable approach to compliance and ensures that ABN AMRO establishes and maintains a robust, independent compliance function. In addition the Compliance Oversight Committee monitors progress towards meeting ABN AMRO's commitments under the enforcement actions, serving as a forum for concentrating attention on compliance issues and reporting on compliance issues to the full Supervisory Board.

Managing Board

The members of the Managing Board of ABN AMRO Holding N.V. collectively manage the company and are responsible for its strategy, structure and performance. The members are appointed by the General Meeting of Shareholders. The Supervisory Board shall nominate one or more candidates for each vacant seat. If the Supervisory Board nominates two or more candidates for a vacant seat, the nomination list is binding. However, the General Meeting of Shareholders may resolve that such a list is not binding by a vote of at least two-thirds of the votes, which must also represent more than half of the economic value of the issued capital. Such a majority vote is also required to appoint a Managing Board member, other than in accordance with a binding or non-binding nomination by the Supervisory Board. The members of the Managing Board are accountable both collectively and individually for all decisions taken by the Managing Board.

The Chairman of the Managing Board leads the Board in its overall management of the company to achieve its performance goals and ambitions. The Chairman is the main point of liaison with the Supervisory Board. The Chief Financial Officer is responsible for the financial affairs of the company, and the Chief Risk Officer is responsible for

the company's risk management and operational risk control. Alongside their overall corporate responsibilities, the members of the Managing Board have specific responsibilities for one or more divisions of ABN AMRO (BUs, Group Functions, Services, Segments). The Managing Board has delegated certain tasks to committees.

The management of the BUs, Group Functions and Services is delegated to management teams. These management teams consist of one or more Senior Executive Vice Presidents and Executive Vice Presidents. A broader leadership and execution team, the Group Business Committee, is responsible for the leadership of initiatives developed by the cross-BU Client Segments, regional BUs, Product BUs and Services to grow the value

of the Group. The Group Business Committee consists of four Managing Board members who are responsible for the BUs, and 11 Senior Executive Vice Presidents.

D. Employees

At 31 December 2006, ABN AMRO had near to 107,000 employees working in 56 countries and territories, which was an increase of approximately 14,000 employees from 31 December 2005. In a dynamic organisation such as ours this total is merely a snapshot, as there is a constant inflow and outflow of employees caused by joiners, leavers, acquisitions, divestments and restructuring programmes. In an ever-changing and increasingly competitive world, ABN AMRO has to continuously adapt to achieve its ambitions and to maintain focus on core activities. This means continuous change for the entire organisation.

In such an environment it is essential to have robust policies and practices in place that support our employees and position ABN AMRO as an 'employer of choice'. Key elements of our approach to human resources management include our Corporate Values and Business Principles as well as our compliance, sustainability, and diversity and inclusion policies.

In terms of its people, ABN AMRO's top priority in 2006 was ensuring that it continued to attract the best and brightest talent, develop those individuals both professionally and personally, and energise them throughout their careers.

To gain deeper insights into the views, talents and leadership capabilities of our people, we ran the Employee Engagement Survey across the entire Group for the third consecutive year. We achieved a response rate of 85%, ten percentage points up from the previous year, and we are proud to say that the scores increased in almost every category, reflecting the fact that our people are more motivated and engaged than before. This was an excellent result for ABN AMRO, and a contributory factor to our being voted one of the best companies to work for in the Netherlands and Brazil, as well as one of the 50 companies that women most want to work for in the UK.

Helping people at all levels to succeed in their careers while meeting our overall strategic ambitions requires active and targeted Performance Management, both at an individual and at an organisational level. In 2006 we focused on harmonising Performance Management processes to ensure global consistency and transparency for our employees. We also defined our Performance Management strategy for the future, based on the findings of a benchmarking exercise among best-in-class organisations. This in turn will set the direction for ABN AMRO's management of human resources in 2007.

Two new leadership programmes helped build on our existing leadership curriculum: Authentic Leadership, designed for women in the upper echelons of our organisation, and Inclusive Leadership, to help managers create high-performing teams in an inter-cultural environment. We also continued our coaching and mentoring programmes to stimulate, encourage and grow our people. Examples include the High Potentials Programme, a business-led initiative that gives employees with high potential from all our BUs the opportunity to work together to create real business value. Such programmes underline and reinforce our commitment to accelerating and managing talent on a global scale.

To measure and help our leaders develop their leadership effectiveness, our top 1,000 senior executives completed a Leadership Review in 2006. This process was set in motion in 2004 when our Top Executive Group, made up of our 200 most senior people, took part in a similar exercise. The Managing Board uses the output from the Leadership Review to optimise the use of our talent base and direct the right people into the most fulfilling and mutually beneficial roles - a win-win situation for all.

To help us reward our people consistently and appropriately for their contribution to our performance, our attention in 2006 focused on refining our global reward framework.

Each BU aligned its own reward strategy to this framework, ensuring that we offer our people excellent reward and incentives, as well as benefiting the bank by improving the return on our investment in people across the board.

Diversity and inclusion remained a priority in 2006. We believe that valuing the diversity of our people - especially in terms of nationality and gender - is a key component of a high- performance culture and an important driver in achieving our business goals. The impact of our diversity and inclusion efforts is reflected in our business: we have 9.6% women in the most senior management positions (Executive Vice President and above) and 18.8%

women at manager level, much higher than most of our peer group. We remain committed to a culture in which people's differences are celebrated and harnessed to achieve success.

ABN AMRO's Human Resources organisation plays a central role in building a high level of engagement with our people. Human Resources supports the implementation of the bank's revised organisational structure and helps us put our three corporate behaviours - collaboration, client intimacy and discipline - into effect. Human Resources has been moving to a new operating model to ensure a consistent and high level of service to our managers and employees. This implementation was largely completed in 2006.

Developing and leveraging the talent of our people is at the heart of everything we do. In 2007 we plan to increase the momentum, and turn our focus to embedding a high-performance culture in the business, thereby making more possible both for our people and our bank.

E. Share ownership

For details of the options on our Ordinary Shares held by members of our Managing Board and Supervisory Board, please refer to Note 43 and 44 to our consolidated financial statements.

Item 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major shareholders

The Dutch Act on the Disclosure of Major Holdings and Capital Interests in Securities-Issuing Institutions (the Act) came into effect on 1 October 2006 with respect to the notification requirements for investors. The Act was subsequently included in the new Financial Supervision Act, which came into effect on 1 January 2007. The Act replaces the Act on the Disclosure of Major Holdings in Listed Companies 1996 and implements a number of provisions of the EU Transparency Directive in Dutch law. The Act aims to increase the transparency of interests held in a company that is admitted to trading on a regulated market and simplify the procedure for notifying such interests. The Act requires an investor to notify the Netherlands Authority for the Financial Markets (AFM) upon actively reaching or crossing a threshold in respect of its shareholding or voting rights, as a result of the acquisition or disposal of shares. The applicable thresholds will be 5%, 10%, 15%, 20%, 25%, 30%, 40%, 50%, 60%, 75% and 95%. The term 'shares' also includes depositary receipts and options and other tradable securities in respect of shares and depositary receipts. The investor also has a duty to notify the AFM upon passively reaching or crossing a threshold in the event that this results from a change in an issuer's capital or voting rights. The AFM will facilitate timely filings by offering an alerting service to notify investors of any changes made by the issuer in its outstanding capital or voting rights.

Under the Act, ING Groep N.V. reported total shareholdings of ABN AMRO Holding N.V. of 120,547,283 ordinary shares at 31 December 2006 (2005: 124,556,052). In 2006, ING Groep N.V. decreased its ownership to 6.50% of the total outstanding amount of ordinary shares from its prior ownership of 6.52%.

The institutions listed in the table below reported holdings of ABN AMRO Holding N.V. depositary receipts of preference shares. The figures reflect the number of depositary receipts of preference shares held as well as the holdings as a percentage of the total outstanding depositary receipts of preference shares at 31 December 2006, respectively.

Depositary receipts of preference shares are issued by the Trust Office. The Trust Office held 1,369,815,864 preference shares, 100% of the outstanding preference shares, at year-end 2006.

Although the Trust Office holds preference shares representing 100% of the total capital of the newly issued financing preference capital on the basis of nominal issued share capital outstanding on 31 December 2006, the actual voting power that can be exercised on the (depository receipts of) preference shares is approximately 1.58% of our total issued capital.

	Number of Depository Receipts of Preference Shares (1) (2)	Percentage of Depository Receipts of Preference Shares (1) (2)
ING Groep N.V.	291,692,888	21.29
Aviva plc	239,409,452	17.48
Fortis Utrecht N.V.	230,833,376	16.85
Kempen Capital Management Ltd.	205,789,464	15.02
Aegon N.V.	196,347,872	14.33
Eureko B.V.	166,000,000	12.12

(1) Other than the trust office, the holders of preference shares listed in the table above hold depository receipts entitling them to the economic benefit of the preference shares. The preference shares represented by these depository receipts are held by the Trust Office.

(2) During 2006 the ownership of depository receipts of preference shares did not change.

The Trust Office is a non-membership organisation, i.e. an entity without shareholders or other members that is similar to a trust or foundation, with a self-appointed Board, organised under the laws of the Netherlands. At 31 December 2006, the members of the Board of the Trust Office were:

Name	Occupation
J.H. Ubas (Chairman)	Former Investment Manager of ING Groep N.V.
J.M. Overmeer	Member of the Managing Board of Aegon Nederland N.V.
C.W.H. Bruggemann	Former Managing Director Corporate Finance of ABN AMRO Bank N.V.

None of the members of the Board of the Trust Office have any managerial or other material relationship with ABN AMRO Holding N.V. or its subsidiaries or other Group companies.

B. Related party transactions

Please refer to Note 46 and 49 of our consolidated financial statements.

C. Interests of experts and counsel

Not required because this document is filed as an annual report.

Item 8. FINANCIAL INFORMATION

A. Consolidated statements and other financial information

The information set forth in “Item 18. Financial Statements” is incorporated into this section by reference.

Legal proceedings

Legal proceedings have been initiated against us in a number of jurisdictions, but on the basis of information currently available, and having taken counsel with legal advisers, the Managing Board is of the opinion that the outcome of these proceedings is unlikely to have significant effect on our consolidated financial position or profitability. See also “Item 3. Key Information - D. Risk factors - Regulatory changes or enforcement initiatives could adversely affect our business” and “—We are subject to legal risk which may have an adverse impact on our results” and “Item 4. Information on the Company - B. Business overview - Legal and regulatory proceedings”.

Dividends

For information on our dividend history and a discussion of our dividend policy, see “Item 3. Key Information — A. Selected Financial Data—Dividends” and “Item 10. Additional Information — A. Memorandum and Articles of Association—Dividends”.

B. Significant changes

Not applicable.

Item 9. THE OFFER AND LISTING

Trading markets

At 31 December 2006 the ordinary shares of ABN AMRO Holding N.V. were listed on the stock exchanges of Amsterdam, Brussels, Paris and New York. With effect from 17 March 2006, ABN AMRO ordinary shares were delisted from the London Exchange. On 23 January 2007, ABN AMRO announced that the ordinary shares will be withdrawn from Eurolist by Euronext Brussels and from Eurolist by Euronext Paris. The shares will no longer be quoted on Euronext Brussels and Euronext Paris. The exact moment when this will happen depends on the delisting procedures of both Euronext Brussels and Euronext Paris.

On the New York Stock Exchange the shares are available in the form of American Depositary Shares represented by American Depositary Receipts (ADRs), each ADR representing one ordinary share. On 31 December 2006, 65,388,677 ADRs were outstanding, compared with 61,459,721 at year end 2005.

The depositary receipts for the convertible financing preference shares are not listed. The (formerly convertible) preference shares are listed on the Euronext Amsterdam.

In 2006, the number of ordinary shares outstanding decreased by 24.1 million from 1,877.9 million to 1,853.8 million. This decrease was the result of a share buy-back (95.9 million) partly offset by dividend payments in stock (63.3 million), payment of performance share plan 2002 (0.7 million) and exercise of staff options (7.8 million).

The time-weighted average number of ordinary shares outstanding amounted to 1,882.5 million (2005: 1,804.1 million). In calculating the time-weighted average, new shares are counted on a pro-rata basis from the date of issue.

The number of convertible financing preference shares remained unchanged at 1,369,815,864, each with a face value of EUR 0.56. Conversion of these shares into ordinary shares may take place in certain conditions (for details please refer to our website). The number of (formerly convertible) preference shares remained unchanged at 44,988, each with a face value of EUR 2.24.

Staff options carry entitlement to the numbers of ordinary shares stated in the table.

Exercisable staff options could increase the number of ordinary shares by 32.8 million or 1.8% of the number of ordinary shares outstanding at 31 December 2006.

Market price information

The following table sets forth, for the periods indicated, the high and low closing prices for Ordinary Shares as reported in the Official Price List of the Euronext Amsterdam Stock Exchange and the high and low prices for the American Depositary Shares on the New York Stock Exchange. Differences in the rate of change between the prices of Ordinary Shares and the prices of American Depositary Shares for the periods indicated are attributable principally to fluctuations in the USD-Euro exchange rate.

Market price information	Ordinary Shares		American Depositary Shares	
	High	Low	High	Low
Year:	(in EUR)		(in USD)	
2006	25.92	20.46	32.60	25.57
2005	22.34	18.27	27.86	22.95

Item 10. ADDITIONAL INFORMATION**A. Share Capital**

Not required because this document is filed as an annual report.

B. Memorandum and Articles of Association

The description set forth below is a summary of the material information relating to Holding's share capital, including summaries of certain provisions of the Articles of Association and applicable Dutch law in effect at the date hereof. The Articles of Association were last amended by a notarial deed executed by Mr. van Helden, civil law notary in Amsterdam, on 9 June 2005. The certificate of no objection of the Ministry of Justice on the amendments to the Articles of Association was issued by the Ministry of Justice under the number N.V. 385.573.

Share Capital

Under the Articles of Association, the authorized share capital of Holding amounts to EUR 4,704,000,224 nominal value. It consists of (1) four billion and four hundred Ordinary Shares, nominal value EUR 0.56 each, (2) one

hundred million preference shares convertible into Ordinary Shares, or Convertible Preference Shares, nominal value EUR 2.24 each, subdivided into one series of twenty million shares and eight series of ten million shares, and (3) four billion financing preference shares convertible into Ordinary Shares, or Preference Shares, nominal value EUR 0.56 each, subdivided into one series of one billion six hundred million shares and six series of four hundred million shares.

Issuance of Shares

The Managing Board may be authorized by resolution of the General Meeting of Shareholders to issue from time to time Ordinary Shares, Preference Shares and Convertible Preference Shares (or to grant rights to take up such classes of shares). This authority is subject to the prior approval of the Supervisory Board and at the present time is among others further limited to an overall maximum of 10% of the issued capital of Holding in issue as of April 27, 2006, and provided in general that the price is not below par. The current authority of the Managing Board to issue shares of capital stock will terminate on 31 October 2007 unless extended by the General Meeting of Shareholders of Holding in accordance with the Articles of Association, in each instance for a period not exceeding five years. At the 2007 annual General Meeting of Shareholders, the general meeting will be requested to renew the current authority for a period of 18 months, starting 27 April 2007, subject among to an overall maximum of 10% of the issued capital of Holding in issue as at 26 April 2007. In the event that the authority of the Managing Board to issue shares of capital stock terminates, the issuance of shares of capital stock would require a resolution of the General Meeting of Shareholders, upon a proposal of the Managing Board, which is subject to the prior approval of the Supervisory Board. The Managing Board is also currently authorized by the General Meeting of Shareholders to restrict or exclude pre-emptive rights with respect to Ordinary Shares and Convertible Preference Shares and the granting of rights to acquire such shares. Only holders of Ordinary Shares are entitled to pre-emptive rights.

Ordinary Shares

Holders of our Ordinary Shares are entitled to one vote per Ordinary Share. There are no limitations, either under Dutch law or in the Articles of Association, on the right of non-residents of the Netherlands to hold or vote our Ordinary Shares. The holders of Ordinary Shares are entitled to dividends in such amounts and at such times as may be declared by Holding out of funds legally available for that purpose. Cash dividends payable in Euros on Ordinary Shares of Holding may be officially transferred from the Netherlands and converted into any other convertible currency. Ordinary Shares have certain pre-emptive rights. See "Shareholders' Pre-emptive Rights," below.

Ordinary Shares are issued in registered or bearer form. Ordinary Shares in bearer form may be represented by a global certificate. No share certificates will be issued in respect of such bearer shares.

For registered Ordinary Shares, no share certificates will be issued. Holders of registered Ordinary Shares are entered in the shareholders' register, which is maintained by Holding. In cases where the registered shares are held by a custodian, the shares may be registered in the name of a central depository institution or a custodian linked to such central depository institution on behalf of the shareholders. Nearly all Ordinary Shares are registered in the name of Nederlands Centraal Instituut voor Giraal Effectenverkeer B.V., or Euroclear Netherlands, the Dutch central depository institution. The shares may be held by individual shareholders through their securities accounts with a custodian linked to Euroclear Netherlands. These shares will be held and transferred by means of book-entries in the administration of the custodian. Holders of any such shares are not entitled to delivery thereof outside the system of the Dutch Securities Giro Act. Any dividends are paid by Holding to the custodian for the benefit of the applicable shareholders.

At the request of a holder of registered Ordinary Shares that are not registered in the name of Euroclear Netherlands, Holding is required to provide an extract from the register of shareholders in the name of the holder. Transfer of such a registered share in the capital of Holding requires an instrument of transfer and, if Holding is not a party to the transfer, either a written acknowledgement by Holding or service of an instrument on Holding. The acknowledgement

must be made in the instrument of transfer, either by a dated statement on the instrument of transfer or on a copy or extract thereof certified by a civil law notary or the transferor to be a true copy or extract of the instrument of transfer. Official service by an authorized Dutch process service provider of the instrument of transfer or of such copy or extract on Holding is considered to have the same effect as an acknowledgement by Holding of the transfer.

The principal Paying Agent in the Netherlands for the Ordinary Shares is ABN AMRO Bank.

Convertible Preference Shares

Until 31 October 2003, each Convertible Preference Share was convertible into Ordinary Shares. Only 44,988 formerly Convertible Preference Shares remain outstanding. There are no limitations, either under Dutch law or in the Articles of Association, on the right of non-residents of the Netherlands to hold or vote Convertible Preference Shares.

Holders of Convertible Preference Shares are entitled to four votes per Convertible Preference Share. The holders of Convertible Preference Shares are entitled to preferred dividends in such amounts as are provided for in the Articles of Association and have certain preferential rights upon liquidation. See “—Dividends” and “—Liquidation Rights,” respectively below.

Preference Shares

All of the Preference Shares are held by the Trust Office, as record holder, which issues depositary receipts evidencing ownership interests in preference shares to the beneficial owners thereof. The Preference Shares have the same nominal value as the Ordinary Shares, being EUR 0.56 each. The Preference Shares are issued in registered form. The depositary receipts are registered in the name of Euroclear Netherlands. The certificates may be held by individual certificate holders through their securities accounts with a custodian linked to Euroclear Netherlands. These certificates will be held and transferred by means of book-entries in the administration of the custodian. The voting rights on the Preference Shares, although formally with the Trust Office, are exercised in practice by the depositary receipt holders, as voting proxies will be issued to the depositary receipt holders by the Trust Office under all circumstances. In principle, the Trust Office will not exercise its voting rights. The voting rights will be calculated on the basis of the equity participation of the (depositary receipts of the) Preference Shares in proportion to the value of the Ordinary Shares. Voting rights on Preference Shares granted to a depositary receipt holder by proxy will correspond to the amount of depositary receipts held by the depositary receipt holder in relation to the stock price of the Ordinary Shares at the close of the last trading day of the Euronext Amsterdam in the month preceding the convocation of the shareholders meeting. There are no limitations, either under Dutch law or in the Articles of Association, on the right of non-residents of the Netherlands to hold or vote Preference Shares.

