MIDSOUTH BANCORP, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENT

1. Basis of Presentation

The accompanying unaudited consolidated financial statements and notes thereto contain all adjustments, consisting only of normal recurring adjustments, necessary to present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of the Company and its subsidiaries as of June 30, 2006 and the results of their operations and their cash flows for the periods presented. These consolidated financial statements should be read in conjunction with the annual consolidated financial statements and the notes thereto included in the Company's 2005 Annual Report and Form 10K.

The results of operations for the six month period ended June 30, 2006 are not necessarily indicative of the results to be expected for the entire year.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

Stock Compensation In December 2004, the FASB revised SFAS No. 123 (SFAS No. 123 (R)). SFAS 123 (R), *Share-Based Payment*, requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. SFAS No. 123 (R) is effective for periods beginning after December 15, 2005. The Company adopted the provisions of SFAS No. 123 (R) on January 1, 2006. For the three and six month period ended June 30, 2006, the required compensation expense totaled \$13,333. Prior period pro forma disclosure if provided in the table below:

Recent Accounting Pronouncements - In November 2005, FSP FAS 115-1 and FAS 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* was issued. The FSP addressed the determination as to when an investment is considered impaired, whether that impairment is other-than-temporary, and the measurement of an impairment loss. It also included accounting considerations subsequent to the recognition of an other-than-temporary impairment and provides guidance on proper disclosures regarding unrealized losses that have not been recognized as other-than-temporary impairments. The adoption of the FSP did not have an effect on earnings or stockholders' equity for the quarter ended June 30, 2006.

In February 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 155 *Accounting for Certain Hybrid Financial Instruments - an amendment of SFAS No. 133 and 140*. This statement provides entities with relief from having to separately determine the fair value of an embedded derivative that would otherwise be required to be bifurcated from its host contract in accordance with the requirements of SFAS 133. The effective date of this standard is for all financial instruments acquired, issued or subject to a remeasurement event occurring after the beginning of an entity's fiscal year that begins after September 15, 2006. The Company currently has no derivatives and therefore, SFAS No. 155 has no impact on the Company's current financial position or results of operations.

3. Declaration of Dividends

On May 17, 2006, the Company declared a \$.06 per share quarterly cash dividend for holders of record on June 12, 2006.

Table of Contents

Part 1. Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

MidSouth Bancorp, Inc. (the Company) is a two-bank holding company that conducts substantially all of its business through its wholly-owned subsidiary banks (the Banks), MidSouth Bank, N. A., headquartered in Lafayette, Louisiana and Lamar Bank, headquartered in Beaumont, Texas. The Company recently announced a name change for the Texas subsidiary from Lamar Bank to MidSouth Bank. The name change is expected to be executed during the fourth quarter of 2006. Following is management's discussion of factors that management believes are among those necessary for an understanding of the Company's financial statements. The discussion should be read in conjunction with the Company's consolidated financial statements and the notes thereto presented herein and with the financial statements, the notes thereto and related Management's Discussion & Analysis in the Company's 10-K for the year ended December 31, 2005.

Forward Looking Statements

The Private Securities Litigation Act of 1995 provides a safe harbor for disclosure of information about a company's anticipated future financial performance. This act protects a company from unwarranted litigation if actual results differ from management expectations. This management's discussion and analysis reflects management's current views and estimates of future economic circumstances, industry conditions, the Company's performance and financial results based on reasonable assumptions. A number of factors and uncertainties could cause actual results to differ materially from the anticipated results and expectations expressed in the discussion. These factors and uncertainties include, but are not limited to:

- changes in interest rates and market prices that could affect the net interest margin, asset valuation, and expense levels;

- changes in local economic and business conditions that could adversely affect customers and their ability to repay borrowings under agreed upon terms and/or adversely affect the value of the underlying collateral related to the borrowings;

- increased competition for deposits and loans which could affect rates and terms;

- changes in the levels of prepayments received on loans and investment securities that adversely affect the yield and value of the earning assets;

- a deviation in actual experience from the underlying assumptions used to determine and establish the Allowance for Loan Losses (ALL);

- changes in the availability of funds resulting from reduced liquidity or increased costs;

- the timing and impact of future acquisitions, the success or failure of integrating operations, and the ability to capitalize on growth opportunities upon entering new markets;

- the ability to acquire, operate and maintain effective and efficient operating systems;

- increased asset levels and changes in the composition of assets which would impact capital levels and regulatory capital ratios;

Table of Contents

loss of critical personnel and the challenge of hiring qualified personnel at reasonable compensation levels;
changes in government regulations applicable to financial holding companies and banking;
and acts of terrorism, weather, or other events beyond the Company's control.

