Exhibit 99

Press release issued November 7, 2006 in which the Registrant announced that assay results from seven additional holes drilled at Mitchell have expanded the known size of the gold-copper porphyry system and confirmed the continuity of grades that are consistent with successful gold-copper mines now in operation. The Mitchell deposit is located at the Registrant's 100% owned Kerr-Sulphurets project in British Columbia. Further drill results are expected in the next several weeks.
