T-MOBILE USA REPORTS SECOND QUARTER 2004 RESULTS

- **1.092 million new net customers added in Q2 2004**
 - **New net customers totaled 2.27 million during the first half of 2004, up from 1.53 million for the first half of 2003**
 - **Customer base currently at 15.4 million, compared to 11.4 million mid year 2003, an increase of 4 million for the 12 months**
 - **\$717 million in Operating Income Before Depreciation and Amortization (OIBDA) in Q2 2004, up 46% from Q1 2004**
-

T-Mobile USA, Inc. ("T-Mobile USA") the U.S. operation of T-Mobile International AG & Co. KG ("T-Mobile International"), the mobile communications subsidiary of Deutsche Telekom AG ("Deutsche Telekom") (NYSE: DT), today announced second quarter 2004 results. All financial amounts are in USD and are based on accounting principles generally accepted in the United States ("GAAP") in order to provide comparability with the results of other U.S. wireless carriers. T-Mobile USA results are included in the consolidated results of Deutsche Telekom, but differ from the information contained herein as Deutsche Telekom reports its financial results in accordance with German generally accepted accounting principles.

In the second quarter of 2004, T-Mobile USA added 1,092,000 net customers, compared with 1,174,000 added in the first quarter of 2004 and 606,000 in the second quarter of 2003. About 86% of the growth in the second quarter of 2004 came from new postpay customers, which currently comprise 89% of the customer base.

"Strong customer growth in the second quarter continues to validate both the strength of the U.S. market overall and the value of T-Mobile's service proposition," said Robert Dotson, President and CEO of T-Mobile USA. "This is the third successive quarter we have added more than a million new customers. Our Get More promise continues to

deliver the best value in wireless, and is complemented with the nation's best customer service experience. T-Mobile was recently recognized by J.D. Powers in their "2004 Customer Care Performance Study" as having the highest satisfaction among all national carriers for customer service (see details below). This is a testament to our ability to operationally deliver on our promise to our customers. As a result of our ongoing focus on quality and reliability, T-Mobile USA captured almost 25% of the net customer additions posted by the six national carriers this quarter, and a 7.6% increase in our customer base."

"With 15.4 million customers, T-Mobile USA has now passed the milestone of 15 million customers a year ahead of the original target," said Rene Obermann, CEO of T-Mobile International and Member of the Board of Management, Deutsche Telekom. "But more importantly, the T-Mobile USA story is one of balancing subscriber growth with financial results, evidenced by a 46% sequential improvement in OIBDA and an OIBDA margin of 29% in Q2 2004."

T-Mobile USA reported OIBDA of \$717 million in the second quarter of 2004, up from \$492 million in the first quarter of 2004 and \$501 million in the second quarter of 2003. OIBDA margin (OIBDA divided by service revenues) was 29% in the second quarter of 2004, compared to 22% in the first quarter of 2004 and 28% in the second quarter of 2003. T-Mobile USA's net income for the second quarter of 2004 was \$240 million, improved from the \$157 million net loss in the first quarter of 2004 and \$130 million net loss in the second quarter of 2003.

This is the first quarter that T-Mobile USA has reported positive net income in its history.

T-Mobile USA service revenues, which consist of postpay, prepaid, and roaming and other service revenues, were \$2.46 billion in the second quarter of 2004, up from \$2.21 billion in the first quarter of 2004 and \$1.77 billion in the second quarter of 2003. In addition to high customer growth, the revenue increases in the current year reflect inclusion of two new components: Universal Service Fund ("USF") recovery fees and regulatory cost recovery fees. Both items are explained further in the footnotes.

ARPU (Average Revenue Per User, calculated by dividing total service revenues by average customers for the month) was \$55 in the second quarter of 2004, up from \$54 in the first quarter of 2004 and \$53 in the second quarter of 2003. The sequential improvement reflects a typical seasonal increase as well continued growth in revenue from data services, which now comprises 5% of postpay ARPU, compared to 4.5% in the first quarter of 2004. (After adjusting for USF and regulatory cost recovery fees, ARPU was the same in the second quarter 2003 as the second quarter of 2004.)