Critical Accounting Policies

Certain critical accounting policies affect the more significant judgments and estimates used in the preparation of the consolidated financial statements. The Company's significant accounting policies are described in the notes to the consolidated financial statements included in Form 10-K for the year ended December 31, 2005. The accounting principles followed by the Company and the methods of applying these principles conform with accounting principles generally accepted in the United States of America (GAAP) and general banking practices. The Company's most critical accounting policy relates to its allowance for loan losses, which reflects the estimated losses resulting from the inability of its borrowers to make loan payments. If the financial condition of its borrowers were to deteriorate, resulting in an impairment of their ability to make payments, the Company's estimates would be updated and additional provisions for loan losses may be required. See Asset Quality . Another of the Company's critical accounting policies relates to its goodwill and intangible assets. Goodwill represents the excess of the purchase price over the fair value of net assets acquired. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets, goodwill is not amortized, but is evaluated for impairment annually. If the fair value of an asset exceeds the carrying amount of the asset, no charge to goodwill is made. If the carrying amount exceeds the fair value of the asset, goodwill will be adjusted through a charge to earnings.

Results of Operations

Second quarter 2006 earnings totaled \$2,235,754, an increase of \$195,501 from the \$2,040,253 earned in the second quarter of 2006. Basic earnings per share were \$.45 for the quarter ended June 30, 2006, compared to \$.42 per share reported for the second quarter of 2005. Diluted earnings per share were \$.44 for the second quarter of 2006 compared to \$.40 per share for the second quarter of 2005.

Earnings increased in the second quarter of 2006 in comparison to the second quarter of 2005 primarily due to the increase in net interest income of \$1.4 million which resulted from a 22.3% increase in average earning assets coupled with a 75 basis point improvement in the average yield on earning assets.

Return on average equity was 16.48% for the second quarter of 2006 compared to 16.26% for the second quarter of 2005. The leverage capital ratio was 8.32% at June 30, 2006 compared to 9.15% at June 30, 2005.

Net interest income totaled \$8,295,281 for the second quarter of 2006, up 21.0% from the \$6,856,992 reported for the second quarter of 2005. Net interest income increased primarily due to

Table of Contents

a \$126.4 million or 22.3% increase in the average volume of earning assets, including a 16.0% increase in average loan volume in quarterly comparison. The impact of increased interest income earnings from the higher volume of earning assets was partially offset by a \$94.7 million or 22.8% increase in the volume of interest-bearing deposits coupled with a 110 basis point increase in the average cost of interest-bearing deposits from 2.07% in the second quarter of 2005 to 3.17% in the second quarter of 2006.

For the first six months of 2006, the Company earned \$4,054,274, a 2.3% increase over the \$3,963,676 reported for the first six months of 2005. Basic earnings per share were \$.82 for the first half of 2006 versus \$.81 per share for the first half of 2005. Diluted earnings per share were \$.80 versus \$.78, respectively. The first six months of 2005 included a \$631,000 pre-tax special distribution of proceeds to the Company from the merger of Pulse EFT Association and Discover Financial Services, Inc. Additionally, the first six months of 2005 included a \$102,000 pre-tax write-down of a branch facility. Excluding the \$349,000 after-tax effect of these non-recurring transactions, the Company's year-to-date earnings for 2006 improved by \$439,000, or 12%, over 2005.

Total consolidated assets increased \$81.0 million or 11.6%, from \$698.8 million at December 31, 2005 to \$779.8 million at June 30, 2006. Total loans grew \$46.7 million or 10.5%, from \$442.8 million at December 31, 2005 to \$489.5 million at June 30, 2006, primarily in commercial, construction, and real estate credits. Total deposits grew \$79.2 million or 12.7%, from \$624.9 million at December 31, 2005 to \$704.1 million at June 30, 2006. Of the \$79.2 million growth in deposits, \$70.8 million was in interest bearing deposits, primarily in Platinum money market and checking accounts. The Platinum money market and checking accounts offer competitive rates of interest that adjust to changes in market rates. Additionally, the core non-interest bearing deposits have continued to grow and approximate 26.5% of total deposits at June 30, 2006. The strong deposit growth in the second quarter of 2006 is attributed to new retail branch offices and to increased government and corporate spending due to rebuilding efforts in the Company's markets.