More detailed information on the Preference Shares is set out under “Item 7.—A. Major Shareholders and Related Party Transactions.”

Each Preference Share entitles the holder thereof to preferred dividends in an amount as is provided for in the Articles of Association. See “—Dividends” below. The holders of the receipts are entitled to receive dividends in an amount equal to any dividends received on the Preference Shares by the Trust Office. Each Preference Share has certain preferential rights upon liquidation. See “—Liquidation Rights” below.

Rights of shareholders

The rights of shareholders set out in this summary derive from our Articles of Association and Dutch law. Any amendment to the Articles of Association must be proposed by the Managing Board, which is subject to the approval of the Supervisory Board, and approved by a majority vote of the shareholders.

Voting

Each Ordinary Share in the capital of Holding is entitled to one vote. Each Preference Share is entitled to one vote and each Convertible Preference Share is entitled to four votes. Subject to certain exceptions provided for by law or in the Articles of Association, as summarized herein, resolutions are passed by an absolute majority of the votes cast.

Meetings of shareholders

General Meetings of Shareholders shall be held in Amsterdam, The Hague, Rotterdam, Utrecht or Haarlemmermeer (Schiphol). Annual meetings must be held within six months of the end of the financial year. In addition, General Meetings of Shareholders shall be held as deemed necessary by the Managing Board or Supervisory Board and when required by law or the Articles of Association.

General Meetings of Shareholders shall be convened by the Managing Board or Supervisory Board or as determined by law. The convocation to the meeting, which shall take place not later than the fifteen day prior to the

day of the meeting, shall state the items to be discussed or indicate that shareholders may inspect such items at our offices. Proposals relating to reducing our share capital or amending the Articles of Association must be included in the convocation. Notices calling meetings must be published in at least one daily national newspaper and on the Official List of the Euronext Amsterdam N.V. Each shareholder, each usufructuary or pledgee of shares holding voting rights, as well as each depositary receipt holder is entitled to attend the General Meeting of Shareholders and to speak and, where applicable, to vote, either in person or by proxy granted in writing. The Managing Board may set the record date, which may not be earlier than thirty days before the meeting, to determine the holders of shares or depositary receipts that are entitled to attend and vote at the meeting on the nominated record date. Supervisory Board and Managing Board members are entitled to attend and speak at the General Meeting of Shareholders. The Chairman of the Supervisory Board shall chair the General Meeting of Shareholders.

Voting at shareholders' meetings is principally related to approval of the annual accounts of Holding, the adoption of the proposed dividend per Ordinary Share (See "Dividends" below) and discharging the members of the Managing Board and Supervisory Board. In addition, the shareholders may appoint the auditors that are required by law to be appointed. However, if they do not, the Supervisory Board must do so. The shareholders of the Holding also may resolve to: (1) delegate the authority to the Managing Board to issue shares or to grant rights to acquire shares, (2) delegate the authority to the Managing Board to restrict or exclude pre-emptive rights in respect of shares issued pursuant to authority granted in clause (1), (3) authorize the Managing Board to engage in repurchases of capital stock of the Holding or (4) amend the Articles of Association, but, in the case of clause (4), only following a motion by the Managing Board that has been previously approved by the Supervisory Board.

In addition, shareholders of Holding are entitled to appoint or, as the case may be, to reappoint the members of the Managing Board and Supervisory Board. See "Item 6. Directors, Senior Management and Employees—C. Board Practices—Corporate governance—Shareholders' Influence".

Meetings of classes of shareholders

Meetings of holders of Convertible Preference Shares and Preference Shares of a particular class must be held as frequently as is required by law or any provision of the Articles of Association or as deemed necessary by the Managing Board or the Supervisory Board. A General Meeting of Shareholders of Holding must be held once a year in Amsterdam, The Hague, Rotterdam, Utrecht or Haarlemmermeer (Schiphol) in the Netherlands, no later than by the month of June to, among other things, adopt the annual accounts of Holding. General Meetings of Shareholders may be convened by the Managing Board, the Supervisory Board and, in certain circumstances, if authorized by the president of the Amsterdam court, the holders of shares (including holders of depositary receipts issued by the Trust Office evidencing ownership interests in Preference Shares) representing at least 10% of the total outstanding share capital of Holding, upon at least 15 days' prior notice that must be published in at least one nationally distributed daily newspaper and the Official Price List of the Euronext Amsterdam. There are no quorum requirements applicable to general meetings, although certain quorum requirements may apply to specific proposed actions.

Dividends

Subject to certain exceptions, dividends may only be paid out of profits, as set forth in the annual financial statements of Holding. Distributions may not be made if the distribution would reduce shareholders' equity below the sum of the paid up capital and the reserves required by Dutch law or the Articles of Association.

The holders of preference financing shares convertible into ordinary shares ("preference shares") issued pursuant to the resolution passed by the extraordinary meeting of shareholders on 25 August 2004 will receive a dividend of EUR0.02604 per share, representing 4.65% of the face value. As of 1 January 2011, and every ten years thereafter, the dividend percentage on the Preference Shares will be adjusted in line with the arithmetical average of the ten-year Euro-denominated interest rate swap as published by Reuters on the dividend calculation dates thereof, plus an

increment to be set by the Managing Board with the approval of the Supervisory Board, of no less than 25 basis points and no more than one hundred basis points, depending on the market situation at that time (article 37.2.a.1 and a.2). The holders of Preference Shares that were formerly convertible into ordinary shares (“convertible shares”) will receive a dividend of EUR 0.95 per share, representing 3.3231% of the amount paid on each share as of 1 January 2004. As of 1 January 2014, and every ten years thereafter, the dividend on the Convertible Preference Shares will be adjusted in the manner described in the Articles of Association (article 37.2.a.4).

No profit distributions will be made to holders of preference shares or convertible shares in excess of the maximum levels defined above (article 37.2.a.6.).

From the profit remaining after these distributions, the Managing Board may decide to make appropriations to reserves, subject to the approval of the Supervisory Board (article 37.2.b.).

The allocation of the amount remaining after these appropriations shall be determined by the General Meeting of Shareholders. The Managing Board, subject to the approval of the Supervisory Board, shall make a proposal to that effect. A proposal to pay a dividend shall be dealt with as a separate item at the General Meeting of Shareholders (article 37.2.b.).

Holding's policy on reserves and dividends shall be determined and can be amended by the Supervisory Board, upon the proposal of the Managing Board. The adoption of and each subsequent amendment to the policy on reserves and dividends shall be discussed and accounted for at the General Meeting of Shareholders under a separate agenda item (article 37.2.c.).

Notwithstanding the provisions of article 37.2.a.1 and a.2 referred to above, after 1 January 2011 the Managing Board may, with the approval of the Supervisory Board, resolve not to pay the dividend on the relevant Preference Shares in cash out of the profit, or to pay the dividend on the relevant Preference Shares out of a freely distributable reserve. In such cases the part of the profit not paid out shall be added to the general reserve. The Managing Board may only pass such a resolution if no dividend is to be paid on the Ordinary Shares in the relevant year, in accordance with the provisions of article 37.2.c. Subject to approval of the Supervisory Board, the Managing Board can make the dividend or interim dividend on the Ordinary Shares payable, at the discretion of the holders, either in cash or, provided it is authorized to issue shares, partly or wholly in the form of Ordinary or Preference Shares in the company's capital or in a combination thereof, such combination to be determined by the Managing Board (article 37.3.).

Shareholders' Pre-emptive Rights

Upon the issuance of Ordinary Shares or Convertible Preference Shares, holders of Ordinary Shares have pre-emptive rights to subscribe for new issuances in proportion to their holdings. Notwithstanding the foregoing, holders of Ordinary Shares will not have pre-emptive rights in respect of (1) issuances of shares to employees of Holding or group companies and (2) issuances of shares for non-cash consideration. Holders of Ordinary Shares also do not have pre-emptive rights in connection with the issuance of Ordinary Shares and Convertible Preference Shares pursuant to the exercise of a right to subscribe for such shares, such as options and warrants, although the holders of Ordinary Shares do have pre-emptive rights in respect of the issuance of such options and warrants.

The Managing Board, subject to the approval of the Supervisory Board, may be authorized by resolution of the general meeting of shareholders to restrict or exclude pre-emptive rights with respect to the Ordinary Shares and Convertible Preference Shares (and the granting of rights to acquire such shares) if the shareholders have delegated the authority to issue these shares (and these rights) to the Managing Board. The current authority of the Managing Board to restrict or exclude pre-emption rights is limited in accordance with the authorization to issue shares (and rights) up to an overall maximum of 10% of the issued capital of Holding in issue as at 27 April 2006. This authority will terminate on 31 October 2007 unless extended by the General Meeting of Shareholders of Holding in accordance with the Articles of Association, in each instance for a period not exceeding five years. At the 2007 annual General Meeting of Shareholders of Holding, the shareholders will be requested to renew the current authority to issue shares for a period of 18 months starting on 27 April 2007, and in the aggregate amount equal to 10% of the issued capital of Holding as of 26 April 2007.

Acquisition by the Holding of its Own Shares

Holding may acquire fully paid-up shares of any class of its capital for a consideration, subject to certain provisions of Dutch law and the Articles of Association, if: (1) shareholders' equity less the payment required to make the acquisition does not fall below the sum of paid-up capital and any reserves required by Dutch law or the Articles of Association and (2) Holding and its subsidiaries would thereafter not hold shares with an aggregate nominal value exceeding one-tenth of Holding's issued share capital. Any shares held by the Holding in its own capital may not be voted.

An acquisition by Holding of fully paid-up shares of any class of its capital for a consideration may be effected by the Managing Board, subject to the approval of the Supervisory Board. Such acquisitions by Holding of shares in its own capital require the general meeting of shareholders of Holding to grant the Managing Board the authority to effect such acquisitions. This authority may apply for a maximum period of 18 months and must specify the number of shares that may be acquired, the manner in which the shares may be acquired and the price limits within which shares may be acquired. At the 2007 annual General Meeting of Shareholders of Holding, the shareholders will be requested to renew the current authority for a period of 18 months starting on 27 April 2007. On 27 April 2006, the Annual General Meeting of Shareholders granted this authority to the Managing Board for a period of 18 months. Under this authorization, the maximum number of shares that can be acquired cannot exceed the maximum amount authorized by law (currently 10%) of the issued share capital at the time of acquisition. No authority is required for the acquisition by Holding of shares in its own capital for the purpose of transferring the shares to employees of Holding or any subsidiary thereof pursuant to any arrangements applicable to such employees, provided that the shares are included in the price list of a stock exchange.

Capital Reduction

Upon a proposal of the Managing Board, subject to the approval of the Supervisory Board, the general meeting of shareholders of Holding may resolve to reduce the issued share capital of Holding by a cancellation of shares or by a reduction of the nominal amount of the shares by amendment of the Articles of Association. The resolution of the General Meeting of Shareholders requires a majority of at least two-thirds of the votes cast if less than half of the issued share capital is present or represented at the meeting. A resolution to cancel may only relate to shares held by Holding or with due observance of the provisions of Book 2 of the Netherlands Civil Code to all shares of a class. In addition to the approval of the General Meeting of Shareholders, any reduction in the share capital of Holding also requires the prior or simultaneous approval of each class of shares to which the capital reduction relates.

The Articles of Association provide for the conditional cancellation of the Preference Shares issued pursuant to the resolution passed by the Extraordinary General Meeting of Shareholders on 25 August 2004.

Liquidation Rights

In the event of the dissolution and liquidation of Holding, the assets remaining after payment of all debts are to be distributed first, to the holders of the Preference Shares and the Convertible Preference Shares on a *pro rata* basis, in an amount equal to all dividends accrued from the beginning of the most recent full financial year through to the date of payment, and then the nominal amount of the Preference Shares or the amount paid in on the Convertible Preference Shares, respectively, and second, to the holders of Ordinary Shares on a *pro rata* basis.

C. Material Contracts

On 2 January 2006, we increased our interest in Banca Antonveneta to 55.8% following the purchase of 79.9 million shares of Banca Antonveneta from Banca Popolare Italiana pursuant to a share purchase agreement, a summary of which has been filed as an exhibit to our annual report on Form 20-F for the year ended 31 December 2005. See "Item 4. Information on the Company - A. History and development of the company - Selected recent acquisitions and dispositions." Following a public offering and the exercise of our right under Italian law to acquire minority share holdings, we now own 100% of the outstanding share capital of Antonveneta.

D. Exchange Controls

There are no limitations under the laws of the Netherlands or in the Articles of Association of Holding, as currently in effect, on the rights of non-residents or foreign owners, as such, to hold or vote Ordinary Shares. However, a declaration of no-objection from the Dutch Central Bank (or the Dutch Minister of Finance) is required for any person

or entity, irrespective of residence, to hold 10% or more of the issued share capital or voting rights in Holding. In addition, certain notification requirements apply to shareholders exceeding or falling below such levels. Moreover, pursuant to the new Dutch Financial Supervision Act a holder is required to disclose its holding if the percentage of its interest is within a certain range. See “Item 7 Major Shareholders and Related Party Transactions - A. Major Shareholders”.

There are currently no exchange controls in effect in the Netherlands, although the Dutch External Financial Relations Act of 25 March 1994 does authorize the Minister of Finance or the Dutch Central Bank to issue such regulations. Cash dividends payable in Euros and stock dividends on Netherlands registered shares and bearer shares

may be transferred from the Netherlands and converted into any other currency without Dutch legal restrictions. For statistical purposes, the sum of such payments and transactions are reported by us to the Dutch Central Bank.

There are currently no other limitations under Dutch law affecting the remittance of dividends or other payments to non-resident holders of Holding securities, other than those imposed by the EU and/or, as the case may be, Dutch sanctions.

E. Taxation

The following is a summary of the material Dutch tax and US federal income tax consequences to US Shareholders, as defined below, of purchasing, owning and disposing of Ordinary Shares or American Depositary Shares of Holding but it does not purport to be a comprehensive description of all the tax considerations that may be relevant to a particular person's decision to acquire such securities. The descriptions of the Dutch tax laws and US federal income tax laws and practices set forth below are based on the statutes, treaties, regulations, proposed regulations, rulings, judicial decisions and other authorities as of the date hereof, all of which are subject to change, retroactively as well as prospectively.

For purposes of this summary, a "Shareholder" is a beneficial owner of Ordinary Shares or American Depositary Shares that does not own a "substantial interest" or a "deemed substantial interest" in Holding. The circumstances under which a "substantial interest" exists include where a holder alone or together with his/her spouse, or any other of their close relatives holds/hold at least 5% of the issued share capital, at least 5% of any class of shares or options giving the right to acquire at least 5% of the issued share capital or any class of shares of Holding. For purposes of this summary, a "US Shareholder" is a beneficial owner of Ordinary Shares or American Depositary Shares that is, for US federal income tax purposes, (i) a citizen or resident of the United States, (ii) a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or any political subdivision thereof, or (iii) an estate or trust the income of which is subject to US federal income taxation regardless of its source.

Dutch taxation

In general, for Dutch tax purposes, beneficial owners of American Depositary Shares will be treated as the beneficial owners of the Ordinary Shares represented by such American Depositary Shares.

Withholding tax on dividends

The Netherlands imposes a withholding tax on any distribution of dividends at a statutory rate of 25% (as of 1 January 2007 15%), which does not apply to any distribution of stock dividends paid out of the share premium account of Holding recognized as such for Dutch tax purposes.

Under certain circumstances, Holding may, with respect to certain dividends received from qualifying non-Dutch subsidiaries, credit taxes withheld from those dividends against Dutch withholding tax imposed on a dividend paid by Holding, up to a maximum of the lesser of (i) 3% of the portion of the gross amount of the dividend paid by Holding that is subject to withholding and (ii) 3% of the gross amount of the dividends received from qualifying non-Dutch subsidiaries. The credit in respect of the non-Dutch withholding taxes reduces the amount of dividend withholding tax that Holding is required to pay to the Dutch tax authorities but does not reduce the amount of tax Holding is required to withhold from dividends paid to US Shareholders.

An individual or corporation not resident in the Netherlands which owns or is deemed to own Ordinary Shares or American Depositary Shares may be eligible for a (partial) exemption or refund of the above withholding tax under a tax convention which is in effect between the country of residence of such individual or corporation and the Netherlands. In order to qualify for the withholding tax reduction or exemption, a Shareholder will be required to

provide certain documentation establishing its status as a resident of a country with which the Netherlands has concluded a tax convention.

The current convention between the Netherlands and the United States for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income, which is known as the 1992 Treaty, became effective as of 1 January 1994.

A US Shareholder can only claim the benefits of the 1992 Treaty if such person is a resident of the United States, as defined in the 1992 Treaty, and such person's entitlement to such benefits is not limited by the limitation on

benefits provisions of Article 26 of the 1992 Treaty (treaty shopping rules). Under the 1992 Treaty, dividends paid by Holding to a portfolio investor (US shareholder holding less than 10% of the voting powers of Holding) are generally eligible for a reduction of the 25% withholding tax to 15%, provided that such US Shareholder does not carry on a business in the Netherlands through a permanent establishment or permanent representative (other than an independent broker acting in the ordinary course of its business) to which or to whom the Ordinary Shares or American Depositary Shares are attributable. If and to the extent the Ordinary Shares or American Depositary Shares are attributable to such permanent establishment or permanent representative, Dutch withholding tax will, depending on the particular circumstances, apply at a rate of 25%, which may be creditable against Dutch Corporation Tax due.

It should be noted that as of 1 January 2007 the domestic dividend withholding tax rate is decreased from 25% to 15%. The new rate equals the 1992 Tax Treaty rate (in general) so US Shareholders will not need to file requests and documents in order to obtain a (partial) exemption or refund anymore.

Taxes on Income and capital gains

A Shareholder will not be subject to Dutch taxes on income or capital gains derived from Ordinary Shares or American Depositary Shares, provided that:

- such holder is not a resident or a deemed resident of the Netherlands; or
- such holder does not have an enterprise or an interest in an enterprise, which carries on a business in the Netherlands through a permanent establishment or a permanent representative to which or to whom the Ordinary Shares or American Depositary Shares are attributable.

Gift, estate and inheritance tax

No gift, estate or inheritance tax is payable in the Netherlands on a gift of Ordinary Shares or American Depositary Shares by, or upon the death of, a Shareholder neither resident nor deemed resident in the Netherlands, unless such Shareholder has an enterprise or an interest in an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which or to whom the Ordinary Shares or American Depositary Shares are attributable.

United States federal income taxation

The following discussion of material US federal income tax considerations applies only to US Shareholders who hold Ordinary Shares or American Depositary Shares as capital assets for US federal income tax purposes and it does not address special classes of holders, such as:

- certain financial institutions;
- insurance companies;
- dealers and certain traders in securities or foreign currencies;
- persons holding Ordinary Shares or American Depositary Shares as part of a hedge, straddle, conversion or other integrated transaction;
- persons whose functional currency for US federal income tax purposes is not the US dollar;
- partnerships or other entities classified as partnerships for US federal income tax purposes;

· persons liable for the alternative minimum tax;

· tax-exempt organizations;

· persons holding Ordinary Shares or American Depositary Shares that own or are deemed to own ten percent or more of Holding's voting stock; or

· persons who acquired Ordinary Shares or American Depositary Shares pursuant to the exercise of any employee stock option or otherwise as compensation.

