**BORGWARNER ANNOUNCES \$275 MILLION CONVERTIBLE SENIOR NOTE OFFERING**

*Auburn Hills, Michigan, April 6, 2009* BorgWarner Inc., a global supplier of highly engineered automotive systems and components, primarily for powertrain applications, today announced that it intends to offer and sell, subject to market and other conditions, approximately \$275 million in aggregate principal amount of convertible senior notes due 2012. BorgWarner also intends to grant to the underwriters of the notes an option to purchase up to an additional \$41.25 million aggregate principal amount of the notes within the 13-day period beginning on the date notes are first issued solely to cover over-allotments, if any. The offering of convertible senior notes is intended to increase BorgWarner's financial flexibility and strengthen its liquidity.

The notes will be general unsecured senior obligations of BorgWarner, will pay interest semi-annually at a fixed rate, and will be convertible at any time prior to the close of business on the second trading day preceding the maturity date. Upon conversion, holders of the notes will receive, at the election of BorgWarner, cash, shares of BorgWarner's common stock or a combination of cash and shares. Holders of the notes will have the right to require BorgWarner to repurchase for cash all or some of their notes upon the occurrence of certain events. The interest rate, conversion rate and other terms of the notes are to be determined by negotiations between BorgWarner and the underwriters.

In connection with the offering of the notes, BorgWarner expects to enter into convertible note hedge transactions with one or more of the underwriters of the notes or their respective affiliates (the hedge counterparties) and intends to use a portion of the net proceeds from the offering to pay for the convertible note hedge transactions. BorgWarner also expects to enter into separate warrant transactions with the hedge counterparties, which would result in additional proceeds to BorgWarner.

BorgWarner Inc. Announces Convertible Senior Note Offering 2

In connection with the convertible note hedge and warrant transactions, the hedge counterparties have advised BorgWarner that they or their affiliates may enter into various derivative transactions with respect to BorgWarner's common stock concurrently with or shortly after pricing of the notes. These transactions could have the effect of increasing or preventing a decline in the price of BorgWarner's common stock concurrently with or following the pricing of the notes. In addition, the hedge counterparties or their affiliates may from time to time, following the pricing of the notes, modify their respective hedge positions by entering into or unwinding various derivative transactions with respect to BorgWarner's common stock or by purchasing or selling BorgWarner's common stock in secondary market transactions during the term of the notes (and are likely to do so during any cash settlement averaging period related to the conversion of the notes). These activities could have the effect of decreasing the price of BorgWarner's common stock and could adversely affect the price of the notes during any cash settlement averaging period related to the conversion of the notes.

BorgWarner expects to use the net proceeds of the offering for general corporate purposes, including to repay short-term indebtedness, after applying a portion of the net proceeds for the cost of the convertible note hedges as offset by the proceeds of the warrant transactions, each as described above.

If the underwriters exercise their option to purchase additional notes, BorgWarner will use a portion of the net proceeds from the sale of the additional notes to increase ratably the number of shares underlying the convertible note hedge transactions and expects the hedge counterparties to increase ratably the number of shares underlying the warrant transactions, which would result in additional proceeds to BorgWarner. BorgWarner expects to use the remainder of the net proceeds from any sale of additional notes for general corporate purposes, including to repay short-term indebtedness.

In connection with the offering, Morgan Stanley, Merrill Lynch & Co., Citi and Deutsche Bank are acting as joint book-running managers.