Nonperforming assets, including loans 90 days or more past due, totaled \$2.7 million at June 30, 2006 compared to \$2.3 million at June 30, 2005 and \$3.4 million at December 31, 2005. The increase of \$.4 million in the second quarter of 2006 as compared to the second quarter of 2005 resulted primarily from an increase in loans past due 90 days and over, partially offset by decreases in nonaccrual loans, other real estate owned and other foreclosed assets in quarterly comparison. Included in the loans past due 90 days and over is approximately \$1.6 million in government-guaranteed loans, which are expected to be paid in full or returned to a current status within the next quarter.

As a percentage of total assets, nonperforming assets decreased to .35% at June 30, 2006, down from .36% at June 30, 2005 and down from .49% at December 31, 2005. Charge-off volume decreased with net charge-offs to total loans at .02% compared to .05% and .11% for the same periods, respectively.

Earnings Analysis

Table of Contents**Net Interest Income**

The primary source of earnings for the Company is the difference between interest earned on loans and investments (earning assets) and interest paid on deposits and other liabilities (interest-bearing liabilities). Changes in the volume and mix of earning assets and interest-bearing liabilities combined with changes in market rates of interest greatly affect net interest income.

The Company's net interest margin on a taxable-equivalent basis, which is net income as a percentage of average earning assets, was 5.00% at June 30, 2006, down 4 basis points from 5.04% at June 30, 2005. Tables 1 through 4 following this discussion analyze the changes in taxable-equivalent net interest income for the two quarters ended and two six months periods ended June 30, 2006 and 2005.

Average earning assets increased \$126.4 million or 22.3%, from \$566.5 million in June 2005 to \$692.9 million in June 2006. The average yield on earning assets improved 75 basis points, from 6.80% at June 30, 2005 to 7.55% at June 30, 2006, but the mix of average earning assets shifted from 70.9% in average loans to total average earning assets in the second quarter of 2005 to 67.3% in the second quarter of 2006. The shift occurred as strong deposit growth exceeded loan funding and excess deposit dollars were invested in short term investments and federal funds sold.

The impact of the change in asset mix was offset by an increase in loan yields of 107 basis points, from 7.81% for the quarter ended June 30, 2005 to 8.88% for the quarter ended June 30, 2006, and a 42 basis point increase in the average taxable-equivalent yield on investment securities, from 4.36% to 4.78%, respectively. The average volume of investment securities increased \$43.5 million, from \$159.1 million at June 30, 2005 to \$202.6 million at June 30, 2006. The average volume of federal funds sold increased \$18.3 million, from \$5.7 million in June 2005 to \$24.0 million at June 2006, primarily due to strong deposit growth.

The Company's strong core deposit mix reflected improvement in the average volume of non-interest bearing deposits from \$132.3 million or 24.2% of average total deposits at June 30, 2005 to \$175.2 million or 25.6% of average total deposits at June 30, 2006. The average volume of NOW, Money Market and Savings deposits increased \$86.6 million from \$302.2 million, or 55.2% of average total deposits at June 30, 2005 to \$388.8 million or 56.8% of average total deposits at June 30, 2006. The average volume of Certificates of Deposit (CD s) increased \$8.1 million, from \$112.8 million at June 30, 2005 to \$120.9 million at June 30, 2006 and represented 20.6% of total deposits at June 30, 2005 compared to 17.6% at June 30, 2006. Most of the Company's deposit growth was in its Platinum Money Market and Platinum Checking accounts, which offer a competitive yield that adjusts weekly to market rates and support the Company's retail strategy of developing long-term banking relationships with depositors. The competitive yield on the Platinum accounts contributed greatly to the 110 basis point increase in the average rate paid on total interest-bearing deposits between the two quarters compared. The average yield on all interest-bearing deposits increased from 2.07% at June 30, 2005 to 3.17% at June 30, 2006.