Postpay churn averaged 2.4% per month in the second quarter of 2004, down from 2.6% in the first quarter of 2004, and up from 2.3% in the second quarter of 2003. Blended churn, a mix of postpay and prepaid customers, was 2.8% in the second quarter of 2004, down from 3.0% in both the first quarter of 2004 and the second quarter of 2003. The sequential improvement in churn is primarily the result of a lower volume of postpay customers reaching their one-year service anniversary, the result of lower net customers additions in the second quarter of 2003.

The cost of acquiring a customer, Cost Per Gross Add ("CPGA"), was \$318 in the second quarter of 2004, down from \$326 in the first quarter of 2004, and down from \$332 in the second quarter of 2003. The sequential improvement in CPGA is primarily the result of reduced handset subsidy loss.

The cost of serving customers, Cash Cost Per User ("CCPU"), was \$23 per customer per month in the second quarter of 2004, level with first quarter of 2004 and second quarter of 2003. (After adjusting for USF fees, CCPU would have been \$1 higher in the second quarter of 2003 than in the second quarter of 2004.)

Capital expenditures were \$664 million in the second quarter of 2004, up from \$599 million in the first quarter of 2004 and \$402 million in the second quarter of 2003. These capital expenditure totals do not include our share of capital expenditures within the network operations venture with Cingular Wireless LLC ("Cingular") in New York, California and Nevada, which are reported as investments in and advances to unconsolidated affiliates. T-Mobile USA's share of expenditures in this venture were \$267 million in the second quarter of 2004, up from \$110 million in the first quarter. Overall, 2004 capital expenditures have been accelerated to provide benefits from quality and capacity improvements in the GSM/GPRS network early in the year. T-Mobile USA has, through the second quarter of 2004, added more than 1,900 new on air cell sites (including more than 250 sites in California and Nevada), and the current total number of on air cell sites exceeds 28,700.

In addition to the results prepared in accordance with GAAP provided throughout this press release, non-GAAP financial measures are also included. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information provided in accordance with GAAP.

Reconciliation from the non-GAAP financial measures to the most directly comparable GAAP financial measures is provided below following Selected Data and the financial statements.

Key Get More Highlights

Get More Service -- J.D. Power Ranks T-Mobile Tops for Customer Service

The results of the 2004 Customer Care Performance Study by J.D. Power and Associates in July 2004 ranked T-Mobile USA the highest among national carriers for customer service by a significant margin. This independent top ranking for T-Mobile made it clear when T-Mobile talks about offering "the best value in wireless" that means more minutes, more features and more service.

With one of the highest rates of new customer additions in the industry, T-Mobile sees quality customer service as a priority commitment to customers and as a significant differentiator in the marketplace.

The 2004 J.D. Power and Associates Customer Care Performance Study provides a detailed report card of wireless customer care performance, based on customer experiences with both the service representative and automated response system (ARS). Four key areas that impact overall carrier performance are factored to determine the customer care index. The key areas include service representative interaction, resolution contact frequency, ARS processing/navigation, and hold time duration.

Capital expenditures ⁶	664	599	547	407	402	378	1,734

Because all companies do not calculate these figures in the same manner, the information contained in this presentation may not be comparable to other similarly titled measures reported by other companies.

1 Our reported revenues include \$38 million in fees charged to our customers in the second quarter and \$36 million charged in the first quarter of 2004 and remitted under the Universal Services Fund ("USF") provision of the Telecommunications Act of 1996. We previously netted these amounts in our financial statements. Reporting such amounts separately as revenues and network operating expenses has no impact on our operating income (loss), OIBDA or net loss. Had we recorded USF fees separately as revenues and expenses in 2003, blended ARPU would have been approximately \$1 higher per quarter for the year.

Also, our revenues for the first and second quarters of 2004 include \$22 million and \$36 million, respectively, of regulatory cost recovery fees based on an \$0.86 per month charge we began including on customer bills during the first quarter. This additional revenue increased ARPU by approximately \$0.81 for the second quarter and \$0.55 for the first quarter of 2004.