This discussion is also partially based on representations by the Depositary and assumes that each obligation under the Deposit Agreement and any related agreement will be performed in accordance with its terms. A US Shareholder should consult its own tax adviser concerning the US federal, state, local and foreign tax consequences of purchasing, owning and disposing of Ordinary Shares or American Depositary Shares in its particular circumstances.

In general, if a US Shareholder owns American Depositary Shares, it will be treated as the owner of the underlying Ordinary Shares represented by those American Depositary Shares for US federal income tax purposes. Accordingly, no gain or loss will be recognized if a US Shareholder exchanges American Depositary Shares for the underlying Ordinary Shares represented by those American Depositary Shares.

The US Treasury has expressed concerns that parties to whom American depositary shares are pre-released may be taking actions that are inconsistent with the claiming of foreign tax credits for US holders of American depositary shares. Such actions would also be inconsistent with the claiming of the reduced rate of tax applicable to dividends received by certain non-corporate US holders. Accordingly, the analysis of the creditability of Dutch taxes and the availability of the reduced tax rates for dividends received by certain non-corporate US Shareholders, each described below, could be affected by actions that may be taken by parties to whom American Depositary Shares are pre-released.

This discussion assumes that Holding will not be considered a passive foreign investment company. See “—Passive foreign investment company rules” below.

Taxation of distributions

Distributions paid on Ordinary Shares or American Depositary Shares (other than certain *pro rata* distributions of Ordinary Shares) will constitute foreign-source dividend income to the extent paid out of Holding’s current or accumulated earnings and profits as determined under US federal income tax principles. The amount of this dividend will include any amounts withheld in respect of Dutch taxes. Subject to applicable limitations that may vary depending upon a US Shareholder’s individual circumstances and the discussion above regarding concerns expressed by the US Treasury, dividends paid to certain non-corporate US Shareholders in taxable years beginning before 1 January 2011 will be taxable at a maximum tax rate of 15%. Non-corporate US Shareholders should consult their own tax advisers to determine whether they are subject to any special rules that limit the availability of these rates. Dividends will not be eligible for the dividends-received deduction generally allowed to corporate US Shareholders.

Dividends paid in Euros will be included in a US Shareholder’s income in a US dollar amount calculated by reference to the exchange rate in effect on the date of the US Shareholder’s (or in the case of American Depositary Shares, the Depositary’s) receipt of the dividend, regardless of whether the payment is in fact converted into US dollars. If the dividend is converted into US dollars on the date of receipt, the US Shareholder generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. A US Shareholder may have foreign currency gains or losses if the amount of such dividend is not converted into US dollars on the date of its receipt.

Dutch taxes withheld from dividends on Ordinary Shares or American Depositary Shares not exceeding the rate provided in the 1992 Treaty will generally be creditable against a US Shareholder’s US federal income tax liability, subject to applicable restrictions and limitations that may vary depending upon the US Shareholder’s circumstances and the discussion above regarding concerns expressed by the US Treasury. However, the Dutch withholding tax will not be creditable against the US Shareholder’s US federal income tax liability to the extent that Holding is allowed to reduce the amount of dividend withholding tax paid over to the Dutch tax authorities by crediting non-Dutch withholding tax imposed on certain dividends previously paid to Holding. See “—Dutch taxation—Withholding tax on dividends” above for a discussion of circumstances in which Holding may credit non-Dutch withholding tax against Dutch withholding tax imposed on a dividend paid by Holding. Upon request, Holding will endeavor to provide to its US Shareholders information regarding the extent to which the Dutch withholding tax on US Shareholders’ dividends may be affected by the foregoing.

The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. The rules governing foreign tax credits are complex and, therefore, a US shareholder should consult its own tax advisor regarding the availability of foreign tax credits in its particular circumstances. Instead of claiming a credit, a

US Shareholder may, at its election, deduct Dutch withholding taxes in computing taxable income, subject to generally applicable limitations under US law.

Sale or other disposition of Ordinary Shares or American Depositary Shares

For US federal income tax purposes, gain or loss realized on the sale or other disposition of Ordinary Shares or American Depositary Shares will be capital gain or loss, and will be long-term capital gain or loss if the US

Shareholder held the Ordinary Shares or American Depositary Shares for more than one year. The amount of a US Shareholder's gain or loss will be equal to the difference between the amount realized on the sale or other disposition and its tax basis in the Ordinary Shares or American Depositary Shares disposed of, determined in US dollars. Such gain or loss will generally be US-source gain or loss for foreign tax credit purposes.

Passive foreign investment company rules

Based upon certain management estimates and proposed Treasury regulations, which are proposed to be effective generally for taxable years beginning after 31 December 1994, Holding does not believe it was a passive foreign investment company for the 2006 taxable year. If Holding were a passive foreign investment company for any taxable year, certain adverse tax consequences could apply to US Shareholders.

Information reporting and backup withholding

Payments of dividends and sales proceeds that are made within the United States or through certain US-related financial intermediaries generally are subject to information reporting and to backup withholding unless the US Shareholder is a corporation or other exempt recipient, or in the case of backup withholding, provides a correct taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred.

The amount of any backup withholding from a payment to a US Shareholder will be allowed as a credit against the US Shareholder's US federal income tax liability and may entitle the US Shareholder to a refund, provided that the required information is furnished to the Internal Revenue Service.

Item 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

ABN AMRO uses a comprehensive and robust risk management framework to ensure all risks are identified, managed and controlled. The following two sections detail the risk management practices employed by the bank in the wider context of the relationship between risk, capital and earnings.

Risk and the Capital Framework

The strategic objectives set by the Managing Board determine ABN AMRO's risk appetite, being one of the inputs for our capital planning and performance management. Risk appetite is the maximum risk ABN AMRO is willing to accept in executing its chosen business strategy, to protect itself against events that may have an adverse impact on its profitability, capital base or share price.

Risks are being managed within the Group by using limits or checkpoints set across the dimensions of capital, earnings volatility and concentration risk, constrained by the maximum risk appetite defined. Capital forms the buffer to absorb losses arising from the risks the bank is exposed to. Therefore risk is an essential element in the Capital Framework.

The Group's Capital Framework is founded on ABN AMRO's strategic objectives, which determine the Group's risk appetite, capital planning and performance management. Risk appetite is amongst others expressed and quantified in terms of economic capital. Economic capital represents ABN AMRO's internal requirement for capital. Economic capital and assigned risk capital, the amount of capital allocated to the BUs, are explained in more detail in the Capital measurement paragraph, starting on the next page.

The Group's risk appetite, capital planning and performance management form the basis for the process of:

- Capital measurement: the measurement of risk resulting in an estimate of the requirement for capital;
- Capital allocation: the allocation of capital to the separate BUs; and
- Capital management: the management of the supply of capital versus the demand for capital.

This process is supported by governance and control.

The design of the Capital Framework is illustrated below.

In this way, ABN AMRO can quantify overall risk appetite at Group level, subsequently cascade this risk appetite, in the form of assigned risk capital, down into each BU and therefore measure performance and manage its risk levels consistently across each BU.

The process aims at allocating resources dynamically to those businesses that provide superior returns on assigned risk capital, so that total return to shareholders is optimised given the set level of risk appetite. Apart from managing assigned risk capital, ABN AMRO must also manage the regulatory capital requirements.

Risk-weighted assets are managed in a complementary fashion through the Capital Framework, with risk-weighted assets limits being allocated to each BU alongside assigned risk capital.

In terms of the Basel II Capital Accord, Pillar 1 and Pillar 2 capital requirements will be managed through the Capital Framework.

Please refer to Note 40 to our consolidated financial statements for an overview of the regulatory capital amounts and ratios.

Capital measurement

The capital that is measured in ABN AMRO is both the internal demand for capital (economic capital) as well as the regulatory capital (risk-weighted assets).

Economic capital is a measure of risk that indicates how much capital ABN AMRO should maintain to sustain unexpected losses with a high degree of certainty, given the exposures of the bank. ABN AMRO uses a confidence level of 99.95% in these calculations.

Economic capital is calculated for the following risks:

- Credit Risk and Country Event Risk (including equity stakes and private equity exposures);
- Interest Rate Risk (banking book positions);
- Market Risk of trading book positions;
- Operational Risk; and
- Business Risk.

As ABN AMRO is active in many locations in the world and is involved in many different business activities, regional and industry diversification as well as the diversification between different risk types is taken into account in calculating economic capital. ABN AMRO calculates economic capital using its own internally developed methodology. Assigned risk capital comprises economic capital for the above-mentioned five risk types (currently approximately 80% of assigned risk capital) and an add-on for other risks.

The assigned risk capital per risk type is visualised in the graph below.

We note that a comparison of ABN AMRO economic capital and/or assigned risk capital with that of other financial institutions is hampered by the fact that banks use a wide variety of definitions, model coverage and underlying assumptions. Concepts based on statistical methods, including economic capital and assigned risk capital, by definition have limitations.

ABN AMRO is currently developing and implementing its Basel II infrastructure. As a result, our economic capital and assigned risk capital models may change due to improvements in our ability to measure risks.

Currently, risk-weighted assets are calculated under the Basel I capital regime. During 2007, both Basel I and Basel II risk-weighted assets will be calculated as a part of an internal parallel run. As of 2008, ABN AMRO aims to implement the advanced approaches for all risk types under Basel II, Pillar 1.

Capital allocation

Capital within ABN AMRO is recognised and valued as a scarce resource, and is allocated centrally by the Group in line with its business strategy.

Capital allocation is embedded in the Strategic Management Process, an all-encompassing management tool that incorporates goal setting, strategy development, resource allocation and performance measurement. The underlying objective of this process is to ensure that capital is allocated in a manner that maximises value creation from a Group perspective within the constraints of ABN AMRO's overall risk appetite.

In recognition of the diverse markets and geographic locations in which ABN AMRO operates, this top-down approach includes a complementary bottom-up process, with input from the BUs, to ensure value-creating opportunities are identified and appropriately addressed.

The result from this process is the allocation of budgets to the BUs for assigned risk capital and for risk-weighted assets. The target returns on assigned risk capital are based on the Group-wide return on equity (ROE) target.

For the assessment of the performance of the BUs, Economic Value is applied as a metric.

Economic Value is the net present value of the cumulative economic profit, which is essentially net profit adjusted for a charge on assigned risk capital and goodwill.

Economic profit is measured on a quarterly basis to ensure that capital allocated is generating the desired returns, and to benchmark the performance of the business against those of internal and external peers. The assigned risk capital per BU is visualised in the graph below.

Capital management

Capital management aims to ensure that there is sufficient capital to meet the capital requirements of the bank as determined by the underlying business strategy.

Capital is managed within ABN AMRO through a centralised Capital Management function within Group Asset and Liability Management, which seeks to:

- Actively manage the supply of capital for the bank in order to reduce capital costs and increase capital velocity;
- Increase strategic and tactical flexibility in the deployment of capital to allow for the timely reallocation of capital; and
- Improve the liquidity of the bank's assets to allow for an optimal deployment of the bank's resources.

The integration of Capital Management and Asset and Liability Management allows a single centralised function within ABN AMRO to take a holistic view of the capital supply and demand equation, and initiate appropriate actions as required.

Structure

The processes described in the previous paragraphs are integrated in order to create a framework to optimally support the usage and allocation of capital, both assigned risk capital and risk-weighted assets, within ABN AMRO.

Capital measurement

The Group Risk Committee and Group Asset and Liability Committee determine the risk policies, procedures and methodologies for measuring and monitoring risk. The departments within Group Risk Management and Group Asset and Liability Management have an overall responsibility to monitor the adherence to all risk policies. The BUs, however, are responsible for operating in compliance with the risk philosophy as described in the following section.

Capital allocation

The Strategic Management Process is governed by the Resource Allocation and Performance Management Committee of the Managing Board, which advises the Managing Board and BUs on optimising economic value creation, the approval of performance targets, the allocation of resources and the agreement of performance contracts with the BUs.

Capital management

The Capital management process is governed by the Group Asset and Liability Committee.

The Group Asset and Liability Committee is responsible for the development of the bank's policies on Liquidity Risk, the hedging of capital invested in countries, managing capital ratios and the total capital requirement and new equity issuance needs.

Risk coverage - scope of the Capital Framework

Risk philosophy

ABN AMRO's risk philosophy sets out bank-wide criteria for the acceptance, monitoring, control and management of risk. Its purpose is to create shareholder value by ensuring the bank adheres to the following concepts:

- Risk awareness

Risks are identified, understood, and measured at all levels in the organisation.

- Defined risk appetite

Risk accepted by the institution is within the tolerance level set by the Managing Board in accordance with the Group strategy, existing capital constraints, sustainable earnings and maintenance of desired credit rating for the bank.

- Clarity and transparency

Risk decisions are clear, explicit, and consistent with strategic business objectives.

- Risk-reward alignment

One of the bank's core competencies is to take and manage risks. The bank's risk decisions should be based upon the appropriate risk-reward balance.

- Compliance

Decisions that may legally and morally commit the bank must be in compliance with internal approval procedures, the relevant regulations, and ABN AMRO's Corporate Values and Business Principles.

In the following paragraphs a description is given of the way we measure and manage the distinct risk types within ABN AMRO.

Credit Risk and Country Event Risk

We define Credit Risk as the risk of a loss because a counterparty or an issuer may fail to fulfil its obligations to the bank. This covers actual payment defaults as well as losses in value resulting from a decrease in the credit quality of the counterparty or issuer.

Country Event Risk is the risk that a certain event in a country triggers a payment problem for a large number of corporates and/or banks in that country that would otherwise not have been in financial difficulty. Therefore, the integrated approach of Credit Risk and Country Event Risk reflects the risk that the counterparty may default whether by reasons specific to that counterparty or as a result of country events.

Management

We manage Credit Risk and Country Event Risk in two dimensions:

- At portfolio level to manage concentrations at the following levels:

- Country/region level
- Industry level
- Product or segment level

- At individual level for single event / single obligor.

To manage concentration risks, limits and/or checkpoints are set on the maximum Credit and Country Event Risk Economic Capital in the relevant countries, industry clusters or product segments.

The concentration in industry clusters is visualised in the graph below.

159

Additionally, notional limits are put in place for Cross-Border Risk and Sovereign Risk. Notional limits are also set on a number of portfolios as a straightforward and practical way to manage the maximum exposure in these portfolios (e.g. commercial real estate, leveraged finance).

Individually, single event/single obligor limits are set:

- Single obligor risk is managed by setting limits on Loss at Default. Loss at Default is the amount that the bank expects to lose when a counterparty defaults.
- Authorities for credit decisions involving commercial clients are primarily based on Global One Obligor Exposure. This is the combination of all direct and contingent credit limits to a given relationship globally.

Measurement

Inputs to the Economic Capital calculation are derived from our rating systems. Rating tools are available for all our major loan portfolios. They consist of a Uniform Counterparty Rating and a Loss Given Default classification. The Uniform Counterparty Rating reflects the estimated probability that the counterparty will default, while the Loss Given Default classification reflects the level of loss that we would expect to suffer on a facility if the counterparty

defaults. The Loss Given Default classification is determined for each facility on the basis of seniority, collateral and an assessment of the legal environment.

There are lending programmes in place for standard loans granted to consumers and small-sized enterprises. A programme lending approach contains standard risk acceptance criteria and loan processing practices in order to optimise the efficiency and risk/rewards of those portfolios.

Please refer to Note 39 to our consolidated financial statements for quantitative information on maximum credit exposure and credit risk concentrations from loans and receivables in commercial and consumer client segments.

Interest Rate Risk (banking book)

We define Interest Rate Risk as the risk that the value of ABN AMRO's financial assets, other than those categorised as trading assets (the banking book), decreases and/or that the value of the bank's liabilities increases, because of changes in interest rates. Interest Rate Risk arises primarily from the fact that the maturity of the bank's assets typically exceeds the maturity of the bank's liabilities (a 'maturity mismatch'). The interest rate sensitivity of our trading books is measured under Market Risk.

Management

The overall objective is to manage current and future earnings sensitivity due to interest rate risk exposure.

For the purposes of economic capital, Value at Risk is calculated on the overall Interest Rate Risk position. Value at Risk is a statistical measure that represents an estimate of the worst-case loss due to adverse changes in risk factors, over a specific time horizon and at a specific level of confidence. However, the ongoing management of Interest Rate Risk goes further than simply looking at the overall Value at Risk, as using this measure only does not lead to an optimal management of the Interest Rate Risk exposures in the banking book.

Measurement

Several tools are used to monitor and limit the Interest Rate Risk exposures in our banking book. The methods employed include earnings simulation, duration and presentvalue per base point limits.

ABN AMRO uses estimation techniques to calculate a set of forward-looking pre-defined interest rate scenarios, such as movements in the yield curve level and shape. In combination with balance sheet simulation models the bank calculates earnings at risk and the change in value of equity. ABN AMRO's position is managed to ensure these two metrics are within defined limits under the pre-defined scenarios. Any required corrective action is taken through steering actions relating to the underlying portfolio.

These model-based scenario analyses require assumptions about client behaviour. The bank uses statistical and mathematical models to express this behaviour in our simulation.

For Interest Rate Risk positions that are less complex, the risk is controlled by (bucketed) present value per base point limits.

Market Risk

We define Market Risk as the risk that movements in financial market prices will decrease the value of our trading portfolios. We are exposed to Market Risk through our trading activities, which are carried out both for customers and on a proprietary basis. For trading related to customer facilitation we warehouse Market Risk, while for proprietary

trading we actively position ourselves in the financial markets.

There are several major sources of Market Risk including interest rate, foreign exchange, equity price, commodity price, credit spread, volatility risks and correlation risks.

Management

In any trading activity, Market Risk arises both from open (unhedged) positions and from imperfect correlation between market positions that are intended to offset one another. The overall objective of managing Market Risk is

to avoid unexpected losses due to changes in market prices and to optimise the use of market risk capital. ABN AMRO manages Market Risk primarily through the use of a set of historical and hypothetical scenarios, stressing relevant risk factors and estimating the potential profit and loss under stress, as well as through the calculation of the 99 percentile loss (or Value at Risk) on open positions.

The bank then looks to manage these potential exposures on a daily basis within pre-defined limits for each of the major types of Market Risk.

This quantitative approach, combined with qualitative analytical approaches, is designed to control ABN AMRO's exposure to movements in the financial markets.

Other control measures used in the Market Risk management process include limits on net open positions in terms of their sensitivities to changes in interest rate, credit spreads, volatilities and so on. Alongside these sensitivities, ABN AMRO also monitors position concentrations and position ageing. These non-statistical measures help to monitor and control Liquidity Risk in trading books.

Measurement

The Value at Risk is reported on a daily basis per trading portfolio, per product line and for the Group as a whole. It is reported daily to the senior management of the BUs, Group Risk Management and the responsible members of the Managing Board. Please refer to Note 39 to our consolidated financial statements for the quantification of Value at Risk per risk category.

Although the Value at Risk represents a good estimate of potential losses under normal market circumstances, it fails to capture 'one-off' events. This limitation of Value at Risk models means that we must supplement it with other measurements of risk. These include a series of stress scenarios that shed light on the behaviour of our portfolio and the impact on our financial results under extreme market movements. Stress scenarios have been developed internally to reflect specific characteristics of the bank's portfolios and are performed on a daily basis for each trading portfolio and at several aggregation levels. These stress scenarios include stepped movements in one or more risk factors (e.g. parallel shifts in interest rate curves) and multiple factor tests that are based on actual historical events or plausible hypothetical scenarios.

Operational Risk

Operational Risk is the risk of loss resulting from inadequate or failed internal processes and/or systems, human behaviour or external events. This risk includes Operational Risk events such as IT problems, shortcomings in the organisational structure, missing or inadequate internal controls, human error, fraud, and external threats.