Table of Contents

The average rate paid on the Company's junior subordinated debentures increased 99 basis points from second quarter 2005 to second quarter 2006 due to increases in the floating rate paid on the \$8.2 million of such debentures issued in the third quarter of 2004 to partially fund the Lamar acquisition. The debentures carry a floating rate equal to the 3-month LIBOR plus 2.50%, adjustable and payable quarterly. The rate at June 30, 2006 was 7.91%. The debentures mature on September 20, 2034 and, under certain circumstances, are subject to repayment on September 20, 2009 or thereafter. In February 2001, the Company issued \$7,217,000 of junior subordinated debentures. The debentures carry a fixed interest rate of 10.20% and mature on February 22, 2031.

The impact of the changes in yield and volume of the earning assets and interest-bearing liabilities discussed above resulted in an increase of \$1.5 million to taxable-equivalent net interest income from June 30, 2005 to June 30, 2006. Net interest income, on a taxable-equivalent basis, increased \$2.5 million for the six-month period ended June 30, 2006, from \$13.8 million at June 30, 2005 to \$16.3 million at June 30, 2006. During the same period, average earning assets increased \$109.8 million or 19.5%, from \$561.9 million in 2005 to \$671.7 million in 2006. The average yield on earning assets improved 68 basis points in six-month comparison, from 6.64% at June 30, 2005 to 7.32% at June 30, 2006. The volume of total interest-bearing liabilities increased \$71.2 million or 16.3%, from \$436.0 million for the six months ended June 30, 2005 to \$507.2 million for the six months ended June 30, 2006. The average yield on total interest-bearing liabilities increased 102 basis points in the same period, from 2.17% to 3.19%.

The impact of the changes in yield and volume of the earning assets and interest-bearing liabilities for the six months ended June 30, 2006 compared to the six months ended June 30, 2005 resulted in an increase of \$2.5 million to taxable-equivalent net interest income.

Table of Contents**Non-interest Income****Excluding Securities Transactions**

The Company's primary source of non-interest income is services charges and fees on deposit accounts, which include insufficient funds (NSF) fees. Income from Service charges on deposit accounts decreased from June 2005 to June 2006 in three and six months comparison by \$24,549 and \$225,665 respectively. The decrease resulted primarily due a decrease in NSF fees attributed to higher average balances in demand deposit accounts and lower NSF activity. Income from other charges and fees decreased \$79,257 for the three months ended June 30, 2006 as compared to June 30, 2005 primarily due to the \$99,000 PULSE distribution included in 2005 and a \$65,983 decrease in third-party mortgage origination fees. Quarterly decreases recorded in the other non-interest income categories were partially offset by a \$137,430 increase in debit card and ATM fee income. For the six months ended June 30, 2006, income from other charges and fees decreased \$460,488 as compared to the six months ended June 30, 2005, primarily due to the \$631,000 special distribution from Pulse included in 2005 income. Additionally, income from third-party mortgage originations decreased \$82,647. The decreases were partially offset by an increase of \$263,320 in debit card and ATM fee income in six months comparison.

Securities Transactions

The Company recorded no gains or losses on sales of securities for the first six months of 2006. During the first six months of 2005, both MidSouth Bank and Lamar Bank sold mutual funds held in the securities portfolios. MidSouth Bank sold a \$1.0 million mutual fund at a loss of \$30,706 and Lamar Bank sold \$8.3 million in a GNMA mutual fund for a gain of \$31,091.

Non-interest Expense

Non-interest expense increased \$882,302 in quarterly comparison and \$1,425,165 in year-to-date comparison, primarily in salaries and employee benefit costs and occupancy expenses related to the new retail branches added in 2006. Salaries and benefit costs increased \$631,891 in quarter-to-date comparison and \$1,214,890 in year-to-date comparison due to the addition of 44 full-time equivalent employees, from 305 at June 30, 2005 to 349 at June 30, 2006. Occupancy expenses increased \$294,635 and \$525,598 in quarterly and six months comparison, respectively, due to the added branches. Other expenses decreased \$44,224 and \$315,323 for the same periods, respectively, primarily due to quarterly and year-to-date decreases of \$85,022 and \$172,543, respectively, in amortization of intangibles.

Analysis of Statement of Condition

Consolidated assets totaled \$779.8 million at June 30, 2006, up \$81.0 million from \$698.8 million at December 31, 2005. The increase resulted primarily from growth in deposits of \$79.2 million of which \$8.3 million was in non-interest bearing balances. As stated under Results of Operations, the deposit growth is attributed to new retail branch offices and to increased

Table of Contents

government and corporate spending due to rebuilding efforts in the Company's markets. Additionally, the competitive market rates paid on the Company's Platinum accounts have contributed to deposit growth.

