NOTES TO PORTFOLIO OF INVESTMENTS September 30, 2007 (unaudited)*Note 1. Security Valuation*

Stocks are generally valued based upon closing sales prices reported on recognized securities exchanges. Stocks listed on the NASDAQ are valued using the NASDAQ Official Closing Price (NOCP). Generally, the NOCP will be the last sale price unless the reported trade for the stock is outside the range of the bid/ask price. In such cases, the NOCP will be normalized to the nearer of the bid or ask price. For listed securities having no sales reported and for unlisted securities, such securities will be valued based upon the last reported bid price.

As of the close of regular trading on the New York Stock Exchange (NYSE), securities traded primarily on security exchanges outside the United States are valued at the last sale price on such exchanges on the day of valuation, or if there is no sale on the day of valuation, at the last-reported bid price. If a security's price is available from more than one exchange, the Fund uses the exchange that is the primary market for the security. However, depending on the foreign market, closing prices may be up to 15 hours old when they are used to price the Fund's shares, and the Fund may determine that certain closing prices are unreliable. This determination will be based on review of a number of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. If the Fund determines that closing prices do not reflect the fair value of the securities, the Fund will adjust the previous closing prices in accordance with pricing procedures approved by the Board of Directors (the Board) to reflect what it believes to be the fair value of the securities as of the close of regular trading on the NYSE. The Fund may also fair value securities in other situations, for example, when a particular foreign market is closed but the Fund is open. For foreign equity securities, the Fund uses an outside pricing service to provide it with closing market prices and information used for adjusting those prices.

Short-term securities with 60 days or less to maturity are amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, are amortized to maturity based on the value determined on the 61st day.

Securities for which market quotations are not readily available or where a development/significant event occurs that may significantly impact the value of the security, are fair valued, as determined pursuant to procedures adopted in good faith by the Board.

Note 2. Federal Income Taxes

As of September 30, 2007, the amounts of aggregate unrealized gain (loss) and the cost of investment securities for federal income tax purposes, including short-term securities were as follows:

Cost (tax basis)	\$ 174,549,067
Appreciation	\$ 44,306,011
Depreciation	(2,605,561)
Net unrealized appreciation (depreciation)	\$ 41,700,450

Note 3. Other Information

The matter related to American International Group, Inc.'s (AIG) settlement with the Securities and Exchange Commission (the Commission) and other governmental authorities that was reported in recent shareholder reports has been resolved. With respect to such matter, in September 2007, the Commission issued a permanent exemptive order (the Order) pursuant to Section 9(c) of the Investment Company Act of 1940, as amended, to AIG and certain affiliated persons of AIG, including AIG SunAmerica Asset Management Corp (AIG SunAmerica). The Order permits AIG SunAmerica to continue to provide advisory services to the Fund. There has been no adverse impact to the Fund or the Fund's shareholders.