Management

The guiding principle in Operational Risk Management is that management at all levels in the organisation is responsible for directing and managing operational risks. Operational Risk Management officers are assigned throughout ABN AMRO to assist line management in fulfilling this responsibility.

Measurement

Line management needs information to enable it to identify and analyse Operational Risk, implement mitigating measures and determine the effectiveness of these mitigating measures. ABN AMRO has implemented a number of programmes and tools to support line management. These include:

- Risk Self-Assessment

A structured approach that helps line management to identify and assess risks and take mitigating actions for risks which are identified as unacceptable. Risks are assessed with the assistance of facilitators, who are usually Operational Risk Management staff.

- Internal and external loss data

Our Corporate Loss Database allows for the systematic registration of our Operational Risk losses. This

tool assists senior management in their analysis of Operational Risk. The use of internal loss data is one of the qualifying criteria for the Advanced Measurement Approaches under Basel II, and forms the basis for calculating economic capital and regulatory capital under Basel II. Additionally, external loss data is used to perform benchmark analyses. In this context, we are a founding member of the Operational Risk eXchange, an international data consortium.

- Operational Risk Assessment Process

The Operational Risk Assessment Process is a comprehensive approval process that includes an explicit assessment of the operational risk associated with change, whether it is a new business proposal, a change to the organisation, the implementation of a system or some other change. The process includes sign-off by relevant parties (including Group Compliance, Group Legal and Group Finance) and approval by an appropriate committee.

- Key Risk Indicators

Key Risk Indicators are used to indicate possible changes in the Operational Risk profile. They allow for a trend analysis over time and trigger actions if required.

- Key Operational Risk Control

A framework that provides clear descriptions of typical key risks and the required controls for a set of defined standard processes. These descriptions contribute to improved risk awareness and provide input for the Risk Self-Assessment.

Business Risk

Business Risk is the risk that operating income is lower than expected because of lower than expected revenues (e.g. lower margins, lower market share, market downturn) or higher than expected costs, not being caused by one of the other risk types.

Management

Business Risk is driven by the volatility of the revenue stream and the extent to which costs are fixed or vary with revenues. For this reason, Business Risk is managed through the regular business processes. Operational leverage (fixed costs as a percentage of total costs) is part of the regular cost management function.

Business Risk can be reduced either by increasing variable cost or decreasing revenue volatility. Operational leverage can be increased at all levels in the organisation. Volatility is endemic to any business, however, and can only be influenced by changing the business mix. As a consequence, volatility will primarily be managed at BU level or Group level.

Measurement

The Value at Risk model that the bank has developed to measure Business Risk has as its key factors the volatility of the revenues and the cost structure of the BU or activity.

Other risks

As described in the previous paragraphs, economic capital is calculated for Credit Risk and Country Event Risk, Interest Rate Risk (banking book), Market Risk, Operational Risk and Business Risk. There are a number of

additional risks ABN AMRO as a whole is exposed to and for which capital needs to be held. For some other risks we deem no additional capital is required to be held or we believe that the impact of such risks is already included in one of the risk types included in economic capital.

In the following paragraphs we describe some risks not explicitly covered by our economic capital models.

Liquidity Risk

Complementing the Capital Framework view, risk appetite is also expressed through the Liquidity Risk framework employed by ABN AMRO. This framework is used to manage Liquidity Risk.

Liquidity may be defined as a bank's ability to ensure the availability of funds to meet all on-balance sheet and off-balance sheet commitments at a reasonable price. Liquidity Risk can in turn be defined as the risk to earnings and capital arising from a bank's potential inability to meet its liabilities when they become due, without incurring unacceptable losses. Conversely, Liquidity Risk also manifests itself in the form of opportunity losses due to holding excess liquidity relative to liabilities.

Management

ABN AMRO takes a two-tiered approach to Liquidity Risk Management:

- **Going Concern Liquidity Management:** the management of the day-to-day liquidity position within specified parameters to ensure all liabilities can be met on a timely basis
- **Event Risk Liquidity Management:** ensuring that in the event of either a firm-specific or general market event, the bank is able to generate sufficient liquidity to withstand a short term liquidity crisis.

The overall Liquidity Risk is kept at such a level that ABN AMRO is able to resume its business after a specified crisis.

Event Risk Liquidity Management includes the following tools:

- **Stress test:** a quantitative analysis of the liquidity impact of several (market- and company-specific) liquidity crises.
- **Liquidity buffer:** mitigation of an event risk is achieved through the provision of standby liquidity in the form of unencumbered, Central Bank eligible collateral.
- **Contingency Funding Plan:** describes the steps and procedures taken in the event of a crisis. Contingency Funding Plans are in place at Group, BU and country level. Their effectiveness is tested with periodic dry-runs.

Measurement

The monitoring and control of Liquidity Risk on an ongoing basis includes:

- **Balance Sheet Ratio Analysis:** the relationship between the sub-components of the balance sheet at a given point in time indicating the underlying balance sheet liquidity.
- **Measurement of Cash Flow Gap:** the gap between expected cash inflows and outflows determined within a series of time brackets.
- **Diversification of Funding Schedule:** an analysis of funding sources broken down by customer, instrument and product.

Legal Risk

Legal Risk may be defined as the risk from failure to comply with statutory or regulatory obligations and from uncertainty due to legal actions or uncertainty in the applicability or interpretation of contracts, law or regulations.

Management

To maintain its strong reputation for integrity and sustainability, ABN AMRO needs to manage Legal Risk in a rigorous and consistent way across all its businesses requiring the involvement and oversight of the legal and the compliance function.

With this in mind, from the start of 2006 the bank made two significant changes to its legal function. The first

was the creation of a consolidated Group Legal function to oversee ABN AMRO's Legal Risk worldwide and act as a central reporting point for our teams of in-house lawyers. The second was a new Global Legal Mandate to help the business make the most effective use of the bank's legal resources.

The compliance function within ABN AMRO exercises independent oversight on behalf of senior management of core processes and related policies and procedures designed to ensure we conform with both the letter and spirit of industry-specific laws and regulations, thereby maintaining the bank's reputation. With effect from 1 January 2006, the Group Compliance organisation was restructured in order to align it further with ABN AMRO's new Group structure.

Measurement

Under the Capital Requirements Directive (Basel II) Operational Risk includes Legal Risk.

Reputational Risk

We define Reputational Risk as the risk of potential losses arising from negative public opinion, irrespective of whether this opinion is based on facts or merely public perception. The losses may result from incurring increased funding costs as well as from not generating expected revenues.

Management

We believe that our pursuit of long-term business sustainability and shareholder value creation requires proper conduct of our business activities in accordance with ABN AMRO's Corporate Values and Business Principles as well as with laws and regulations. A key component of risk management is ensuring that ABN AMRO's reputation is preserved and enhanced through choosing to engage responsibly in the right business activities with the right clients. Our philosophy is that the primary responsibility for applying sustainability criteria to business selection and approval processes rests with our client-facing staff. For this reason we have created tools to support our staff.

Apart from legal and compliance policies we have developed several reputational risk policies to identify, assess and manage the non-financial issues present within our business engagements. These policies and standards are referred to as Environmental, Social and Ethical Risk Management policies, and currently include: Human Rights, Forestry and Tree plantations, Oil & Gas, Mining & Metals, Dams, Defence industry, Tobacco, Gambling, and Animal Testing. Every policy contains client and transaction acceptance criteria, including appropriate filters. Such filters have been developed to assess whether an engagement could present potential environmental, social or ethical issues and thereby translate into Reputational Risk.

In applying this philosophy, we have developed an approach to policy development that is based on applicable international industry norms and conventions and that incorporates consultation with non governmental organisations, clients, peers and our client-facing staff.

For further information on our Reputational Risk and sustainability approach, please refer to our Sustainability Report for 2006, which can be viewed on our website at www.abnamro.com.

For additional qualitative as well quantitative information please refer to Note 39 to our consolidated financial statements.

Item 15. CONTROLS AND PROCEDURES

Management's report on internal control over financial reporting

Under Section 404 of The Sarbanes-Oxley Act of 2002, ABN AMRO is required to assess the effectiveness of its internal control over financial reporting as of 31 December 2006 and report, based on that assessment, whether ABN AMRO's internal controls over financial reporting are effective.

Management of ABN AMRO is responsible for establishing and maintaining adequate internal control over financial reporting for ABN AMRO as defined in Rule 13(a) - 15 (f) under the Securities Exchange Act of 1934, as amended.

ABN AMRO's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. For ABN AMRO generally accepted accounting principles refers to International Financial Reporting Standards as adopted by the European Union as well as the accounting principles generally accepted in the United States of America relating to the reconciliation between these two and the information presented in Note 50 to our consolidated financial statements relating to the nature and effect of such differences.

ABN AMRO's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of ABN AMRO and its consolidated entities; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of ABN AMRO are being made only in accordance with authorizations of management and directors of ABN AMRO; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of ABN AMRO's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ABN AMRO's management assessed the effectiveness of ABN AMRO's internal control over financial reporting as of 31 December 2006. In making this assessment, ABN AMRO used the criteria established by the Committee of Sponsoring Organisations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. ABN AMRO's assessment included documenting, evaluating and testing of the design and operating effectiveness of its internal control over financial reporting. Management of ABN AMRO reviewed the results of its assessment with the Supervisory Board and its Audit Committee.

Based on this assessment, management concluded that, as of 31 December 2006, ABN AMRO's internal control over financial reporting was effective.

Management's assessment of the effectiveness of ABN AMRO's internal control over financial reporting as of 31 December 2006 has been audited by Ernst & Young, an independent registered public accounting firm, as stated in

their report appearing hereafter.

Attestation report of independent registered public accounting firm

To the Supervisory Board and the Managing Board of ABN AMRO Holding N.V.

We have audited management's assessment, included in the Management's Report On Internal Control Over Financial Reporting on page 166 that ABN AMRO Holding N.V. maintained effective internal control over financial reporting as of 31 December 2006, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). ABN AMRO Holding N.V.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that ABN AMRO Holding N.V. maintained effective internal control over financial reporting as of 31 December 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, ABN AMRO Holding N.V. maintained, in all material respects, effective internal control over financial reporting as of 31 December 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated balance sheets of ABN AMRO Holding N.V. and subsidiaries as of 31 December 2006 and 2005, and the related consolidated statements of income, cash flows and changes in shareholders' equity for each of the three years in the period ended 31 December 2006 and our report dated 2 April 2007 expressed an unqualified opinion thereon.

Item 16. [RESERVED]**Item 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Please refer to “Item 6. Directors, Senior Management and Employees - C. Board Practices - Audit committee activities”.

Item 16B. CODE OF ETHICS

The standards of ethical conduct that ABN AMRO expects from its employees are set out in ABN AMRO’s Corporate Values and Business Principles. We believe the Business Principles address the standards necessary to comprise a code of ethics for the purposes of section 406 of the Sarbanes-Oxley Act.

The Business Principles are applicable to all our employees, including the Chairman of the Managing Board, the Chief Financial Officer and other senior financial officers. All employees are accountable for adhering to the Business Principles. Suspected violations of the Business Principles may be reported in accordance with ABN AMRO’s employee whistleblowing policy. The employee whistleblowing policy provides employees with clear and accessible channels for reporting suspected malpractice, including a direct channel to the Audit Committee of the Supervisory Board.

The Business Principles are accessible at www.abnamro.com. A copy of our Business Principles is also available upon request, free of charge, by writing or telephoning us at:

ABN AMRO, Investor Relations Department (HQ9141), P.O. Box 283 1000 EA Amsterdam, the Netherlands, Tel: +31 20 6287835.

Item 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Following is a summary of the fees to our independent external auditors for the years ended 31 December 2006, and 2005.

	2006	2005
	Actual Fees	Actual Fees (1)
	(in millions of EUR)	
Audit fees	44.8	30.9
Audit-related fees	6.0	3.1
Tax fees	3.7	1.9
All other fees	0.3	0.4
Total fees	54.8	36.3

(1) 2005 fees have been restated in order to disclose the fees of our principal auditor, Ernst&Young, where we previously disclosed the fees of both KPMG and Ernst&Young.

Audit related fees consist mainly of accounting consultation and audits in connection with acquisitions and disposals of businesses, review of internal controls and advice on accounting control policies and procedures, attest services not required by statute or regulation and consultation concerning financial accounting and reporting standards.

Tax fees consist of tax compliance, tax advice and tax planning services and assistance and advice related to tax audits and appeals.

Other fees are related to risk management and corporate finance advisory services, and other non-proscribed services.

The Audit Committee is responsible for pre-approving all audit, audit-related and permitted non-audit services provided by the external auditor. See “Item 6. Directors, Senior Management and Employees - C. Board practices - Supervisory Board”.

1 December 2006 to 31 December 2006	13,554,363	23.53	13,554,363	0
Total	95,899,360	22.98	95,899,360	-

(1) Most purchases were spread over all working days of the month.

ABN AMRO publicly announced several plans of buying back its own shares:

- Shares of a total amount of EUR 600 million to be bought back by 30 June 2006 was announced on 14 December 2005.
- Shares, issued in conjunction with the interim dividend 2006, to be repurchased by 31 December 2006, in order to neutralize the dilutive effect of the stock dividend. This was announced on 14 December 2005.
- Shares issued as a result of the exercise of staff options in 2006 to be repurchased by 31 December 2006. This was announced on 9 February 2006.
- Shares of a total amount of EUR 750 million to be repurchased as per 31 December 2006. This was announced on 15 August 2006.

The total amount of repurchased shares did not exceed 10% of ABN AMRO's issued capital.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Supervisory Board and the Managing Board of ABN AMRO Holding N.V.

We have audited the accompanying consolidated balance sheets of ABN AMRO Holding N.V. and subsidiaries as of 31 December 2006 and 2005, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended 31 December 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of ABN AMRO Holding N.V. and subsidiaries as at 31 December 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended 31 December 2006, in conformity with International Financial Reporting Standards as adopted by the European Union.

International Financial Reporting Standards as adopted by the European Union vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in note 50 to the consolidated financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States of America), the effectiveness of ABN AMRO Holding N.V.'s internal control over financial reporting as of 31 December 2006, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated 2 April 2007 expressed an unqualified opinion thereon.

Corporate Information

ABN AMRO Holding N.V. is the ultimate parent company of the ABN AMRO consolidated group of companies (referred to as the 'Group' or 'ABN AMRO'). The Group provides a broad range of financial services on a worldwide basis, including consumer, commercial and investment banking.

At 1 January 2006, the Group changed its organisational structure, to align the organisation with the Group's mid-market strategy, and to open up its network offering and product suite to all its clients. The change to the organisational structure and the principal activities of the Group are described in more detail in note 1, Segment reporting.

ABN AMRO Holding N.V. is a public limited liability company, incorporated under Dutch law on 30 May 1990, whose registered office is Gustav Mahlerlaan 10, 1082 PP Amsterdam, the Netherlands. The Group is listed on the Stock Exchanges of Amsterdam and New York. As ordinary shares in ABN AMRO Holding N.V. are listed on the New York Stock Exchange (NYSE) in the form of American Depositary Receipts, ABN AMRO also publishes an annual report on Form 20-F that conforms to the rules of the Securities and Exchange Commission (SEC) applicable to foreign registrants. The annual report on Form 20-F includes a reconciliation of equity and profit attributable to shareholders of the parent company to the comparable amounts using accounting principles generally accepted in the United States (US GAAP).

The consolidated financial statements of the Group for the year ended 31 December 2006 incorporate figures of the parent, its controlled entities and interests in associates. The financial statements were signed and authorised for issue by the Supervisory Board and Managing Board on 14 March 2007 with the exception of Note 50. This Note was signed and authorised for issue by the Chairman of the Managing Board and the Chief Financial Officer, as part of this Annual Report on Form 20-F, on 2 April 2007. The articles of association of ABN AMRO do not give shareholders or others the power to amend the financial statements after issuance. However, the right to request an amendment of the financial statements is embedded in the Dutch Civil Code. Interested parties have the right to ask the Enterprise Chamber of the Amsterdam Court of Appeal for a revision of the financial statements.

Basis of preparation

ABN AMRO Group applies International Financial Reporting Standards (IFRS).

The consolidated financial statements are prepared on a mixed model valuation basis as follows:

- Fair value is used for: derivative financial instruments, financial assets and liabilities held for trading or designated as measured at fair value through income, and available-for-sale financial assets
- Other financial assets (including 'Loans and Receivables') and liabilities are valued at amortised cost
- The carrying value of assets and liabilities measured at amortised cost included in a fair value hedge relationship is adjusted with respect to fair value changes resulting from the hedged risk
- Non-financial assets and liabilities are generally stated at historical cost.

The Group adopted IFRS on 1 January 2004. For all periods up to and including the year ended 31 December 2004, the Group prepared consolidated financial statements in accordance with Generally Accepted Principles in the Netherlands (Dutch GAAP). The effect of the transition to IFRS, and the elections and exemptions which were used as part of the transition process, are disclosed in note 47, First-time adoption of IFRS.

The consolidated financial statements are presented in euros, which is the presentation currency of the Group, rounded to the nearest million (unless otherwise noted).

Certain amounts in the prior periods have been reclassified to conform to the current presentation.

Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU). The Group does not utilise the portfolio hedging 'carve out' permitted by the EU. Accordingly, the accounting policies applied by the Group comply fully with IFRS.

Critical accounting policies

The preparation of financial statements in conformity with IFRS requires management to make difficult, complex or subjective judgements and estimates, at times, regarding matters that are inherently uncertain. These judgements and estimates affect reported amounts and disclosures. Actual results could differ from those judgements and estimates. The most significant areas requiring management to make judgements and estimates that affect reported amounts and disclosures are as follows:

F-1

Allowance for loan losses

Allowances for loan losses are made to reserve for estimated losses in outstanding loans for which there is any doubt about the borrower's capacity to repay the principal and/or the interest. The allowance for loan losses is intended to adjust the value of the Group's loan assets for probable credit losses as of the balance sheet date. Allowances are determined through a combination of specific reviews, statistical modeling and estimates. Certain aspects require judgements, such as the identification of loans that are deteriorating, the determination of the probability of default, the expected loss, the value of collateral and current economic conditions. Though we consider the allowances for loan losses to be adequate, the use of different estimates and assumptions could produce different allowances for loan losses, and amendments to allowances may be required in the future, as a consequence of changes in the value of collateral, the amounts of cash to be received or other economic events. For a further discussion on our allowance for loan losses, see note 19 to our consolidated financial statements.

Fair value of financial instruments

For financial instruments that are actively traded and have quoted market prices or parameters readily available, there is little to no subjectivity to determine fair value. When observable market prices and parameters do not exist, management judgement is necessary to estimate fair value.

Where no active market exists, or quoted prices are unobtainable, the fair value is estimated using a variety of valuation techniques, including discounted cash flow and other pricing models. Input to pricing models are generally taken from reliable external data sources. The models used are validated prior to use by staff independent to the initial selection or creation of the model. The degree of management judgement involved in determining the fair value of a financial instrument is dependent upon the availability of quoted market prices or observable market parameters. Other factors that could affect estimates are incorrect model assumptions, market dislocations and unexpected correlation. We believe our estimates of fair value are adequate. However, the use of different models or assumptions could result in changes in our reported results. For a further discussion on the use of fair values and the impact of applying reasonable possible alternative assumptions as inputs, see note 38 to our consolidated financial statements.

Assessment of risk and rewards

When considering the recognition and derecognition of assets or liabilities, and the consolidation and deconsolidation of subsidiaries, the Group is required to use judgment in assessing risk and rewards. Although management uses its best knowledge of current events and actions in making assessments of risk and rewards, actual risks and rewards may ultimately differ.

