INCORPORATION BY REFERENCE

Sappi Limited's report for the conformed fourth quarter results ended September 2010, furnished by the Registrant under this Form 6-K, is incorporated by reference into (i) the Registration Statements on Form S-8 of the Registrant filed December 23, 1999, December 15, 2004 and February 2, 2010 in connection with The Sappi Limited Share Incentive Scheme, (ii) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme, (iii) the Registration Statements on Form S-8 of the Registrant filed December 15, 2004 and December 21, 2005 in connection with The Sappi Limited 2004 Performance Share Incentive Plan and (iv) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited 2004 Performance Share Incentive Plan. This Form 6-K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the documents referred to in clauses (i) - (iv) above.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the impact of the global economic downturn, the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclical nature, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed, changing regulatory requirements, unanticipated production disruptions (including as a result of planned or unexpected power outages), economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Commentary on the quarter

The group had a much improved performance for the quarter, achieving the highest quarterly operating profit excluding the plantation price fair value adjustment for a number of years and cash generated from operating and investing activities of US\$238 million. The performance of each of the businesses improved, particularly those of North America and Southern Africa which are net sellers of pulp and therefore benefited from high pulp prices.

Demand conditions continued to improve gradually and almost all our mills ran at full capacity for the quarter. In Europe, we implemented a price increase during September (the third since March) which has started to offset the effect of the substantial increase in pulp input costs experienced over the past year and to restore reasonable margins.

Sales increased to US\$1.8 billion, a 14% increase on sales in the equivalent quarter last year as a result of increased sales volumes and prices.

Average prices realised by the group were 3% higher than a year ago in US Dollar terms. In local currency, average prices increased by 11% in Europe, 8% in North America and, largely as a result of high pulp prices, 25% in South Africa.

Raw material input costs were up approximately US\$100 million compared to the equivalent quarter last year, mainly as a result of higher pulp prices.

The plantation price fair value adjustment was a gain of US\$29 million for the quarter.

Operating profit was US\$158 million for the quarter, a substantial improvement compared to a loss of US\$129 million in the equivalent quarter last year.

Earnings per share for the quarter were 16 US cents, compared to a loss of 20 US cents in the equivalent quarter last year.

Year ended September 2010 compared to year ended September 2009

2010 was a much improved year for Sappi. Sales for the year were 22% higher than the prior year as a result of improving demand, favourable currency movements and the inclusion of the coated paper businesses acquired from M-real for the full year in 2010 compared to 9 months in 2009.

Operating profit was US\$341 million compared to a loss of US\$73 million in the prior year.

The group generated a net profit of US\$66 million for the year and earnings per share of 13 US cents compared to a net loss of US\$177 million and a loss per share of 37 US cents last year.

fourth quarter

fourth quarter results

3

Cash flow and debt

Quarter

Cash generated from operating and investing activities was US\$238 million for the quarter reflecting improved cash generated by operations, and cash released from working capital of US\$181 million.

Year

Over the financial year, cash generated from operating and investing activities was US\$341 million.

At year end we had cash on hand of US\$792 million and had additional liquidity in the form of a

m
209 million (US\$282 million) committed revolving credit facility. During the year, we used approximately US\$250 million of our cash to repay debt early. Capital expenditure of US\$188 million for the year was in line with our target of US\$200 million.

The Fine Paper business achieved an operating profit of US\$87 million for the quarter, a substantial improvement compared to the equivalent quarter last year as a result of improved demand levels in our major markets and improving prices.

While the business performed significantly better during the quarter, it is not yet achieving an acceptable return which remains the top priority for the Sappi group.

The European business' coated paper shipments continued to grow in the quarter. Industry coated woodfree paper shipments increased by 7%, compared to the equivalent quarter last year including a significant increase in exports. Shipments of coated mechanical paper increased 13%, almost returning to the shipment volumes of the equivalent quarter in 2008 which was prior to the global crash.

A third coated woodfree price increase was implemented in September which, together with increases in April and June, is helping offset the effect of rapidly increasing pulp prices. There was a modest price increase for coated mechanical paper in July but the margins for our coated mechanical paper remain well below acceptable levels.

Our average price realised in Europe for the quarter was 11% above the equivalent quarter last year and 5% above those realised in the June 2010 quarter.

The North American business performed well, benefiting from its market positioning, competitive cost base, good performance from the specialities products and surplus pulp position with higher pulp pricing. Operating profit was lower than the equivalent quarter last year due to alternative fuel tax credits received in the quarter ended September 2009.

Demand levels improved further, with US industry shipments of coated woodfree paper increasing 9% compared to the equivalent quarter last year.

While price increases were implemented on selected coated paper grades during the quarter, the average price increase of 8% compared to the equivalent quarter last year was largely a result of pulp price increases.

During the quarter, we built our pulp inventory at Somerset mill in preparation for a pulp mill outage which commenced in October 2010. During the outage we upgraded the chemical recovery complex at the mill which is expected to significantly reduce energy costs and increase the proportion of renewable energy used at the Somerset mill to 89%.

