Item 2.02 Results of Operations and Financial Condition

Item 9.01 Financial Statements and Exhibits

**Item 2.02 Results of Operations and Financial Condition**

On January 27, 2011, Kennametal Inc. (Kennametal or the Company) issued an earnings announcement for its fiscal second quarter ended December 31, 2010.

The press release contains certain non-generally accepted accounting principles (GAAP) financial measures. The following GAAP financial measures have been presented on an adjusted basis: gross profit, operating expense, operating income, Industrial operating income and margin, Infrastructure operating income and margin, net income (loss) and diluted earnings per share. Adjustments include: (1) restructuring and related charges for the three and six months ended December 31, 2010 and 2009, respectively, and (2) divestiture related charges for the three and six months ended December 31, 2009. Management adjusts for these items in measuring and compensating internal performance and to more readily compare the Company's financial performance period-to-period. The press release also contains free operating cash flow and adjusted return on invested capital (ROIC), which are both non-GAAP measures and are defined below.

Management believes that presentation of these non-GAAP financial measures provides useful information about the results of operations of the Company for the current and past periods. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

**Free Operating Cash Flow**

Free operating cash flow is a non-GAAP financial measure and is defined by the Company as cash provided by operations (which is the most directly comparable GAAP measure) less capital expenditures plus proceeds from disposals of fixed assets. Management considers free operating cash flow to be an important indicator of Kennametal's cash generating capability because it better represents cash generated from operations that can be used for dividends, debt repayment, strategic initiatives (such as acquisitions), and other investing and financing activities.

**Adjusted Return on Invested Capital**

Adjusted Return on Invested Capital is a non-GAAP financial measure and is defined by the Company as the previous 12 months' net income, adjusted for interest expense, noncontrolling interest expense and special items, divided by the sum of the previous five quarters average balances of debt and total equity. The most directly comparable GAAP measure is return on invested capital calculated utilizing GAAP net income. Management believes that this financial measure provides additional insight into the underlying capital structure and performance of the Company.

Management utilizes this non-GAAP measure in determining compensation and assessing the operations of the Company.

A copy of the Company's earnings announcement is furnished under Exhibit 99.1 attached hereto. Reconciliations of the above non-GAAP financial measures are included in the earnings announcement.

Additionally, during our quarterly earnings teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Accordingly, we have compiled below certain reconciliations as required by Regulation G. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Investors are cautioned that non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

**Debt to Capital**

Debt to capital is a non-GAAP financial measure and is defined by Kennametal as total debt divided by the sum of total shareowners' equity plus total debt. The most directly comparable GAAP measure is debt to equity, which is defined as total debt divided by shareowners' equity. Management believes that debt to capital provides additional insight into the underlying capital structuring and performance of the Company.

**DEBT TO CAPITAL (UNAUDITED)**

(in thousands, except percents)

	<b>December 31, 2010</b>	<b>June 30, 2010</b>