Pension and post-retirement benefits

Significant pension and post-retirement benefit costs and credits are based on actuarial calculations. Inherent within these calculations are assumptions including: discount rates, salary increases and the expected return on plan assets. Changes in pension and post-retirement costs may occur in the future as a consequence of changes in interest rates, the return on assets or other factors. For a further discussion on the underlying assumptions, see note 28 to our consolidated financial statements.

Goodwill and intangible assets

Goodwill is not amortised but is subject to an annual test for impairment or more frequently if events or circumstances, such as adverse changes in the business climate, indicate that there may be justification for conducting an interim test. The initial recognition and measurement of goodwill and other intangibles, and subsequent impairment analysis, requires management to make subjective judgements concerning estimates of how the acquired asset will perform in the future using a discounted cash flow analysis. Additionally, estimated cash flows may extend beyond ten years and, by their nature, are difficult to determine over an extended timeframe. Events and factors that may significantly affect the estimates include, among others, competitive forces, customer behaviours and attrition, changes in revenue growth trends, cost structures and technology, and changes in discount rates and specific industry

or market sector conditions. Other intangibles are systematically amortised over their estimated useful lives, and are subject to impairment if events or circumstances indicate a possible inability to realise their carrying amount.

Basis of consolidation

The consolidated financial statements are prepared annually for the Group for the year ended 31 December and include the parent company and its controlled subsidiaries as well as joint ventures on a proportionate share basis. The financial statements of the subsidiaries are prepared for the same reporting year using consistent accounting policies.

Subsidiaries

Subsidiaries are those enterprises controlled by the Group. Control is deemed to exist when the Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The existence

F-2

and effect of potential voting rights that are presently exercisable or convertible are taken into account when assessing whether control exists. The Group sponsors the formation of entities, including certain special purpose entities, which may or may not be directly owned, for the purpose of asset securitisation transactions and other narrow and well-defined objectives. Particularly in the case of securitisations these entities may acquire assets from other Group companies. Some of these entities hold assets that are not available to meet the claims of creditors of the Group or any of its subsidiaries. Such entities are consolidated in the Group's financial statements when the substance of the relationship between the Group and the entity indicates that control is held by the Group.

The financial statements of subsidiaries and special purpose entities are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Equity attributable to minority interests is shown separately in the consolidated balance sheet as part of total equity and current period profit or loss attributable to minority interests are presented as an attribution of profit for the year.

Business combinations

IFRS 3 'Business combinations' was adopted for all business combinations that took place after 1 January 2004. Goodwill on acquisitions prior to this date was charged against equity. The cost of an acquisition is measured at the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition, plus costs directly attributable to the acquisition. The excess of the cost of acquisition over the Group's share of the fair value of the identifiable net assets (including certain contingent liabilities) acquired is recorded as goodwill.

In a step acquisition, where control is obtained in stages, all assets and liabilities of the acquired subsidiary, excluding goodwill, are adjusted to their fair values at the date of the latest share acquisition transaction. Fair value adjustments relating to existing holdings are recorded directly in equity.

As a consequence of measuring all the acquired assets and liabilities at fair value, minority interests are calculated by reference to these fair values.

Investments in associates

Associates are those enterprises in which the Group has significant influence (this is generally demonstrated when the Group holds between 20% and 50% of the voting rights), but not control, over the operating and financial policies.

If significant influence is held in a Private Equity portfolio the investment is designated to be held at fair value with changes through income, consistent with the management basis for such investments.

Other investments in which significant influence is held, including the Group's strategic investments, are accounted for using the 'Net equity method' and presented as 'Equity accounted investments'. Under this method the investment is initially recorded at cost and subsequently increased (or decreased) for post acquisition net income (or loss), other movements impacting the equity of the investee and any adjustments required for impairment. When the Group's share of losses exceeds the carrying amount of the investment, the carrying amount is reduced to zero, including any other unsecured receivables, and recognition of further losses is discontinued except to the extent that the Group has incurred obligations or made payments on behalf of the investee.

Jointly controlled entities

Jointly controlled entities are those enterprises over whose activities the Group has joint control, established by contractual agreement. The consolidated financial statements include the Group's proportionate share of these enterprises' assets, liabilities, equity, income and expenses on a line-by-line basis, from the date on which joint control commences until the date on which joint control ceases.

Non-current assets held for sale and discontinued operations

Non-current assets and/or businesses are classified as held for sale if their carrying amount is to be recovered principally through a sale transaction planned to occur within 12 months, rather than through continuing use. Held for sale assets are measured at the lower of their carrying amount and fair value less costs to sell. Assets and liabilities of a business held for sale are separately presented.

The results of discontinued operations (an operation that represents a separate major line of business or a geographical area of operation) are presented in the income statement as a single amount comprising the net profit and/or net loss of the discontinued operation and the after tax gain or loss realised on disposal. Comparative income statement data is re-presented if in the current

F-3

period an activity qualifies as discontinuing and qualifies for separate presentation.

F-4

Private equity

Investments of a private equity nature controlled by the Group are consolidated. All other investments of a private equity nature are designated at fair value through income.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any related unrealised gains, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in the enterprise. Unrealised losses are also eliminated unless the transaction provides evidence of impairment in the asset transferred.

Summary of significant accounting policies

Currency translation differences

The financial performance of the Group's foreign operations (conducted through branches, subsidiaries, associates and joint ventures) is reported using the currency ('functional currency') that best reflects the economic substance of the underlying events and circumstances relevant to that entity.

Transactions in a currency that differs from the functional currency of the transacting entity are translated into the functional currency at the foreign exchange rate at transaction date. Accruals and deferrals are translated using the foreign exchange rate on the last day of the month to which the results relate. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rate prevailing at the balance sheet date. Non-monetary assets and liabilities accounted for at cost, if denominated in foreign currency, are translated at the foreign exchange rate prevailing at the date of initial recognition.

Currency translation differences on all monetary financial assets and liabilities are included in foreign exchange gains and losses in income. Translation differences on non-monetary items (such as equities) held at fair value through income are also reported through income and, for those classified as available-for-sale, directly in equity within 'Net unrealised gains and losses on available-for-sale assets'.

The assets and liabilities of foreign operations, including goodwill and purchase accounting adjustments, are translated to the Group's presentation currency, the euro, at the foreign exchange rates prevailing at the balance sheet date. The income and expenses of foreign operations are translated to the euro at the rates prevailing at the end of the month. Currency translation differences arising on these translations are recognised directly in equity ('currency translation account'). Exchange differences recorded in equity, arising after transition to IFRS on 1 January 2004, are included in the income statement on disposal or partial disposal of the operation.

Fiduciary activities

The Group commonly acts as trustee and in other fiduciary capacities that entail either the holding or placing of assets on behalf of individuals, trusts or other institutions. These assets are not assets of the Group and are therefore not included in these financial statements.

Income statement

Interest income and expenses

Interest income and expense is recognised in the income statement using the effective interest rate method. The application of this method includes the amortisation of any discount or premium or other differences, including transaction costs and qualifying fees and commissions, between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. This item also includes interest income and expense in relation to trading balances.

Fee and commission income

Fees and commissions are recognised as follows:

- Fees and commissions generated as an integral part of negotiating and arranging a funding transaction with customers, such as the issuance of loans are included in the calculation of the effective interest rate and are included in interest income and expense
- Fees and commissions generated for transactions or discrete acts are recognised when the transaction or act is completed
- Fees and commissions dependent on the outcome of a particular event or contingent upon performance are recognised when the relevant criteria have been met
- Service fees are typically recognised on a straight-line basis over the service contract period; portfolio and other management advisory and service fees are recognised based on the applicable service contracts
- Asset management fees related to investment funds are also recognised over the period the service is provided. This principle is

F-5

also applied to the recognition of income from wealth management, financial planning and custody services that are provided over an extended period.

Net trading income

Net trading income includes gains and losses arising from changes in the fair value and disposal of financial assets and liabilities held for trading and includes dividends received from trading instruments. Interest income or expenses on trading assets or liabilities are included within interest income or expense.

Results from financial transactions

Results from financial transactions include gains and losses on the sale of non-trading financial assets and liabilities, ineffectiveness of certain hedging programmes, the change in fair value of derivatives used to hedge credit risks that are not included in hedge accounting relationships, fair value changes relating to assets and liabilities designated at fair value through income and changes in the value of any related derivatives. Dividend income from non-trading equity investments is recognised when entitlement is established.

Other operating income

Development property income is first recognised when the outcome of a construction contract can be estimated reliably after which contract income and expenses are recognised in the income statement in proportion to the stage of completion of the contract. The stage of completion is assessed by reference to the phases of work performed. An expected loss on a contract is recognised immediately in the income statement.

Rental income from investment property is recognised in the income statement on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income.

Income from insurance activities is presented net of direct costs and provisions required for the insured risk.

Earnings per share

Earnings per share is calculated by dividing the profit attributable to shareholders of the parent company from continuing and discontinuing operations by the average number of shares in issuance during the year. Fully diluted earnings per share is calculated taking into account all dilutive instruments, including options and employee share plans, in issuance at the balance sheet date.

Segment reporting

Business segments are the primary reporting segments and are grouped by the nature of risks and rewards assessed by reference to product and service characteristics. Geographical segments are grouped based on a combination of proximity, relationships between operations and economic and currency similarities. Geographical data is presented according to the location of the transacting Group entity.

Financial assets and liabilities

Measurement classifications

The Group classifies its financial assets and liabilities into the following measurement ('valuation') categories:

Financial instruments held for trading are those that the Group holds primarily for the purpose of short-term profit-taking. These include shares, interest earning securities, and liabilities from short sales of financial instruments.

Derivatives are financial instruments that require little or no initial net investment, with future settlements dependent on a reference benchmark index, rate or price (such as interest rates or equity prices). Changes in expected future cash flows in response to changes in the underlying benchmark determine the fair value of derivatives. All derivatives are recorded in the balance sheet at fair value. Changes in the fair value of derivative instruments are recorded in income, except when designated in cash flow or net investment hedge relationship (see hedging below).

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted on an active market. They generally arise when the Group provides money or services directly to a customer with no intention of trading or selling the loan.

Held-to-maturity assets are non-derivative financial assets quoted on an active market with fixed or determinable payments (i.e. debt instruments) and a fixed maturity that the Group has the intention and ability to hold to maturity.

F-6

Designated at fair value through income are financial assets and financial liabilities that the Group upon initial recognition (or on transition to IFRS on 1 January 2004) designates to be measured at fair value with changes reported in income. Such a designation is done if:

- The instrument includes an embedded derivative that would otherwise require separation. This applies to certain structured notes issued with hybrid features. Fair value measurement also helps to achieve offset against changes in the value of derivatives and other fair value positions used to economically hedge these notes.
- The designation eliminates or significantly reduce a measurement inconsistency that would otherwise arise. In this regard unit-linked investments held for the account and risk of policyholders and the related obligation to policyholders are designated at fair value with changes through income.
- It relates to a portfolio of financial assets and/or liabilities that are managed and evaluated on a fair value basis. This is applied to equity investments of a private equity nature and mortgages that are originated held for sale by our business in North America.

Available-for-sale assets include interest earning assets that have either been designated as available for sale or do not fit into one of the categories described above. Equity investments held without significant influence, which are not held for trading or elected to fair value through income are classified as available-for-sale.

Non-trading financial liabilities that are not designated at fair value through income are measured at amortised cost.

Recognition and derecognition

Traded instruments are recognised on trade date, defined as the date on which the Group commits to purchase or sell the underlying instrument. Where settlement terms are non-standard the commitment is accounted for as a derivative between trade and settlement date. Loans and receivables are recognised when they are acquired or funded by the Group and derecognised when settled. Issued debt is recognised when issued and deposits are recognised when the cash is deposited with the Group. Other financial assets and liabilities, including derivatives, are recognised in the balance sheet when the Group becomes party to the contractual provisions of the asset or liability.

Financial assets are generally derecognised when the Group loses control or the ability to obtain benefits over the contractual rights that comprise that asset. This occurs when the rights are realised, expire or are fully transferred. If a servicing function is retained, which is profitable, a servicing asset is recognised. A financial liability is derecognised when the obligations specified in the contract are discharged, are cancelled or expire.

Financial instruments continue to be recognised in the balance sheet, and a liability recognised for the proceeds of any related funding transaction, unless a fully proportional share of all or specifically identified cash flows are transferable to the lender without material delay and the lenders claim is limited to those cash flows, in which case that proportion of the asset is derecognised, or substantially all the risks and returns and control associated with the financial instruments have been transferred in which case the assets are derecognised in full.

The Group derecognises financial liabilities when settled or if the Group repurchases its own debt. The difference between the former carrying amount and the consideration paid is included in results on financial transactions in income. Any subsequent resale is treated as a new issuance.

The Group securitises various consumer and commercial financial assets. This process generally necessitates a sale of these assets to a special purpose entity (SPE), which in turn issues securities to investors. The Group's interests in securitised assets may be retained in the form of senior or subordinated tranches, issued guarantees, interest-only strips or other residual interests, together referred to as retained interest. In many cases these retained interests are significant, such that the SPE is consolidated, and the securitised assets continue to be recognised in the consolidated balance sheet.

Measurement

All trading instruments and financial assets and liabilities designated at fair value are measured at fair value, with transaction costs related to the purchase as well as fair value changes taken to income directly.

All derivatives are recorded in the balance sheet at fair value with changes recorded through income unless the derivative qualifies for cash flow hedging accounting.

Available-for-sale assets are held at fair value with unrealised gains and losses recognised directly in equity, net of applicable taxes. Premiums, discounts and qualifying transaction costs of interest earning available-for-sale assets are amortised to income on an effective interest rate basis. When available-for-sale assets are sold, collected or impaired the cumulative gain or loss recognised in equity is transferred to results from financial transactions in income.

F-7

All other financial assets and liabilities are initially measured at cost including directly attributable incremental transaction costs. They are subsequently valued at amortised cost using the effective interest rate method. Through use of the effective interest rate method, premiums and discounts, including qualifying transaction costs, included in the carrying amount of the related instrument are amortised over the period to maturity or expected prepayment on the basis of the instrument's original effective interest rate.

When available, fair values are obtained from quoted market prices in liquid markets. Where no active market exists, or quoted prices are unobtainable, the fair value is estimated using a variety of valuation techniques - including discounted cash flow and other pricing models. Inputs to pricing models are generally market-based when available and taken from reliable external data sources. The models used are validated prior to the use for financial reporting by staff independent of the initial selection or creation of the model. Where inputs cannot be reliably sourced from external providers, the initial recognition value of a financial asset or liability is taken to be the settled value at trade inception. The initial change in fair value indicated by the valuation technique is then released to income at appropriate points over the life of the instrument (typically taking account of the ability to obtain reliable external data, the passage of time and the use of offsetting transactions). Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate applied is a market-related rate at the balance sheet date for an instrument with similar terms and conditions. Fair values include appropriate adjustments to reflect the credit quality of the instrument.

Professional securities transactions

Securities borrowing and securities lending transactions are generally entered into on a collateralised basis, with securities usually advanced or received as collateral. The transfer of the securities themselves is not reflected on the balance sheet unless the risks and rewards of ownership are also transferred. If cash is advanced or received, securities borrowing and lending activities are recorded at the amount of cash advanced (included in loans and receivables) or received (due to banks or customers). The market value of the securities borrowed and lent is monitored on a daily basis, and the collateral levels are adjusted in accordance with the underlying transactions. Fees and interest received or paid are recognised on an effective interest basis and recorded as interest income or interest expense.

Sale and repurchase transactions involve purchases (sales) of investments with agreements to resell (repurchase) substantially identical investments at a certain date in the future at a fixed price. Investments purchased subject to commitments to resell them at future dates are not recognised. The amounts paid are recognised in loans and receivables to either banks or customers. The receivables are shown as collateralised by the underlying security. Investments sold under repurchase agreements continue to be recognised in the balance sheet. The proceeds from the sale of the investments are reported as liabilities to either banks or customers. The difference between the sale and repurchase price is recognised over the period of the transaction and recorded as interest income or interest expense.

Netting and collateral

The Group enters into master netting arrangements with counterparties wherever possible, and when appropriate, obtains collateral. If the Group has the right on the grounds of either legal or contractual provisions and the intention to settle financial assets and liabilities net or simultaneously, these are offset and the net amount is reported in the balance sheet. Due to differences in the timing of actual cash flows, derivatives with positive and negative fair values are generally not netted, even if they are held with the same counterparty.

Hedge accounting

The Group uses derivative instruments to manage exposures to interest rate, foreign currency and credit risks, including exposures arising from forecast transactions. The Group applies fair value, cash flow or net investment hedging to qualifying transactions that are documented as such at inception.

The hedged item can be an asset, liability, highly probable forecasted transaction or net investment in a foreign operation that (a) exposes the entity to risk of changes in fair value or future cash flows and (b) is designated as being

hedged. The risk being hedged (the 'hedged risk') is typically changes in interest rates or foreign currency rates. The Group also enters into credit risk derivatives (sometimes referred to as 'credit default swaps') for managing portfolio credit risk. However these are generally not included in hedge accounting relationships.

Both at the inception of the hedge and on an ongoing basis, the Group formally assesses whether the derivatives used in its hedging transactions have been highly effective in offsetting changes in the fair value or cash flows of the hedged item, by assessing and measuring whether changes in the fair value or cash flows of the hedged item are offset by the changes in the fair value or cash flows of the hedging instrument, within the range of 80% to 125%.

Hedge ineffectiveness represents the amount by which the changes in the fair value of the derivative differ from changes in the fair

F-8

value of the hedged item in a fair value hedge, or the amount by which the changes in the fair value of the derivative are in excess of the fair value change of the expected cash flow in a cash flow hedge. Hedge ineffectiveness and gains and losses on components of a derivative that are excluded from the assessment of hedge effectiveness are recorded directly in income.

The Group discontinues hedge accounting when the hedge relationship has ceased to be effective or is no longer expected to be effective, or when the derivative or hedged item is sold or otherwise terminated.

Fair value hedges

Where a derivative financial instrument hedges the exposure to changes in the fair value of recognised or committed assets or liabilities, the hedged item is adjusted in relation to the risk being hedged. Gains or losses on remeasurement of both the hedging instrument and the hedged item are recognised in the income statement, typically within results from financial transactions. For hedges of mortgage service rights any hedging ineffectiveness is recorded in other income.

When a fair value hedge of interest rate risk is terminated, any fair value adjustment to the carrying amount of the hedged asset or liability is amortised to income over the original designated hedging period or taken directly to income if the hedged item is sold, settled or impaired.

Cash flow hedges

When a derivative financial instrument hedges the exposure to variability in the cash flows from recognised assets, liabilities or anticipated transactions, the effective part of any gain or loss on remeasurement of the hedging instrument is recognised directly in equity. When a cash flow hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss recognised in equity remains in equity.

The cumulative gain or loss recognised in equity is transferred to the income statement at the time when the hedged transaction affects net profit or loss and included in the same line item as the hedged transaction. In the exceptional case that the hedged transaction is no longer expected to occur, the cumulative gain or loss recognised in equity is recognised in the income statement immediately.

Hedge of a net investment in a foreign operation

The Group uses foreign currency derivatives and currency borrowings to hedge various net investments in foreign operations. For such hedges, currency translation differences arising on translation of the currency of these instruments to euro are recognised directly in the currency translation account in equity, insofar as they are effective.

Impairment of financial assets

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a portfolio of financial assets is impaired. A financial asset or portfolio of financial assets is impaired and impairment losses are recognised if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and prior to the balance sheet date ('a loss event') and that event adversely impacts estimated future cash flows of the financial asset or the portfolio.

Loans and receivables

An indication that a loan may be impaired is obtained through the Group's credit review processes, which include monitoring customer payments and regular loan reviews at least every 6 or 12 months depending on the obligors' creditworthiness.