Cash flows from the increase in deposits funded \$46.7 million in loan growth for the first half of 2006. Loan growth was below projections, but is expected to improve with recent hires, new retail branches and good loan demand in the Company's markets. The loan growth occurred primarily in the Company's commercial portfolio, with increases also noted in construction loans and commercial real estate loans. The remaining cash flows from the deposit growth and a \$16.5 million decrease in federal funds sold funded a \$48.9 million increase in investment securities available-for-sale during the six months ended June 30, 2006. The Company invested primarily in tax-free municipal securities and in short-term agencies that offered some yield improvement over the rate earned on federal funds sold. The Company ended the second quarter of 2006 with a federal funds sold position of \$9.6 million at June 30, 2006.

Bank premises and equipment increased \$5.0 million for the first six months of 2006 and reflects the Company's continued branch expansion.

Liquidity

Liquidity is the availability of funds to meet contractual obligations as they become due and to fund operations. The Banks' primary liquidity needs involve their ability to accommodate customers' demands for deposit withdrawals as well as their requests for credit. Liquidity is deemed adequate when sufficient cash to meet these needs can be promptly raised at a reasonable cost to the Banks. Liquidity is provided primarily by three sources: a stable base of funding sources, an adequate level of assets that can be readily converted into cash, and borrowing lines with correspondent banks. The Banks' core deposits are their most stable and important source of funding. Further, the low variability of the core deposit base lessens the need for liquidity. Cash deposits at other banks, federal funds sold, principal payments received on loans and mortgage-backed securities, and maturities of investment securities provide additional primary sources of asset liquidity for the Banks. The Banks also have significant borrowing capacity with the FHLB of Dallas, Texas and borrowing lines with other correspondent banks.

At the parent company level, cash is needed primarily to meet interest payments on the junior subordinated debentures and pay dividends on common stock. An \$8.2 million issuance of junior subordinated debentures was completed on September 20, 2004, the proceeds of which were partially used to fund the Lamar Bancshares merger. The parent company previously issued \$7.2 million in junior subordinated debentures in February 2001. Dividends from the Banks primarily provide liquidity for the parent company. As a publicly traded company, the parent company also has the ability to issue additional trust preferred and other securities instruments to provide funds as needed for operations and future growth.

Table of Contents**Capital**

The Company and the Banks are required to maintain certain minimum capital levels. Risk-based capital requirements are intended to make regulatory capital more sensitive to the risk profile of an institution's assets. At June 30, 2006, the Company and the Banks were in compliance with statutory minimum capital requirements and were classified as well capitalized. Minimum capital requirements include a total risk-based capital ratio of 8.0%, with Tier 1 capital not less than 4.0%, and a leverage ratio (Tier 1 to total average adjusted assets) of 4.0% based upon the regulators latest composite rating of the institution. The Company's leverage ratio was 8.32%, Tier 1 capital to risk-weighted assets was 10.92% and total capital to risk-weighted assets was 11.77% at the end of the second quarter of 2006.

Asset Quality**Credit Risk Management**

The Company manages its credit risk by observing written, board approved policies which govern all underwriting activities. The risk management program requires that each individual loan officer review his or her portfolio on a quarterly basis and assign recommended credit ratings on each loan. These efforts are supplemented by independent reviews performed by the loan review officer and other validations performed by the internal audit department. The results of the reviews are reported directly to the Audit Committee of the Board of Directors. Additionally, bank concentrations are monitored and reported to the Board of Directors quarterly whereby individual customer and aggregate industry leverage, profitability, risk rating distributions, and liquidity are evaluated for each major standard industry classification segment.

Nonperforming Assets and Loans Past Due 90 Days and Over

The following table summarizes the Company's nonperforming assets and loans past due 90 days and over for the quarters ending June 30, 2006 and 2005 and for the year-ended December 31, 2005.