During October, the U.S. International Trade Commission ruled to impose anti-dumping and countervailing duties on imported coated sheet paper from Indonesia and China. The duties which range from 25.2% to 313.8% are expected to re-establish a level playing field in the US.

The performance of the Southern African business improved significantly during the quarter. We reorganised the paper and packaging paper business during the quarter to provide a more effective customer interface and to share best operating practices among the mills.

The chemical cellulose business continued to achieve higher output from the expanded Saiccor Mill. Demand was very strong and prices increased further. The majority of our sales are linked to long-term contracts and we therefore did not realise the full benefit of the record spot prices in certain markets for chemical cellulose. These spot markets represent a small proportion of the total chemical cellulose market. Demand for packaging and fine paper products has improved in the domestic market but competition from imports has continued as a result of the strength of the Rand relative to the US dollar.

Directorate

During the quarter, it was announced that Mr H C Mamsch would be retiring from the board of directors at the end of December 2010, having served for seven years.

fourth quarter

fourth quarter results

7

Outlook

We expect continued gradual improvement in global economic conditions during the year ahead; however we remain cautious as a result of factors such as the volatility of exchange rates which could dampen growth.

Against that background, we expect demand for coated paper in our major markets to recover further during the year. We believe that input costs are likely to rise. We intend to reduce our costs where possible and to grow revenue through sales volume, mix and higher price levels to achieve acceptable margins across the businesses.

We expect continued strong demand and good price levels for chemical cellulose in the year ahead. The reorganisation of the paper business in Southern Africa is expected to help improve margins; however, the Rand is currently strong relative to the US dollar and remains volatile. A strengthening Rand would be unfavourable for the performance of the Southern African business.

The extended outage at Somerset pulp mill in October 2010 will reduce the potential profitability of our North American business for the quarter but we expect the pulp mill to start ramping up production in early November and for energy costs to be reduced once the rebuilt energy complex reaches optimum efficiencies.

With the expected improvement in the performance of our businesses and reduced uncertainty in financial markets we will gradually reduce our cash on hand with further repayment of debt. This, together with our targeted continued reduction in debt, will help reduce finance costs in the year ahead.

In our first financial quarter, we expect the group's operating profit, excluding asset impairments, impairment reversals, restructuring costs, costs associated with fire, flood, storm and related events as well as plantation price fair value adjustments, to continue the improving trend relative to the equivalent quarter last year.

Forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. The words 'believe', 'anticipate', 'expect', 'intend', 'estimate', 'plan', 'assume', 'positioned', 'will', 'may', 'should', 'risk' and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to, the impact of the global economic downturn, the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed, changing regulatory requirements, possible early termination of alternative fuel tax credits, unanticipated production disruptions (including as a result of planned or unexpected power outages), economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Notes to the group results

1. Basis of preparation

The condensed financial information has been prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board, the AC 500 standards issued by the Accounting Practices Board and the information required by IAS 34 “Interim Financial Reporting”. The report has been prepared using accounting policies that comply with IFRS which are consistent with those applied in the financial statements for the year ended September 2009, except for the adoption of IFRS 8 “Operating Segments”. The results are unaudited.

2. Adoption of IFRS 8 “Operating Segments”

The adoption of IFRS 8 “Operating Segments” did not have an impact on the group’s reported results or financial position.

IFRS 8 requires an entity to report financial and descriptive information about its reportable segments. Reportable segments are components of an entity for which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and assessing performance. Prior year segment disclosure has been restated as reflected in note 8.

(1)

In the third quarter of fiscal 2010 the group changed the estimates used to derive the prices of timber that are used to calculate the fair value of its plantations. The change impacts the estimate of the expected future cash flows that are used in calculating the present value of mature and immature timber except for the timber that is expected to be felled in the next twelve months from balance sheet date. Before the change, Sappi used period end spot prices to estimate the fair value of the above timber; the group now uses a twelve quarter rolling average price, as this reflects the fair value of the plantations more accurately.

(2)

IFRS 2 non-cash charges associated with Black Economic Empowerment transactions, the majority of which relates to the unwinding of the 2006 Black Economic Empowerment deal with the remaining charge relating to the issue of shares to employees and local communities.

7. Material balance sheet movements

Early repayment of interest-bearing borrowings

The North American Municipal Bonds of US\$106 million were repaid in March 2010 at par value.

An amount of US\$29 million of our 7.5% Guaranteed Notes due 2032 was repurchased in the open market early in the third quarter for US\$24 million.

An early repayment of the first instalment on a syndicated loan with Österreichische Kontrollbank of m80 million (US\$99 million), due in December 2010, was made in June 2010.

Transfers from assets held for sale and liabilities associated with assets held for sale

The Usutu pulp mill was permanently closed at the end of January 2010. The future of the site and plantations was discussed with potential investors and the Government of Swaziland. The disposal group consisting mainly of plantations had been classified as held for sale since December 2009. The Sappi board subsequently took a decision to continue with its forestry operations in Swaziland, and is investigating the establishment of various timber processing operations at the Usutu mill site. As a result, the assets are no longer classified as held for sale.

Reconciliation of operating profit excluding special items to operating profit (loss)

Special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash.