The Group first assesses whether objective evidence of impairment exists for loans (including any related facilities and guarantees) that are individually significant, and individually or collectively for loans that are not individually

significant. If the Group determines that no objective evidence of impairment exists for an individually assessed loan, it includes the asset in a portfolio of loans with similar credit risk characteristics and collectively assesses them for impairment. Loans that are evaluated individually for impairment are not included in a collective assessment of impairment.

Indications that there is a measurable decrease in estimated future cash flows from a portfolio of loans, although the decrease cannot yet be identified with the individual loans in the portfolio, include adverse changes in the payment status of borrowers in the portfolio and national or local economic conditions that correlate with defaults in the portfolio.

The amount of impairment loss is measured as the difference between the loan's carrying amount and the present value of estimated future cash flows discounted at the loan's original effective interest rate. The amount of the loss is recognised using an allowance account and the amount of the loss is included in the income statement line loan impairment and other credit risk provi-

F-9

sions.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that are likely to result from foreclosure less costs for obtaining and selling the collateral.

Future cash flows of a group of loans that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the loans in the portfolio and historical loss experience for loans with credit risk characteristics similar to those in the Group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the historical data and to remove the effects of conditions in the historical data that do not currently exist.

The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. The impact of changes in estimates and recoveries is recorded in the income statement line loan impairment and other credit risk provisions.

Following impairment, interest income is recognised using the original effective rate of interest. When a loan is deemed no longer collectible, it is written off against the related allowance for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to the income statement line loan impairment and other credit risk provisions. Assets acquired in exchange for loans to achieve an orderly realisation are reflected in the balance sheet as a disposal of the loan and an acquisition of a new asset, initially booked at fair value.

Other financial assets

In the case of equity instruments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is also considered in determining whether impairment exists. Where such evidence exists, the cumulative net loss that has been previously recognised directly in equity is removed from equity and recognised in the income statement within results on financial transactions.

Held to maturity and available-for-sale debt investments are assessed and any impairment is measured on an individual basis, consistent with the methodology applied to loans and receivables.

Property and equipment

Own use assets

Property and equipment is stated at cost less accumulated depreciation and any amount for impairment. If an item of property and equipment is comprised of several major components with different useful lives, each component is accounted for separately. Additions and subsequent expenditures (including accrued interest) are capitalised only to the extent that they enhance the future economic benefits expected to be derived from the asset. Expenditure incurred to replace a component of an asset is separately capitalised and the replaced component is written off. Other subsequent expenditure is capitalised only when it increases the future economic benefit of the item of property and equipment. All other expenditure, including maintenance, is recognised in the income statement as incurred. When an item of property and equipment is retired or disposed, the difference between the carrying amount and the disposal proceeds net of costs is recognised in other operating income.

Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of items of property and equipment, and major components that are accounted for separately. The Group generally uses the following estimated useful lives:

- Land not depreciated
- Buildings 25 to 50 years

- Equipment 5 to 12 years
- Computer installations 2 to 5 years.

Software, presented as an intangible asset, is amortised over 3-7 years.

Depreciation rates and residual values are reviewed at least annually to take into account any change in circumstances. Capitalised leasehold improvements are depreciated in a manner that takes into account the term and renewal conditions of the related lease.

Development property

The majority of the Group's development and construction activities are undertaken for immediate sale or as part of a pre-agreed

F-10

contractual arrangement. Property developed under a pre-agreed contractual arrangement is stated at cost plus profit recognisable to date less a provision for any foreseeable losses and less progress billings. Cost includes all expenditure (including accrued interest) related directly to specific projects and an allocation of fixed and variable overheads incurred in the Group's contract activities based on normal operating capacity. The specific components of development property are accounted for as follows.

Building and development sites are carried at cost including allocated interest and additional expenses for purchasing the site and making them ready for development. No interest is allocated to land which has not been zoned for a particular purpose, if there is no certainty that the land will be built on. Any provision deemed necessary for expected losses on sale is deducted from the carrying value of the site.

Work in progress relates to commercial property projects, as well as to unsold residential property under construction or preparation. Work in progress is carried at the costs incurred plus allocated interest and net of any provisions as required. Progress instalments invoiced to buyers and principals are deducted from work in progress. The profit and loss is recognised in accordance with the percentage of completion method. Until sold, commercial and residential developments are carried at cost of production net of any required provisions. If a decision is taken to retain an unsold property it is classified as investment property.

Investment property

Investment property is carried at fair value based on current market prices for similar properties in the same location and condition. Any gain or loss arising from a change in fair value is recognised in profit and loss. Rental income from investment property is recognised on a straight-line basis over the term of the lease, with lease incentives granted recognised as an integral part of the rental income.

Leasing

As *lessee*: most of the leases that the Group has entered into are classified as operating leases (including property rental). The total payments made under operating leases are charged to the income statement on a straight-line basis over the period of the lease. Lease incentives received are recognised in the income statement as an integral part of the total lease expense. When it is anticipated that an operating lease will be terminated or vacated before the lease period has expired, the lesser of any penalty payments required and the remaining payments due once vacated (less sub-leasing income) is recognised as an expense.

As *lessor*: assets subject to operational leases are included in property and equipment. The asset is depreciated on a straight-line basis over its useful life to its estimated residual value. Leases where the Group transfers substantially all the risks and rewards resulting from ownership of an asset to the lessee are classified as finance leases. A receivable at an amount equal to the present value of the lease payments, using the implicit interest rate, including any guaranteed residual value, is recognised. Finance lease receivables are included in loans and receivables to customers.

Intangible assets

Goodwill

Goodwill is capitalised and represents the excess of the cost of an acquisition over the fair value of the Group's share of the acquired entity's net identifiable assets at the date of acquisition. For the purpose of calculating goodwill, the fair values of acquired assets, liabilities and contingent liabilities are determined by reference to market values or by discounting expected future cash flows to present value. Any change in the assessed fair value of acquired assets and liabilities at the time of acquisition identified within one year following the acquisition are corrected against goodwill. Any revisions identified after one year are recorded in income.

Goodwill on the acquisition of equity accounted investments is included in the carrying amount of the investment.

Gains and losses on the disposal of an entity, including equity accounted investments, are determined as the difference between the sale proceeds and the carrying amount of the entity including related goodwill and any currency translation differences recorded in equity.

Software

Costs that are directly associated with identifiable and software products that are controlled by the Group, and likely to generate future economic benefits exceeding these costs, are recognised as intangible assets. Direct costs include staff costs of the software development team. Expenditure that enhances or extends the performance of computer software beyond its original specification is recognised as a capital improvement and added to the original cost of the software. Software is amortised over 3-7 years.

F-11

Costs associated with maintaining computer software programmes are recognised as an expense as incurred.

Mortgage servicing rights

Mortgage servicing rights (MSRs) represent the right to a stream of fee-based cash flows and an obligation to perform specified mortgage servicing activities. MSRs are initially recorded at fair value and amortised over the estimated future net servicing income stream of the underlying mortgages. The duration of the income stream relating to these servicing rights is dependent on the pre-payment behaviour of the customer, which is influenced by a number of factors including interest rate expectations. MSR assets are subject to hedging under a fair value hedge programme designed to limit the Group's exposure to changes in the fair value of the MSR. The change in the fair value of the hedged MSRs and the change in the fair value of the hedging derivatives are included as part of mortgage banking income within other operating income.

Other intangible assets

Other intangible assets that are acquired by the Group are stated at cost less accumulated amortisation and any adjustment for impairment losses. Other intangible assets are comprised of separately identifiable items arising from acquisition of subsidiaries, such as customer relationships, and certain purchased trademarks and similar items. Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of the intangible asset.

Impairment of property and equipment and intangible assets

Property and equipment and intangibles are assessed at each balance sheet date or more frequently, to determine whether there is any indication of impairment. If any such indication exists, the assets are subject to an impairment review. Regardless of any indications of potential impairment, the carrying amount of goodwill is subject to a detailed impairment review at least annually.

An impairment loss is recognised whenever the carrying amount of an asset that generates largely independent cash flows or the cash-generating unit to which it belongs exceeds its recoverable amount. The recoverable amount of an asset is the greater of its net selling price and value in use. To calculate value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market rates and the risks specific to the asset. When conducting impairment reviews, particularly for goodwill, cash-generating units are the lowest level at which management monitors the return on investment on assets.

Impairment losses are recognised in the income statement as a component of depreciation and amortisation expense. An impairment loss with respect to goodwill is not reversible. Other impairment losses are reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognised.

Pension and other post-retirement benefits

For employees in the Netherlands and the majority of staff employed outside the Netherlands, pension or other retirement plans have been established in accordance with the regulations and practices of the countries in question. Separate pension funds or third parties administer most of these plans. The plans include both defined contribution plans and defined benefit plans.

Defined contribution plans

In the case of defined contribution plans, contributions are charged directly to the income statement in the year to which they relate.

Defined benefit plans

The net obligations under defined benefit plans are regarded as the Group's own commitments regardless of whether these are administered by a pension fund or in some other manner. The net obligation of each plan is determined as

the difference between the benefit obligations and the plan assets. Defined benefit plan pension commitments are calculated in accordance with the projected unit credit method of actuarial cost allocation. Under this method, the present value of pension commitments is determined on the basis of the number of active years of service up to the balance sheet date and the estimated employee salary at the time of the expected retirement date, and is discounted using the market rate of interest on high-quality corporate bonds. The plan assets are measured at fair value.

Pension costs for the year are established at the beginning of the year based on the expected service and interest costs and the expected return on the plan assets, plus the impact of any current period curtailments or plan changes. Differences between the expected and the actual return on plan assets, as well as actuarial gains and losses, are only recognised as income or expense when the net cumulative unrecognised actuarial gains and losses at the end of the previous reporting year exceed 10% of the greater of the commitments under the plan and the fair value of the related plan assets. The part that exceeds 10% is recognised

F-12

in income over the expected remaining years of service of the employees participating in the plans. Differences between the pension costs determined in this way and the contributions payable are accounted for as provisions or prepayments. Commitments relating to early retirement of employees are treated as pension commitments.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised as an expense in the income statement on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the past service cost is recognised immediately in the income statement.

Other post-retirement benefits

The Group's net obligation with respect to long-term service benefits and post-retirement healthcare is the amount of future benefit that employees have earned in return for their service in current and prior periods. The obligation is calculated using the projected unit credit method. It is then discounted to its present value and the fair value of any related assets is deducted.

Share-based payments to employees

The Group engages in equity and cash settled share-based payment transactions in respect of services received from certain of its employees. The cost of the services received is measured by reference to the fair value of the shares or share options granted on the date of the grant. The cost related to the shares or share options granted is recognised in the income statement over the period that the services of the employees are received, which is the vesting period, with a corresponding credit in equity for equity settled schemes and a credit in liabilities for cash settled schemes.

The fair value of the options granted is determined using option pricing models, which take into account the exercise price of the option, the current share price, the risk free interest rate, the volatility of the ABN AMRO share price over the life of the option and the terms and conditions of the grant. Non-market vesting conditions are taken into account by adjusting the number of shares or share options included in the measurement of the cost of employee services, so that ultimately the amount cumulatively recognised in the income statement shall reflect the number of shares or share options that eventually vest. Where vesting conditions are related to market conditions, these are fully reflected in the fair value initially determined at grant date and as a result, the charges for the services received are recognised regardless of whether or not the market related vesting condition is met, provided that the non-market vesting conditions are met.

Provisions

A provision is recognised in the balance sheet when the Group has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. If the effect of time value is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market rates and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when an obligation exists. An obligation exists when the Group has approved a detailed plan and has raised a valid expectation in those affected by the plan by starting to implement the plan or by announcing its main features. Future operating costs are not provided for.

Provisions for insurance risks are determined by actuarial methods, which include the use of statistics, interest rate data and settlement costs expectations.

Other liabilities

Obligations to policyholders, whose return is dependent on the return of unit linked investments recognised in the balance sheet, are measured at fair value with changes through income.

Income taxes - current and deferred

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The future tax benefit of income tax losses available for carry forward is recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred tax is recognised for qualifying temporary differences. Temporary differences represent the difference between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The most significant temporary differences arise from the revaluation of certain financial assets and liabilities including derivative contracts, allow-

F-13

ances for loan impairment, provisions for pensions and business combinations. The following differences are not provided for: capitalised goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit, and differences relating to investments in subsidiaries and associates, to the extent that they will probably not reverse in the foreseeable future and the timing of such reversals is controlled by the Group. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised.

Deferred and current tax assets and liabilities are only offset when they arise in the same tax reporting group and where there is both the legal right and the intention to settle on a net basis or to realise the asset and liability simultaneously.

Issued debt and equity securities

Issued debt securities are recorded on an amortised cost basis using the effective interest rate method, unless they are of a hybrid/structured nature and designated to be held at fair value through income.

Issued financial instruments or their components are classified as liabilities where the substance of the contractual arrangement results in the Group having a present obligation to either deliver cash or another financial asset or to satisfy the obligation other than by the exchange of a fixed number of equity shares. Preference shares that carry a non-discretionary coupon or are redeemable on a specific date or at the option of the holder are classified as liabilities. The dividends and fees on preference shares classified as a liability are recognised as interest expense.

Issued financial instruments, or their components, are classified as equity when they do not qualify as a liability and represent a residual interest in the assets of the Group. Preference share capital is classified as equity if it is non-redeemable and any dividends are discretionary. The components of issued financial instruments that contain both liability and equity elements are accounted for separately with the equity component being assigned the residual amount after deducting from the instrument's initial value the fair value of the liability component.

Dividends on ordinary shares and preference shares classified as equity are recognised as a distribution of equity in the period in which they are approved by shareholders.

Share capital

Incremental external costs directly attributable to the issue of new shares are deducted from equity net of any related income taxes.

When share capital recognised as equity is repurchased, the amount of the consideration paid, including incremental directly attributable costs net of income taxes, is recognised as a change in equity. Repurchased shares are classified as treasury shares and presented as a deduction from total equity. Where such shares are subsequently sold or reissued, any consideration received is added to shareholders' equity.

Other equity components

Currency translation account

The currency translation account is comprised of all currency differences arising from the translation of the financial statements of foreign operations net of the translation impact on liabilities or foreign exchange derivatives held to hedge the Group's net investment. These currency differences are included in income on disposal or partial disposal of the operation.

Cash flow hedging reserve

The cash flow hedging reserve is comprised of the effective portion of the cumulative change in the fair value of cash flow hedging derivatives, net of taxes, where the hedged transaction has not yet occurred.

Net unrealised gains and losses on available-for-sale assets

In this component, gains and losses arising from a change in the fair value of available-for-sale assets are recognised, net of taxes. When the relevant assets are sold, impaired or otherwise disposed of, the related cumulative gain or loss recognised in equity is transferred to the income statement.

Collectively, the cash flow hedging reserve and the available-for-sale reserve are sometimes referred to as special components of equity.

F-14

Cash flow statement

Cash and cash equivalents for the purpose of the cash flow statement include cash in hand, deposits available on demand with central banks and net credit balances on current accounts with other banks.

The cash flow statement, based on the indirect method of calculation, gives details of the source of cash and cash equivalents which became available during the year and the application of these cash and cash equivalents over the course of the year. The cash flows are analysed into cash flows from operations, including banking activities, investment activities and financing activities. Movements in loans and receivables and inter-bank deposits are included in the cash flow from operating activities. Investment activities are comprised of acquisitions, sales and redemptions in respect of financial investments, as well as investments in and sales of subsidiaries and associates, property and equipment. The issuing of shares and the borrowing and repayment of long-term funds are treated as financing activities. Movements due to currency translation differences as well as the effects of the consolidation of acquisitions, where of material significance, are eliminated from the cash flow figures.

Future changes in accounting policies

IFRS standards not yet effective

IFRS 7 was issued in August 2005 and is effective for annual reporting periods beginning on or after 1 January 2007. It requires entities to provide additional disclosures on financial instruments within their financial statements but does not change the recognition and measurement rules of these financial instruments.

IFRS 8 was issued in November 2006 and is effective for annual reporting periods beginning on or after 1 January 2009. The standard replaces IAS 14 'Segment Reporting' in setting out requirements for disclosure of information about an entity's operating segments and also about the entity's products and services, the geographical areas in which it operates, and its major customers. The Group plans to adopt IFRS 8 in 2007.

IFRIC Interpretations not yet effective

IFRIC interpretation 8 'Scope of IFRS 2' was issued in January 2006 and is required to be applied for financial years beginning on or after 1 May 2006. It requires IFRS '2 Share-based Payment' to be applied to any arrangements where equity instruments are issued for consideration which appears to be less than fair value. As equity instruments are only issued to employees in accordance with the employee share scheme, the interpretation has no impact on the financial position or results of the Group.

IFRIC interpretation 9 'Reassessment of Embedded Derivatives' was issued in March 2006 and becomes effective for financial years beginning on or after 1 June 2006. This interpretation establishes that the date to assess the existence of an embedded derivative is the date an entity first becomes a party to the contract with reassessment only if there is a change to the contract that significantly modifies the cash flows. This interpretation is consistent with our accounting policies and thus will have no impact on the Group's financial statements when implemented in 2007.

IFRIC interpretation 10 'Interim Financial Reporting & Impairment' was issued in July 2006 and becomes effective for financial years beginning on or after 1 November 2006. It states that an entity shall not reverse an impairment loss recognised in a previous interim period in respect of goodwill or an investment in either an equity instrument or a financial asset carried at cost. The adoption of this interpretation will have no impact on the financial position or results of the Group.

IFRIC interpretation 11 'Group & Treasury Share Transactions' was issued in November 2006 and becomes effective for financial years beginning on or after 1 March 2007. The interpretation provides further guidance on the implementation of IFRS 2 'Share-based Payment'. The Group is still evaluating the effect of this interpretation for implementation in 2008.

Consolidated income statement for the year ended 31 December

Notes to the consolidated financial statements

(unless otherwise stated, all amounts are in millions of euros)

1 Segment reporting

Segment information is presented in respect of the Group's business. The primary format, business segments, is consistent with the Group's management and internal reporting structure applicable in the financial year.

Measurement of segment assets, liabilities, income and results is based on the Group's accounting policies. Segment assets, liabilities, income and results include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Transactions between segments are conducted at arm's length.

Business segments

Below the business segments are detailed. In the 'Business review' chapter of the Annual Report more detailed descriptions of the activities of these segments have been included.

Netherlands

BU Netherlands serves a diverse client base that comprises consumer and commercial clients. BU Netherlands offers a broad range of investment, commercial and retail banking products and services via its multi-channel service model consisting of a network of branches, internet banking facilities, a customer contact center and ATMs throughout the Netherlands. BU Netherlands focuses increasingly on mass affluent customers and commercial mid-market clients. BU Netherlands also comprises the ABN AMRO Mortgage Group including the former Bouwfonds mortgage activities. The non-mortgage activities of Bouwfonds were sold during the year.

Europe (including Antonveneta)

BU Europe provides its consumer and commercial clients with a range of financial products and services. Its regional strategies and operations are closely aligned with those of ABN AMRO's global BUs.

BU Europe combines activities in 27 countries: 23 countries in Europe (excluding the Netherlands) along with Kazakhstan, Uzbekistan, Egypt and South Africa.

ABN AMRO acquired a majority stake in Antonveneta in January 2006 and launched a tender offer for the remaining shares on 27 February 2006. It acquired 100% of the bank in July 2006 after it exercised its right to purchase the shares it did not yet own following its tender offer.

Antonveneta is rooted in north-eastern Italy, and focuses on consumer and commercial mid-market clients.