2 The cost of serving customers, or Cash Cost Per User ("CCPU") is a non-GAAP financial measure and includes all network and general and administrative costs as well as the subsidy loss on equipment (handsets and accessories) sales unrelated to customer acquisition divided by the average total customers during the period. We believe that CCPU, which is a measure of the costs of serving

a customer, provides relevant and useful information to our investors and is used by our management to evaluate the operating performance of our consolidated operations. As noted above, our first and second quarter 2004 revenues and network operating expenses include \$36 and \$38 million, respectively, of USF fees. Inclusion of these fees in network operating expenses increased CCPU for the first and second quarters of 2004 by approximately \$0.90. Had we reported USF fees similarly in 2003, CCPU would have been approximately \$1 higher each quarter.

3 Cost Per Gross Add ("CPGA") is a non-GAAP financial measure and is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss on equipment (handsets and accessories) sales related to customer acquisition, divided by gross customers added during the quarter. We believe that CPGA, which is a measure of the cost of acquiring a customer, provides relevant and useful information to our investors and is used by our management to evaluate the operating performance of our consolidated operations.

4 Service revenues include post pay, prepaid, and roaming and other service revenues.

5 OIBDA is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. We previously used EBITDA, but have changed to OIBDA to be more consistent with industry practice. In a capital-intensive industry such as wireless telecommunications, we consider growth in OIBDA, as well as improvements in the associated percentage margin calculations, to be meaningful indicators of potential future profitability. OIBDA should not be construed as an alternative to operating net income (loss) or net loss as determined in accordance with GAAP, as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We also use OIBDA as an integral part of our internal reporting to evaluate the performance of our senior management. We believe that operating income (loss) is the financial measure calculated and presented in accordance with GAAP that is the most directly comparable to OIBDA.

6 Excludes our investment to fund capital expenditures in the network infrastructure venture with Cingular Wireless LLC ("Cingular"). We and Cingular share in the ownership and operation of the network in the New York City area, most of California and parts of Nevada. Network capital expenditures in these areas are shared between the parties. Our share of these capital expenditures is reflected as part of the accompanying Condensed Consolidated Balance Sheet and Condensed Consolidated Statement of Cash Flows in the line "Investments in and advances to unconsolidated affiliates."

About T-Mobile USA:

Based in Bellevue, WA, T-Mobile USA, Inc. is a member of the T-Mobile International group, the mobile telecommunications subsidiary of Deutsche Telekom AG (NYSE: DT). Effective December 31, 2003, Powertel, Inc. became a wholly-owned subsidiary of T-Mobile USA, thus the consolidated balance sheets and operating results of T-Mobile USA represent all the consolidated U.S. operations of T-Mobile International. All information contained in this press release reflects the combined results of T-Mobile USA and Powertel as if the companies had been combined historically.

T-Mobile USA operates the largest GSM/GPRS 1900 voice and data network in the United States, reaching over 250 million people including roaming and other agreements. In addition, T-Mobile USA operates the largest carrier-owned Wi-Fi (802.11b) wireless broadband (WLAN) network in the United States, available in more than 4,700 public access locations including Starbucks coffeehouses, Kinko's copy shops, Borders Books and Music, selected airports and American Airlines Admirals Clubs, United Red Carpet Clubs and Delta Air Lines Clubs. T-Mobile USA is committed to providing the best value in wireless service through its GET MORE promise to provide customers with more minutes, more features and more service. T-Mobile USA, Inc. and Powertel, Inc. are no longer required to file periodic reports with the SEC. For more information, visit the company website at <http://www.t-mobile.com/>.

About T-Mobile International:

T-Mobile International, one of Deutsche Telekom AG's four strategic divisions, is one of the world's leading international mobile communications providers. T-Mobile International's majority-held mobile companies today serve more than 65 million mobile customers in Europe and the U.S For more information about T-Mobile International, please visit <http://www.t-mobile.net/>.
