Breakthrough corn herbicide receives US EPA approval

- Step change in technology to address herbicide resistance challenges
- Launch this year with peak sales potential of more than \$250 million
- One of many compelling products in Syngenta’s \$3 billion crop protection pipeline

Syngenta announced today that it has received US EPA approval for its breakthrough corn herbicide, ACURON™. The first sales of the product to US growers will take place this year.

In the USA herbicide resistance, notably to glyphosate, is increasing with infestations of broadleaf weeds in corn up 50 percent in the past four years. ACURON has been shown to improve control of more than 70 weeds that are increasingly difficult for growers to manage, such as Palmer amaranth and Giant Ragweed.

ACURON incorporates bicyclopyrone, a novel chemical ingredient which is combined with three other active ingredients to target a wider range of weeds than any existing product. The four active ingredients and three modes of action in ACURON deliver a multi-targeted approach to weed control.

Davor Pisk, Chief Operating Officer, said: “As current herbicides such as glyphosate lose effectiveness, corn farmers have to spend considerably more per acre on crop protection. The most cost-effective solution is to use a high performing pre-emergent herbicide that stops weeds before they start. We’re delighted that we can now offer ACURON to US corn farmers. It sets a new standard for weed control and will be critical in helping farmers make corn production more sustainable.”

ACURON is a key component of Syngenta’s \$3 billion crop protection pipeline with peak sales potential of more than \$250 million.

Syngenta is one of the world's leading companies with more than 28,000 employees in over 90 countries dedicated to our purpose: Bringing plant potential to life. Through world-class science, global reach and commitment to our

customers we help to increase crop productivity, protect the environment and improve health and quality of life. For more information about us please go to www.syngenta.com.

Cautionary Statement Regarding Forward-Looking Statements

This document contains forward-looking statements, which can be identified by terminology such as 'expect', 'would', 'will', 'potential', 'plans', 'prospects', 'estimated', 'aiming', 'on track' and similar expressions. Such statements may be subject to risks and uncertainties that could cause the actual results to differ materially from these statements. We refer you to Syngenta's publicly available filings with the U.S. Securities and Exchange Commission for information about these and other risks and uncertainties. Syngenta assumes no obligation to update forward-looking statements to reflect actual results, changed assumptions or other factors. This document does not constitute, or form part of, any offer or invitation to sell or issue, or any solicitation of any offer, to purchase or subscribe for any ordinary shares in Syngenta AG, or Syngenta ADSs, nor shall it form the basis of, or be relied on in connection with, any contract there for.

In the US, Acuron is a Restricted Use Pesticide registered by the EPA.