North America

The core of BU North America is LaSalle Bank, headquartered in Chicago, Illinois. BU North America serves a large number of clients, including small businesses, mid-market companies, larger corporates, institutions, non-profit entities and municipalities in the US and Canada. BU North America offers a broad range of investment, commercial and retail banking products and services through a network of branches and ATMs in Illinois, Michigan and Indiana. BU North America focuses increasingly on mass affluent customers and commercial mid-market clients. While based in the US Midwest, BU North America reaches further through an expanding network of regional commercial banking offices across the US.

Latin America

BU Latin America has a presence in nine Latin American countries: Brazil, Argentina, Chile, Colombia, Ecuador, Mexico, Paraguay, Uruguay and Venezuela, with the presence of Banco Real representing the majority of the operations. In Brazil, Banco Real is a retail and commercial bank, offering full retail, corporate and investment

banking products and services. It operates as a universal bank offering financial services through an extensive network of branches, points-of-sale and ATMs. BU Latin America also has a strong presence in the Brazilian consumer finance business through its Aymoré franchise, focused on vehicle and other consumer goods financing.

Asia

ABN AMRO has been operating for well over 100 years in several Asian countries including Indonesia, China, Singapore and Japan. BU Asia now covers 16 countries and territories and is extending its branches and offices network. BU Asia's client base

F-21

includes commercial clients as well as consumer and private banking clients.

Global Clients

BU Global Clients serves a range of major corporate and institutional clients that demand sophisticated financial solutions customised to their specific needs.

BU Global Clients is organised around six hubs (Amsterdam, London, New York, Hong Kong, São Paulo and Sydney). The financial results of BU Global Clients also reflect the contribution of ABN AMRO Mellon, a joint venture with the Mellon Financial Corporation that provides global custody and value added services to institutional investors worldwide.

Private Clients

BU Private Clients offers private banking services to wealthy individuals and institutions with EUR 1 million or more in net investable assets. In the past few years, BU Private Clients built up an onshore private banking network in continental Europe through organic growth in the Netherlands and France, and through the acquisition of Delbrück Bethmann Maffei in Germany and Bank Corluy in Belgium.

Asset Management

BU Asset Management is ABN AMRO's global asset management business. BU Asset Management operates in 26 countries worldwide, offering investment products in all major regions and asset classes. Its products are distributed directly to institutional clients such as central banks, pension funds, insurance companies and leading charities. Funds for private investors are distributed through ABN AMRO's consumer and private banking arms, as well as via third-party distributors such as insurance companies and other banks. The institutional client business represents just over half of the assets managed by BU Asset Management. Consumer and third-party clients account for a further 30%, and the remainder is in discretionary portfolios managed for BU Private Clients.

Private Equity

The business model of ABN AMRO's Private Equity unit - branded as ABN AMRO Capital - involves providing capital and expertise to non-listed companies in a variety of sectors. By obtaining, in most cases, a majority stake, Private Equity gains the ability to influence the company's growth strategy and increase its profitability. It then aims to sell its shareholding at a profit after a number of years. Private Equity specialises in European mid-market buyouts, but also manages a portfolio of investments in Australian buyouts, non-controlling and controlling shareholdings in small to medium sized Dutch companies ('participaties'), and dedicated media and telecom sector investments. It operates from seven offices across Europe and Australia.

Group Functions, including Group Services

Group Functions provides guidance on ABN AMRO's corporate strategy and supports the implementation of the strategy in accordance with our Managing for Value methodology, Corporate Values and Business Principles. By aligning and uniting functions across ABN AMRO's BUs and geographical territories, Group Functions also facilitates Group-wide sharing of best practices, innovation and positioning to public authorities, and binds the bank together in both an operational and cultural sense.

Group Functions includes Group Asset and Liability Management, which manages an investment and derivatives portfolio in order to manage the liquidity and interest rate risks of the Group. Group Functions also holds the Group's strategic investments, proprietary trading portfolio and records any related profits or losses.

2 Acquisitions and disposals of subsidiaries

Major acquisitions in 2006, 2005 and 2004

The following major acquisitions were made in 2006, 2005 and 2004 and were accounted for using the purchase method:

	% acquired	Consideration	Total assets	Acquisition Date
Acquired companies				
2006				
Antonveneta	100	7,499	49,367	various
Private equity acquisitions	51-100	105	1,295	various
2005				
Bank Corluy	100	50	121	April 2005
Private equity acquisitions	51-100	43	2,174	various
2004				
Bethmann Maffei	100	110	812	January 2004
Private equity acquisitions	51-100	112	963	various

Acquisitions 2006

Antonveneta

On 2 January 2006 the Group acquired a controlling interest in Banca Antoniana Popolare Veneta (Antonveneta) in order to increase its mid-market footprint, and accelerate the existing partnership that gives access to the large Italian banking market and the customer base of Antonveneta.

During 2005 the Group had already increased its interest in Antonveneta from 12.7% to 29.9%. The purchase of 79.9 million shares of Antonveneta from Banca Popolare Italiana on 2 January 2006 resulted in the Group acquiring a controlling 55.8% share. Following purchases of shares in the open market, a public offering and the exercise of the Group's right under Italian law to acquire minority share holdings, ABN AMRO now owns 100% of the outstanding share capital of Antonveneta.

The Group paid EUR 26.50 per share for Antonveneta, representing a total consideration of EUR 7,499 million. Total goodwill arising from the acquisition amounted to EUR 4,399 million, reflecting final adjustments to the purchase price and an adjustment to the fair value of the purchased loan portfolio over and above the provisional goodwill amount calculated at EUR 4,273 million as at 2 January 2006. For further details on the purchase price adjustments and goodwill calculation please refer to note 22. In addition, the Group has recognised newly identifiable intangible assets amounting to EUR 1,194 million. For further details on intangible assets please refer to note 22.

The impact of consolidating Antonveneta in the figures of ABN AMRO Holding N.V. as at 31 December 2006 can be summarised as follows:

	Year ended 31 December 2006
Income statement	
Operating income	2,071
Operating expenses	1,310
Loan impairment and other credit risk provisions	382
Operating profit before tax	379
Income tax expense	187
Profit for the year	192
	31 December 2006
Balance sheet	
Loans and receivables - banks	4,640
Loans and receivables - customers	38,070
Sundry assets	8,775
Total assets	51,485
Due to banks	11,777
Due to customers	19,742
Issued debt securities	9,803
Sundry liabilities	6,623
Total liabilities	47,945

BU Asset Management

In February 2006, BU Asset Management acquired International Asset Management, a 'fund of hedge funds' manager. The integration of this acquisition was completed in May 2006. In June 2006, BU Asset Management increased its share in its Beijing joint venture to 49% and changed local partner from XiangCai Securities to Northern Trust, a member of Tianjin TEDA holdings.

VermogensGroep

In October 2006, the Group acquired a majority share in VermogensGroep to expand its Private Clients business in the Netherlands.

Banco ABN AMRO Real

On 20 September 2006, ABN AMRO exercised its right to call Banca Intesa's remaining 3.86% holding in Banco ABN AMRO Real. The total consideration for the acquisition of the shares amounted to EUR 233 million. After the exercise of the rights ABN AMRO owns 97.5% of the shares in Banco ABN AMRO Real.

Capitalia

On 18 October 2006 the Group purchased 24.6 million shares, representing a stake of 0.95%, in Capitalia from Pirelli S.p.A. After this purchase the Group has a stake of 8.60% in Capitalia. The consideration paid for the shares amounted to EUR 165 million.

Private Equity

Major new buy-out investments in 2006 were:

- U-pol (United Kingdom, automotive manufacturing)
- OFIC (France, isolation materials)
- Lucas Bols (Netherlands, branded liqueurs and spirits)
- Nextira One (France, integrated enterprise network solutions)
- Volution (United Kingdom, construction)
- Douglas Hanson (United States, manufacturing, add-on to Loparex, Sweden)
- Amitco (United Kingdom, manufacturing)
- Saunatec (Finland, manufacturing).

Disposals 2006

Asset Management

In April 2006 BU Asset Management disposed of its US mutual fund business to Highbury Financial Inc. The sale involved 19 mutual funds accounting for USD 6 billion assets under management. The net profit on the sale amounted to EUR 17 million. In July 2006, BU Asset Management sold its onshore Taiwanese asset management business to ING Group. The profit on the sale amounted to EUR 38 million, included in other operating income.

Kereskedelmi és Hitelbank Rt

In May 2006, ABN AMRO completed the sale of its 40% participation in Kereskedelmi és Hitelbank Rt of Hungary, as announced in December 2005, for a consideration of EUR 510 million to KBC Bank. The profit recognised on the sale included in other operating income is EUR 208 million.

Global Futures business

On 30 September 2006 ABN AMRO sold the Global Futures business for an amount of EUR 305 million (USD 386 million). The net profit on the sale amounted to EUR 190 million (EUR 229 million gross). During 2006 the Global Futures business contributed EUR 163 million of operating income and a net loss of EUR 24 million.

Private Clients

In May 2006, BU Private Clients sold its business in Denmark and in December 2006 it disposed of its business in Monaco, to focus on growth in other private banking markets and further enhance the efficiency of its global structure.

Bouwfonds non-mortgage

On 1 December 2006 the Group disposed of the property development and management activities of its Bouwfonds subsidiary. The Bouwfonds Property Development, Bouwfonds Asset Management, Bouwfonds Fondsenbeheer, Rijnlandse Bank and Bouwfonds Holding were sold to Rabobank for a cash consideration of EUR 852 million and the Bouwfonds Property Finance activities were sold to SNS Bank for a cash consideration of EUR 825 million. The total net gain on the sale of Bouwfonds amounted to EUR 338 million.

The operating result and disposal gain of the Bouwfonds businesses sold have been reported as discontinued operations in the income statement.

Private Equity

In 2006 major divestments were:

- Holland Railconsult (Netherlands, railway engineering)
- Kreatel Communications (Sweden, telecommunications)
- Sogetrel (France, telecommunications)
- Radio Holland Group (Netherlands, maritime navigation and communication systems)
- RTD (Netherlands, industrial non-destructive testing services)
- Jessops (United Kingdom, retail)

- Dennis Eagle (United Kingdom, industrial).

Acquisitions 2005

Bank Corluy

In April 2005 the acquisition of the Belgian private bank Bank Corluy was completed. The purchase price amounted to EUR 50

F-29

million. Total Assets under Management of this entity were over EUR 1.5 billion. The net asset value acquired amounted to EUR 20 million, resulting in capitalised goodwill of EUR 30 million.

Bouwfonds

In April 2005, we exercised our right to acquire the cumulative preference shares of Bouwfonds in order to obtain full legal control, in addition to the 100% economic interest we acquired in 2000.

Artemis

In December 2005, we increased our shareholding in the UK based asset management company Artemis from 58% to 71%. The consideration paid for this increase amounted to EUR 107 million.

Private Equity

Major new buy-out investments in 2005 were:

- FlexLink (Sweden, engineering)
- Strix (UK, engineering)
- Fortex (Netherlands, support services)
- Loparex (Finland, industrial products)
- Everod (Australia, medical services)
- Bel'm (France, consumer products)
- IMCD (Netherlands, chemicals), Nueva Terrain (Spain, construction)
- Roompot (Netherlands, leisure)
- Scotts and McColls (Australia, transportation)
- Bonna Sabla (France, industrial products & services)
- Bianchi Vending (Italy, business products & supplies).

Disposals 2005

ABN AMRO Trust Holding

In June 2005, the sale of ABN AMRO Trust Holding to Equity Trust was completed. The Trust and Management Services performed in Asia, Europe and the Caribbean were transferred to Equity Trust. The profit on the sale amounted to EUR 17 million.

Nachenius Tjeenk & Co.

In July 2005, the sale of Nachenius Tjeenk to BNP Paribas was completed. The net profit on sale amounted to EUR 38 million.

Real Seguros S.A.

In July 2005, ABN AMRO and Tokio Marine & Nichido Fire Insurance Co., Ltd. ('TMNF'), an integral subsidiary of Millea Holdings, Inc. announced that TMNF would purchase from ABN AMRO 100% of Real Seguros S.A., and establish a 50/50 joint venture in Real Vida e Previdência S.A. As part of the agreement, ABN AMRO agreed to distribute on an exclusive basis through its retail network in Brazil, insurance and pension products. The net profit on the sale amounted to EUR 196 million.

Private Equity

In 2005 major divestments were:

- Handicare (Norway, medical equipment)
- MobilTel (Bulgaria, communications)
- AUSDOC (Australia, support services)
- Puzzler Media (UK, media).

Dilution of investment 2005

Capitalia

In December 2005, Capitalia issued additional shares. Because we did not participate in this offering, our shareholding reflects a dilutive effect and decreased from 9% to 8%.

Acquisitions 2004

Bethmann Maffei

In January 2004, we acquired Bethmann Maffei, a private bank in Germany for EUR 110 million. We then merged it with Delbrück & Co to form Delbrück Bethmann Maffei. With more than EUR 10 billion in Assets under Management, Delbrück Bethmann Maffei

F-30

is one of the top five private banks in Germany.

Sparebank 1 Aktiv Forvaltning

In February 2004, we acquired the asset management activities of Sparebank 1 Aktiv Forvaltning of Norway.

Disposals 2004

Bank Austria

In February 2004, we sold our stake in Bank Austria for a net profit of EUR 115 million.

US Professional Brokerage

In April 2004, we sold our US Professional Brokerage unit to Merrill Lynch, Pierce, Fenner & Smith Incorporated.

Bank of Asia

In July 2004, we sold our controlling 80.77% interest in Bank of Asia in Thailand to the United Overseas Bank for a total cash consideration of THB 22,019 million or EUR 442 million as per 27 July 2004. The operating result and disposal gain of EUR 224 million have been reported as discontinued operations in the profit and loss account.

LeasePlan Corporation

In November 2004, we sold LeasePlan Corporation of the Netherlands for a net profit of EUR 844 million (under Dutch GAAP) to a consortium of investors led by Volkswagen Group. The operating result and disposal gain have been reported as discontinued operations in the profit and loss account.

Executive Relocation Corporation

In November 2004, we sold our US employee relocation management and consulting firm, Executive Relocation Corporation, to SIRVA Inc. of the United States for USD 100 million.

US defined contribution pensions administration business

On 31 December 2004, Business Unit Asset Management sold its US defined contribution pensions (401(k)) administration business to Principal Financial Group of the United States.

Financial liabilities held for trading	1,289	1,054	976
Due to banks	5,449	5,037	3,941
Due to customers	12,208	9,616	7,254
Issued debt securities	7,140	4,160	2,744
Subordinated liabilities	1,037	993	1,088
Subtotal	27,123	20,860	16,003
Total	10,575	8,785	8,525

4 Net fee and commission income

	2006	2005	2004
Fee and commission income			
Securities brokerage fees	1,785	1,560	1,548
Payment and transaction services fees	2,123	1,530	1,401
Asset management and trust fees	1,562	1,153	1,041
Fees generated on financing arrangements	248	180	158
Advisory fees	500	336	311
Insurance related commissions	168	168	130
Guarantee fees	223	218	160
Other fees and commissions	518	427	436
Subtotal	7,127	5,572	5,185
Fee and commission expense			
Securities brokerage expense	330	321	281
Payment and transaction services expense	287	165	125
Asset management and trust expense	151	127	126
Other fee and commission expense	297	268	168
Subtotal	1,065	881	700
Total	6,062	4,691	4,485

5 Net trading income

	2006	2005	2004
Securities	61	978	179
Foreign exchange transactions	789	662	687
Derivatives	2,199	933	380
Other	(70)	48	63
Total	2,979	2,621	1,309

Interest income and expense on trading positions are included in interest income and expense.

6 Results from financial transactions

	2006	2005	2004
Net gain from the disposal of available-for-sale debt securities	634	431	179
Net gain from the sale of available-for-sale equity investments	158	55	154
Dividend on available-for-sale equity investments	71	54	48
Net gain on other equity investments	491	514	694
Hedging ineffectiveness	58	39	(112)
Fair value change of credit default swaps	(280)	(51)	(12)
Other	(45)	239	(46)
Total	1,087	1,281	905

The net gain on other equity investments includes gains and losses arising on investments held at fair value and the result on the sale of consolidated holdings of a private equity nature.

The Group enters into credit default swaps for managing portfolio credit risk. However, these are generally not included in hedge accounting relationships due to difficulties in demonstrating that the relationship will be highly effective. Accordingly any fair value changes are recorded directly in income, while the gains and losses on the credit positions hedged are accrued in interest income and expense and as impairment and other credit related provisions if any.

F-32

7 Other operating income

	2006	2005	2004
Insurance activities	103	150	177
Leasing activities	61	60	63
Disposal of operating activities and equity accounted investments	553	347	187
Other	665	499	318
Total	1,382	1,056	745

Income from insurance activities can be analysed as follows:

	2006	2005	2004
Premium income	1,273	1,182	1,243
Investment income	308	406	300
Provision for insured risk	(1,478)	(1,438)	(1,366)
Total	103	150	177

The 2006 result on disposal of operating activities (not qualifying as discontinued operations) and equity accounted investments includes the profit recognised on the following sales: Kereskedelmi és Hitelbank Rt to KBC Bank of EUR 208 million, the Global Futures business to UBS of EUR 229 million, Asset Management Taiwan to ING Group of EUR 38 million and Asset Management Mutual Funds USA to Highbury Financial Inc. of EUR 17 million.

In 2006 an amount of EUR 110 million has been recognised in relation to the settlement of a claim regarding a former subsidiary of our US operations in the line Other.

8 Personnel expenses

	2006	2005	2004
Salaries (including bonuses and allowances)	6,469	5,686	5,413
Social security expenses	873	710	592
Pension and post-retirement healthcare costs	404	11	373
Share-based payment expenses	78	61	4
Temporary staff costs	309	228	196
Termination payments	144	174	191
Restructuring related costs ¹¹	153	42	502
Other employee costs	211	313	279
Total	8,641	7,225	7,550

Average number of employees (fte):

Banking activities Netherlands	26,260	26,960	27,819
Banking activities foreign countries	79,173	66,054	65,957
Consolidated private equity holdings ⁴⁰	29,945	22,201	17,938
Total	135,378	115,215	111,714

The 2006 increase in Salaries is mainly due to the consolidation of Antonveneta and increased bonus expenses in relation to our BU Global Markets activities.

9 General and administrative expenses

	2006	2005	2004
Professional fees	1,376	1,055	763
Information technology expenses	1,311	909	800
Property costs	918	751	725
Staff related expenses (including training)	204	179	149
Travel and transport	350	296	258
Stationary and printing expense	112	114	111
Communication and information	603	461	455
Commercial expenses	656	547	410
Expenses of consolidated private equity holdings	466	352	284
Restructuring related costs ¹¹	(27)	(9)	179
Sundry expenses	1,088	898	613
Total	7,057	5,553	4,747

10 Depreciation and amortisation

	2006	2005	2004
Property depreciation	207	145	153
Equipment depreciation	551	538	512
Software amortisation	385	272	274
Amortisation of other intangible assets	170	16	2
Impairment losses on goodwill of private equity investments	1	19	124
Impairment losses on property and equipment	1	9	38
Impairment of property and equipment from restructuring ¹¹	16	4	109
Impairment of software	-	1	6
Total	1,331	1,004	1,218

This item includes EUR 212 million (2005: EUR 133 million and 2004: EUR 151 million) of depreciation, amortisation and impairments charged by consolidated private equity holdings (see note 41). Amortisation of other intangible assets in 2006 mainly relate to Antonveneta (see note 22).

11 Restructuring costs

The following table summarises the Group's restructuring costs as included in the relevant cost categories.