	Period Ended		%	Year

Net YTD charge-offs to total loans	0.02%	0.05%	-57.1%	0.11%

Nonperforming assets, including loans 90 days or more past due, totaled \$2.7 million at June 30, 2006, compared to \$2.3 million at June 30, 2005. As a percentage of total assets, nonperforming assets were .35% and .36% for June 30, 2006 and 2005, respectively. Included in nonperforming assets for June 30, 2006 is approximately \$1.6 million in government-guaranteed loans, which are expected to be paid in full or returned to a current status within the next quarter. The past-due status of the \$1.6 million in government-guaranteed loans is not related to Hurricanes Katrina and Rita. Net charge-offs to total loans decreased to .02% for the second quarter of 2006 compared to .05% for the second quarter of 2005. Allowance for loan loss provisions totaling \$300,000 were taken in the second quarter of 2006 compared to \$65,737 in the second quarter of 2005. As a percentage to total loans, the allowance for loan losses for the quarter ended June 30, 2006 and 2005 was 1.00% and .99%, respectively. The Company has not experienced an increase in delinquencies or charge-offs due to Hurricanes Katrina and Rita.

Specific reserves have been established in the ALL to cover probable losses on nonperforming assets. The ALL is analyzed quarterly and additional reserves, if needed, are allocated at that time. Factors considered in determining provisions include estimated losses in significant credits; known deterioration in concentrations of credit; historical loss experience; trends in nonperforming assets; volume, maturity and composition of the loan portfolio; off balance sheet credit risk; lending policies and control systems; national and local economic conditions; the experience, ability and depth of lending management and the results of examinations of the loan portfolio by regulatory agencies and others. The processes by which management determines the appropriate level of the allowance, and the corresponding provision for probable credit losses, involves considerable judgment; therefore, no assurance can be given that future losses will not vary from current estimates. Management believes the \$4,887,254 in the allowance as of June 30, 2006 is sufficient to cover probable losses in nonperforming assets and in the loan portfolio.

Impact of Inflation and Changing Prices

The consolidated financial statements of and notes thereto, presented herein, have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of the Company's operations. Unlike most industrial

Table of Contents

companies, nearly all the assets and liabilities of the Company are financial. As a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

Part I. Item 3. Qualitative and Quantitative Disclosures About Market Risk

In the normal course of conducting business, the Company is exposed to market risk, principally interest rate risk, through operation of its subsidiaries. Interest rate risk arises from market fluctuations in interest rates that affect cash flows, income, expense and values of financial instruments. The Asset/Liability Management Committee (ALCO) is responsible for managing the Company's interest rate risk position in compliance with policy approved by the Board of Directors.

There have been no significant changes from the information regarding market risk disclosed under the heading Interest Rate Sensitivity in the Company's Annual Report for the year ended December 31, 2005.

Part I. Item 4. Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the disclosure controls and procedures (as such term is defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). As of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date), the principal executive officer and principal financial officer have concluded that such disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

During the second quarter of 2006, there were no significant changes in the Company's internal controls over financial reporting that has materially affected, or is reasonably likely to affect, the Company's internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

The Banks have been named as a defendant in various legal actions arising from normal business activities in which damages of various amounts are claimed. While the amount, if any, of ultimate liability with respect to such matters cannot be currently determined, management believes, after consulting with legal counsel, that any such liability will not have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

Table of Contents**Item 1.A. Risk Factors** None**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table provides information with respect to purchases made by or on behalf of the Company or any affiliated purchaser, as defined in Securities Exchange Act Rule 10b-8(a)(3), of equity securities during the quarter ended June 30, 2006.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan ¹	Maximum Number of Shares That May Yet be Purchased Under the Plan ¹
April 2006	5,000	\$ 29.10	5,000	172,817
May 2006	591	\$ 29.36	591	172,226
June 2006				172,226

1 - Under a share repurchase program approved by the Company's Board of Directors on November 13, 2002, the Company can repurchase up to 5% of its common stock outstanding through open market or privately negotiated transactions. The repurchase program does not have an expiration date.

Item 3. Defaults Upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders

On May 17, 2006, the Company held its Annual Meeting of Shareholders to consider and act upon the election of Class I Directors C.R. Cloutier, J. B. Hargroder, M.D., and William M. Simmons. A total of 3,761,586 shares were voted in favor of the election for C. R. Cloutier, with 9,703 shares withheld from voting. A total of 3,760,201 shares were voted in favor of the election of J. B. Hargroder, M.D. with 11,088 shares withheld from voting. A total of 3,762,798 shares were voted in favor of the election of William M. Simmons with 8,491 shares withheld from voting.