	2006	2005	2004
Personnel related costs	153	42	502
Other administrative expenses	(27)	(9)	179
Impairment of property and equipment	16	4	109
Total	142	37	790

Restructuring charges and releases in income statements

Restructuring charges of EUR 137 million have been accounted for in relation to the services and IT alignment initiatives. Also restructuring costs of EUR 123 million have been recognised in respect of the efficiency improvement initiatives in Group Functions, North America and Global Markets activities, as included in our regional BUs:

- The Group has identified opportunities to improve productivity and efficiency whilst maintaining an effective control framework at all times. This affects mainly the head office and predominantly Group Risk Management and corporate IT projects through acceleration of the implementation of the IT operating model for Group Functions. The restructuring provision accounted for in relation to this amounts to EUR 47 million.
- In order to bring the efficiency ratio in line with peers a process of continuous efficiency improvement has started in BU North America. The first step was the announcement at the end of 2006 to reduce BU North America's workforce. A provision expense

F-34

of EUR 41 million has been recorded in respect of this.

- Global Markets, as reflected in the regions, announced further initiatives to improve the efficiency ratio. A provision of EUR 85 million, including EUR 25 million in the Services initiative and EUR 25 million in the Europe IT provision, has been recorded to support the initiative.

- The Services Operations organisation is responsible for the Group's internal services such as transaction processing, clearing and settlement. The Services Operations initiative brings together a portfolio of projects, covering the whole scope of the global banking operations and improving the efficiency of the internal processes. The initiative is being implemented over a three-year timeframe (2006-2008). The initiative will mainly impact operations in the Netherlands, United States, Brazil and United Kingdom. The total amount provided is EUR 108 million, of which EUR 25 million relating to Global Markets, as reflected in the regions.

- ABN AMRO will further aligns all IT areas within the bank to the global Services IT model previously established. All sourcing is brought under a single governance structure, supported by a multi-vendor operating model. In Europe, the IT alignment primarily has consequences for the IT-related activities in the UK. This happens through consolidation of infrastructure estate and further off shoring of application development. It will also leads to a significant reduction in contractors and consultants. Total amount provided is EUR 29 million, of which EUR 25 million to Global Markets, as reflected in the regions.

A review performed on various restructuring provisions established in prior years has led to a release of EUR 118 million. This review assessed the status of existing restructuring initiatives, contemplated the impact of new plans and identified releases including those arising from higher levels of voluntary leavers due to stronger than expected employment markets.

12 Income tax expense

Recognised in the income statement

	2006	2005	2004
Current tax expense			
Current year	944	1,106	1,186
Under/(over) provided in prior years	(96)	(87)	(30)
Subtotal	848	1,019	1,156
Deferred tax expense			
Origination and reversal of timing differences	322	257	(373)
Reduction in tax rate	(141)	(35)	(13)
Subtotal	181	222	(386)
Total	1,029	1,241	770
Continuing operations	902	1,142	715
Discontinued operations	138	99	55
Taxation on disposal	(11)	-	-
Total	1,029	1,241	770

The Group made net cash income tax payments of EUR 1.2 billion in 2006 (2005: EUR 1.1 billion).

Reconciliation of the total tax charge

The effective tax rate on the Group's profit before tax differs from the theoretical amount that would arise using the basic tax rate of the Netherlands. The difference can be explained as follows:

	2006	2005	2004
	(in percentage points)		
Dutch tax rate	29.6	31.5	34.5
Effect of tax rate in foreign countries	(2.1)	(5.0)	(4.2)
Effect of previously unrecognised tax losses utilised	-	(0.8)	-
Effect of tax-exempt income in the Netherlands	(7.2)	(1.2)	(3.7)
Other	(2.6)	(2.7)	(3.0)
Effective tax rate on operating profit	17.7	21.8	23.6

Recognised directly in equity	2006	2005	2004
	(benefits)/charges		
Relating to currency translation	114	(198)	51
Relating to cash flow hedges	(223)	(235)	(54)
Relating to available-for-sale assets	190	169	118
Total	81	(264)	115

13 Earnings per share

The calculations for basic and diluted earnings per share are presented in the following table.

	2006	2005	2004
Profit for the year attributable to shareholders of the parent company	4,715	4,382	3,865
Profit from continuing operations attributable to shareholders of the parent company	4,106	4,195	2,214
Profit from discontinued operations attributable to shareholders of the parent company	609	187	1,651
Weighted average number of ordinary shares outstanding (in millions)	1,882.5	1,804.1	1,657.6
Dilutive effect of staff options (in millions)	7.5	4.3	3.1
Conditional share awards (in millions)	5.5	1.3	1.0
Diluted number of ordinary shares (in millions)	1,895.5	1,809.7	1,661.7
<i>Earnings per share from Continuing operations</i>			
Basic earnings per ordinary share (in euros)	2.18	2.33	1.34
Fully diluted earnings per ordinary share (in euros)	2.17	2.32	1.34
<i>Earnings per share from Continuing and discontinued operations</i>			
Basic earnings per ordinary share (in euros)	2.50	2.43	2.33
Fully diluted earnings per ordinary share (in euros)	2.49	2.42	2.33
Number of ordinary shares outstanding as at 31 December (in millions)	1,853.8	1,877.9	1,669.2

Edgar Filing: ABN AMRO HOLDING N V - Form 20-F

Net asset value per ordinary share (in euros)	12.73	11.83	8.88
Number of preference shares outstanding as at 31 December (in millions)	1,369.8	1,369.8	1,369.8
Return on average shareholders' equity (in %)	20.7	23.5	29.7

F-36

14 Cash and balances at central banks

This item includes cash on hand and deposits with central banks in countries in which the bank has a presence.

	2006	2005
Cash on hand	1,887	1,590
Balances at central bank	10,430	15,067
Total	12,317	16,657

15 Financial assets and liabilities held for trading

	2006	2005
Financial assets held for trading		
Interest-earning securities:		
Dutch government	976	2,520
US treasury and US government agencies	1,115	7,843
Other OECD governments	29,529	37,855
Other interest-earning securities	28,670	13,789
Subtotal	60,290	62,007
Equity instruments	40,112	34,676
Derivative financial instruments	105,334	105,372
Total	205,736	202,055
Financial liabilities held for trading		
Short positions in financial assets	45,861	52,060
Derivative financial instruments	99,503	96,528
Total	145,364	148,588

Gains and losses on derivative financial instruments and changes in fair value of other trading instruments are recognised in net trading income. Interest income and expense from debt and other fixed-income instruments that are held for trading are recognised in net interest income.

Trading portfolio derivative financial instruments

For an analysis of the market and liquidity risks involved, please refer to note 39.

16 Financial investments

	2006	2005
Interest-earning securities - available-for-sale		
Dutch government	2,537	2,781
US treasury and US government	4,800	6,618
Other OECD governments	38,437	51,760
Mortgage-backed securities	14,655	12,100
Other interest-earning securities	57,129	39,918
Subtotal	117,558	113,177
Interest-earning securities - held-to-maturity		
Dutch government	1,285	2,136
US treasury and US government	14	22
Other OECD governments	2,001	3,660
Mortgage-backed securities	26	36
Other interest-earning securities	403	718
Subtotal	3,729	6,572
Total	121,287	119,749
Equity investments		
Available-for-sale	1,866	2,337
Designated at fair value through income	2,228	1,688
Subtotal	4,094	4,025
Total	125,381	123,774

Other interest-earning securities include investments in covered bonds. Income from debt and other fixed-income instruments is recognised using the effective interest method in interest income. Dividend income from other equity instruments is recognised in results from financial transactions.

17 Loans and receivables - banks

This item is comprised of amounts due from or deposited with banking institutions.

	2006	2005
Current accounts	9,473	5,479
Time deposits placed	15,396	11,613
Professional securities transactions ³³	105,969	87,281
Loans to banks	3,986	4,279
Subtotal	134,824	108,652
Allowances for impairment ¹⁹	(5)	(17)
Total	134,819	108,635

The movements during the year are mainly due to an increase in professional securities transactions in the UK.

18 Loans and receivables - customers

This item is comprised of amounts receivable, mainly regarding loans and mortgages balances with non-bank customers.

	2006	2005
Public sector	11,567	7,461
Commercial	180,262	152,411
Consumer	135,484	122,708
Professional securities transactions ³³	93,716	74,724
Multi-seller conduits	25,872	25,931
Subtotal	446,901	383,235
Allowances for impairment ¹⁹	(3,646)	(2,987)
Total	443,255	380,248

The increase year-on-year reflects the consolidation of Antonveneta, impact EUR 38 billion, and growth in the loan portfolio of BU Asia and BU Latin America.

The amount advanced held by multi-seller conduits is typically collateralised by a pool of customer receivables in excess of the amount advanced, such that credit risk is very low (see note 39). These conduits issue commercial paper as specified in note 26.

The risk management disclosures section on credit risk (see note 39) contains information about the concentration of credit risk by business sector and geographical location, as well as a breakdown of the amounts by type of collateral.

19 Loan impairment charges and allowances

	2006	2005
Balance at 1 January	3,004	3,177
Loan impairment and other credit risk provisions:		
New impairment allowances	2,563	1,409
Reversal of impairment allowances no longer required	(455)	(544)
Recoveries of amounts previously written off	(253)	(236)
Other credit related charges	-	6
Total loan impairment and other credit risk provisions	1,855	635
Amount recorded in interest income from unwinding of discounting	(62)	(32)
Currency translation differences	(56)	208
Amounts written off (net)	(1,136)	(1,070)
Disposals of businesses and discontinued operations	(70)	13
Reserve for unearned interest accrued on impaired loans	116	73
Balance at 31 December	3,651	3,004

All loans are assessed for potential impairment either individually and/or on a portfolio basis. The allowance for impairment is apportioned as follows:

	2006	2005
Commercial loans	2,344	2,146
Consumer loans	1,302	841
Loans to banks	5	17
Total	3,651	3,004

Loan provisioning-commercial loans

The Group reviews the status of credit facilities issued to commercial clients at least every 6 or 12 months. Additionally, credit

F-40

officers continually monitor the quality of the credit, the client and the adherence to contractual conditions. Should the quality of a loan or the borrower's financial position deteriorate to the extent that doubts arise over the borrower's ability to meet their contractual obligations, management of the relationship is transferred to the Financial Restructuring and Recovery function.

After making an assessment, Financial Restructuring and Recovery determines the amount, if any, of the specific allowances that should be made, after taking into account the value of collateral. We partly or fully release specific allowances when the debt is repaid or expected future cash flows improve due to positive changes in economic or financial circumstances.

Loan provisioning-consumer loan products

The bank offers a wide range of consumer loan products and programmes such as personal loans, home mortgages, credit cards and home improvement loans. Provisioning for these products is carried out on a portfolio basis, with a specific provision for each product being determined by the portfolio's size and loss experience.

Our consumer loan portfolio policy states that, in general, when interest or principal on a consumer loan is 90 days or more past due, such loans are classified as non-performing and as a result the loans are considered impaired.

Provisions for a given portfolio may be released where there is improvement in the quality of the portfolio. For consumer loans, our write-off rules are time-based and vary by type of product. For example, unsecured facilities, such as credit cards and personal loans, are generally written off at 180 days past due and cash-backed and debt and/or equity-backed facilities are generally written off at 90 days past due.

Allowance for incurred but not identified losses

In addition to impairment allowances calculated on a specific or portfolio basis, the Group also maintains an allowance to cover undetected impairments existing within loans due to delays in obtaining information that would indicate that losses exist at the balance sheet date.

20 Equity accounted investments

	2006	2005
Banking institutions	1,436	2,885
Other investments	91	108
Total	1,527	2,993
Balance at 1 January	2,993	1,428
Movements:		
Purchases	194	1,554
Sales/reclassifications	(1,833)	(265)
Share in results of equity accounted investments	243	263
Dividends received from equity accounted investments	(72)	(63)
Currency translation differences	(43)	31
Other	45	45
Balance at 31 December	1,527	2,993

In this balance an 8.6% interest in Capitalia is included. ABN AMRO equity accounts for this interest because ABN AMRO is the largest party of a shareholder pact and has representation in the Supervisory Board.

Reclassifications mainly relate to Antonveneta, which became a consolidated operating entity as of 2 January 2006.

Purchases in 2005 include our increased stake in Antonveneta. During 2005 our investment in Kereskedelmi és Hitelbank Rt. was reclassified to available-for-sale assets upon the loss of significant influence, prior to being sold in 2006.

Included in the Group's cash flow hedging and available-for-sale reserve is EUR 53 million (2005: EUR 95 million) of unrealised gains relating to equity accounted investments.

Investments with a book value of EUR 875 million (2005: EUR 2,345 million) that are traded on a recognised stock exchange had a combined market value of EUR 1,601 million (2005: EUR 3,399 million).

F-41

Amounts receivable from and payable to equity accounted investments included in the various balance sheet items totalled:

	2006	2005
Loans and receivables - banks	11	1,151
Loans and receivables - customers	212	495
Due to banks	61	138
Due to customers	258	246

The principal equity accounted investments of the Group on an aggregated basis (not adjusted for the Group's proportionate interest) have the following balance sheet and income statement totals:

	2006	2005
Total assets	155,000	192,927
Total liabilities	134,741	180,577
Total operating income	7,432	8,887
Profit before tax	2,355	1,524

21 Property and equipment

The book value of property and equipment in 2006 and 2005 changed as follows:

	Property			Total
	Used in operations	Other	Equipment	
Balance at 1 January 2006	3,340	2,979	1,791	8,110
Movements:				
Business combinations	1,010	98	215	1,323
Divestment of businesses	(269)	(2,846)	(171)	(3,286)
Additions	450	783	688	1,921
Disposals	(108)	(767)	(148)	(1,023)
Impairment losses	(17)	-	-	(17)
Depreciation	(203)	(4)	(551)	(758)

Divestment of businesses in 2006 mainly relates to development property of Bouwfonds.

As lessee

The Group leases equipment under a number of finance lease agreements. At 31 December 2006 the net carrying amount of leased equipment included in property and equipment was EUR 8 million (2005: EUR 23 million).

As lessor

The Group also leases out various assets, included in 'Other', under operating leases. Non-cancellable operating lease rentals are as follows:

	2006	2005
Less than one year	56	27
Between one and five years	140	100
More than five years	49	30
	245	157

During the year ended 31 December 2006, EUR 59 million (2005: EUR 60 million) was recognised as rental income in the income statement and EUR 48 million (2005: EUR 51 million) in respect of directly related expenses.

F-44

Business combinations

On 2 January 2006 the Group acquired Antonveneta, refer to note 2 for further details. The fair values of the identifiable assets and liabilities of Antonveneta as at 2 January 2006, and the goodwill arising on acquisition are as follows:

	Recognised on acquisition by the group	Carrying value Antonveneta
Intangible assets	1,233	848
Property and equipment	752	751
Financial assets	43,058	41,936
Deferred tax assets	958	736
All other assets	3,366	3,461
Total identifiable assets	49,367	47,732
Deferred tax liabilities	654	147
All other liabilities	45,463	44,487
Total identifiable liabilities	46,117	44,634
Total net assets	3,250	3,098
Purchase price (100%)	7,499	
Net assets	(3,250)	
Fair value adjustment of pre-existing 12.7% investment included in shareholders' equity	150	
Goodwill arising on acquisition of 100% outstanding shares	4,399	

Impairment testing of goodwill

Goodwill has been allocated for impairment testing purposes to individual cash-generating units within the business. The EUR 4,399 million of goodwill allocated to the Antonveneta cash-generating unit is the only significant individual carrying amount. The remaining goodwill is allocated across multiple cash-generating units whose recoverable amounts are assessed independently of one another.

The recoverable amount of Antonveneta has been determined based on a value in use basis, calculated using a discounted dividend model, which applies a dividend payout ratio to the cash flow of the business. Cash flows for an initial five-year period are based on financial forecasts used in target setting by management, in this case a two-year detailed forecast with subsequent three-year extrapolation. Beyond the initial five-year period a maximum dividend payout ratio, subject to the special features of the banking business and its regulatory environment has been applied to cash flows estimated with reference to the following key assumptions:

- Expected long term return on equity 18.0%
- Expected growth rate 1.5%.

Management has benchmarked these key assumptions against market forecasts and expectations. The dividend model is based on post-tax cash flows. Therefore these cash flows have been discounted using a post-tax discount rate of 8.5%, reflecting the risk-free interest rate with an appropriate market risk premium for the business.

Management believes that it may be reasonably possible that changes in the key assumptions would cause the carrying amount of the Antonveneta cash-generating unit to exceed its recoverable amount. The calculated recoverable amount of Antonveneta currently exceeds its carrying amount by EUR 126 million. The recoverable amount of Antonveneta would be equal to its carrying amount if the actual value of each key assumption, assuming the other assumptions

were constant, was as follows:

- Actual growth rate fell to 1.3%
- Actual return on equity fell to 17.7%, or
- Discount rate increased to 8.6%.

F-45

Other Intangibles

As a result of the acquisition of Antonveneta, the Group has recognised newly identifiable intangible assets as follows:

Core deposit intangible assets	400
Core overdraft intangible assets	224
Other customer relationship intangible assets	325
Other intangible assets	245
Total	1,194

The amortisation period for all newly identifiable intangible assets is on average approximately 8 years. The Group estimates that the total amortisation expense (pre-tax) related to the newly identifiable intangible assets amounts to EUR 174 million in each of the next two years up to and including 2008, and to EUR 142 million for 2009 and to EUR 135 million for each of the three years thereafter up to and including 2012.

23 Other assets

	2006	2005
Deferred tax assets ³⁰	3,479	2,682
Current tax assets	1,189	337
Derivatives assets used for hedging ³⁷	3,214	3,213
Mortgages originated for-sale	331	4,311
Unit-linked investments held for policyholder accounts	5,462	3,624
Pension assets ²⁸	145	119
Other assets of consolidated private equity holdings, including inventories	1,733	1,531
Sundry assets and other receivables	11,659	9,733
Total	27,212	25,550

Mortgages originated-for-sale and unit-linked investments held for policyholders are designated at fair value with changes through income. Mortgages originated-for-sale are originated by our mortgage banking business in North America. In the prior year, the volume of originated-for-sale loans was significantly higher due to the inclusion of those loans originated by ABN AMRO Mortgage Group, Inc., which is now classified as held for sale.

Sundry assets include insurance related deposits and other short-term receivables.

24 Due to banks

This item is comprised of amounts due to banking institutions, including central banks and multilateral development banks.

	2006	2005
Professional securities transactions ³³	87,762	71,231
Current accounts	20,273	23,573
Time deposits	70,127	63,836

Cash notes, savings certificates and bank certificates	5.6	2,269	4.2	2,657
Subtotal		175,766		144,580
Commercial paper issued by multi-seller conduits	5.0	26,280	3.4	26,039
Total		202,046		170,619

Bonds are issued in the capital markets with a focus on the euro market and are denominated mostly in euro and US dollars. The commercial paper programmes are issued globally with the majority issued in the United States and Europe. The other debt securities are instruments used in markets in which ABN AMRO is active and are usually denominated in local currencies. Of the total amount, EUR 75.3 billion (2005: EUR 60.6 billion) are variable interest bearing securities. EUR 20.1 billion (2005: EUR 16.5 billion) of issued debt of a fixed rate nature has been designated in fair value hedge relationships.

Issued debt securities in (currency):

	2006	2005
EUR	95,452	77,660
USD	84,308	75,243
Other	22,286	17,716
Total	202,046	170,619

Included in the balance above are various structured liabilities that have been designated at fair value through income due to the inclusion of embedded derivative features. These liabilities had a fair value at 31 December 2006 of EUR 2,540 million (2005: EUR 2,815 million) and an amortised cost value of EUR 2,661 million (2005: EUR 2,882 million).
